Now, a few words on the importance of industry. From the very earliest times, the great men have extolled the value of industry: "Go to the ant thou sluggard, consider her ways, and be wise," has served for the text of many a powerful sermon; the expression that "genius is only an infinite capacity for work" has been endorsed by many thinkers. Napoleon said: "I have never found the limit of my capacity for work." In short, the men who have made their mark in the world have been at a loss for words to express themselves strongly enough on the subject. Don't be afraid of work and don't forget that "Folks

Linus Fenical.

who never do more than they are paid for, never get paid for more than they do." Let not the amount of pay be your main consideration; rather see how much and how well you can do the work; the real reward that life holds out for work is the increased capacity to do more and better work, and consequently greater satisfaction and enjoyment. The man who wants an indolent life is not fitted for a gardener. Many good men fail to do their best for want of courage, and faith in themselves, and from lack of energy and ambition; there are not so many failures from want of capacity, Herrick says: "The great man is not so great as folks think, nor the stupid man so stupid as he seems."

New Geranium Fenical.

See page 276.

The late Peter Henderson, a great gardener, close observer and successful business man, often said that he did not think there was so much difference in the mental capacity of men as in their courage, ambition and industry. Have faith in yourselves and loyalty to your employer. I am fond of the saying of Fra Elbertus: "If put to the point, an ounce of loyalty is worth a pound of cleverness." Don't be afraid to undertake all the time bigger things; your ability will grow in your earnest attempts to accomplish; and, don't be afraid of manual labor if occasion require; it will not lessen, but increase your mental power. A stiffening and strengthening of the spinal column begets no weakness of the mind: "A sound mind in a sound body." The immortal Lincoln split rails, and it was only recreation for Gladstone to cut down immense trees with an axe. The advantage of outdoor exercise is recognized everywhere. The orator in the English parliament exclaimed: "The battlefields of England were won on the cricket fields of Eton"; there was as much force in the rejoinder of the Irish member: "They were won on the bogs of Ireland."

One of the most encouraging points in gardening is the improvement in greenhouse architecture since the days of small glass and heating by brick flues. Many of the more ambitious structures of early date were failures for practical purposes; architecturally effective, they were frequently poorly heated and otherwise defective from a cultural standpoint. Thanks to frequent consultations in recent years between architects and advanced gardeners, the more modern houses have gained in appearance and are almost perfect in producing results.

The problem of compensation for gardeners is an interesting one; most gardeners think it is a poorly paid work and perhaps it is, considering how much has to be learned. I think, however, the money reward rests largely with the individual; there can be nothing like a uniform scale of wages. I had, for instance, paid my foreman about $1,200 per year, but I must say that one to whom I paid $2,000 was the most profitable one to me. I think, on the whole, the outlook for first class gardeners is good. Never in the history of nations has wealth increased so fast as in the United States during the past quarter of a century, and a majority of the wealthy men will, in the future, I venture to say, find their highest pleasure in developing their gardens and country estates.

On the fine old estates in England, France and Germany, no one is more respected, nor in closer, kindlier touch with the owner than the head gardener. As fast as men fit themselves in character, deportment and ability, this is coming to pass here; but, admitting that salaries might in some cases be justly increased, we must not forget that gardening has many advantages for those who are fond of it; it is the most healthful of all occupations; it is one of the fine arts. Ruskin has defined fine art as any in which the head, hand and heart work together. I cannot see why the gardener cannot take as much pleasure as the owner. "He who ad-

mires is the real possessor," "there is no ancient gentlemen, but gardeners."

"Give fools their gold and knaves their power
Let fortune's bubble rise and fall
Who sows a field, or trains a flower,
Or plants a tree, is more than all."

Linus Fenical.

Linus Fenical, of Middletown, Pa., the originator and grower of the beautiful geranium, Fenical, was born November 4, 1849, in Perry county, near Carlisle, Pa. The love of flowers was a passion with him from childhood; the desire to grow flowers grew with him. Fifteen years ago he started in business in his home town, and from a small beginning has established a fine trade. Seven years ago he started the growth of the geranium, Fenical, experimenting and improving, until he has it now to be the perfection of geraniums and ready for the market. By many in the trade, he is considered a leader among geranium growers, as his annual output numbers thousands of plants. He has a large glass area and grows all kinds of flowers and plants; but makes geraniums a specialty. Being a conscientious and painstaking grower, he has, before advertising this new variety, made ample preparations with a clean, healthy stock of thousands of plants, to fill all orders in a satisfactory manner.

The H. M. Hooker Co., Chicago.

The H. M. Hooker Co., the old established and well known paint and glass house of Chicago, is now comfortably established in its superb new fire proof building at 120 to 128 Washington boulevard. This building has been erected by the firm during the summer and fall expressly for its business and is probably the most perfectly adapted for the handling of this class of business of any building in the country. The building is of re-inforced concrete construction throughout, the outer walls only being of brick, six stories in height above basement, with a frontage of 120 feet on the boulevard, and a depth of 186 feet to Meridian street, this street in the rear affording most excellent loading and shipping facilities; these are supplemented by a court 20 feet in width extending along the entire west side of the building. The offices and show room front on the boulevard and are exceptionally light and pleasant. The building is equipped with one passenger and four freight elevators; these as well as all other machinery in the place are electrically operated from the firm's generating plant. The shops for the manufacture of mirrors, art glass windows, etc., are located on the sixth floor, and for light and equipment are probably unapproached anywhere in the world.

This house was established in Chicago by Fayette and Henry M. Hooker in 1855 at 56 W. Randolph street. The older brother died in 1868 and the following year the business was moved across the street to 57-59 W. Randolph street, into more commodious quarters. Additional buildings were erected from time to time as growth of trade made necessary. In 1889 the business was incorporated as H. M. Hooker Co. and has continued to grow year by year into one of the most important houses in its line in the west. The projected improvements of the Northwestern railroad forced the removal from its old location to make way for the new depot, and this forced removal has resulted in placing this well known house in new quarters, where its facilities for serving their very large clientage are greatly increased. For many years the firm has made a specialty of glass and other supplies for the florist trade.

CHRYSANTHEMUMS

Propagation.

If growing cut blooms for exhibition, it is not any too early to get the cuttings into the sand particularly the slow growing varieties and most of the foreign sorts that require a long season of growth. We expect that the strictly exhibition blooms and also the commercial varieties will both have a pretty good innings at the big show so plans should be laid accordingly. The vases calling for 100 blooms of the different colors are where the varieties that come under the commercial scale will play an important part, and, though it is a little early to start propagating many of the best of this section, it is not any too early to get the stocks into good condition. If they have been allowed to suffer from any neglect they should be placed where they can get ample light and air with a cool temperature to induce them to throw strong sturdy wood for cuttings. To obtain 100 blooms of one color and variety requires that a good size batch be planted to make a selection from. Intending exhibitors should make up their minds for a strong competition and act accordingly. Should the stock on hand be for any reason not up to expectations get in some extra so that it will be under control when needed. The cuttings of the exhibition and foreign varieties that require a long season of growth should be put in right away, selecting clean and healthy wood. The large Japanese varieties like F. S. Vallis, Wm. Wells, and D. V. West, the big fellows that count in a collection, are the ones to get after and not let up until they are on the exhibition tables. This is the only way to be successful. It seems a long season from now to November, but most of the largest varieties require every day to get them at their best. We may particularly note the variety Miss May Seddon; propagated at this time it

DESIGN BY LINDSAY THE FLORIST, BIRMINGHAM, ALA.
Heart of Roses, Carnations, Hyacinths, etc.

does not make more than three feet in height, being such a hard, woody grower, but it is there with the quality of bloom. Late propagation does not suit it at all. We would particularly impress intending exhibitors not to overlook the novelties and last year's importations. They are there with the size and are going to count.

C. W. JOHNSON.

OBITUARY.

John T. Borland.

John T. Borland died at his home in St. Johnsburg, Vt., January 20, of acute diabetes, following a short illness of about two weeks. Mr. Borland was born in Dundonald, Scotland, July 27, 1846. His knowledge of gardening and horticulture he acquired at Eglinton Castle, Scone Palace and other famous gardens. In 1868, at the age of 21, Mr. Borland came to New York and for a time was engaged as gardener at Ellerslie on the Hudson, the present country seat of Ex-Governor Morton of New York. Later he was employed at Cornwall on the Hudson and also in New Jersey and Massachusetts.

On April 10, 1872, at Haydenville, Mass., he was married to Miss Christina MacDonald and two years later they came to St. Johnsburg, and Mr. Borland took charge of the greenhouses and gardens at Underclyffe. Delighting in his occupation he gave it unstinted time and study and was a recognized authority in all branches of the work. Mr. Borland was a member of the North Congregational church for over 30 years. He was a member of the masonic fraternity belonging to the Blue lodge, Chapter and Palestine commandery. A charter member of the Scotia club and a past president, he was one of the Loyal Sons of Old Scotland, who knew and loved his Burns and his country's lore, and contributed much to the life of the organization. He is survived by his wife, two sons, two brothers and one sister. Interment was in Mount Pleasant cemetery.

Henry I. Rauss.

Henry I. Rauss, aged 49 years, died at his late residence, 220 Moran avenue, Detroit, Mich., February 25, after a lingering illness which terminated in a fatal stroke of apoplexy. He was a stepson of the late Albert Breitmeyer, for whom he worked for many years in the latter's greenhouse establishment. During recent years he was employed on Belle Isle where he held the position of greenhouse foreman. His associate workmen and the Detroit Florists' Club, of which he was a member, sent large floral designs to the funeral, which was held February 28. He is survived by his widow and several children as well as his aged mother and a brother, Chas. Rauss.

J. F. S.

F. Miller.

F. Miller, the senior member of Miller & Sons of Bracondale, Ont., died February 25, after a brief illness. Mr. Miller was well known to the trade both in Canada and the United States, where he made many friends when he exhibited the T. Eaton chrysanthemum, some years ago. Mr. Miller was a Mason, an Orangeman and prominent in politics. A widow and family of three sons and three daughters survive him. The funeral was largely attended and many floral tributes were sent by different friends and orders.

H. G. D.

PICKING the flowers from the century plant is advised as suitable occupation for a retired Pennsylvania sheriff.

FLORAL DESIGN ADOPTED BY THE KENTUCKY SOCIETY OF FLORISTS.
Executed by Jacob Schulz, Louisville.

To Be Done Now.

IN THE GREENHOUSES.

Prick out the seedling pansies on firm soil on a bench for flowering.

Take off dahlia cuttings regularly and do not allow them to get large and hollow.

Prick off seedling ferns before they get crowded in the flats where sown.

Look carefully after the seedling asters and see that insects are not allowed to get ahead or they will be ruined.

Thin the shoots on tuberous rooted begonias, gloxinias and others before they get crowded. It is useless allowing too many shoots.

Watch plants with yellow foliage or points. In most cases this is due to overfeeding or overwatering.

Keep bouvardias cool from the first to ensure a stocky growth and pinch them regularly.

Continue to propagate plenty of lobelias from cuttings.

Keep the atmosphere moist about the young rose plants in the morning by light spraying but let them dry off well before night.

IN THE STORE.

When customers want anything not in stock obtain it for them if possible. Even if only a little profit is made it holds the customer.

Make a good showy display of some flower that happens to be cheap and call attention to the fact by a neat sign or otherwise.

A few neat button-hole sprays shown on a suitable stand should help business along this line.

Lily of the valley is never so beautiful as when displayed upon its own foliage.

Asparagus Sprengeri and red carnations form an excellent combination.

Bronze galax leaves are very suitable as a setting to a wreath of yellow jonquils or other bulbous stock, especially yellow.

OUTDOORS.

Carefully protect the young growth shoots of Eremurus Himalaicus and others as soon as they appear above ground.

Push on with the preparation of the early border for vegetables when the weather is suitable.

Leave the rose pruning alone for a time. Haste here means loss later.

Use a wide board for standing on when it is necessary to get on wet cultivated soil for tree lifting or pruning. If the soil is trodden into a pasty condition it will work badly all summer.

Look over the herbaceous stock in frames on a mild day. Should any of the plants be drying out too much, moisten them early in the day and leave air on to dry up superfluous moisture.

Never plant dwarf rock and trailing plants in low, badly drained positions.

Cut down golden and other variegated elders where they are expected to make a show in summer and keep dwarf.

Use the hoe just as soon as it is possible to get on top of the soil to do so.

Philadelphia.

A very interesting tournament is being bowled in the club alley in Horticultural Hall. Dennis Connor holds high score for three games, making 610.

ST. PAUL, MINN.—E. P. Holm, O. J. Olson and S. D. Dysinger have incorporated their business under the name of Holm & Olson, Inc., authorized capital $75,000, the corporation to commence business March 1.

THE English carnation growers prefer Winsor spelled with a d—Windsor.

TAUSENDSCHON is said to be an excellent rose to force for Easter flowering.

TOADS are friends of roses, says Prof. Pharo Gagge, landscape artist at Columbus, O.

ENGLISH growers prophecy that kentias will be cheaper. But they don't say how soon.

GLASS prices still range rather low. The market this week is somewhat firmer, but very little.

AN extensive grower of cannas and dahlias says that he finds coal ashes an excellent medium for starting the roots.

MEMBERS of the executive of horticultural societies should read carefully the notice respecting affiliation from the secretary of the Chrysanthemum Society of America.

OUR Philadelphia correspondent says that there is considerable complaint of disease among Easter lily growers of that section, some of the crops showing up very badly.

THAT Bassett & Washburn, Chicago, have every confidence in their new carnation, O. P. Bassett, is best evidenced by the fact that they are propagating 50,000 for their own use next season.

CARNATION FLOWERS are in over-supply in the markets of many of the large cities just now; many large shipments come in and a rate as low as 50 and 60 cents per 100 has failed to clean up the stock in hand.

A CORRESPONDENT says: "Though there is nothing like a panic in the florist trade in New York it is noticeable that there is a general cutting down and curtailment of expenses, both among wholesalers and retailers."

TOULON, FRANCE.—J. Chevalier claims the invention of a new process for coloring immortelles, for which he proposes to erect a factory near Toulon for dyeing all the immortelles grown in the territory of Ollioules. He claims economy in cost under the new process.

MARCH 10 of an average year is said to be a reasonably safe date for shipping plants and bulbs by freight. Those who are in no great haste may wait a week later. This applies to that part of the country south of a line drawn from Boston through Chicago to Denver.

IT is quite evident that growers of Chicago and the vicinity are going to look to their laurels at the coming show of the American Rose Society, March 25-27. Preparations are active and the flowers promise well. But the competition from all parts will be very keen and they will need to be on their mettle to keep up their reputation.

ROSE CUTTINGS that have been in sand in preparation for shipment, but have never in fact been in soil, are not dutiable as "rose plants" under paragraph 252, tariff act of 1897, but as "cuttings of shrubs or plants, commonly known as nursery or greenhouse stock," under the same paragraph. This decision, adverse to the government, was arrived at in the circuit court of appeals, February 11, in the suit United States vs. American Express Co., being an appeal by the former against a decision of the board of general appraisers which sustained the importers' protest against the assessment at the port of Buffalo, N. Y.

MANY worn out farms in Virginia, it is stated, have been utilized for violet growing and the industry is rapidly spreading.

Chicago Rose Show Visitors.

Those who visit the exhibition and convention of the American Rose Society at Chicago, March 25-27, are cordially invited to have their letters and telegrams while in the convention city addressed care of the AMERICAN FLORIST, 324 Dearborn street.

Society of American Florists.

A meeting of the executive board of the Society of American Florists is called by order of President Traendly, to be held at the Prospect house, Niagara Falls, N. Y., at 9 a. m., March 23 next. The same is to continue on March 24 in case the business affairs of the Society are not concluded previously.

W. N. RUDD, Sec'y.

National Flower Show.

W. Wells of Merstham, England, offers for the National Flower Show in November next, a gold, silver and bronze medal for six blooms of Chrysanthemum W. M. Moir to be shown on stems 30 inches long. Notice of this offer having arrived too late to be included in the first edition of the premium list it is hereby given.

W. N. RUDD, Chairman.

Meetings Next Week.

Baltimore, March 9, 8 p. m.—Gardeners' Club of Baltimore, Exchange hall, St. Paul and Franklin streets.

Boston, Mass., March 14, 11 a. m.—Massachusetts Horticultural Society, Horticultural Hall, Lecture on "Development of Disease Resistant Varieties of Plants," by Prof. H. S. Jackson, Newark, Del.

Buffalo, N. Y., March 10, 8 p. m.—Buffalo Florists' Club, 383 Ellicott street.

Butte, Mont., March 13.—Montana Florists' Club, Columbia gardens.

Chicago, March 11.—Gardeners' and Florists' Union No. 10615, 10-12 Clark street.

Cincinnati, O., March 14, 8 p. m.—Cincinnati Florists' Society, Jabez Elliott Flower Market.

Cleveland, O., March 9, 7:30 p. m.—Cleveland Florists' Club, Progress hall, 2610 Detroit street.

Davenport, Ia., March 12.—Tri-City Florists' Club.

Denver, Col., March 13, 8 p. m.—Denver Floral Club, 323 Charles Block.

Hartford, Conn., March 13, 8 p. m.—The Connecticut Horticultural Society.

Madison, N. J., March 11, 7:30 p. m.—Morris County Gardeners' and Florists' Society, Masonic hall.

New Bedford, Mass., March 12.—New Bedford Florists' Club.

New London, Conn., March 11.—New London County Horticultural Society, Elks' hall.

New Orleans, La., March 8, 2 p. m.—Gardeners' Mutual Protective Association, 118 Exchange alley.

New York, March 9, 7:30 p. m.—New York Florists' Club, Murray Hill lyceum, Thirty-fourth street, between Third and Lexington avenues.

New York, March 11, 7:30 p. m.—Horticultural Society of New York, American Institute rooms.

Omaha, Neb., March 12, 8 p. m.—Omaha Florists' Club, City hall.

St. Louis, Mo., March 10-12.—St. Louis Horticultural Society, Odeon building, Grand and Finney avenues, spring exhibition.

St. Louis, Mo., March 12, 2 p. m.—St. Louis Florists' Club, Burlington building, Olive street.

Wants, For Sale, Etc

One Cent Per Word, Cash with Adv.

For Plant Advs., See Ready Reference Section.

Every paid subscriber to the AMERICAN FLORIST for the year 1908 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

Where answers are to be mailed from this office, enclose 10 cents extra to cover postage, etc.

Situation Wanted—A good decorator designer and manager, by March 15. Best of references. Key 440, care American Florist.

Situation Wanted—By florist with 15 years experience growing roses, carnations and general stock; age 30; please state wages. Key 455 care American Florist.

Situation Wanted—As foreman or assistant on good private place; good experience in cut flowers fruit and general stock. Address Box 744, Mamaroneck, N. Y.

Situation Wanted—As head gardener on first-class private place single, age 31, best of references; state full particulars and salary in letter Key 454, care American Florist.

Situation Wanted—As rose, carnation, 'mum and violet grower by youeg married man; no children; state wages; good reference. Address Key 457 care American Florist.

Situation Wanted—By A1 landscape gardener grower of all kinds of cut flowers and plants, nurseryand vegetable stock; 44 years of age; life-time experience, references. Key 448, care American Florist.

Situation Wanted—By orchid grower; 15 years' experience in first-class private and tradeestablishments in England; seedling growing a specialty; please state wages. Key 447. care American Florist.

Situation Wanted—Experienced florist foreman, grower fine roses, carnations 'mums; general all around, good designer, decorator; best wages expected. W. FOREMAN, care Station B., 18th St., Detroit, Mich.

Situation Wanted—As working foreman, first-class grower roses carnations, palms and ferns, bedding plants and forcing bulbs; 22 years' experience, strictly sober and honest; married. Key 441, care American Florist.

Situation Wanted—As foreman or manager of large commercial place where roses are grown as a specialty for cut flowers; experienced also in other lines; first class references J., care of The Nebraska Seed Co., 1613 Howard St., Omaha, Neb.

Situation Wanted—As head gardener on public place or private estate; also able to take full charge of commercial establishment; am a thoroughly competent grower, florist and landscape gardener; middle age, no family. Key 452, care American Florist.

Situation Wanted—By an energetic and honest florist; German, 26 years old, single; 12 years' experience in the growing of cut flowers and all commercial pot and bedding plants; have excellent European and English references; competent to take charge; retail or private place preferred; good wages and steady position expected Address Key 449, care American Florist.

Situation Wanted—Head gardener on a private place with first-class references, single, strictly sober, intelligent, good education 22 years' practical and theoretical experience in all kinds of indoor cut flowers palms ferns, fancy pot plants, also decorating, landscaping, carpet bedding and fruit and vegetable growing. Disengaged March 15 or later; good wages expected. Key 462, care American Florist.

Situation Wanted — As responsible florist; thoroughly understands the management of private estates; 12 years' experience in public institutions; life experience in greenhouse flowers and vegetables; first class carnation and rose grower; strictly temperate; Ameican; married, small family; best of references; state full particulars in first letter. Key 458 care American Florist.

Help Wanted—A good general greenhouse man give reference and state wages. WAGNER PARK CONSERVATORIES Sidney, O.

Help Wanted—Competent rose and carnation grower. Send full particulars at once. Key 464 care American Florist.

Help Wanted—First-class American Beauty grower; references required. UNITED STATES CUT FLOWER CO. Elmira, N. Y.

Help Wanted—Young man or lady to make up designs for store in Chicago; must have experience. Key 456, care American Florist.

Help Wanted—A good rose grower at $15 and one assistant at $12 per week. Position will be open March 15. WILLIAM DITTMANN, New Castle, Ind.

Help Wanted—A man to work in rose section, also two men for general greenhouse work; state wages without board. Address Key 340, care American Florist.

Help Wanted—Decorator and designer; one who has some knowledge of plants; single man preferred. References and wages in first letter. Address Key 410, care American Florist.

Help Wanted—An upright, sober young man, who has some knowledge in the culture of fruit and vegetables; state wages wanted with room and board. AUGUSTUS CASPERS, Rochelle, Ill.

Help Wanted—Young man assistant for general greenhouse work, must understand bedding out for a large public park; apply stating experience and references. JOHN THATCHER, Chester, West Virginia.

Help Wanted—A good grower of carnations and bedding plants; must understand his business; steady place for the right man; German preferred. Address R. O. LOMMATZSCH, R. F. D. No. 1, La Grange, Ill.

Help Wanted—Experienced gardener for private place; no greenhouse; must have knowledge of trees, shrubs and perennials; must be good worker; permanent position at $60.00 per month. MEHL & MUSKOPF, 23 Euclid Building, St. Louis, Mo.

Help Wanted—A young man with some experin rose growing and a good helper for general greenhouse work on a small place in southern Minnesota; steady work for the right man; wages $30 and board give references, nationality and other particulars in own handwriting. Key 463, care American Florist.

Help Wanted—By April 1, a working foreman, married, to take charge of 35,000 feet of glass, where roses, carnations, 'mums and a general line of bedding and pot plants are grown for retail store; must be capable of producing first class material and also fully able to handle men to best advantage. JOHN RECK & SON, Bridgeport, Conn.

For Rent—In one of the busiest sections of New York a very desirable room for a small flower shop and stand; rent very reasonable. Address, S. & S., care American Florist, 1133 Broadway, N. Y.

For Sale—A large florist refrigerator with mirrors and marble base at a bargain A. B. ELLSWORTH, 17 N. 6th St., Allentown, Pa.

For Sale—20,000 square feet of glass, well stocked; three acres of ground; six-room house; all modern, in good condition, and a money-making place in best city of Indiana; $4,500 required. Details to parties meaning business. Key 427, care American Florist.

For Sale—Nicely fitted up florist's store, ready for business; Seventy-fifth Street and Madison Avenue corner, New York city; lease one to five years; best private neighborhood in city; immediate possession. Inquire of American Florist, 1133 Broadway, New York.

For Sale—A retail florist business consisting of 4200 feet of glass well stocked, store building with living rooms above; on 2 lots 44x136 feet located in the heart of a residence city; county seat of 10,000 inhabitants less than 50 miles from Chicago with good surrounding towns. Address Key 434, care American Florist.

For Sale—A large modern and successful floral establishment, the oldest established in the city, carrying a complete line of cut flowers potted plants, seeds, poultry supplies, etc This place must be seen to be appreciated, and under proper management, is a money maker. Will be sold at a price that is right. For further information address C. EDWIN OYSTER, 507-8 Dollar Bank Bldg., Youngstown, Ohio.

For Rent or Sale.

7 greenhouses, well filled; doing a good business Purchaser buying the stock. For particulars see my adv. in this paper Feb. 22. W. H. HUMFELD FLORAL CO., Kansas City, Mo.

For Sale One tubular steam boiler, 60 horse-power, in excellent condition, price $150.00. One Kroeschell hot water boiler No 1, will heat 6000 ft glass. Used only three seasons, Price $100.00. Write GRASER & HUMPHREYS, Mt. Sterling, Ky.

To Growers.

We want a good grower of carnations and roses and will pay a good salary to the right man. We prefer one who has had some experience in the South, although this is not absolutely essential. State age and give full particulars of previous employment. Address

Key 460, care American Florist.

Store Man Wanted.

The advertiser wants a good man who can attend to general store work and decorating and also grow palms, ferns and like decorative stock. He must be an experienced packer of cut flowers for shipping. Give references and experience.

Key 459, care American Florist.

Wanted.

A man to grow lettuce, onions and celery for a stock company at Shiocton, Wis., for an assured market; house furished and good wages guaranteed to a hustler. Apply giving reference to JOHN TIPLADY, Lake Geneva, Wis.

Help Wanted.

Onion set grower wanted in the west. Will give right man good opening.

Key 453, care American Florist.

To Lease or For Sale

To first-class grower of Roses and Carnations **35,000 sq. feet of glass,** all new and modern doing a wholesale business. Local retailers buy everything grown. **A splendid opportunity** for competent grower and manager. Would sell a part interest to right man. Location, Indiana.

Address **Key 442, care American Florist.**

MANAGER WANTED.

Manager wanted for Dunlop's retail store in Toronto, Ontario. This store does the leading and best business in Toronto and and requires a man of the very best type who is thoroughly competent and up-to-date in decoration and designing. Apply with references to

HENRY WINNETT, The Arlington Hotel, NEW YORK CITY.

A Undeveloped Gold Mine at a Bargain,

A snap for a live practical florist having a small amount of cash capital; my greenhouse plant and residence is offered for the next 60 days at a sacrifice; it is well located in the best city of its size in Michigan, having 14 profitable tributary towns and only one other greenhouse within 30 miles; first-class cut flower and plant business. Write for particulars.

A. W. TWEEDIE, Cadillac, Mich.

Wanted....

First-class Store Man. Must be competent decorator and thoroughly capable designer. This is a good opening for the right party. With full particulars Address

Key 461, care American Florist;

J. Otto Thilow on his Travels.

At the meeting of the Florists' Club of Philadelphia March 3, J. Otto Thilow gave a long and interesting account of a month's trip to Europe, which was greatly enjoyed by those present. Mr. Thilow has the knack of telling in an entertaining manner his experiences and of the many cities he visited he managed to skim the cream of the noted places and bring away with him a good general idea of the customs and habits of the people as well as being able to describe fully the principal buildings and other sights. He speaks highly of the voyage across on the North German Lloyd steamer to Plymouth, England.

Arriving in London, naturally the travelers—for J. D. Eisele was his companion—first turned their thoughts to Kew, which Mr. Thilow describes as a perfect Eden. He speaks very highly of the botanical department there and describes the roses and dahlias, which were in bloom at the time of his visit in September, as clothed with a wealth of bloom. He also pays a high tribute to the excellent system of labeling trees, shrubs and other plants.

Ghent and Bruges, Belgium, he says, are highly interesting cities and he mentions them as the home of azaleas and bay trees, also of fields of tuberous begonias and large glass areas devoted to palm growing. In Germany the Palmen-garten of Frankfurt delighted our travelers and Mr. Thilow describes it as a vast glass structure covering some monster palms and a beautiful garden. The grounds, he says, were beautifully laid out and well broken up by groups of trees, shrubs and flower beds, which are kept in perfect condition throughout the growing season. Erfurt, the great seed growing center, is well described, also many other places of interest, and his description of a trip down the Rhine makes stay-at-homes envious. Mr. Thilow received and honestly deserved the hearty thanks of his audience for his excellent paper which, we regret, is too long to publish in detail.

Paper Very Satisfactory.

London.

Trade is improving at Covent Garden. The new pink Spirea Queen Alexandra from Rochford's is an acquisition and sells at about 85 cents each. Azaleas are cheaper. Cocos Weddelliana in 3-inch is worth $4.50 per dozen, good stock. Funkia variegata in 4-inch and 5-inch is a good selling line at $2 to $3.50 per dozen. All cut flowers are selling better, but greens such as asparagus and adiantum are scarce.

ROCKLAND, MASS.—Fifty thousand roses were used February 29, in the decorations at a rose ball given in the opera house. There were roses everywhere, thousands of them, and, shaded by a soft light, the interior was a dream of beauty.

New Crape Chasing Trick.

A Boston correspondent of the Music Trades contributes the following to that journal:

A piano salesman connected with one of the warerooms in Tremont street is coming in for some criticisms as a result of his probably well-meaning but rather ill-advised interest in securing flowers for the funeral of a prominent member of the trade who died recently. The salesman in question evidently has an interest, either friendly or financially, in a certain florist's establishment in the city, and it is his practice, it seems, whenever a member of the trade passes away, to immediately "tip off" his florist friend, who at once calls up many of the members of the piano and supply trades, as well as the heads of the various associations, and suggests that flowers be sent, and that the order be turned over to him.

Now, the heads of associations and individuals in the trade feel that they do not require hints and suggestions from florists in order that their kindly feelings toward the departed may be aroused to the extent of making floral offerings.

Miss Sipe on School Gardens.

"Where did the idea of school gardens begin?" "The idea of the home garden through the school was first adopted in Cleveland, I think," replied Miss Sipe. "Although as long ago as 1691 George Fox, an old Quaker, left a tract of land near Philadelphia for a playground for the children of the town to play on, and for a garden to plant with physical plants, for lads and lasses to know simples and to learn how to make oils and ointments.' Two hundred years later the first school garden in America was established on the grounds of the George Putnam school of Roxbury, Mass., by Henry Lincoln Clapp, its master. Our work in Washington has been imitated in the Whitechapel district of London upon the recommendation of a member of the London board of education. He visited a flower show held by the school children of Washington and was so much impressed with the value of the plan that at his suggestion the London teachers organized a home garden movement."

German Horticulture.

FROM THE GERMAN TRADE PAPERS.

TRADE CONDITIONS.—The business in trees, seeds, bulbs, plants and flowers for the first 10 months of the year 1907 is reported to have been exceedingly good. A decided falling off right after the most flourishing of Memorial day trades in plants and floral make-ups ever experienced, marks the beginning of a period of depression in all lines of business connected with the growing and disposal of horticultural products. Apprehension of hard times coming rather than actually felt so far at any time, are the real cause, it is believed, and the fairly brisk holiday business, having brought the only break in the monotony of dull inactivity since, gave ground to this belief and support to the hope, shared in by everybody, for a speedy betterment of conditions. Then, too, a great part of what caused the florists' business to assume a most erratic character throughout the latter half of last year is thought to be wholly attributable to the unusually wet and disagreeable weather experienced all last summer, which proved disastrous to many field crops and greatly curtailed at the same time the supply for the then exceptionally good demand. Although this was followed by an extremely fine autumn, matters were not markedly improved thereby. While it favored the ripening of seed crops and cultures generally, it also had the effect of over-stocking the market until away into winter with all sorts of open-air garden flowers; dahlias in best form, for instance, holding sway until the end of November. The first destructive frosts came late and brought but partial relief, since from that time on demand slackened perceptibly with a steadily increasing supply from the greenhouses. Plants in preference to cut flowers, it is stated, have had the call in late years.

A FIXED STANDARD TO RULE PRICES.—An attempt in good earnest is now being made by the united societies of German florists, engaged in active business, to establish a tariff of prices, to be recognized as binding to everyone in the trade. It is believed that by accomplishing this somewhat difficult feat great good would accrue, it being the only means presenting itself at this hour of need to check reckless competition, underselling and over-production, the bane of present day floriculture. A fixed minimum price to be asked for every description of service or article, rendered or sold by florists, including work done for patrons, the price of plants, cut material and made-up floral pieces, as also the lowest rate of wages or salaries paid to employes, from the helper and laborer up to the head gardener or store manager, is to be the basis of the standard.

BEGONIA MASTERPIECE.—Larger flowers on shapelier and more compactly built plants, a decidedly better form and greater vigor of growth, are said to distinguish the new begonia, Masterpiece, a sport of B. Gloire de Lorraine, from this, its illustrious prototype.

The man who has something to sell
Must not holler down a well,
For he will not collar the dollars
Like the man who climbs his tree and hollers.

TRADE BETTER.

Conditions throughout the city have vastly improved during the week and, with the exception of carnations, stock has moved along better. Bulbous stock, as expected, weighs heavily on the market and will continue to do so until the season is over, although there is a good demand for first class stock which seems to be scarce. Carnations are absolutely undesirable stock for which no terms are low enough to induce but the smallest purchase. In the face of a well filled rose market prices are strongly supported showing no signs of relaxation from the high standard set by the early winter.

MUSIC HALL EXHIBITION.

The growers of the Music Hall Market, the younger of the marketing corporations, exhibited a choice line of commercial products February 29. No prizes were offered and no competition was induced, the occasion being merely a public exhibition of the goods being handled daily by this market. Among the attractive displays were noticed a fine line of Ulrich Brunner roses by John McFarland, also a splendid vase of lily of the valley for which this able grower has become prominent. A. Roper's display of carnations was particularly prominent and occasioned much favorable comment. His Bay State and Fair Maid were the leaders in the carnation display, and were well supported by a varied collection of seedlings.

V. E. Small displayed an enviable line of Beacon. A. Bately was excellently represented by White Perfection, while D. Carmichael was prominently identified by his vase of mixed carnations. Lewis' Marlboro establishment showed Enchantress of the first quality and John Foote, Beacon. Robt. Montgomery showed a varied assortment of the season's roses, and H. F. Crawford an attractive vase of Perle. A splendid collection of violets from the plants of Dobbins & Shannon, John Newman, Alex. Porter, M. B. Dallache and M. Orr, easily ranked with the season's best. F. E. Hardy exhibited an excellent strain of antirrhinums of various shades. This display, though limited in size, was not lacking in quality and was the first of its kind, finished with the hope of a future exhibition on a scale befitting the growers identified with this corporation.

NOTES.

Wm. Nicholson, who for several seasons past has supplied so far as able the demand for shamrock for March 17, has taken unusual precautions this year to meet the trade. While but a small portion of his stock is consumed in the local market large shipments are made to sections all over the country.

Philip L. Carbone, the Boylston street retailer, has again started for Europe on a business trip which he expects to keep him occupied until Easter.

The Waban Rose Conservatories are now in excellent condition to meet the market with American Beauty roses.

Among the visitors to the market exhibitions were: Robt. Craig and Wm. P. Craig, Philadelphia; Harry May, Summit, N. J.; C. S. Stroud, Biddeford, Me.; H. A. Jahn, New Bedford; S. J. Reuter, Westerley, R. I.; G. L. Mahoney, Saco, Me.; H. H. Buxton, Nashua, N. H.

Exhibition of the Boston Flower Market.

The most successful exhibition ever held by the Boston Flower Market was that of February 29, at the famous Park Street Market, which for many years has been the headquarters of the leading growers of New England. A display that has never been equalled in this section of the country, outside of the noted exhibitions of the Massachusetts Horticultural Society, was viewed by thousands. The exhibition was strictly confined to commercial growers and was not advertised at all. A continuous swarm of enthusiastic lovers of flowers passed in and at times admission was almost impossible. A grand sight was the reward of the interested public, the one regret being the impossibility of displaying the superb collection to its best advantage. The market is poorly adapted for this sort of a display, but it was the unanimous desire of the committee in charge to confine the show to the spot which is daily used in disposing of the products.

Roses, carnations, violets, sweet peas, lily of the valley and a limitless collection of bulb products, plants and oddities, all combined in a most interesting collection, each branch of which claimed its host of admirers. The carnation display was the most extensive. In this department S. J. Goddard of Framingham swept everything before him and presented a most unusual assortment of varieties, new and standard. In totalling up his awards Mr. Goddard carried off six first prizes and seven seconds, a record which undoubtedly will stand for a long while. For the best vase of 100 carnations of one variety, a difficult matter, was the choice for the prize. White Perfection and Afterglow were very evenly matched; the former was the winner. This carnation was shown to splendid advantage and a product of the famous establishment of Peter Fisher. Afterglow was shown in prime condition and the display was a very creditable product of the renowned house of Wm. Nicholson. For the best vase of 100 mixed the competition was again very keen, the first prize being awarded to S. J. Goddard with the second honors falling to Pierce Bros.

The F. R. Pierson Co.'s cup for the best Winsor was won by Peter Fisher, with Pierce Bros. a close second. The A. H. Hews Co.'s cup for the best collection of six varieties of 50 blooms each was won by Peter Fisher with a matchless display. The rivals of dark reds were Harry Fenn and Octoroon, the former was adjudged the leader. Helen

PETER REINBERG, 51 Wabash Ave., CHICAGO.

Largest Grower in the World. 1,580,000 Feet of Glass.

Goddard outranked its competitors in the deep pink class, the time worn Lawson being next in order, and but a poor resemblance of the most famous carnation ever grown. Enchantress was a consistent winner in the light pink class, gaining the laurels from a commendable exhibit of Winsor. The class for variegated varieties was only a meagre display of Mrs. Patten and Lawson.

The local rose growers rather astonished the public with their superb though limited collection of superior goods. Combined with the local attractions, two new favorites were exhibited by visitors. An excellent display of Mrs. Jardine was staged by the Robert Craig Co., Philadelphia, Pa., and met with popular commendation. On account of its widespread notoriety it was the center of great attention. The E. G. Hill Co., Richmond, Ind., showed its popular production, Rhea Reid. The honors of the rose exhibition were justly awarded to that expert producer, W. H. Elliott. He won the Wm. E. Doyle cup which he has won three times sucessively and now becomes its permanent owner. The displays of Killarney and Richmond were the admiration of all, the possibilities of both roses being plainly emphasized. Waban Rose Conservatories were the sole exhibitors of American Beauty and showed a very creditable product. Montrose Greenhouses were awarded first for Bridesmaid, and W. H. Elliott second. The old time and still popular rose, Safrano, was excellently staged by W. H. Elliott. Sweet peas as a commercial product were shown to perfection. Wm. Sim was the winner of the Zvolanek trophy with his Florence Denzer. He also won first in both white and pink exhibits. An unusual display of violets of all varieties was a difficult judging problem. H. F. Calder won first as expected for Campbell. The Imperial class was led by Paul Thompson, and the largest class, Princess, was accorded to Esty Bros. Wm. Sim captured the Wheeler trophy with a magnificent vase of his new origination, Boston. In competition for this variety he also won first. The judges were: S. J. Reuter, Thos. Roland, Elijah A. Wood and A. H. Fewkes. A complete list of awards follows:

CARNATIONS, CLASS A.

Dark red.—E. Winkler, Wakefield, first, with H. Fenn; S. J. Goddard, Framingham, second, with Octoroon.

Dark pink.—S. J. Goddard, first, with Helen Goddard; Pierce Bros., Waltham, second, with Lawson.

Light pink.—S. J. Goddard, first, with Enchantress; Peter Fisher, Ellis, second with Winsor.

Scarlet.—Peter Fisher, first, with Beacon; S. J. Goddard, second, with Victory.

White.—M. A. Patten & Co., Tewksbury, first, with White Perfection; S. J. Goddard, second, with the same variety.

Variegated.—Leonard Cousins, Concord Junction, first, with Variegated Lawson.

CLASS B.

Dark red.—S. J. Goddard, first, with H. Fenn; Littlefield & Wyman, North Abington, second, with Octoroon.

Dark pink.—Littlefield & Wyman, first, with Lawson; second, S. J. Goddard, with Helen Goddard.

Light pink.—Chas. S. Strout, Biddeford, Me., first, with Enchantress; Littlefield & Wyman, second, with Winsor.

Scarlet.—S. J. Goddard, first, with Victory; Littlefield & Wyman, second, with Robt. Craig.

White.—M. A. Patten & Co., first, with White Perfection; S. J. Goddard, second, with Lady Bountiful.

Variegated.—Pierce Bros., first, with Mrs. M. A. Patten; Backer & Co., Billerica, second, with Mrs. M. A. Patten.

Vase of 100 blooms mixed.—S. J. Goddard, first; Pierce Bros., second.

Vase 100, one variety.—Peter Fisher, first, with White Perfection.

Striped.—S. J. Goddard, first, with Priscilla; New Hampshire College, Durham, second.

SPECIALS.

A. H. Hews cup for six varieties, 50 flowers of each.—Peter Fisher, first.

F. R. Pierson cup for Winsor.—Peter Fisher, first; Pierce Bros., second.

Peter Fisher cup for Beacon.—S. J. Goddard, first; Chas. S. Strout, second.

ROSES.

American Beauty.—Waban Rose Conservatories, first.

Killarney.—W. H. Elliott, first.

Richmond.—W. H. Elliott, first; Waban Rose Conservatories, second.

Bridesmaid.—Montrose Greenhouses, first; W. H. Elliott, second.

Any other variety.—W. H. Elliott, first, with Safrano.

W. P. Craig was awarded a cup for Mrs. Jardine and W. H. Elliott for Killarney.

MISCELLANEOUS.

Collection of bulbous flowers.—Mann Bros., Randolph, first.

Lily of the valley.—H. M. Robinson & Co., first.

Mignonette.—Wm. Nicholson, Framingham, first.

Pansies.—W. C. Ward, Quincy, first.

Lilium speciosum.—F. T. White, Holbrook, first.

Sweet peas, white.—Wm. Sim, Cliftondale, first; H. M. Sanderson, Waltham, second.

Pink.—Wm. Sim, first; H. M. Sanderson, second.

Zvolanek trophy for sweet peas.—Wm. Sim.

Violets, 100 Campbell.—H. F. Calder, first; H. F. Wood, second.

One hundred Imperial.—Paul Thompson, first; H. M. Sanderson, second.

One hundred Princess.—Esty Bros., first; Wm. Sim, second.

Wheeler trophy.—Wm. Sim, for 200 Boston.

One hundred Boston.—Wm. Sim, first; H. F. Wood, second.

Collection of plants.—Mann Bros., first.

Prize for Music Hall Market growers.—Albert Batley & Sons, Maynard, first; Littlefield & Wyman, second.

A certificate of merit and special prize for excellence of culture was won by Geo. McAlpin, grower to W. H. Elliott.

John Marshall, Newport, R. I., was awarded a first class certificate for a red seedling carnation.

Backer & Co. received honorable mention for seedling carnation.

Unnamed seedlings, crimson, yellow and white, separate classes.—M. A. Patten & Co., first in each.

B.

Chicago.

MARKET MORE ACTIVE.

Clear weather and the prevailing low prices have brought in a more active demand. Mardi Gras created some little demand on Sunday and Monday, but orders were much smaller than usual and were so much scattered that this southern festival did not have the hoped for effect on the market. However, it does now appear as if the regular spring trade had opened in spite of the advent of Lent. Growers of American Beauty roses report that plants are now fast setting bud and that it will not be long before prices are down to their usual spring rates. Short-stemmed stock is not of very good quality, as it gets very little light or air, but medium and long-stemmed stock is very good for the time of year. Other roses are in sufficient supply to fill the requirements of the market. Carnations, which have been seen in such tremendous supply, seem now to be giving way somewhat, although not sufficiently to strengthen prices. Tulips, daffodils and lilies have all been affected by the spring weather and prices have materially weakened. Large quantities are being received and sold at low prices. Growers claim that less money has been realized this year than for several years. Prices for New York double violets have come to their lowest level, with little call for them. Asparagus sprays have been selling well, but other green material has not been selling as well as usual.

NOTES.

E. C. Amling is back in the harness again. He returned Sunday by way of Salt Lake City and Denver after spending six weeks in southern California. Most of that time he was within about 30 miles of Los Angeles and made frequent trips to that city. He says that at a time Enchantress carnations were here selling for $2 and $3 per 100. $4 was the price there for stock shipped from San Francisco. Carnations grown outdoors brought only $1.

Wm. Abrahamson, of E. H. Hunt's, returned from his regular winter trip. He notes as the peculiar feature of this year's business that a good trade exists in the small towns but a slight falling off has taken place in the large cities. This firm last week received its first shipment of tissue parchment, which was ordered nearly a year ago. This comes from Germany and is used by many florists in place of wax paper.

Anton Then and wife returned from Magnolia Springs, Ala., February 26, much benefited by the waters and in fine shape to plan the celebration of the twenty-fifth anniversary of his start in business, which occurs April 16. Anton is not worrying about the future supply of wild smilax after what he saw in the Alabama woods.

Aristocrat carnations are coming fine at J. A. Budlong's and on account of their larger flowers and more pleasing color are much more in demand than Lawson, although they are considerably higher in price. White Perfection is here justifying its name, being much preferred to other whites.

Geo. Hartung's greenhouses will hereafter be known as the Kensington Greenhouses and Nursery instead of Roseland. Mr. Hartung has put in two telephones both through the Pullman exchange and expects to be in with good stock for Easter.

Zech & Mann's growers are gradually coming into very heavy crops of Bride, Bridesmaid and Richmond roses. Albert Lies, who consigns his flowers to this firm, finds his Killarney a good seller and will grow more of it this coming season.

C. L. Washburn, of Bassett & Washburn, celebrated his fiftieth birthday February 27, and was well remembered by friends, business associates and employes. His son, E. B. Washburn, reaches his majority on March 5.

Thos. D. Long, manager, and Edward Houck, treasurer, of the Elitch-Long Greenhouses, of Denver, Col., spent Friday and Saturday of last week in this city, returning from New York and Philadelphia.

The supply houses note that quite an active demand has recently arisen for prepared sea moss. This is used to fill the bric-a-brac lying around the average store and frequently helps to sell a piece or two.

The sleet of Saturday night that coated every exposed surface in this city with ice caused quite a little damage to trees in the various parks. The box elders and cottonwoods suffered the most.

John T. Withers, the well known landscape architect of Jersey City, N. J., will deliver a lecture at the Academy of Sciences, Lincoln park, Saturday, March 7, at 8 p. m.

The Chicago University will build two greenhouses for its zoological department at Fifty-eighth street and Ellis avenue, 29x100 feet, as soon as the weather opens up.

Frank Farney, traveling salesman for the A. L. Randall Co., was in town for over Sunday and reports a very good demand for seasonable supplies.

Club meeting March 5 at the Union restaurant, 111 Randolph street, at 8 p. m. An unusually interesting meeting is expected.

The condition of A. I. Simmons, who is still ill at his home, is less favorable the past week.

The E. F. Winterson Co. is getting orange blossoms grown under glass at Belvidere.

A good crop of American Beauty roses is coming on at Peter Reinberg's.

Bassett & Washburn are daily making large cuts of Formosa lilies.

Herman Langville, gardener of Groveland park, died March 3.

Milwaukee.

TRADE FAIRLY GOOD.

During the past week carnations have been coming into the market in very heavy quantities with the result the prices have taken a tumble but at present writing it looks as if this condition will be only temporary. There are also more than enough violets. Other stock is all selling fairly well with exceptionally heavy calls for greens.

NOTES.

The florists certainly turned out in splendid manner for the club dance February 26. Over 75 couples were present and that takes in almost every florist in this vicinity. The committe in charge, consisting of Gus. Roesch, C. C. Pollworth and A. Leideger, worked hard to make this the biggest success that the Florists' Club ever had and they succeeded beyond expectations. The club will have another dance in May but a larger hall will be provided.

Gust. Pohl has commenced work on the new addition so as to have it ready for early planting.

John Rossow on the Green Bay road expects to add one new house for violets this coming summer.

Holton & Hunkel Co. have handled more wild smilax so far this season than in any other two previous years. They have just received another carload.

Heitman & Baerman are cutting some fine Empress narcissus. They are also coming on crop with carnations within the next week. H.

ALBERT LEA, MINN.—The active members of the Freeborn County Horticultural Society met at the city hall, February 21, to discuss several matters of importance, including the revision of the premium list.

St. Louis.

A BUSY WEEK.

The market the past week was a busy one, entertainments and weddings being crowded in before the Lenten season. Flowers were in abundance; even roses, which have been very scarce, have become plentiful and low prices on everything have prevailed. A great many short American Beauty roses are seen, in many instances of very poor color and quality. Sweet peas, short stems, are hard to sell and have to be quoted at low prices to move to any extent. Violets are plentiful and if warm weather continues, such as we have experienced the past two days, the supply will shorten up. Already the growers tell us the plants are producing big leaves and smaller blooms. Callas and Harrisii lilies have been abundant, in fact all bulbous flowers. Greens are scarcer. There was quite a demand for stock Monday, due to the Mardi Gras celebrations.

NOTES.

W. C. Smith & Co. are handling some very beautiful lavender sweet peas, which find ready sale. This firm has had heavy sales of wild smilax the past week.

The Burton-Allison Co. is disposing of large quantities of its green flower colorings, also yellow, blue and orange. The green is fine and the best seen here.

It is expected that the Florists' Club will assist the Horticultural Society materially in making its spring show at the Masonic Temple a success.

C. Young & Sons Co.'s windows are a mass of tulips of most beautiful varieties. They will have a fine supply of flowering plants for Easter.

J. F. Wilcox is shipping some good Bride and Bridesmaid roses to this market, also some good Lawson carnations.

Charlie Schoenle now wears a broad smile; his wife has recovered from her sickness, and is again at the store.

We are glad to announce that Mrs. Alex. Siegel is getting better and will shortly be out of the hospital.

The St. Louis Seed Co. will make an extensive exhibit at the spring flower show, March 10-12.

H. G. Berning is receiving some extra fine roses. W. F.

Detroit.

TOO MUCH BULBOUS STOCK.

The carnation glut continues and the unfortunate condition finds ventilation in the growers' censure of the wholesalers for not moving the product faster. The helpless commission men in turn charge much of the present carnation calamity to some of the extensive growers of bulbous stock who have this season more than ever before, loaded up heavily with this class of stock, which has to a large extent, usurped the position of the carnations and at a most inopportune time. The wholesalers aver that their repeated warnings annually given to the growers not to increase their plantings of bulbs have been as regularly ignored but it is now painfully apparent to all concerned that there is too much bulbous stock grown here to satisfy the local demand and next fall will see a considerable decrease in the importations. We have had another week of intensely cold weather which has not been conducive to favorable conditions for shopping, and retailers are as a consequence unable to report much if any improvement in trade over that of last week. The meagre increase that is noted is due almost entirely to that branch of the business which is now properly looked upon as the mainstay of the retailers—funeral work. Social events requiring the extensive use of flowers are still conspicuously scarce and the near approach of the Lenten season is a barrier to much prospect in that line.

NOTES.

Members of the Society of American Florists here are much pleased with the action of the Illinois State Florists' Association at its third annual meeting recently held at Springfield in regard to the statistics of the florist business. The association's resolution petitioning the parent society to take this matter up at its next annual convention will in all probability be acted upon at the Niagara Falls meeting. President Philip Breitmeyer urgently suggested this measure in his annual address to the convention held in St. Louis, August, 1904.

All report a fairly good trade the past week. While there have been no large funerals, parties just before Lent have kept most of them busy.

NOTES.

Miss Mamie Doran, who recently went to California to accept a position as special saleslady in the floral department of a large department store, reports being delighted with the country and is enthusiastic in her description of the delightful climate.

The Alpha Floral Co. had a beautiful display in both their large show windows fronting on Walnut and Seventh streets, having a large variety of roses, among them being Killarney and Mrs. Potter Palmer, besides a large assortment of other stock.

J. Ledig has bought property on Nineteenth and High streets. He expects to remove his greenhouses from his present location after the spring trade.

J. T. D. Fulmer, the park florist, who has been seriously ill with pneumonia for the last two months, is slowly recovering.

Robt. Bebb, successor to Vaughan's Greenhouses, is cutting a fine lot of carnations and roses.

Mrs. A. Anderson, who has been laid up with the grip, is reported convalescent. T. L.

ATLANTA, GA.—The civic improvement committee, working in conjunction with several clubs, is holding meetings at which the projects of beautifying the city are discussed. Nothing is settled as yet but the movement contemplates a continual and perpetual beautifying of the city, a work which will be gradual and at the same time lasting in its scope.

New York.

TRADE VERY QUIET.

There is little change, worthy of note, in the condition of the flower market. Prices are about as low as they can go, so there is little cause for alarm on that score. There has been intermittent periods when the market had the appearance of life, but a close investigation proved that there was but little to it. There is considerable activity about some of the leading retail stores, but with the great volume of good stock pouring into the wholesale districts, it is not nearly what it should be. The weather has been cold, and we feel sympathy for the hard working growers who are burning coal to save flowers that must be sold at a sacrifice. In the vernacular of the cartoonists, we all seem to be "in bad," and, so far as human foresight goes, there will be no improvement this season; Easter comes late and can only furnish a few crumbs for the hungry. What has been written is the dark side. On the other hand, we see the country generally prosperous; confidence in a large measure restored after the late financial panic; a greater and more widespread interest in horticulture than ever before existed; therefore, it is reasonable to hope and believe that, when the clouds roll by, the business of the florists will be on a firmer basis. There is an abundance of good stock, going cheap; and this statement covers the whole field.

March 2.—A fog and slushy streets do not improve trade conditions. The advent of Lent, this week, while it causes little foreboding in the market, cannot be expected to improve conditions.

NOTES.

Henry Hession, a well-known carnation grower of Flatbush, has a very interesting novelty in the shape of a magenta carnation seedling. In addition to its distinct shade, which is doubly beautiful in a setting of white flowers, it is productive and a splendid keeper. It is now in its fourth year and has improved each year. Though the flowers are not of extraordinary size they are large enough for all commercial purposes, finely formed and the calyx never splits. He is now making a great cut of Enchantress, White Enchantress and other standard varieties of carnations. The quality is unexcelled by any blooms that reach the market. Another feature of his range is his great cut of Boston Market carnations.

E. H. Smith, of Hazelton, Pa., is opening a wholesale store on Twenty-ninth street. He has engaged as manager, James H. Blauvelt, formerly manager for A. Warendorff, and later with Chas. Millang. The new enterprise will be conducted as a wholesale plant and cut flower store and a commission business will also be carried on. There will be no change in Mr. Smith's Hazelton interests.

A cablegram was received February 28 from F. W. Smythe, the active member of the retail firm of Wadley & Smythe of this city, announcing his safe arrival in Paris. Mr. Smythe will spend about six weeks visiting the leading cities of Europe. He is accompanied by his mother. Before leaving the city he gave a dinner to a number of his old employes which was a very enjoyable affair.

President Traendly of the Society of American Florists will, after attending the meeting of the executive committee at Niagara Falls, take an extended western trip, which will include the American Rose Society's convention and exhibition at Chicago. He will be accompanied by E. V. Hallock and other well-known horticulturists of this section.

Professor J. C. Corbett, horticulturist, of the Department of Agriculture, Washington, D. C., will read a paper at the club meeting March 9, on the "Preparation of Soil for Greenhouse Purposes." Growers should take notice and attend the meeting as Professor Corbett stands high in the ranks of investigators.

The officers of the New York Cut Flower Exchange report that, notwithstanding the depression, the exchange has enjoyed one of the most prosperous years since it came into existence. The exchange people practice the square deal policy and it may be well to add, it is practically a grower's market.

Wm. H. Kuebler, of Brooklyn, is not sure that the tunnel from Manhattan to Borough Hall is an unmixed blessing to Brooklyn wholesalers. One morning last week his train got tied up somewhere under the middle of the East river and he came near having that creepy feeling.

A. J. Guttman entered his tenth year of business in the wholesale district March 1. He celebrated February 29 by taking a large party of friends and employes to the Florists' Club banquet. Mr. Guttman is a generous employer and an entertaining host.

Chas. Weiss, who has a considerable glass area, and grows a variety of stock at One Hundred and Sixty-second street and Morris avenue, has opened a retail store at 1 East Forty-first street, which is just around the corner from Fifth avenue.

Chas. Zeller & Son of Flatbush, have a very fine stock of plants coming on for Easter. This includes lilies, hydrangeas and various other stocks. They are now sending in fine specimens of genista and Otaheite oranges.

New York Florists' Club.

THE ANNUAL DINNER.

The annual dinner of the New York Florists' Club was held on the night of February 29, at the Hotel St. Denis. President Weathered of the club acted as toastmaster; Ex-President Totty sat at his right and Vice-President Marshall at his left. A pleasing feature of the function was the presentation to Mr. Totty of a handsome diamond scarf pin from members of the club, the presentation speech being made by Robert M. Schultz, whose remarks were in a particularly happy and felicitous vein. The response by Mr. Totty was feeling and appropriate.

There were interesting after-dinner addresses from President Traendly of the S. A. F., the toastmaster, E. V. Hallock, Walter F. Sheridan, and others. There was good music, and amusing recitations by a professional entertainer.

Among those present were: Pres. Traendly of the S. A. F., Pres. Weathered of the Florists' Club, Walter F. Sheridan, E. V. Hallock, John N. May, John G. Essler, F. A. Bolles, W. R. Du Rie, W. E. Marshall, Chas. H. Totty, A. F. Faulkner (AMERICAN FLORIST), S. S. Butterfield, Andrew Scott, Phil. Kessler, Arthur T. Rogers, John Miesem, E. W. Holt, John Donaldson, John Birnie, Robert M. Schultz, A. J. Rickards, A. J. Guttman, H. Reidel, J. K. Allen, John Allen, Herman Kuhn, John Young, W. A. Manda, Frank Manda, John T. Withers, Harry Turner, John Egenbrod, Clif. Hopkins, Albert Metz, H. J. Metz, George Okerse, Harry Hornecker, August Begrow, Patrick Schwartz, A. L. Miller, and Harry Bunyard.

SUMMER OUTING.

The summer outing of the club will be to Witzel's Grove, July 1, via the steamer Isabel. Stowe's orchestra has been engaged and the horticultural societies of Glen Cove, Bayshore, Tarrytown, N. J., Red Bank, Madison and Orange, N. J., will be invited to co-operate. Additional members of the committee are Messrs. Bunyard, Rickards, Guttman, Fenrich, Hoffmeyer, Kessler, Wheeler, Berry, Donaldson and Totty.

ROCHESTER, N. Y.—Thos. Cogger has removed from 41 North street to 280 East Main street.

CHATHAM, N. Y.—The Chatham Floral Co. is to remove its large greenhouse on Fairview avenue to its plant above the Rutland tracks.

Toronto.

STOCK VERY PLENTIFUL.

Although business is fairly active it is not good enough to use up the large quantities of stock coming in at present and values are not steady. With carnations and daffodils as low as $7.50 per 1,000 it gives a good idea of the quantities of these which are on the market. Roses continue to sell out fairly close, though good bargains can even be had in these; the stock is in excellent shape, Richmond and Killarney having most demand. Carnations are mostly of the fancy varieties and are all that can be desired excepting the price. Violets and lily of the valley continue plentiful.

NOTES.

Grobba & Wandrey will erect a new range this season; much of the material is on the place and the work will be pushed forward as soon as the weather permits. This firm is handling large quantities of bulbous stock, but as it always combines good quality with quantity, it realizes good prices.

Richmond roses prove so successful and come with such good stems that the Bedford Park Floral Co. will discard American Beauty. There is so long a period at which this rose is unproductive in this section that the other variety has proven more profitable.

Carnations and miscellaneous stock have done so well with Wm. Mackay that he will erect another house. Myosotis in quantity has been his specialty lately and was sold to good advantage.

Geo. Mills has a new device for the burst carnation calyx shaped much after the style of a hairpin; it is quickly and easily attached, hardly noticeable and of great benefit.

Those who had the pleasure of seeing the new rose, Mrs. Jardine, are so favorably impressed that nearly all the growers here will try it the coming season.

Wm. Gammage of London is in the city having a look at the different establishments; he reports a very good season for his locality.

D. J. Sinclair is again getting into shape after his recent fire, the insurance company having allowed him $2,000.

H. Bayersdorfer and M. Rice & Co., of Philadelphia, Pa., have both had their agents here.

H. G. D.

Syracuse, N. Y.

TRADE IMPROVED.

Business has taken a brace, due as much as anything else to the excellence of the stock which is coming in. The show windows are resplendent with beautiful flowers and plants. A number of social events previous to the opening of the Lenten season has created a good demand. All are preparing for Easter.

NOTES.

Superintendent of Parks David Campbell has begun a systematic trimming of trees located all over the streets of the city. Two gangs of men have been employed and work will be continued until the middle of March. About $4,000 will be expended in this way.

P. R. Quinlan is cutting the finest lot of carnations he has ever had. The dark weather has retarded his roses somewhat and a little more sunshine would improve conditions. Mr. Quinlan is having a splendid plant trade.

The state fair appropriation bills have been advanced out of the committees and will probably pass. This will give the state fair the opportunity to do a large amount of landscape gardening at the grounds.

Henry Morris says that business is fairly good for this time of year. Mr. Morris has a good trade on American Beauty roses in pots.

Bard & Davis are doing a large wholesale and retail business in the west end.

Tarrytown, N. Y.

The regular monthly meeting of the Horticultural Society was held at Good Templars hall February 28. The executive committee reported that the following dates had been arranged for the annual exhibitions: Summer show, June 14; fall show on November 4, 5, 6. An invitation was read from the Monmouth County Horticultural Society to attend its fourth annual dinner which will be held at Red Bank, N. J., March 3, and C. M. Atkinson, Irvington, N. Y., was elected an active member of the society.

Wm. Scott offered a prize for 12 cut roses, but we are sorry to report, that roses must be off crop around here, as the only vases on the table were from Robert Scott and Sons, Sharon Hill, Pa.; they sent the new Mrs. Jardine, which, after a severe and critical discussion, was awarded a certificate of merit. "Rose Growing Under Glass" was the subject for the evening; the discussion was opened by Joe Mooney and followed by many members.

At the next meeting "Cyclamens" will be the subject for discussion. L. A. M.

Philadelphia.

DEMAND VERY LIGHT.

The feature of the market the past two weeks has been the unprecedented glut in carnations. The quantities coming in are not unusual, but the demand is so light that prices for the most part are ruinous. The best Enchantress, on first arrival, are offered at $1.50 per 100, an unheard of price for such stock. The very best price for any of the fancies is $3, in small lots. Quantity figures are away below the prices quoted, $5 per 1,000 securing very good stock for street sales. No one seems to understand this slump or the reason for the light demand as it was generally expected that the last two weeks of the season would wind up with a rush, but no extra demand developed and it remains to be seen what effect the Lenten season will now have. Things can scarcely get much worse and if there is to be any hope for the better it must develop soon, as the brief season after Easter will make a very short season indeed. For some reason the American Beauty rose crop is very short at present. One of the large commission houses having an order for 18 specials had hard work to fill it one day the past week, as after saving up and telephoning to their growers, getting a few here and there, they finally managed to make good; $6 per dozen is the price, although they say they should bring $9. All the tea roses are plentiful, $12 being high. A few Richmond roses, special stock, are quoted at $20 to $25 per 100. All other flowers are plentiful and cheap. Daffodils range from $1.50 to $2. Nothing good from the south as yet, but they are expected any time. Lily of the valley is still very plentiful and cheap, $2 buying good stock, with $3 for special.

CLUB MEETINGS.

The feature of the March meeting of the club was the paper of J. Otto Thilow, on new things in an old country. It was replete with incidents and information, given in his inimitable style and was declared by President Hohman the most enjoyable paper ever read before the club. Robt. Craig spoke of his recent trip to Boston, describing the Killarney roses at the trade exhibition there that were remarkable for size and beauty having buds four inches in length, borne on stems four feet long. He also saw sweet peas with stems 24 inches in length and other things much better than are seen in this market. He described trips to the places of Wm. Sim and Thos. Roland, which were worth a trip to Boston if nothing else was seen. It was decided to hold a dinner in the foyer of Horticultural Hall March 11, the price of tickets to be $3.

NOTES.

The second assembly ball was held at the Bellevue-Stratford hotel last Friday. Habermehl's had the decorations, which were quite elaborate. Numerous dinner parties to visiting guests gave quite a lot of work and made Friday a rather busy day.

Pennock Bros. have had their window elegantly decorated with cypripediums the past week, large plants in full flower, with cut blooms arranged in small baskets and the whole in a setting of Adiantum Farleyense making a very much admired display.

The Century Flower Shop advertised a sale of Enchantress carnations for Saturday last; the price, 45 cents per dozen, was tempting, and it is said that over 5,000 blooms were sold.

There is considerable complaint among the growers of Easter lilies, on account of diseased bulbs, some of the crops showing up very badly as the season advances.

K.

TORONTO, ONT.—The amendments to the act respecting horticultural societies introduced by the Minister of Agriculture provide that the annual meetings of such organizations be now held during the first week in November.

Pittsburg.

STOCK PLENTIFUL AND CHEAP.

All last week the carnation market was to the bad, although street sales Saturday were very good and gave every one a chance to clean up, but at a miserable price. One prominent retailer advertised all week that he would give four dozen carnations for $1 on Saturday. When one considers that he handled in the neighborhood of 30,000 flowers one may know how many dollar boxes went over the counter. This is one way to clean up a glut and the wholesale men seem to like it as it cleans up an icebox full of stock without much trouble although the price is way low. Roses, which have been none too plentiful, are now coming in very strong and a great many are left over. Lilies are also over abundant with better quality. It always seems to be a feast or a famine with these flowers. Other bulb stock moves slowly although there is a good call for Emperor narcissus.

NOTES.

In its Sunday edition, The Gazette-Times gave the opinion of different business men on the hard-times situation, and the following appeared regarding the florist: "The florist with his bright and pleasant surroundings gives an added touch of confidence to the prospects and while admitting a slight falling off in trade, is not downcast, one firm even making the assertion that its January business has surpassed all records for the same month in any previous year. The 'girl' must have flowers and the 'boy' will see that she gets them at any cost for he won't take the chance of losing her for the sake of a few paltry dollars. That will come afterwards."

The little colony of florists between Seventeenth and Eighteenth streets on the south side are again making things merry in that neighborhood. M. S. Stafford has secured the lease on the place now occupied by H. L. Blind & Bros., while the South View Floral Co. of Carrick intends to open a new store at the

old Stafford stand. The Blind Bros. expect to secure other quarters near their old place and with J. J. Fuchs and The Palm Decorating Co. across the street, the south side will not suffer for want of flower stores.

W. Q. Potter resigned from The Pittsburg Cut Flower Co. February 29. The trade will miss him very much as he has been with that firm for the past six years. As a mark of appreciation, the above firm gave a theatre party to their employes in his honor, February 27.

Some time ago thieves entered the greenhouses of A. T. Lorch & Co., De Haven, and stole about 600 fine White Lawson carnations.

Christ, one of the old-time florists of the Pittsburg market, has returned from Georgia where he has spent most of the winter.

Breitenstein & Flemm have closed a lease for the entire building at 636 Liberty Ave., where they will move April 1.

Mrs. J. Elicker, Homestead, has been laid up with the grip.

Visitors: H. Glenn Fleming, Fairmont, W. Va., M. Shattles, New York, and C. Limbach of L. Baumann & Co., Chicago.

Fredericton, N. B.

With the exception of Christmas, the trade in this section has been the worst on record since October, but we are hoping for better things. Not much money has been made this winter and those who have kept their end up are lucky. The weather has been favorable and just now there is scarcely enough snow for the lumber industry. In this neighborhood, and probably in others, it would be better if half the florists were out of the business and back on the farms.

NOTES.

J. Bebbington & Son have had their stokehole under water and have had great difficulty in maintaining the temperature in their houses. Not only the stokeholes but three of the houses were submerged February 16, some five feet of water being reported. By the use of stoves and various makeshifts Messrs. Bebbington were fortunately able to hold the temperature around 40° and thus save serious damage. They intend petitioning the city council to help them by providing proper drainage for the upper portions of the city and prevent this flooding of the lower levels. It was fortunate that the weather at the time was moderately cold only. This firm has an unusually fine strain of cyclamens.

BUSY DAYS PRECEDE LENT.

The past week has been enlivened by the rush of society to get all entertainments in before Lent and all have succeeded. While the number has been large, the amount expended from a florist's point of view has not been as large as in other years. The supply of stock is good, with the possible exception of American Beauty roses, whose quality is poor and demand small, signs on the store windows giving a price of $1; violets 50 cents per bunch, while another had daffodils 20 cents per dozen, carnations 25 for 25 cents, which goes to show when a good lot of the above mentioned flowers are on hand and not moving fast. A sign will wake the people up and booms trade, but it is unwise to run the same article two days in succession. It is not a bargain or snap then and the people are first to know it. Azaleas are coming in fine.

NOTES.

On March 2 the florists had another bowling meeting which was attended by 46 of the florists Even J. H. Rebstock was there and bowled in his old-time form. This week Friday will be the election and banquet when Rome will howl and florists who have not attended a meeting for years have assured the committee of their intention to be there. The entertainment will be grand. We hope the night will be so that Wm. Scott, Sr., will be able to be with us.

Traveling men have been numerous recently, not counting the gentlemen from Holland, whose names are legion, but the supply houses have had S. B. Green, of H. Bayersdorfer & Co., Philadelphia, Pa.; Dykes, representing Ed. Jansen, New York; J. B. O'Neil, of Vaughan's Seed Store, Chicago, also the representative of Reed & Keller, New York.

Miss Margaret Skinner, who for several years has had charge of J. H. Rebstock's store, has forsaken the life of a winning lady in a flower store for the quiet life of a married woman. While the shock was great, the florists all wish Margaret a long and happy life.

The rivalry between Charlie Sanford and Charlie Reichert for the presidency of the Florists' Club is great.

BISON.

CUT FLOWERS OR DESIGNS will be Delivered for the Trade on Wire or Mail Orders in Best Qualities and Prices.

Louisville.

STOCK PLENTIFUL.

Business conditions the past week were very slow; especially was this the case with carnations, which seem to be plentiful everywhere. The extra quality stock finds a ready demand. Roses are in fair supply, but not much can be said of the quality. They find a good demand. Violets are very cheap, and find slow sale. Lily of the valley has a fair demand, and is in good supply. The quality is excellent. Jonquils, Roman hyacinths, narcissi, tulips, etc., are in good supply, and find a fair demand. Green goods, especially fancy ferns, are very scarce.

NOTES.

Nanz & Neuner had a large display of violets this week, while Jacob Schulz had a good window of jonquils.

J. E. Marret is much improved.

F. L. S.

Indianapolis.

The delegation from this city that visited Richmond, February 26, was probably the largest that has ever gone from here, and the trip was very enjoyable. At the E. G. Hill Co.'s place Rhea Reid rose was the chief object of admiration and it was showing up better than ever.

Geo. M. Garland of Des Plaines, Ill., who was with us, devoted, it seemed, about one hour to each of the delegates, talking iron gutter. He is the only living man who can drill a square hole with a rotary motion.

The following is a list of the visitors comprising the delegation to Richmond: G. Brown, M. Brandlein, J. Eigel, J. Elsner, Geo. M. Garland, Des Plaines, Ill., J. Grande, J. Hack, —— Hansley, J. and W. Hartje, J. and E. Haugh, Geo. Hitz, F. Hukriede, F. Hyatt, H. Junge, W. Langstaff, O. Lorange, E. Nelson, J. Nickels, F. Pahud, A. Petit, E. and F. Rieman, H. Rodenbeck, F. Schubert, S. Smith, ——— Stanley, J. S. Stuart, Jr., E. Temperly, P. Weiland, H. and E. Weigand, G. Willner and A. Youngerman.

Tall, the city florist, is making a name for himself by his systematic and economical arrangement of the numerous city parks.

H. D. Schilling is the proud father of a Schilling, Jr.

J.

Indianapolis Florists Visit Richmond.

At the regular January meeting of the Indiana State Florists' Association, we were invited to visit the Richmond florists, and February 26 was the date named to go. When the day came we had one of the worst snowstorms of the year, but I went down to the depot, believing that the florists would give up the trip. To my surprise I found about 35 florists waiting for the train, and soon we heard the cry: "All aboard for Richmond."

Grave's was the first stopping place. We found carriages in waiting and all the Richmond florists there to escort us over the city and to different greenhouse plants. I do not know how many thousand feet of glass this firm has, but the place is immense. Here they grow a large stock of roses, carnations, chrysanthemums and a large lot of assorted plants, which they ship all over the country.

The next place we visited was that of John Evans, of the Quaker City Machine works, then the B. K. and B. Floral Co. and the great plant of the E. G. Hill Co., the latter of which alone would have taken a week to see properly.

I wish to thank Messrs. Nelson and Hukriede for taking care of the old man, for had it not been for them he would have fallen by the wayside.

BUSINESS GOOD.

Trade in most respects is good. There are, however, some dull days but so far there has been no noticeable over supply in any item which is regarded as unusual for this time of the year. Funeral work seems to have fallen off somewhat during the past two weeks but the stores seem to be fully as busy with other kinds of work. Social affairs are responsible for quite a bit of the store business at present but this is usually the case during the few weeks previous to Lent which is observed very noticeably to the decorators. Stock of almost all kinds is adequate and the quality is good. Carnations are in the lead at present both in quantity and in general demand. Enchantress is particularly good with all the growers. American Beauty rose is the only item of real scarcity but since we have other fine varieties such as Killarney and Richmond it is not so difficult to cope with the situation as it was a few years ago when American Beauty was in the field all to itself. Some good Mrs. Potter Palmer is seen occasionally but they are not gaining the popularity of some of the other roses, perhaps on account of their weak stem. Bulb stock appears more plentiful but so far it is a disappointment to most of the growers. Easter lilies, freesias, lily of the valley, and other seasonable offerings are plentiful.

NOTES.

The Wm. L. Rock Flower Co. had the decorations for the Lemon-Howe wedding which occurred at St. Joseph, last week. The affair was an elaborate one consisting of the decorations at both the home and the church. Quantities of southern smilax and Easter lilies were used at the church and at the house were arranged huge bunches of Killarney roses and white lilac. The table was most striking, a huge round arrangement of Killarney rose and white lilac placed on a tall standard and draped with many streamers of pink chiffon. The bridal outfit was especially attractive. The bride's bouquet was a shower of white orchids and lily of the valley, and the attendants had arm bouquets of cypripediums and white lilac.

The Jones Dry Goods Co. offered as a special last Saturday carnations at 15 cents per dozen while the Emery Bird Thayer Co. sold them for 25 cents. Looks as though a little war existed between the two stores. Some of the flowers were good while others were not fit to give away. Retailers say that after all the sales of carnations have been increased and continue to increase on the days that the department stores offer them.

Geo. M. Kellogg called on the trade last week for the first time this winter. Mr. Kellogg says conditions have been fully restored at the plant and hardly a trace remains of the damage done by the explosion which nearly wrecked the plant last fall. At present he is cutting exceptionally fine carnations.

It is rumored that a new flower shop is to be opened very soon in a portion of the Wherritt Drug Co.'s new quarters in the Bryant building. Our old friend D. Freudenthal is said to be back of the venture and if the report is true we extend the best wishes for every success.

E. A. Humfeld's place is quite gay with bright colors these days and attracts no little amount of admiration from the endless string of passersby on the boulevard. Pans of daffodils and jonquils and fine pots of white lilac were in the window recently.

Visitors: Warren Spain, Lees Summit; Frank Sachs, Topeka, Kans.; A. Roelker, New York; and G. M. Reyburn of Vaughan's Seed Store, Chicago. K. C.

ST. CHARLES, ILL.—Henry Swaby is preparing to build a greenhouse 30x130 feet for carnations and bedding stock.

The Seed Trade.

American Seed Trade Association.

Geo. S. Green, Chicago, Pres.; M. H. Duryea, New York, First Vice-Pres,; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-sixth annual convention, June 23 to 25, at Hotel Ponchartrain, Detroit, Mich.

VISITED BOSTON: L. W. Wheeler, San Jose, Cal.

DETROIT, MICH.—Lem Bowen has returned from California.

A EUROPEAN advertiser has it that "Dead seeds tell no tales."

LOS ANGELES, CAL.—The Morris & Snow Seed Co. is doing a good business this season.

PORTLAND, ORE.—J. J. Butzer says business is better this season that he has ever known in his experience of over 20 years.

ESCANABA, MICH.—C. Peterson & Sons, florists, will install a seed department this month, carrying a full line of garden and field seeds.

OKLAHOMA CITY, OKLA.—Guy Reyburn, representing Vaughan's Seed Store, was a recent visitor and reports doing good business here although the season is just opening.

WATERTOWN, S. D.—Five carloads of choice timothy seed have been shipped from Codington county to the Chicago market this winter, purchase price paid on the tracks being $3,386.76, the net weight being 80,419 pounds.

PHILADELPHIA, PA.—Robert Buist, 70 years of age, is as sprightly as many men at 50. He varies his work betw en the office and counter and at the latter often makes a very active salesman through the mid-day hours.

SAN FRANCISCO, CAL.—The May Seed Co., a new firm established by C. S. May, formerly with the Cox Seed Co., and A. J. Moraumont, formerly with Trumbull & Beebe, are reporting quite a good business, in fact better than expected.

EDEN GEM, as a name for cantaloupe seed, has been registered under United States Certificate 57955, by A. F. Young & Co., of New York. It will be interesting to know to what extent and for how long they expect protection.

THE Iowa state law against adulterated seed makes an exception of the farmer who sells his own seed to the planter, thus making it possible for any farmer to sell adulterated seeds if he should so desire—pretty smart Iowa farmer law makers. Query—Is such a law constitutional?

THE Canadian government will distribute nearly $3,000,000 worth of seeds to the settlers in the Alberta and Saskatchewan regions, where the crops last year were either total or partial failures. This will differ, however, from the United States government distribution in that the money spent for this purpose will draw 5 per cent interest and operate as a mortgage on the land.

Braslan Seed Growers' Co.

Growers for the Wholesale Trade Only.

SAN JOSE, CAL.

HOLLAND DUTCH travelers report a falling off of 25 per cent from their advance orders booked at this time.

SOME Iowa seed houses are advertising to the retail trade that their seeds correspond with the new laws of every state.

THE Iowa pure seed law, which has the endorsement of the Iowa Seed Dealers' Association, establishes a very high standard of purity and germination and exacts a penalty on unscrupulous dealers exposing for sale or giving away for seeding purposes seeds which do not come up to the requirements of the law. The officers of the association are: Chas. N. Page, president; Henry Field, vice-president; John T. Hamilton, treasurer, and W. C. Adams, of the Adams Seed Co., Decorah, secretary.

American Seed Trade Association.

President Green and Secretary Kendel met in Detroit February 22, and made final arrangements with the Hotel Pontchartrain for headquarters for the twenty-sixth annual convention. The use of a suite of rooms on the parlor floor has been secured for the meetings and ample accommodations for all have been assured at reasonable rates.

New York.

TRADE VISITORS: A. J. Pieters, Hollister, Cal.; Chas. P. Braslan and L. W. Wheeler, San Jose, Cal.; J. B. Agnew, Greeley, Col.; Chas. R. Kimberlin, Santa Clara, Cal.; C. Cropp and C. W. Scott, Vaughan's Seed Store, Chicago.

The disturbance caused in building the terminal of the Jersey subway has not benefited retail traffic in Cortlandt street.

Chicago.

TRADE VISITORS: A. J. Brown, Grand Rapids, Mich.; J. B. Agnew, Greeley, Col. Mr. Agnew has just returned from a 60-day trip through Western Mexico, where he left Mrs. Agnew, in Guadalajara; E. M. Parmalee of John H. Allan Seed Co., Sheboygan, Wis.; Chas. P. Braslan and L. W. Wheeler of the Braslan Seed Growers Co., San Jose, Cal.

S. F. Leonard, of the Leonard Seed Co., returned last week from a business trip to Boston and other eastern points. John M. Clark, of the same firm, is confined to his home with grip.

Grass seed contract prices on the board of trade March 3 are noted as follows: Prime timothy, $4.85 (no bids); medium red clover, $19.25; choice white clover, $15.

Onion set prices for immediate delivery are about as follows: Yellow, $2.40; red, about $2.50; white, $3 for 32 pounds.

Dealers who sold sets early at $1.65 to $2 per bushel for March delivery are now in position to make a loss.

Business Notes.

At Sunnyville, Cal., C. C. Morse & Co. are planting this year onion and sweet pea seed crops on the Murphy range, which has formerly been used by the Braslan Seed Growers' Co. for some years past, while the Braslan Co. has leased the Britton and Center

HORTICULTURE IN ALASKA.

Collection of Vegetables. See page 272.

ranges, amounting to about 250 acres, just beyond the Murphy range toward Agnew's. This land is mostly devoted to onion.

Hollister, Cal.—A. J. Pieters has recently purchased a home of about 13 acres about four miles out of this city. His firm has about 500 acres of seed crops made up of sweet peas, a favorite crop of this firm, onion, about one-half of last year, the remainder devoted to lettuce, radish, carrot and onion bulbs for 1909 seed crops, with moderate quantities of other vegetable and flower seed crops, the latter to be planted later in the season.

Neubert, Wandsbek, Germany, seeds.

Imports.

During the week ending February 29 imports were received at New York as follows:

McHutchison & Co., 188 cases trees and plants.

H. F. Darrow, 53 cases plants, 84 pkgs. lily of the valley pips, one bag seed.

A. Rolker & Sons, 29 cases plants.
Elliott & Sons, three cases plants.
H. H. Beyer & Co., two cases bulbs.
Vaughan's Seed Store, two bls, bulbs.
J. M. Thorburn & Co., 20 pkgs. seed.
Yokohama Nursery Co., 22 cases garden seed.
Stumpp & Walter Co., 12 pkgs. seed.
P. Henderson & Co., two pkgs. flower seed.
S. Stern, eight cases lily of the valley pips.
H. Philips Seed Co., one case seed.
F. G. Mills, one case seed.

To others: 181 pkgs. plants, 42 cases plants, two cases fruit trees, five cases forest trees, 19 cases trees, 788 bags, 83 bls. seed, 194 bags clover seed, six cases bulbs.

British Horticulture.

FROM THE BRITISH TRADE PAPERS.

THE MANCHESTER BOTANIC GARDEN.—The White City Co., who offered £2,000 per year rent for the gardens of the Manchester Royal Botanical Society, have "come to grief through having started a large business with too little capital;" but John Edward Lees, a gentleman of considerable means, thinks that a success can yet be guaranteed. He asks for the option of renting the gardens for a term of 20 years, determinable by the tenant at the end of five, ten or fifteen years, and the rent is £2,000 a year for the first ten years, and £2,200 for the remainder of the term; £500 deposit had been paid on the agreement. It was proposed to form a company to carry on a similar undertaking to that conducted at the gardens by the White City Co. last summer. The horticultural shows would be the same as they had always been, and the shareholders in the botanical society would continue to enjoy the privileges they had always had. The resolution to accept Mr. Lees' offer was then put to the meeting and carried.

AMERICAN FLORIST CO., CHICAGO.

VIBURNUM RHYTIDOPHYLLUM.—A very distinct species of viburnum, and a striking evergreen shrub. The broadly lanceolate leaves are large, being each from eight inches to nine inches in length, and two inches to two and one-half inches in width. They are, on the upper surface, dark green and very much channelled, while the under-side is covered with a dun-colored tomentum. The flowers, borne in dense corymbs in May or June, are not particularly showy. They are yellowish-white in color. The berries that succeed them become bright red in hue, changing afterwards to almost black. It was in this stage when a first-class certificate was awarded it on September 17.

RUBUS BAMBUSARUM.—One of the many brambles that we have received from China within the last few years. It produces long, trailing branches 12 feet or so in length, clothed with very distinct foliage. The major portion of the leaves consists of but three leaflets, but there are occasionally five. Each leaflet is lance-shaped and smooth on the upper surface, while the lower is clothed with a thick brownish tomentum. This also occurs on the young shoots. The bramble in question is said to produce its flowers in terminal racemes, while the fruit, black when ripe, is edible.

London Cries.

Here's pennyroyal and marygolds,
Come, buy my nettle-tops.
Here's water-cresses and scurvy-grass,
Come, buy my sage of virtue, ho!
Come, buy my wormwood and mugworts.
Here's all fine herbs of every sort;
Here's southernwood that's very good,
Dandelion and houseleek.
Here's dragon's tongue and wood-sorrel,
With bear's-foot and horehound
Let none despise the merry, merry cries
Of famous London town!

MARKET GARDENS.

POTATOES are a glut in California—one million sacks remain unsold. New cabbage is also selling below cost, shipping having just begun. Tomato growers made no money.

GRAND RAPIDS, MICH.—The March meeting of the Grand River Valley Horticultural Society will be held at the home of John B. Martin the first Saturday in the month and Chas. W. Garfield has charge of the programme. The general topic will be "Glass Farming" and at this meeting Mr. Garfield announces that Prof. Thomas Gunson, of the Michigan Agricultural College, will speak on "The Hotbed and Its Uses," and that Prof. L. R. Taft, also of the college, will speak on "Some of the Forward Movements in Glass Farming."

GENY BROS'. ESTABLISHMENT, WEST NASHVILLE, TENN.
House Containing More Than 400 Dozen Lettuce.

Notes on Cucumbers.

Where cucumbers are intended to follow some other crop, say lettuce, a plan should be made so no time is lost, or plants are stunted by waiting for their permanent quarters. As a rule, lettuce and cucumbers do not combine very well. Lettuce needs a low temperature while cucumbers love heat. Lettuce needs plenty of water—cucumbers love only moderate moisture—especially while young. Hence it is much better to prepare strong plants in 4-inch pots, and cut all the lettuce out before planting the cucumbers. Then the temperature can be held up and excellent results obtained. To produce good cucumber plants, a warm separate plant house is best. The time to produce good plants will vary between four and six weeks, depending on heat given. With a minimum night temperature of 60°, five weeks would be a fair allowance.

To follow lettuce, the single stem method is well liked; for this system, the plants are best set in rows across the beds, not lengthways of the house, this to permit easy access to carry on the work. These rows should be about four feet apart and in the rows the plants may be set 18 inches apart. These distances are minimum; 2x5 would be a fair spacing. I mention this so the grower who wishes to try this method can figure out what plants he needs. Where vines are allowed to run on wires or trellises, a good deal more room can be allowed, as each plant will make many shoots. Then the rows are run lengthwise, generally two rows to each bed, and the plants three feet apart in the rows.

MARKETMAN.

Prices of Indoor Vegetables.

The prices of indoor vegetables at leading points February 29 were as follows: New York, cucumbers, No. 1, $1.50 to $2 per dozen; No. 2, $3 to $5 per box; lettuce, 15 cents to 60 cents per dozen; mushrooms, 25 cents to 55 cents per pound; mint, 50 cents to 75 cents per dozen bunches; radishes, $2 to $3 per 100 bunches; rhubarb, 40 cents to 60 cents per dozen bunches; tomatoes, 15 cents to 25 cents per pound. Boston, tomatoes, 25 cents to 35 cents per pound; cucumbers, $9 to $12 per box. Pittsburg, cucumbers, $15 to $18 per box. Chicago, radishes, 30 cents to 45 cents per dozen bunches; mushrooms, 25 cents to 50 cents per pound. Cincinnati, cucumbers, $1.75 to $2 per dozen; mushrooms, 40 cents to 50 cents per pound. Denver, cucumbers, $2.50 per dozen. Minneapolis, cucumbers, $2 per dozen.

Market Gardening in England.

CUCUMBERS.

Astonishing as is the area that is grown yearly under glass, it is still increasing, new houses being built. The crop season is a short one, followed up by clearing in July, for tomato planting. A successful grower will cut fruit eight weeks after sowing. Sown thinly in boxes, they are potted in 2½ or 4-inch when ready to handle. Benches and soil all being inside and warm, check is thus avoided. We pot loosely, getting some two or three inches of the stem in the pot, care being taken not to bruise the stem, which quickly roots. Beds being ready a fortnight or three weeks from potting they are ready for planting. Some run the plants up the wires to nearly the top before stopping, others do this earlier, when they reach the first wire. The red spider pest which was formerly the scourge is well defied by the free use of "Hamiltons Red Spider Killer." This specific, raised by one of England's largest growers, is welcomed this side of the water, a cheap yet certain cure.

GRAPE GROWING.

Prices and demand are such that the growers here, are paying more attention to the cleaning and border preparations. Black Hambro vines, started in mid-November are now in flower, a good break. Those started a month later are breaking very strongly. Early Alicante fired January 1, are moving, but these are always slower, producing fruit for July-August cutting. Gros Colman is about the same as the last named, Gros Maroc is an early breaker with the Alicante, but takes a long hang after coloring to sweeten. Muscat of Alexandria and Canon Hall, are usually fired March 1, for the early crop, a natural break for the late crop. Late houses of Alicante and Gros Colman are each treated separately, as grapes are cut. Cleaning houses and vines are done as vines are pruned, followed up with border forking, dressing and watering. While, even in our largest and best establishments, the vine and its crop must be the consideration, houses are by no means empty. After clearing, all being ready to start, bulbs, spireas, geraniums, etc., find a temporary home.

S.

Work of Illinois Experiment Station.

A paper (abridged) read by A. C. Beal, of the University of Illinois, at the third annual convention of the Illinois State Florists' Association, Springfield, Ill., February 19, 1908.

Floriculture is one of the interests which has recently received a little attention from the stations. Aside from insect and disease problems and leaving out of consideration, for the moment, publications on forcing vegetables, it seems incredible that an industry representing so large an investment of capital and with an annual product of so great a value has not received more recognition. According to the census of 1900, the amount of capital invested in floriculture was $52,462,419 and wholesale value of the product is given at $18,422,522. Since 1900, the florist business has developed wonderfully and the investment is not far from $100,000,000 for

the whole country. What interest of such magnitude has been given less recognition?

In this connection it is well to bear in mind that when the stations were founded the farmer was the one to whom those in charge of the work looked for support and whom they sought to benefit. Most men, and the farmers least of all, know little about plant growing under glass and he generally has a sort of contempt for the man whose operations are confined to a small area. He might be surprised to learn that there are florists in Illinois who grow under glass more rose or carnation plants than there are hills of corn on 50 acres of land. If he had any adequate conception of the amount of handling, pruning, tying, etc., to care for this number of plants as compared with cultivating the same number of hills of corn, he would have a better opinion of the florist business.

Illinois has published one bulletin upon the subject of tomato forcing. However, the manuscript for a bulletin on school gardens is ready, and data is at hand for three or four other bulletins, viz., "Strawberry Forcing," "Peonies" and "Carnation Fertilizers." I think it a matter of congratulation that this association secured the first appropriation for the exclusive purpose of experimentation in floriculture. Illinois leads in floriculture and it was quite fitting that she should take the lead. The legislature is to be commended for its recognition of this industry by providing funds with which to start the work.

Since Illinois is taking the lead we bear great responsibility as the other states are watching with interest the outcome. We should be exceedingly careful in the expenditure of the funds to secure the greatest possible results. We may be certain that other states sooner or later will follow our example. Should we accomplish this we need not fear but that we shall get further appropriations. It marks a new epoch in floriculture in the experiment stations.

THRIPS INVESTIGATIONS.

The advisory committee has decided that investigations on thrips be taken up this year. A search of the literature was begun to learn what was already known including everything written by florists. From this and from correspondence it was learned that little was known about the species doing the damage and also about their life history in greenhouses. It became necessary to enlist the services of the entomologists in the problem. Dr. S. A. Forbes very willingly detailed one of his most capable assistants on this work. Since the horticultural greenhouses at the university were put to other purposes we had to seek houses at some other city. After considerable search and correspondence the university authorities decided that work should be begun at Bloomington since it seemed that the houses were better adapted to our needs and more convenient. The house was already planted to two varieties of carnations, Queen Louise and Genevieve Lord. Varieties of these colors do not show thrip injury unless the in-

DREER'S FINE FERNS

We offer in particularly nice shape at the present time:

Cyrtomium Falcatum	Pteris Cretica Alba Lineata
Cyrtomium Fortunei	Pteris Cretica Magnifica
Davallia Stricta	Pteris Wimsetti
Dicksonia Antarctica	Pteris Wimseti Multiceps
Lastrea Chrysoloba	Pteris Mayii
Lastrea Opaca	Pteris Hastata
Onychium Japonicum	Pteris Ouvrardi
Pteris Adiantoides	Pteris Serrulata Cristata
Pteris Argyrea	Pteris Tremula
Pteris Wilsoni	Pteris Victoriæ

also Extra Choice Mixed varieties. All the above from 2 1-4-inch pots, $3.50 per 100; $30.00 per 1000.

Pteris Adiantoides	Pteris Ouvrardi
Pteris Cretica Alba Lineata	Pteris Wilsoni
Pteris Mayii	Pteris Wimsetti Multiceps
Pteris Magnifica	Lastrea Opaca

also Extra Choice Mixed Varieties. All the above from 3-inch pots, $6.00 per 100; $50.00 per 1000.

FOR GROWING ON.

Adiantum Croweanum. Unquestionably the best of all the Adiantums to grow for cutting; always in good demand and at profitable prices; a good lot of 3-inch pots, $15.00 per 100; $140.00 per 1000.

Nephrolepis Whitmani. A fine lot of this very useful plume variety, 2¼-inch pots, 75c per doz.; $5.00 per 100; $40.00 per 1000.

Nephrolepis Bostoniensis. A large stock of this popular variety, 2¼-inch pots, 60c per doz.; $4.00 per 100; $35.00 per 1000.

Nephrolepis Todeaoides. This English introduction is unquestionably the best of the plume varieties for growing into large specimens. 2¼-inch pots, 30c each; $3 50 per doz.; $25.00 per 100. 4-inch pots, 50c each; $5.00 per doz.; $40.00 per 100.

Nephrolepis Amerpohli. The most graceful of the Nephrolepis; beautiful, fine divided foliage; especially fine for growing in 5 and 6 inch pans; 2¼-inch pots, 35c each; $3.50 per doz.; $25.00 per 100; $200.00 per 1000.

Fern Flats. The following varieties are still in stock in good condition; potted up now they will make good spring selling plants:

Cyrtomium Falcatum,	Pteris Cretica Alba Lineata,
Pteris Mayii,	Pteris Harrisoni,
Pteris Serrulata Cristata,	Pteris Wimsetti Multiceps.

About 200 plants in a flat, $2.00 per flat.

HENRY A. DREER, 714 Chestnut Street, Philadelphia, Pa.

sects are numerous and the amount of feeding is considerable. As the house was planted late there were few blooms until December and consequently few thrips.

In the different compartments into which the house was divided we are testing the efficiency of some of the leading insecticides now on the market. In two compartments we are using the insecticides as a spray; in three others for fumigation, one both fumigation and spray and the other check. At the present writing there appears to be little difference in the efficiency of the different materials tried. In one instance injury was done the plants by using the substance according to the manufacturer's directions accompanying the goods. In some instances injury has been reported from the use of certain insecticides.

It developed that, after all, we know little about the composition of insecticides, and not having any insecticide law in this state there might be cases where the compound contained little or none of the essential constituent. Pure nicotine is worth not less than $3 per ounce. It is the nicotine that is the constituent which kills the insects. The price of the preparations was not uniform, neither were the claims of the manufacturers as to the amount of nicotine. However the price did not vary as to whether the amount of nicotine claimed was small or large. Why this difference? Did a 30 per cent nicotine preparation contain other valuable material to justify its selling for more than a 40 per cent nicotine preparation?

There was one way to find out about some of these things and that was to analyze them, which I proceeded to arrange for. This work is in progress and I will call your attention to some completed results: The insecticides so far as analyzed with one exception, were ammonia free. The X. L. All vaporizing compound contained camphor in addition to nicotine, while the liquid preparation of the same name, and intended for spraying contained one-tenth the amount of nicotine with soap or oil. Not longer ago than last Saturday I learned of a substance used for adulterating nicotine preparations, and which, it is claimed, is injurious to plants. This alkaloid is much cheaper than nicotine.

Among the insecticides available for destroying thrips is hydrocyanic gas, although its dangerous character may practically exclude its use except in the hands of careful men. The only experiments on carnation thrips reported were to the effect it did not kill thrips. We know that it does kill thrips and in order to learn of its effect on the plant a series of tests were carried out on potted carnation plants from the field. Twenty-eight tests were made on different lots of plants using the gas at the rate of 1¾ ounces to seven ounces per 1,000 cubic feet, and at intervals of from five minutes to one hour with one set exposed for 12 hours, the important consideration being that none of the tests were made at a higher temperature than the night temperature usually carried on in carnation houses. The result was that the plants were not injured.

So the experiment has broadened from a mere test of those insecticides which will or will not kill thrips to study of the species and their life history, so as to give us an insight into their habits. We know that all the species injuring cut flowers are three common, outdoor species, while a fourth is found on the foliage of certain greenhouse plants, and that it is the greenhouse thrips. We know something of their behavior toward temperature and light. We are making progress in the study of insecticides and their efficiency, also their action on the plants. Further than this we have had considerable correspondence with manufacturers of sprayers, etc., and with leading growers over the country about spraying appliances. I would remind you that in solving questions along these latter lines, we solve them with reference to more than one insect pest.

Perhaps some person may think that we have not reported many results, but I wish to say that the responsibility resting on all connected with this work, whether on the committee or the station staff, and further the amount of capital involved, is too great for any of us to report results which we are not absolutely certain are correct. We are appreciative of the fact that you are desirous of results, and I beg to assure you that we want to get the information to you as soon as possible; but I am sure we will at least always agree on one thing, and that is, no reports are better for both than premature reports. In conclusion I would like to say that I should like to hear from any man present, who has any suggestions to make, or I would welcome any communications at any time along this line. I am sure we need your cooperation and we hope to meet your expectations.

TOLEDO, O.—Ewald Suder shot himself February 24 at the family residence on Cherry street.

FORMOSA

LILIUM LONGIFLORUM

Ask your dealer for our own special grown stock or write us direct for quotations. Only a limited quantity available for the coming season 1908. Delivery will be made the first part of August.

The bulbs are thoroughly ripened one month before the Bermuda Harrisii and are considered far superior in quality as they are **entirely free from disease.**

Careful trials were made for two years and were so successful that we imported over 300 cases last season. Our cases will be marked Y. N. Co.

Yokohama Nursery Co., Ltd., 31 Barclay St., New York.

The Nursery Trade

American Association of Nurserymen.
J. W. Hill, Des Moines, Ia., President; C. M Hobbs, Bridgeport, Ind., Vice-President; George C Seager, Rochester, N. Y., Sec'y.
Thirty-third annual convention to be held at Milwaukee, Wis., June, 1908.

YUMA, ARIZ.—Chas. Meadows has recently purchased in southern California 22 tons of young trees at a cost of about $1,600.

FREIGHT shipments may begin about March 10 or soon after if carefully packed and if not intended for northern or northwestern points.

AUGUSTA, GA.—L. A. Berckmans, of the Fruitland Nurseries, has been confined to his home for several days with the grip, but is now recovering.

JUST as the buds are starting in spring and during mild, moist weather at the end of August are the best times to transplant evergreens, according to John Dunbar.

FREDERICK, MD.—The senate has refused to reimburse Josiah A. Ramsburg for diseased trees valued at about $4,500 that were destroyed by order of the inspector at his nursery.

ROSARIANS will welcome the pamphlet "How to Have Roses," giving a list of the best sorts to grow, by Wm. C. Barry, just issued by Ellwanger & Barry, Rochester, N. Y. Copies may be had for the asking.

C. D. OTIS, president of the Louisiana State Horticultural Society, speaking at the meeting at Minden February 22, said that Prof. Van Deman has acquired a 2,700-acre tract in Concordia and is planting it to grafted pecans and figs. He will plant 25,000 of the latter this year.

A GOOD deal of damage was done to trees in the vicinity of Chicago in the storm of February 29-March 1. The sleet and rain freezing on the branches was especially injurious to cottonwoods and other trees of similar texture. In the fine avenue of these trees adjoining Jackson park, hardly a tree escaped more or less damage. Evergreens were also badly injured.

THE number of trees to be planted on the San Gabriel and San Bernardino forest reserves in California, by the government within the next few weeks has been largely increased over the number originally intended. Provision had been made for 80,000 trees, but Supervisor Charlton announces that there will be an additional 20,000 planted on the San Bernardino reserve and 25,000 on the San Gabriel reserve, making a total of 125,000 to be planted. In addition to these, the forestry bureau has furnished about 25,000 trees to individuals who own lands running back into the mountains along the edge of the forestry reserve.

Texas Peaches Not Hurt by Cold.

Chicago, Feb. 28.—The Morrill, Tex., Orchard Co., wired W. W. McFarland, president of the company, this week that the mercury went to 21° on February 20, but careful examination failed to disclose any damage to peach buds in that section. They also reported that peaches in other sections had not been injured.—Produce News.

ARLINGTON, MASS.—A. Foster Brooks Co. has been incorporated with capital stock $1,000 for landscape gardening. A. Foster Brooks is president and treasurer, Alice H. Brooks secretary.

Hopedale, Mass.

"Landscape Gardening" was vividly described with the aid of the stereopticon by Warren H. Manning of Brookline before the members of Hopedale Unitarian club February 18. Mr. Manning referred to the vast improvements that have been made to the lands in Washington, Cleveland, and other places. In 1850 the first public parks were discussed and later Central park, New York, and still later the park system in Boston were undertaken, these being the first park systems that were tried out.

The speaker told of the shores along the rivers and the edges of ponds as being first places that are secured for public reservations. This kind of work Mr. Manning says extended into many towns today and is rapidly growing. He said Hopedale was one of the first towns to establish a park system and today there are nearly 50 towns that have the park systems. He referred to the improvements to land in the state of Michigan. In referring to the value of beauty, Mr. Manning said that if it was a fit plan it was a beautiful plan. He believed that the plan should be made to fit the service in beautifying the town. He did not believe that the natural beauty of every town was appreciated. He said that the people today, who are seeking house sites, always seek for good views, the living rooms always facing the best view and the kitchen of the house being built in the other direction.

The most beautiful towns, said Mr. Manning, like Hopedale, will bring many people out from the city, who are looking for beauty. He advocated the organizing of a place where flowers can be made to grow close to the house and also connect the terraces with walks and lawns. Regarding the education of beauty, the speaker favored the pupils being taught in the public schools the value of beauty and things that will come to them in every-day life. Mr. Manning closed his remarks by showing numerous illustrations on the screen of houses and grounds that had been greatly beautified by the growing of flowers and shrubbery around the outside of the buildings.

Philadelphus Grandiflorus Laxus.

The philadelphus or mock oranges as a class are so well known in gardens that it seems almost impossible to suggest anything which is not already well known in regard to them. The object of the present note is, therefore, merely to call attention to a fine form of P. grandiflorus, known under the above name, which possesses characters which render it worthy of the notice of lovers of hardy shrubs. The flowers, which are two inches across, are more loosely disposed and are more numerous on the inflorescence, thus displaying their individual beauty much better than those of the type, while they are produced a week to ten days later. The plant is the

HORTICULTURE IN ALASKA.

White Currants Grown by Chas. Walker, Skagway. See page 272.

largest of the genus, and will quickly form a specimen 10 to 12 feet high and as much across. A fine effect may be produced by this plant when grown as a single specimen on a lawn, but the flowers being pure white, require the setting of a background of trees in order to be seen to the best advantage.—Gardeners' Chronicle, Eng.

Work of a Horticultural Society.

In a paper read before a recent meeting of the St. Louis Horticultural Society, Wm. H. Mehl made some very suggestive remarks. After reviewing the progress of the society, which he said had been very well received at the hands of the people of St. Louis, he pointed out that there was a danger of thinking too much of the flower show end of its work and not enough of the even more important side, the "city beautiful" idea. He ably explained the special lines of work that ought to be taken up, such as grading and leveling of home grounds, the making of lawns and the care of the finished garden.

Placing himself in the role of a property owner Mr. Mehl said he would locate his residence and all other buildings properly to do justice to his own taste and judgment and his civic pride. He would make the lay-out harmonious, not forgetting his neighbors' grounds and the effect it will have upon them and the street or avenue. The layman looks to books and papers for instruction and here also is where the lectures and demonstrations of an up-to-date society will help, and, by arousing interest, stimulate public sentiment in favor of beautifying homes and home surroundings. The society should approach the newspapers and get them to publish carefully drawn up sketchs and photographs of homes before and after treatment; also print and distribute in book or pamphlet form the subject matter of its lectures and addresses. Then when all these points are taken care of the society might well bend its energies towards a grand show, which will, as far as possible, outshine that of other cities and towns.

French Gardening in London.

The French Gardeners' Society of London held their annual dinner in London January 18, at the Cafe Royal, Regent street. The meeting was presided over by Harry J. Veitch, the celebrated nurseryman of Chelsea, who was supported by a large company of French and English friends. The greatest cordiality prevailed and the society's work which aims at placing Frenchmen in England and Englishmen in France to enable them to improve their horticultural education, is now a recognized institution of considerable merit. Many of the young men succeed in occupying prominent positions in the world as a result. The society receives the support of the leading nursery houses on both sides of the channel.

P.

Shrubs for New York.

The variety of ornamental shrubs which can be grown in the vicinity of New York is somewhat limited owing to climatic conditions, but in his talk at the American Institute, February 19, George V. Nash enumerated what seemed to the lay mind to be quite a sufficient number of beautiful plants, and he added that he believed many more would be introduced from northern China and Japan. The talk was illustrated with lantern slides showing the shrubs that grow in Central and Bronx parks. Mr. Nash began in the spring with the pussy willow, the earliest flowering shrub, and carried his audience through the seasons, not omitting winter.

It is not at all necessary, it seems, for the garden to stand bare and leafless in winter. In addition to the conifers, which can be arranged so as to be highly ornamental, Mr. Nash mentioned several plants that retain their foliage long after the snow flies. Other plants have ornamental fruit, like the bitter sweet and the holly, and still others have richly colored bark. The Japanese rose, besides having beautiful blossoms in summer, has bright green bark that is most effective in winter.

"If you want a beautiful fall effect on a hillside," said Mr. Nash, "you can select nothing better than the common sumach. This shrub is much despised here, but in Europe it is grown with great care and regard. For a swampy place, or a brook's edge, you can get suggestions by consulting the region in the vicinity. The elder is suitable for such situations and the swamp rose, which may be found in all our swamps, is pretty both in fruit and flower. The swamp azalea may be found around New York."

The wistaria Mr. Nash classed as a shrub and also the arbutus. The latter he has found very difficult to transplant from the wild state, while the natural growth is being exterminated by flower "prospectors." "It used to grow quite freely in The Bronx," said the lecturer, "but has now disappeared. There was one clump that we watched with much solicitude for some time, but some ruthless person came and tore it out, root and branch. Shrubs should not be planted so thickly that their individual peculiarities are lost," said Mr. Nash, "and should not be overpruned for the same reason. They should be allowed to grow in such a way as to bring out their own natural grace and beauty."

Forest Extension in Ireland.

The people of Ireland pay $5,000,000 a year for the timber which is imported from other countries. This is the penalty of failure to protect its forests. Ireland has only 1½ per cent of its land in timber and much of that small area is covered with scrub growth of little value. At the same time 23 per cent of the island is uncultivated. Few inhabited countries have been so extensively deforested.

The work of changing conditions for the better has been entered upon, however, and scientific forestry will be applied. Consul General Alfred K. Moe, of Dublin, reports the progress that has been made looking to the preservation of the few remaining forests and the reforestation of vast areas. The Irish Department of Agriculture maintains a forest school at Avondale which will have charge of the tree planting.

A special study has been made of Lord Fitzwilliam's estate which was planted to timber 50 years ago. A popular objection to reforestation in Ireland has been that forest plantations offer less employment to labor than equal areas of agricultural land. It was shown, however, that Lord Fitzwilliam's forest, although planted on poor soil not valuable for agriculture, had employed four times as much labor as has been employed upon the agricultural land, and was more profitable to the owner. Within the past year timber to the value of $50,000 has been sold from the plantation, and much remains to be cut.

F. DORNER & SONS CO., La Fayette, Ind.

Cincinnati.

STOCK MOVES SLOWLY.

Business the past week was at a standstill and it took some tall hustling to move stock. Enchantress carnations came along by the wagonload and the prices went to pieces. In fact carnations of all kinds, with the exception of white, were in oversupply and quite a few found their way into the barrel. The same state of affairs seemed to exist with tulips, daffodils and violets. Roses sold fairly well but at reduced prices; the stock had to be exceptionally fine to fetch $6 per 100. Lily of the valley, Paper White narcissi and white carnations were good property, some funeral work using these up to advantage. Another redeeming feature was the good demand for callas while Lilium Harrisii went begging for customers. Green goods of all kinds sold well, while the demand for florists' supplies was only fair.

NOTES.

Ernst Mack of Price Hill is again buying property. He recently acquired the two lots adjoining his present location and contemplates erecting a new dwelling on the property. Ernst has a good business location, grows good stock and is making money; and deservedly so for he is a hustler, who does not take all the credit for himself but is loud in the praises of his son George, who takes charge of the place when the head is away.

Wm. Dittmann of New Castle, Ind., stopped over on his way home from Florida and while he would not talk flowers hinted that he intended growing nothing but American Beauty roses, and would devote his time and entire greenhouse plant to their culture the coming season.

Carrol Kirkpatrick, who has had charge of the Rosebank Conservatories, left the place rather abruptly February 21, for parts unknown. Wm. Chissick, who has been employed here for a dozen years or more, is now in charge and the place is in good hands as Billy is one of the best greenhouse hands in this section.

At this writing, February 29, the call for stock was very brisk. The street fakirs cleaned up a great deal of the left-over stock, some nice shipping orders helped to move the fresh flowers and by night there was not much stock left in the commission houses.

Albert McCullough, president of the J. M. McCullough's Sons Co., who has been spending the past month with a party of friends fishing in the Gulf of Mexico, is again at his desk and reports having had a delightful time.

Tom Windram returned from Florida Saturday night where he had been looking over his asparagus farm.

Visitors: J. F. Herdigen, Aurora, Ind.; Victor H. Thomas of Augusta, Ky.

White Enchantress.

ROOTED CUTTINGS

$6.00 per 100; $50.00 per 1000.

E. SCHRADER, New Springville,

RICHMOND BOROUGH, N. Y.

CARNATION CUTTINGS.

We are in unusally good postion to supply exceptionally well-rooted, healthy stock. We have such a large quantity of flowering plants that we propagate only from heel cuttings from flowering shoots. Our cuttings are rooted in light, sunny, airy, houses, and we are sure will satisfy the most critical buyer.

A prominent carnation grower writes: "You seem to be **the only firm in the business that knows how to pack stock and have it reach the buyer in good condition,** and I have always found your cuttings cheaper than the same varieties at much lower figures.

While our prices may not always be the cheapest, we certainly can give, quality considered, as good value if not better, than is obtainable anywhere.

WINSOR, which we introduced last year has proved to be the finest novelty introduced in years. We think it is the most profitable variety grown to-day, considering its fine color, splendid keeping qualities and productiveness. When properly grown it leaves little to be desired, and almost every one succeeds with it.

White Enchantress, the best all-round White Carnation, on account of its large size, long stem, earliness and productiveness. Our White Enchantress exhibited at the Carnation Convention at Washington, was the only White Enchantress exhibited that received an award.

Strong rooted cuttings, now ready for delivery, from sand, $6.00 per 100, $50.00 per 1000; from soil, $7.50 per 100, $60.00 per 1000.

We offer, also, **Beacon** and **Red Chief,** from sand, $6.00 per 100, $50.00 per 1000; from soil, $7.50 per 100, $60.00 per 1000, also **Victory, Melody** and **White Perfection,** from sand, $4.00 per 100, $35.00 per 1000; from soil, $6.00 per 100, $45.00 per 1000; **Variegated Lawson, White Lawson** and **Red Lawson,** from sand, $3.00 per 100, $25.00 per 1000; from soil, $4.00 per 100, $35.00 per 1000. We can supply, also, **Winona** and **Afterglow,** at $12.00 per 100, $100.00 per 1000.

Buyers will find transplanted stock offered from soil well worth the difference in price.

F. R. PIERSON CO., Tarrytown-on-Hudson, N. Y.

SPLENDOR

Color: Light pink. Between Mrs. T. Lawson and Winsor. Nothing finer ever introduced as a commercial variety at any price.

Strong healthy cuttings guaranteed. March delivery. PRICE: $10.00 per 100; $75,00 per 1000; 500 at 1000 rates.

Stevenson Bros.,
GOVANSTOWN, BALTIMORE, MD.

Columbus, O.

BUSINESS DULL.

Trade this week has been dull. There have been a very few society events lately, not anything to compare with former years. American Beauty roses are still of poor quality but the demand is light also. Violets are of splendid quality, both single and double, prices ranging from $1 to $1.50 per 100. Tea roses are of good quality but the demand is somewhat light. Carnations are selling fine, Enchantress taking the lead. Prices range from 35 cents to 75 cents per dozen.

Geo. Bauman has been soliciting donations for a church fair at which he will have charge of the agricultural products and plants. Mr. Bauman is one of our well known west side growers.

The contract for constructing a new and much needed greenhouse in Schiller park was awarded by the service board, February 24, to W. A. Borrer and A. Feustel, at their bid of $4,925.

Members of the Florists' Club were entertained by Mrs. Griswold at the old Griswold inn, in Worthington, February 25.

Columbus Floral Co. has had large numbers of carnations on hand this week, principally in dark colors.

Albert Knopf has gone on a trip for his health to Daytona, Fla. He expects to stay about four weeks.

Graff Bros. are running heavily on single violets, which are of splendid quality.

Utica, N. Y.

Business is good, and has been better during February than last year.

Peter Crowe is cutting roses from his houses which were planted less than eight weeks ago.

Possibly the finest sight in the city at present is the large new house of carnations at Wm. Pfiefer's place. The house contains about 10,000 plants and each plant has from six to ten buds and flowers. Its beauty could not be described but is worth going miles to see.

BUD.

Utica Florists' Club.

The Utica, N. Y., Florists' Club held its seventh annual carnation meeting in Elks' hall, Franklin square, February 28, and it was in every way a gratifying success. The club has a membership of over 60 and the attendance was large. There was a magnificent display of cut flowers, mainly carnations, which were exhibited in vases placed on long tables in the center of the hall.

The exhibits included a new cerise pink carnation of very large size, called Splendor, which is not yet on the market, but will be disseminated this year. There were many beautiful specimens sent by Stevenson Bros., Govanstown, Baltimore, Md. A vase of pink carnations called Victoria came from J. H. Cushing, Quidnick, R. I., and attracted much favorable attention, as did a vase of yellow carnations, all seedlings and new ones from Paul Thompson of Rhode Island. On the same table was a vase of white carnations, President Seelye, from H. W. Field, Northampton, Mass., a large vase of Beacon from Peter Fisher, Ellis, Mass., and one of the dark crimson Harvard, from J. D. Cockcroft, Northport, L. I. A vase of Afterglow from R. Witterstaetter, Cincinnati, O., was also much admired.

A vase of the new single violet Boston, a variety which will be sent out next year, also stood on this table, from William Sim of Cliftondale, Mass. Another exhibit on the same table deserving of special mention, was a vase of Rose Rhea Reid, sent by E. G. Hill Co., Richmond, Ind. Robert Scott & Son, Sharon Hill, Pa., sent Mrs. Jardine.

Dr. W. A. Rowlands of Whitesboro had a large and beautiful collection of carnations, including numerous specimens of the following varieties: New Red (1907), White Perfection, Mrs. Patten (var), White Lawson, and two very large vases filled with Variegated Enchantress carnations extra large flowers.

L. F. Goodwin of Clark Mills displayed 75 very handsome White Perfection carnations. J. O. Graham of Little Falls showed fine specimens of Enchantress and Rose Pink Enchantress, and William P. Pfeifer of Whitesboro street exhibited superb specimens of Enchantress, White Enchantress, Rose Pink Enchantress and Winsor.

After the flowers had been duly admired and talked over all partook of a banquet. The next meeting of the club will be held at the residence of Dr. W. A. Rowlands, Whitesboro, on the first Thursday in April, at which time a winter clambake will be enjoyed.

37 Randolph St., CHICAGO.

New Orleans.

The carnival season is now in full blast, and the city is full of strangers from all parts of the country taking in the sights, enjoying the delightful spring weather and admiring the beautiful gardens in full bloom all over the city. The florists are all now doing a rushing business, both in the cut flower line and decorative work, with the prospect that it will keep up during the best part of Lent. Outdoor plants are now beginning to bloom and the gardens and parks are one mass of flowers.

NOTES.

The Horticultural Association met February 20 with Chas. Eble, president; Paul Abele, acting secretary, and several members present. Owing to the necessity of a large attendance to discuss the plans for the chrysanthemum exhibition, this matter went over to be taken up at a special meeting to be held in March.

Richard Eichling, grower for Uriah Virgin, exhibited splendid specimens of Roman and Italian hyacinths and narcissus, lily of the valley and magnificent callas.

J. A. Newsham showed very fine and extra large specimens of callas. Paul Abele, for Abele Bros., exhibited sweet peas grown in the open in winter. Newsham stated that he purposes to leave for Central America in a few days, and that he will pay special attention to orchids.

J. Lapouyade, J. H. Menard, Abele Bros. and Geo. Thomas are now doing a good business in plants at the markets.

B. M. Wichers & Co. are now growing Nephrolepis Whitmani in large quantities for their increasing trade.

P. Terrade has added a greenhouse, 25x75, to his other house.

D.

LOS ANGELES, CAL.—The Southern California Horticultural Association has been incorporated under the title of the Southern California Horticultural Society, with 10,000 shares of $5 each, which have been freely taken by the members, one to five each.

DALHART, TEX.—The Dalhart Agricultural Co., has been incorporated, with capital stock $10,000 to encourage agriculture and horticulture through the maintenance of fairs and exhibitions. The incorporators are J. S. Bailey, R. C. Balaam, R. S. Coon, W. D. Wagner and Geo. F. Atkinson.

Denver.

TRADE FAIR.

Trade has been fairly good but not so good as last year. St. Valentine's Day business was very fine showing an increase of 30 per cent over the previous year. Stock now coming in is of very good quality, especially bulbous material. American Beauty roses are in very short supply; in fact roses of all kinds are very scarce and it is impossible to get enough to fill orders. Carnations, however, are very plentiful and good. Funeral business has been very brisk during the past month, quite a number of prominent people having passed away. There has been very little going on in the way of decorations or entertaining so far this season.

NOTES.

J. A. Valentine is in the east looking over some new stock and investigating building materials, as he expects to build several new houses the coming season.

The Alpha Floral Co. has been incorporated with a capital of $5,000. The incorporators are E. S. Kennedy, L. O. Brown and W. S. McClain.

The Park Floral Co. now has two growing establishments and three retail stores in this city. PLATTE.

DAVIS BROS., Morrison, Ill.

Minneapolis.

STOCK PLENTIFUL.

The Junior ball, February 28, furnished the greatest demand during the past week for flowers. Violets were the favorite, great bunches combined with orchids, roses and lily of the valley being used extensively; sweet peas and roses came next, pink roses were used in abundance. Stock in general is plentiful, and prices are going down. Bulb stock is flooding the market, tulips, etc., selling for $2 and $2.50 per 100.

NOTES.

L. L. May & Co., St. Paul, Minn., invited the Twin City Florists Club to visit their greenhouses at Mayfield February 25, and an interesting afternoon was spent looking over the stock.

E. Nagel called a committee meeting at his greenhouses February 28, to draw up a premium list for the state fair next year, this list to be submitted to the State Horticultural Society. M.

BAKER BROS. CO., Ft. Worth, Texas.

Southampton, N. Y.

The second bi-monthly meeting of the Horticultural Society was held February 20, President Clark in the chair. There were four members elected, making a membership of about 100. It was decided to hold a show sometime in August on the art gallery grounds as these have been generously donated, with a tent, for the purpose. The subject of the evening, "Planting Trees and Shrubs," was very ably handled by Treasurer J. King. This led to a very interesting discussion until the meeting adjourned, to meet again March 5, subject "Vegetables and How to Grow Them" by J. Griffin. U. G. A.

PELARGONIUMS.

We have a fine lot of good strong plants in 3 in. pots at $1.50 per doz., $6.50 per 100, such varieties as Purity, Gloriosa Countess of Crew, Tommy Dodd, Duke of Cornwall, Lady Carrington and others.

The Grand New Double Geranium

"FENICAL"

Since I am willing to introduce this new and excellent variety to the public, I am sure it will bring joy, gladness and satisfaction to all who are willing to take hold of it.

IN SIZE IT IS THE LARGEST ON RECORD,

Clusters measuring from three to five and one-half inches in diameter.

BORNE ON LONG STEMS, FROM SIX TO FOURTEEN INCHES LONG. **Color, Bright Sage, stands the weather, foliage is fine, making a nice, bushy, shapely plant.** Plants bear from one to seven clusters at a time. It has become A STANDARD VARIETY. IT HAS BEEN TESTED FOR SEVEN YEARS TO ASSURE ITS QUALITY before being placed on the market.

A large sum has been refused for the sole right of this plant.
Try a lot of them and be convinced.
If you wish something good, now is your chance.
I must sell owing to the crowded condition of my greenhouses.

All plants will be delivered strictly in rotation.

PRICES ARE AS FOLLOWS:

Fine 2½-inch plants.....$2.00 per doz.
Fine 3½-inch plants..... 2.75 per doz.
Fine 5-inch plants..... 3.50 per doz.

Kindly remit with order.

CHAS. SHERWOOD,
WATERLOO, IA.

HUTCHINSON, KANS.—N. T. Barrett, the vegetable grower, has just finished one house 48x200 feet, for radishes and lettuce, a part of which is devoted to carnations, making 15,000 square feet in his plant, which is the largest here. He will add more glass the coming season.

DUBUQUE, IA.—Union park has been greatly improved of late and many other improvements are in prospect for the summer. L. D. Mathias, general manager of the company who is running the park, said recently: "One of the aims of the company has been to make Union park so beautiful that it will be one of the attractions of the city, one which people coming here will want to see. We are planning to have beautiful floral designs throughout the park, beautiful flowers and shrubbery that will be one of the sights of the city. During the winter we have built a large greenhouse and are raising plants so that when the time comes we can put out our own plants, and if the first that we set out are killed by a frost, we will have other bulbs and seeds to put in their places."

Stock YOU NEED NOW.

JANESVILLE FLORAL CO.,
JANESVILLE, WIS.

Vancouver, B. C.

Trade here has been very good of late, but we would be a good deal better off here if retailers would combine a little to prevent the cutting of prices and have something like a uniform standard. Much better prices could have been realised for bulb stock and carnations than have been prevailing here. Landscape work is very active, lots of estates and property changing hands, but there is considerable difficulty in obtaining good nursery stock, partly owing to the stringent regulations regarding inspection. Dutch bulbs have now to be inspected and the worst of it is that the inspection is carried on in many cases by inexperienced cranks who condemn half the goods as well as charge 5 per cent for inspection, and the florist or nurseryman is helpless. This is simply killing one of the best industries. H. C.

TACOMA, WASH.—The construction of the Seymour conservatory, to be erected in Wright park, was commenced February 18, by the breaking of the sod. It is expected that the erection of the $10,000 structure, made possible by W. W. Seymour's donation of that amount, will now be pushed rapidly to completion.

PREPARE FOR EASTER

Araucarias, Azaleas and the Cultivation of Choice Easter Plants Our Specialties.

Never mind hard times. Look for a big Easter trade. Secure your supply early. All our houses are full to their utmost capacity with the choicest plants in **bud.** Just right for Easter—in fine condition; finer than ever before. With a little forcing they can be brought into bloom at any time, according to your requirements.

Araucarias Robusta Compacta and **Glauca,** a perfect marvel and wonder of nature. We are one of the heaviest importers and cultivators of this beautiful decorative plant. Our plants are about the same in height as in width.

Robusta Compacta, 7-in. pots, specimen plants, 6-year-old, 5 tiers, 27 to 30 in. high, $2.00 to $2.50 each.

Excelsa Glauca, specimen 7-in. pots, 6-year-old (the fine bluish-green color makes or gives this variety a fine, striking appearance—sells at sight), 30 to 40 in. high, 4, 5 and 6 tiers, $1.50, $1.75, $2.00, $2.50 to $3.00 each.

Araucaria Excelsa, 6-in. pots, 4 to 5 years old, 20 to 25 in. high, 4, 5 and 6 tiers, 75c to $1.00 each; 5¼-in. pots, 3 years old, 3 to 4 tiers, 7, 8, 10 to 14 in. high, 40c to 50c each.

Azalea Indica. We make a specialty of importing every year an immense stock of the choicest varieties popular in America, grown under contract for us by an Azalea specialist in Ghent, Belgium. If you need Azaleas, don't look around in vain all over the country for bargains, but come or write direct to us. We will be able to supply you with the best obtainable in the American market; full of buds; in good, healthy condition, right for Easter; all planted in October or November in 6 to 7 in. pots.

☞ **Take Notice.** We do not sell Azaleas in the fall, having the best picked out (and having the rubbish left for Easter), but we keep them all full of buds for our customers for Easter. Mme. Van der Cruyssen (2,500 of them), this is the best double pink variety known to the market, round as an apple, covered with buds; Simon Mardner (dbl. pink), Vervæneana (variegated dbl. rose), Bernard Andreas Alba (dbl. white), Niobe (dbl. white), Deutsche Perle (dbl. white), Empress of India (dbl. variegated), Professor Wolters, and about six more varieties. Price: 6-7-in. pots, 60c, 75c, $1.00, $1.25, $1.50, $1.75 to $2.00 each.

Kentia Belmoreana and **Forsteriana,** Belgium and home-grown stock, 4-in. pots, 18 to 20 in. high, 35c: 5¼, 5½ and 6 in. pots, bushy plants, 50c, 60c and 75c each.

Latania Borbonica, 5-in., 30c.

Asparagus Plumosus Nanus Compacta, 4-in. pots, $10.00 per 100.

Dracena Bruanti, from Belgium, full of green foliage from bottom to top, 6-in. pots, 22 to 25 in. high, 40c each

Cineraria Hyb., 4-in., 10c; 5-in., 20c; 6-in., $3.00, $4 00 to $5.00 per doz.

Boston Ferns, 8-in., as big as a washtub, $1.25 to $1,50 each; 7-in., $1.00; 6-in., 50c; 5 to 5½-in., 35c to 40c.

Whitmani Ferns, 8-in., $1.50; 6-in., 50c.

Scottii Ferns, 7-in., $1.00 to $1.25; 6-in., 50c; 5½-in., 40c.

In Philadelphia there's a florist noted,
  Aschmann his name, his plants beyond compare;
To a sweet girl his heart is all devoted,
  Next rank his Araucarias, passing fair;
When seen together they're a pair so charming—
  Brimful of beauty—both he cannot keep;
So to his heart he'll hold his winsome darling,
  While you may have the Araucarias cheap.

Ficus Elastica or **Rubber Plant,** home grown and Belgium stock, 5, 5½, 6 and 7 in. pots, 30c, 35c, 50c, 60c and 75c each.

Begonia Improved Erfordii, 4-in. pots, very large, $2.00 per doz.; 5¼-in., in bloom and bud, 25c each, or $3.00 per doz. **Begonia Flambeau,** 5½-in. pots, sells on sight, 25c.

Cyclamen Grandiflora, 4-in., in bud and bloom, 20c.

Hydrangea Otaksa, 6 to 7 in pots, in bud, 35c, 50c, 75c and $1.00 each; right for Easter.

EASTER LILIES. Japan Multiflorum. of our own importation, raised from special 10-in. bulbs, 6-in. pots, right for Easter. This year I can say we have the finest lot we ever had. Have about 5,000 to offer. Please send your order in time this year, as we have such a big demand every year for Lilies that some cannot be supplied. Prices as usual. Plants above 5 buds, 10c; plants under 5 buds, 12c per bud. (Medium height).

Spirea Gladstone. 6 to 7-in. pots, large stock, right for Easter, in bud now, 50c to 75c.

Watch adv. for Hyacinths, Tulips and Daffodils later on.

Please mention if in or out of pots. All goods must travel at purchaser's risk. Cash with order, please

FLORISTS CLUB MEETING.

The special carnation meeting of the club brought out a good attendance. It was held in Peck's Summit street store. The exhibits were very scarce, in fact, it could hardly be called a carnation meeting. John Gratopp had some good flowers of Enchantress, Rose Pink Enchantress, Aristocrat and White Lawson on show. What we lacked on flowers was made up in carnation talk, a never-tiring subject with our growers. I believe they could talk it over every day, it would still be full of interest.

As our outing had been such a success, it was decided that we go as a club to visit some of our home growers next Sunday and the establishments of C. Kaminski, John Gratopp, Harry Heinl and Chas. Koelker & Sons will be looked over. The ladies of the club members sprang a surprise on us treating us to coffee and cake, which were most welcome. SCH.

Hartford, Conn.

The regular meeting of the Connecticut Horticultural Society was held in County building, February 28, President Huss in the chair. It was "Cyclamen" night and the attendance was unusually large, about 35 members being present. President Huss named Messrs. Sierman, Gerard and Vidbourne as judging committee, and certificates of merit were awarded as follows: For cyclamens, two specimen plants, C. Peterson; collection of six varieties, J. F. Huss; Cineraria stellata, J. F. Huss and A. J. Weber. For Primula obconica, collection of six varieties, P. Zuger was awarded a diploma. W. N. Shumway, Berlin, exhibited for the first time a seedling carnation of the Enchantress type, of which it is a seedling: color deep pink. Mr. Shumway has grown this carnation for five years and says it is practically a non-splitter; a good grower, and in every way as prolific as its parent. A special committee awarded this promising variety a certificate of merit.

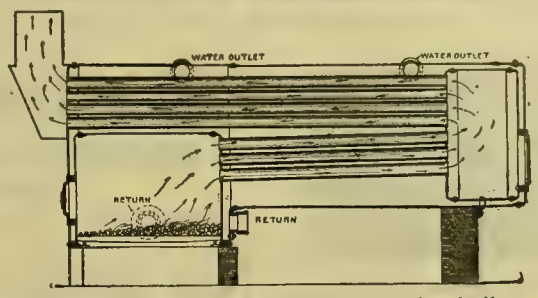
F. Roulier read an excellent paper on "Cyclamen Culture," which was of much interest, especially to the amateur members. Mr. Roulier is one of our most successful cyclamen growers, and the skilful way in which he treated his subject was heartily applauded. The paper was followed by a lively discussion on the advisability of saving old bulbs. The general opinion was that while an occasional specimen could be produced from an old bulb, the only profitable way was to grow them annually from seed. The membership of this society is steadily on the increase; 12 new members were voted in at the last meeting. A. C., JR.

SPRINGFIELD, MASS.—The Botanical Society met at the Science Museum, February 21, and heard an address on the diseases of plants, or rather a resume of his 20 lectures on such subjects by Dr. Geo. E. Stone of the Amherst Experiment Station. In an interesting and popular way Dr. Stone drew important lessons from common objects and gave particulars of the great mischief wrought in this country by disease and insects. He then spoke of various antidotes for plant destroyers, detailing a number of those whose value has been proved. He also spoke of the advantages of gardening under glass. In closing he instanced the Bliss peach orchard of Wilbraham as an example of perfect cultivation and mentioned the Miller apple orchard at Haydenville. An interesting discussion followed. The next meeting of the society will be held March 20.

THE SUPERIOR

Return Flue Fire Box Boiler.

Ask the man that knows. The names are yours for the asking of them.



12 of these were bought and used by one grower. 6 by another grower.

LENOX, MASS.—The annual banquet of the Horticultural Society was held February 15, when covers were laid for 90 guests who sat at one long table in the new colonial dining-room at the Curtis hotel, which was adorned with plants and cut flowers. Many roses, carnations and other flowers of the season were used. At each plate was a handsome gardenia. Alexander McConnachie, a charter member of the society, was toastmaster and ably presented members of the society who reviewed the past history of the organization, last year having been especially notable in growth of membership, interest and exhibitions. It was predicted that some day the society would have its own home and hall where the scope for usefulness will be greater.

STOCK OVER PLENTIFUL.

Trade the past week has been very quiet in all lines. Large shipments are being received, and the end of the week found the wholesale houses loaded with stock and quantities have gone to waste as the cold weather keeps the street men indoors. Roses are coming in crop with almost all the growers and the quality is above reproach; the prices have weakened a little with a further drop in sight. Bulb stock of all kinds, including Easter lilies, is a drug on the market, the only item that has sold well being single violets, home grown. Double violets are in oversupply. Sweet peas were never finer and clean up fairly well. Lily of the valley is hard to move and some lots have gone very cheap.

NOTES.

Chas. Bartels of the Essex Greenhouses, is sending in the finest sweet peas in this market, in all colors, including a new lavender which is very fine. His carnations also are in a class by themselves and are selling up clean in an overstocked market.

Isaac Kennedy of West Park and Lamborn Floral Co., Alliance, are sending the Florists' Exchange some of the finest roses to be seen.

The J. M. Gasser Co. showed a window the past week of old fashioned boquets which attracted a good deal of attention.

Miss Nettie Heideman, bookeeper for the Florists' Exchange, has been on the sick list for the past week.

Visitors: Reed & Keller's representatives, New York; and M. Shattles of Lion & Co., New York; Williams Bros., Lorain; M. Bloy, New Castle, Ind.

—a McCray built-to-order refrigerator—Quartered Oak with beveled mirror over display doors.

Best Results With Less Ice

The condition of your stock does not depend upon the amount of ice you use. It depends upon the *cooling* you get from the ice you use, and this depends upon the patented system of refrigeration which you find in the McCray Refrigerator. The proper circulation of pure, fresh air keeps perishable stock fragrant, and in perfect, strong condition. At the same time it uses very little ice.

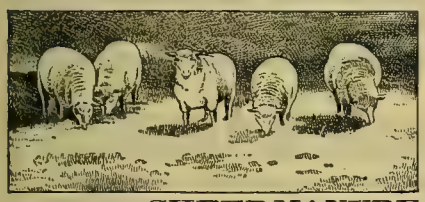
McCray Refrigerators

will give an air of elegance to your store. It will save ice for you daily. It will keep your stock right. It will help sell your stock because it will be kept in such perfect condition. Your refrigeration troubles will be over when you buy a McCray.

McCray Refrigerators are lined with white enamel, tile, opal glass, or with marble or mirrors as you prefer, and are made in a wide range of regular sizes for immediate shipment, or can be built to order for any requirement.

Don't neglect to write at once for our beautiful Catalog No. 71, giving the detail of the full line of McCray Refrigerators for Florists.

McCray Refrigerator Co., 760 Mill St., Kendallville, Ind.



DREER'S SHEEP MANURE (WIZARD BRAND.)

FLORIST SPECIALTIES 100 lbs., $1.75; 500 lbs., $8.00; 1,000 lbs., $15.00. Ton, 2,000 lbs., $30.00.

HENRY A. DREER, 714 Chestnut St., Phila., Pa.

Los Angeles, Cal.

A Florists' Club was organized here last Saturday, O. M. Morris being chairman and E. C. Morton, secretary. This is something we have needed for some time. A suitable hall will be engaged and regular meetings held which will be of an educating and social nature.

The warm weather is bringing out the flowers. Violets by the thousands are seen on the streets and in department stores five cents per bunch, 60 to 80 in a bunch.

Dr. Houghton, who is managing the coming flower show in April, is very busy these days. The doctor says he is going to have the best show ever held in the city.

J. W. Wolfskill is around again; the boys are glad to see the grand old man, though sorry to see his arm suspended in a sling.

This city is going to have an up-to-date wholesale and commission house for cut flowers, plants and florists' requisites.

Flowers, fruits and vegetables are scarce at this time, owing to the heavy rains, followed by a cold snap.

C. E. Morton at the Redondo Floral Co. has been very busy of late with large orders for funeral work.

The officers of the South California Horticultural Society held a meeting in this city February 25.

A. F. Borden, of Hollywood, is contemplating the erection of three new greenhouses.

O. C. Saakes, Spring street, has built a small greenhouse at his carnation garden.

Visitors: W. D. McRorie, representing W. A. Manda, South Orange, N. J.; A. J. Currie, Milwaukee, Wis., and W. J. Schuch, representing C. C. Pollworth & Co., Milwaukee, Wis. ED.

HOLLYWOOD, CAL.—The Womans Club will hold a flower show April 30 and May 1. The school exhibits are expected to be very interesting.

Albany, N. Y.

The Florists' Club held its second annual banquet at the Hotel Belvedere, Beaver street, on February 25. John A. Howe, Jr., formerly county treasurer, acted as toastmaster. During the evening, addresses on trade subjects were made by James Karins, with Henry A. Dreer, Inc., Philadelphia; Fred. A. Danker; Wm. C. King, a former president; Edward P. Tracey, and Fred Henkes, who spoke for the growers. A feature that added to the attractiveness of the banquet was the flowers that many of the members contributed in large vases. These were arranged at regular intervals down the long table and furnished a constant inspiration for discourse. Many prominent men were present. The arrangements for the banquet were in charge of a committee composed of Patrick Hyde, chairman; Edward P. Meaney, and Fred Henkes.

The wedding of Miss Marcia Brady and Carl Tucker of Baltimore, Md., took place at the home of the bride in this city February 27. The decorations were by Eyres and comprised lily of the valley, white lilac, white orchids, southern smilax and Asparagus plumosus in the drawing room where the ceremony took place. The gold room adjacent was decorated with purple lilac. American Beauty roses and smilax were used to decorate the staircase and clusters of this rose adorned the newel posts. The entrance hall was adorned with lilac and Asparagus plumosus and two small reception rooms adjacent were resplendent with white hyacinths. American Beauty roses were used in the dining room.

T. J. Totten of Saratoga Springs has sent to some of the retailers in this city samples of his new seedling carnation which he has not named. The flowers sent are approximately three inches in diameter and of the color of the well known variety Crane.

Amos F. Balfoort is contemplating the building of a small addition to his greenhouses on Second street for azaleas. The improvements will include also a new boiler.

SUGGESTIONS FOR PLANT GROWERS.

Hydrangeas.

Some growers are apt to forget, when they are flowering hydrangeas under glass, that the plant is practically a hardy one and that forcing, except in so far as it is necessary to get the plants on time, is not good for them. Extra heat leads to soft foliage, weak and poor colored flower trusses, no matter how good the dormant plants were. The Easter plants are now well established and in most cases will be finished for this holiday. Hydrangeas like a moderately cool house and, until the flowers show color, plenty of atmospheric moisture. At night 50° is ample, rising by day by fire heat about five degrees more, according to the weather, on bright days. When it is apparent that the roots are well through the compost and the growth is vigorous feed the plants rather liberally to ensure large, well colored flower heads. Light spraying, taking in the under sides as well as the top of the leaves, is necessary to keep the plants growing freely and discourage insects.

Begonia Gloire de Lorraine.

When potting the young plants from leaf cuttings use a compost of sound fibry loam, leaf mould and a little pounded cow manure, with abundance of clean sharp sand. Such soil will not run together readily and thus the crusting over of the surface, so troublesome with weakly rooted small plants, is to a great extent avoided. Use the smallest pots the plants can be conveniently got into as this will give an opportunity for another shift later, and each shift, if the work is carefully and correctly done, will give the plants a new start. Have everything very clean, pots, soil and benches, and stir a little soot and lime into the ashes or other material on which the plants are to stand. As long as the old leaf remains fresh and sound leave it, but remove every trace of decay at once. In potting, if crocks are not used, take a little of the roughest of the soil and place in the bottom of the pots. Set them up pot thick at first but give them a new stand in about two weeks and see that nothing is clogging up the drainage hole. Keep the largest, medium and smallest plants each by themselves when setting them up or giving them a new stand, to facilitate watering, which must be very judiciously done at this early stage.

Palms for Decoration.

The small pots that palms for decoration are usually grown in, and the amount of fire heat required during cold weather, make frequent examination for water necessary. Palms are easily overwatered, it is true, but they dry out very rapidly when in a healthy, growing condition, and the grower must be around them regularly. Not only is root moisture necessary, the atmosphere of the house must be kept moist, or healthy growth is out of the question. Damp freely all available places, dry spots on the walks and under the benches or any place where several pipes converge and cause a dry atmosphere. But avoid the hot pipes, as a steaming atmosphere is bad for any plants. The experienced plant grower does not need to be told about these things. He has a kind of sixth sense that tells him when a house is the right condition atmospherically, and this should be cultivated by those who would become expert, for nothing is more important than a properly balanced atmosphere as regards heat, air and moisture. Speaking generally, the ventilators should be slightly raised as soon as the sun strikes the house on bright mornings, but not sufficiently to stop the gradual upward trend of the temperature. If this does not rise slightly with a "crack of air" on, close the vents again. Increase the air as it becomes necessary and damp frequently. Then close soon after mid-day, again damping the dry spots. Any plants that have been long in their pots may need feeding, if it is desired to increase their size rapidly. Nitrate of soda may be lightly sprinkled on the surface of the soil in the pots and carefully watered in, or if watering cans are used, the crystals may be dissolved in the water at the rate of an ounce to four gallons, and the plants watered with this. Never water with nitrate when the roots are dry. Go over them first and thoroughly moisten them with clear water. Soot water is also excellent as a feed, made according to directions frequently given

in these columns, and a little scattered about the house mixed with an equal part of lime has also a good effect on the foliage.

Calceolarias.

If not already done, place the calceolarias in their flowering pots. These plants like a free, open compost of good loam, leaf mould, well dried cow manure and sharp sand. Drain the pots well as the roots are very impatient of stagnant moisture. The earliest batch may go into 9-inch or even 10-inch pots if large enough, later batches being given proportionately smaller pots. A very large shift is not desirable but the plants make a lot of growth at the last and should have good room. Great care is necessary with this last potting not to injure the leaves which, on well grown plants, will be close to the soil. Careless help must not be used here or much mischief results. No place is so good for the plants after potting as a cool frame or sunken house, where the heads come close to the light and where the temperature at night can be kept around 48° to 50°. A constantly cool and moist atmosphere, with plenty of air, is needed and only sufficient fire heat to keep the air moving and enable the grower to ventilate daily, especially in dull weather. If no such house or frame is at command stage the plants on a cool bottom of ashes or gravel on a bench as close to the light as possible and endeavor to imitate the above conditions. Just around now the plants often throw up flower spikes; take these out on sight and divert the energies of the plants to producing strong side growths. As these develop place a neat stake and tie to each, drawing them from the center a little, but carefully avoiding snapping them out. This treatment results in the fine spreading heads of flowers so much admired in these beautiful plants.

Plants in Small Pots.

Not only is there a distinct gain to the grower and shipper of pot plants when the pots are kept as small as possible, but the decorator finds his work much simplified. Nothing is more annoying than to have a fine palm or decorative plant in so large a pot that it will not fit into any reasonably sized vase or other receptacle, while decorative stock for the various devices, now so much used around the holidays, is worthless unless the pots are small, for sufficient to make a good display cannot be placed in these if the pots are large in comparison with the size of the plant. The point for the grower to study is how much the size of the pot can be cut down, by feeding the roots, and yet produce a well finished specimen, no matter what the variety may be. One of the greatest helps along this line is a good loam, a soil of a holding character that does not readily part with its moisture yet is not too adhesive or liable to bake and shrink from the side of the pot. Old fashioned gardeners often erred in making their composts too light. There is less risk of making it too heavy, provided, of course, that the man behind the watering can or hose can be depended upon. In a fairly heavy soil, well firmed in the pots, the roots take a good hold and will stand plenty of feeding so that fine, healthy foliage or flowers of good substance are produced, but no grower, however skilled, can produce a good plant in light, unsubstantial soil. Another aid is using broken bones over the drainage hole instead of crocks. By the time the roots get through the compost this far they are able to take hold of the bones, which are a great aid, and they will continue to assist the plant right along to the finishing stage. Chemical manures in the soil are easily overdone. They are good for the stronger rooting subjects, but it is better to leave them out than overdo them in the least. A point sometimes lost sight of in this connection is the power these manures have of breaking down the mechanical condition of the soil, rendering it close and difficult for roots to penetrate. Good, well dried cow manure on the other hand is not only a fine manurial stimulant but, for a time, long enough at least for the roots to obtain a good hold, it forms a real mechanical aid in keeping the soil open. Old, decayed cow manure, however, is not wanted. This is simply the shell that has held the nutriment. Gather the manure and dry it, over a slight heat if necessary, and it is there in a fit state for use without having parted with any of its manurial qualities. We have purposely avoided giving any specific instructions in this note as to separate plants; it is intended as a general hint to be used as circumstances dictate and more specific instructions will be given under the heading of the various plants.

Dahlia Cuttings.

Propagating Dahlias.

Under separate mail I send you a photo which clearly illustrates good dahlia cuttings. There seems to be a good deal of doubt among beginners how to get dahlia cuttings that would produce good tubers, that is, those with no tendency to come blind. Wherever one has a good stock to propagate from, the best way is to simply jerk the young shoots off as soon as of proper size. With a little experience they can be obtained just like those on the picture, which will make excellent stock. We generally throw away the first few cuttings produced, as they are too rank and do not root well. At first glance one would think this method produces but few cuttings; however, in practice, it will be found it is next to impossible to exhaust the roots. There is satisfaction in knowing that every young plant on hand will produce a fine root, against the chances of having grown a lot of fine bushes with nothing to carry over winter, which is often the result from stem cuttings. W.

CHRYSANTHEMUMS

American Varieties Grown in England.

Most of the articles written on this subject are penned at exhibition time, when the commercial or decorative sorts, as they are called, are given little attention. Taking the catalogues of two of the leading English chrysanthemum specialists, we find quite a number of American origin. While these comprise only a minor part of those listed, yet many of them have been introduced for many years, and must possess merit according to their requirements, or they would be discarded.

In the decorative section we find the following: L. Canning (Craig 1888), Ivory (Waterer 1889), Eldorado (Waterer 1891), White Clinton Chalfant; Clinton Chalfant is a yellow sport from Joseph H. White—(Hill 1892), and doubtless has reverted to the original, as the name implies. Niveus and Tuxedo (Smith 1893), Clinton Chalfant (Chalfant 1894), H. W. Rieman (Hill 1895), Agnes L. Dalskov (Pink Ivory), (Hausen 1896), Western King (Smith 1897), Harry A. Parr (Binder 1899), Nagoya (Smith 1889), Goldmine (Smith 1900), Golden Age (Smith 1904), M. F. Plant (Totty 1906). In the incurved section there are, Falstaff (May 1893), Major Bonnaffon (Dorner 1894), Mrs. W. C. Egan (Dorner 1893). Of the anemone varieties still offered, we find J. Thorpe, Jr. (Thorpe 1886), Gladys Spaulding (Spaulding 1888), Mrs. Judge Benedict (Spaulding 1889), Delaware (Pitcher & Manda 1891), Judge Hoitt (Hill 1893), Rider Haggard, disseminated in this country under the name of Mrs. F. Gorden Dexter (Pitcher & Manda 1894), Marcus Jones (Spaulding 1897), Zoriada (Smith 1899) F. J. Taggart (Smith 1903), is the only hairy variety mentioned.

In addition to the foregoing, there are several varieties imported from Japan and sent out in this country, which are still catalogued, such as, Louis Boehmer, Mrs. Alpheus Hardy, and W. H. Lincoln. Among the large flowering Japanese for exhibition use, Simplicity (Smith 1897), is the only sort found. None of the pompons originated in this country, appear in the English lists but we believe that most of these have not been tested on the other side.

In the back of Norman Davis' catalogue, varieties are mentioned for special purposes. Here we find, under the heading of "Hardy Garden Chrysanthemums" selected from all classes and types the sorts, Ivory, white and pink, and Harry A. Parr. In the 12 best for September and October flowering for pots and useful for cutting, Harry A. Parr. Among the 12 best November varieties for pots and cutting, are Ivory, white and pink; 18 for December and winter flowering, Tuxedo, Nagoya, Niveus, Western King, and L. Canning.

All varieties which flower with us after November 1, seem to be much later in England. For instance, A. J. Balfour, Dr. Enguehard, H. W. Rieman, Nagoya, Niveus and Morton F. Plant are mentioned as December flowering. ELMER D. SMITH.

ORCHID NOTES.

Notes in Season.

CATTLEYAS.

Now that orchid flowers are a recognized factor in commercial horticulture, the demand increasing each year, there are few progressive establishments that do not carry these plants in stock. The probabilities are, too, that the future will see rapid strides made both in the space devoted to orchids commercially and also by amateurs.

Cattleyas have always taken the lead here and cannot be surpassed for rich coloring, they are also the cheapest to buy and easiest to grow, and, judging by the importations promised the coming season, are as easily obtained as in the past; certainly they are promised in as large quantities as in old times. It is not intended at this time to treat on newly imported plants, this can wait until later on when they arrive, but the present is the best possible season of the year to attend to the needs of the established plants such as are in poor shape at the roots.

A cattleya should be repotted at least once in two years, in individual plants perhaps oftener, the intention being to give as often as needed material for the new roots to run into, rather anticipating this than being forced to it. Roots that are within the pot, pan, or basket, are always secure of moisture and this under modern intelligent cultural methods means food, which should always be present in the water applied. There is in this country no such time as a period of rest for cattleyas, and the quicker this is appreciated the better the success in their culture. The plants are always at work, either getting ready to bloom or recuperating after it; stint at any time shortens their lives. It is also the belief of the writer after 17 years culture of the same individual plants, many of which were years established when obtained, that some cattleyas may be induced to go on "from time into eternity" as a noted cultivator once said when asked this question. The whole truth should, however, be told, that others, say of the same batch of C. Trianæ or C. Mossiæ, will retrogress from the time they first begin to lose their old bulbs and no skill that can be applied will save them, they being constitutionally unfitted to withstand the vicissitudes of our indoor culture. The same also holds true of seedlings raised under glass; millions of germs perish before they are separable by the naked eye, but they start to grow, others pass on in the thalloid stage, and so on up to the flowering age and even here there are plants raised out of the same pod of seed that seem to hate to live. The great majority, however, attain rude health never enjoyed by imported plants.

TEMPERATURE.

The majority of cattleyas and also lælias are grown too warm in winter. We have proved that on cold zero nights, L. purpurata will grow vigorous and strong, even though the temperature falls below 50° several degrees, and this lælia is considered to need more heat than the cattleyas, coming as it does from Brazil. A maximum of 55° should be allowed in ordinary winter weather, dropping to 50° with strong fire heat, giving air when possible, and, in summer, leaving the ventilators open full at night with doors also open by day. The white Lælia anceps can be made to bloom as freely as the type by being placed outdoors all summer in partial shade, such as that of trees during midday, and all cattleyas indoors grow stouter with plenty of air and flower freely in consequence.

C. labiata will now be starting to grow and needs attention first of any. If the old material is decayed, remove it all for there will be no live roots among it, cut off all old leafless bulbs; they are no help but a decided hindrance for the growing end has to pump back vigor to them year after year if retained; indeed some clever and progressive cultivators retain three bulbs only back of the "business end," and while we are not yet converted to this, they are surely on the right track. The best medium for cattleyas to grow in is osmunda root fiber, and the same remark applies to all other orchids. We have seen the coming and going of many other materials, but our osmundas are now being exported to England in large quantities for orchid culture there, and now also the Belgians are converted to its use, and we used to send to Belgium for leaf mould—at least others did.

The use of sphagnum moss is not permissible, unless it will grow; the average hose water is death to it owing to the lime and iron present, and dead moss is most detrimental to healthy root action. Thus we see the material is simplicity itself—straight fern root. This should last four years before decaying. If sphagnum will live and thrive it is good practice to use it, furnishing an unfailing index as to the presence or absence of moisture and consequent need or otherwise. Firm potting is always desirable, pressing the material as firmly as possible around the plant. This obviates the danger of too much water being held in suspension to the exclusion of air at the roots. An inverted pot should always be used at the bottom, never a flat crock that will exclude air, and this remark leads to another, that all cattleyas do best when suspended; this has been proved many times, though suspension was first adopted in our case for the formation of a hospital for sick patients. They were beyond criticism because out of the line of vision, but they usually got well. Then difficult ones were given the privilege as well as those that were shy to bloom, and this worked well; then specially choice plants were suspended until most everything worth seeing was "out of sight."

It is the old story over again of more light needed, and add to this the better circulation of air and freedom from creeping pests, each root made being retained at least until it had performed its functions. Cattleya roots are pretty much of annual duration; lælias retain them for a longer period. Thus, at this time, before new roots commence to grow, see to it that good fresh material is ready to receive them. Water very carefully for a month or two, and if drip has saturated a plant remove to a safe place. We never tear the fiber to pieces before using, but chop it into cubes or triangles to fit the situation; nature put it together much better than we could do it. Use the dark fiber for the lower layer over drainage and the brown grade for the surfacing; the new roots take to it very kindly.

When C. labiata is repotted, C. Trianæ is usually out of bloom and may be attended to. We usually repot C. Mossiæ and C. Mendelii before blooming; they come in so late it would be wrong to disturb them, as the roots would all be active, get injured, and be an extra strain on the plants directly after blooming. The one cardinal principle is to repot all orchids when it can be done with the least injury to the roots, and the time is from now on to April 1. Seedlings and natural hybrids inherit a go-as-you-please way of living, making it essential to give them a shift when necessary, even if it be twice a year during their earlier progress; but after maturity, while they may bloom twice a year, it will be found that any necessary attention at the roots may be given during the early months of the year.

E. O. O.

CORYANTHES MACULATA.

Coryanthes Maculata.

Coryanthes maculata, meaning a spotted helmet, in reference to the helmet-like appendage, is commonly called the bucket orchid, owing to its peculiar shaped labellum. It is now in flower at the Missouri Botanical Garden, St. Louis. The genus were first described by Sir. W. J. Hooker. The species are all natives of tropical America and are dispersed over the vast territory that stretches from Santa Catherina in southern Brazil to Mexico, where they are found growing on branches of trees inhabiting the hot valleys or near the low-lying seashore, with their flower spikes pendulous and relying exclusively upon insects for their fertilization.

The genus requires considerable attention for successful cultivation. When imported plants are received they should be placed on moss in a warm house, taking care to choose a shady corner. After a few weeks, when the plants become established, they may be placed on blocks of wood or baskets, but on no account should pots be used for these plants because their flower spikes invariably penetrate through the bottom of the basket. The potting material should consist of equal parts of osmunda fiber and sphagnum moss with a little charcoal to keep the soil sweet. A plentiful supply of water should be given especially in the growing season. The plants grow admirably with us, suspended in the vanda house where there is a humid atmosphere.

The fertilization of this extraordinary genus is very interesting. Quoting Dr. Cruger's observation of Trinidad: "Large humble bees, noisy and quarrelsome, are attracted at first by smell of the flower, but the smell probably only gives notice to the insect; the substance they come for is the interior lining of the labellum, which they gnaw off with great industry. They may be seen in great numbers disputing with each other for a place on the edge of the hypochile. [I.] Partly by the contents, partly, perhaps, intoxicated by the matter they are indulging in, they tumble down in to the "bucket" (epichile) [II.] which is full of the fluid secreted by the horn-like organs at the base of the column. [III.] They then crawl along the anterior inner side of the "bucket" where there is a passage for them [IV.]. If one is early on the lookout, as these hymenoptera are early risers, one can see on every flower how fecundation is performed. The humble bee in forcing its way out of its involuntary bath has to exert itself considerably as the mouth of the epichile [A], and the face of the column [B], fit together exactly and are very stiff and elastic. The first bee that is immersed will have the gland of the pollen masses glued to its back. The insect that generally gets through the passage [IV] comes out with their peculiar appendage to return almost immediately to its feast when it is generally precipitated a second time into the bucket passing through the same aperture [IV] and so inserting the pollen masses into the stigma while it forces its way out and thereby impregnating either the same or some other flower. I have often seen this, and sometimes so many of these humble bees assembled that there is a continual procession of these through the passage specified." For convenience I have numbered the different parts of the flower so as to demonstrate the route of the humble bee.

The pseudo-bulbs are strongly ribbed and clustered and from three to five inches long, tapering upwards, bearing two lanceolate leaves 12 to 15 inches long. The flowers are of a dull brown with purple spots. The hypochile is of a bright yellow in some species according to the variety. The column is pure white. When the flowers first open, the sepals resemble a bat's wing, but in the course of a few hours they collapse as seen in the illustration. In my observation of the plant in flower at the garden the bucket is filled with the watery secretion when the flower first opens and is kept filled by the continual dripping of the hollow appendages from three to four days. G. H. P.

WREATH, BY JOHN MANGEL, CHICAGO.

Sunrise Roses and Asparagus Sprengeri over White Carnations.

THE RETAIL TRADE

Wreath by John Mangel, Chicago.

The wreath shown in the accompanying illustration by John Mangel, Chicago, was a very beautiful one, consisting of Sunrise roses over white carnations and arranged with Asparagus Sprengeri. The wreath is an excellent sample of the work carried out by this clever florist who has good ideas and carries them out well. Quite recently in this store we noted a lovely wreath of Enchantress carnations alone with a long trailing spray of violets on one side of the wreath. The upper portion had carnations standing well out and tastefully arranged with maiden-hair fern. Unfortunately there was no time to photograph this fine wreath which was one of the best we have seen for a long time, and typical of the bold and striking effects carried out here.

Fine Funeral Designs.

A truly remarkable exhibit of floral offerings was seen at the funeral of Assistant Fire Chief Kruger, of New York, at St. Thomas, P. E. Church, on February 16. The assistant chief was killed while in the discharge of his duty at a fire on Canal street on February 14. The various designs were executed from the best stocks to be found in the market. A wreath of flowers and the chief's cap were the only things on the coffin within the hearse. Two electric trucks draped in black carried great masses of flowers sent to the house. Among the tributes was a huge cross sent by the Baltimore fire department, a pillar of roses from the fire chiefs of Kings and Queens, wreaths from Commissioner Bonner, Mayor McClellan, the Liederkranz, the Short Hills, N. J., department, Col. Jacob Ruppert, Jr., and floral designs from every engine and truck company in the greater city.

Lenten Business in Chicago.

Experienced wholesalers and growers always look for a quiet time and superabundance of certain classes of stock around the first weeks in March, after which it usually improves, especially should Easter be early. This year, Easter falling late, it is difficult to forecast what will happen for the next few weeks but there is an optimistic feeling both among the wholesalers and retailers. Just now, with one or two notable exceptions, the better class stores are feeling the pinch worse than those who cater to a cheaper class of trade. Their rents and running expenses are high; they cannot afford to buy cheap stock as their customers always look for the best and such stock is always held at a good figure. Nor can they afford to offer "bargain" stock to the class of customers who are looking for it.

Still it is pleasing to note that in two, at least, of the leading Chicago stores, the early Lenten sales and the general business at the end of February have been away above the average and that, owing to reasonable prices in carnations of good quality, the profits have been better than usual. Funeral work has been the saving of many the last few weeks, using up a lot of stock that otherwise would have gone to waste. Bulbous stock, pot and cut flowers, is in most cases a drug and we shall be surprised if as much of this is grown next season. Regarding the pot stock many retailers are doubtless at fault in their methods of handling. A pot of hyacinths, tulips, lily of the valley or other flower cannot be called a very attractive object, nor are lines of them with their pots either showing or just hidden with crepe paper much better. To make such plants attractive they must be arranged in an attractive way either in baskets or some other devices. Though some attempts are made along this line really attractively shown bulb pot stock would be very difficult to find in this city, though the flowers are good and the plants excellently grown in every respect. There is room for attractively put up bulb stock without a doubt and the demand is likely to increase rather than decrease as the season advances.

Many of the less prominent stores and doorway florists are having an elegant time. A wrangle with the wholesaler in the morning seems to give a kind of fillip to the day's trade and after getting a few cents off their bill they return to work with an idea that their morning has not been wasted. The prices at which stock is marked up are ridiculously low, but doubtless this is, in a manner, a good thing for trade as a whole. People of moderate means who will not enter a florist's store in the ordinary way yet who love flowers are induced by the low figures at which they are marked up to purchase a few and the amount of stock sold at these low rates is enormous. It brings some kind of a price to the grower and is better than dumping it which would doubtless be the fate of much of it otherwise, especially at a time like the present when a facetious wholesaler was speaking of offering carnations in "carload lots, cheap to clear."

LEANING CROSS, BY JOHN MANGEL, CHICAGO.
Red Carnations and Asparagus Sprengeri over White Carnations.

WITH THE GROWERS

Wm. C. Blackman, Evansville, Ind.

The story of the growth of a florist's business is well told in the life of Wm. C. Blackman, senior member of the firm of the Wm. C. Blackman Floral Co., Evansville, Ind. Mr. Blackman was born in Mepal, Cambridgeshire, Eng., in 1837, and arrived in this country in July, 1856. In 1868 he started his present floral business, the first in this city, although J. D. Carmody's greenhouse, built in 1870, was the first of importance—with six greenhouse sash. Considering that the plant now includes 10 acres of ground and 75,000 feet of glass, the greater portion of it thoroughly up-to-date in structure and appointments, the growth of the business in a city with a present population of 75,000, is truly marvelous. Indicative of the progressive spirit of the firm, we noted a Morehead steam trap, installed some time ago. This device gives entire satisfaction.

Mr. Blackman's first lessons in floriculture were taken under Wm. G. Newitt, later of Grand boulevard, Chicago. The first greenhouses were built on borrowed capital bearing interest at the rate of eight per cent. From the outset Mr. Blackman enjoyed the confidence of everyone with whom he transacted business and that he merited this confidence is shown by the fact that the indebtedness was speedily cleared off. In his early efforts Mr. Blackman, himself a hard working and thoroughly conscientious man, was most ably assisted by a devoted wife, who died November 6, 1904. Mr. Blackman suffered paralysis of the limbs three years ago, but while no longer able to walk he enjoys excellent health and attends daily to much of the firm's business with the aid of his horse and buggy. Two sons are now his able lieutenants, Geo. H., as manager of the city store, and E. S., as superintendent at the greenhouses. In the third generation, Walter C., son of Geo. H., has charge of a very creditable section of carnations.

The greenhouses are situated on the outskirts of the city and a general line of greenhouse cut flower stock is grown. In addition to the regular city retail trade, a thriving business is done in shipping floral designs and cut flowers to points within 100 miles. Ten acres of ground have been added recently to supply soil and Mr. Blackman is considering the propriety of establishing a dairy farm which will yield needed manure, which is high in price here and difficult to secure. Good greenhouse coal (bituminous) can be had here at $1.90 per ton, delivered.

An extensive plot of peonies is cultivated and as the plants bloom early in this comparatively mild section, the returns from Chicago, to which city the flowers are shipped, are considered good.

Mr. Blackman is pardonably proud of the record that in all his 40 years' experience he or his firm have never lost $5 worth of stock by neglect.

That is the reward of keeping everlastingly at it.

Wietor Bros., Chicago.

Right now the most interesting sections of a large, modern greenhouse establishment are those devoted to carnations and the houses devoted to the day are being placed in sand and ultimately this season's plants will number at least 1,000,000, the majority of which will be sold to other growers in all parts of the country.

ESTABLISHMENT OF WM. BLACKMAN CO., EVANSVILLE, IND.
Partial View of Greenhouses.

bringing on of young stock. Wietor Bros.' place is typical and the excellent cultural conditions always maintained bring into prominent notice a few things not evidenced in many other ranges. For instance, Thos. Lawson carnation is already considered a back number. The management here also realizes that the blood of this best moneymaker of any carnation heretofore introduced is now becoming somewhat thin and that sooner or later it will have to be permanently retired. But, as seen at the present time at this place, Lawson has hardly been seen in any better form, color or other good quality. House after house is producing up to its best of other years and Lawson will be kept until another variety clearly supplants it; 43,000 plants is the number now grown and the same number will be benched this coming season. Rose Pink Enchantress, Aristocrat and Winsor share equal honors here, 5,000 each being grown. White Lawson is being propagated as heavily as possible and there will be 10,000 plants in the benches next season; the same number of White Perfection will be grown. A few White Enchantress will also be grown. About 5,000 each of White Cloud and Boston Market completes the list of whites.

Enchantress naturally continues to be a prime favorite and bench room for 25,000 plants will be accorded it. Victory is the red to which Wietor Bros. are partial; 5,000 plants are now in the benches and this number is to be just doubled. Two thousand Harlowarden concludes the list.

The roses have already set bud for a new crop. Enough are already coming in for present demands, but a very heavy crop is promised as soon as a few bright days come to fill out the buds. Interest now naturally centers in the young stock. Our illustration shows a part of the 150,000 plants that have been put into 2-inch pots. Wietor Bros. are no advocates of grafting tea roses and none are being grafted this year. Having for many years grown American Beauty so successfully it will be no surprise to learn that there are 60,000 young plants of this variety in soil. E. G. Hill's Rhea Reid (5,000 plants) and Robt. Scott & Son's Mrs. Jardine are the only novelties to be grown here this year.

Being famed as the world's largest chrysanthemum growers, the propagating benches for chrysanthemums attract all visitors. Upwards of 5,000 cuttings each

At John Scheepers & Co., New York.

The illustration herewith shows a fine batch of lily of the valley in a trial house at John Scheepers & Co.'s establishment, New York. This firm makes a distinct specialty of lily of the valley pips for the trade and owing to careful trials of the several strains from various German farms the experts know exactly which are best and most suitable for early or late forcing and for cold storage purposes and the firm is always in a position to supply the best and most suitable pips for every occasion. Scheepers & Co. strongly advise trade growers to buy the best and instance the fact of a large English grower, who annually handles 10,000,000 pips, often outbidding other firms in the open market to obtain only the best.

Then the re-selection that goes on after the pips come into the firm's hands is very rigid, in some cases only 10 per cent of the bulk turning out really first class stock. But after all, the best pays; less of such pips are needed than of poorer quality to produce a given number of fine flowers and it would doubtless be a good thing if less pips and of better quality were imported to this country. Where growers for the sake of a dollar or so per 1,000 buy and grow a poor grade of pips they have only themselves to thank if their crops turn out poor. Scheepers & Co. challenge the world as to quality. They handle only the very best and we can strongly advise growers who have had trouble in the past with their pips to give this noted firm a trial order.

LILY OF THE VALLEY TESTING HOUSE OF JOHN SCHEEPERS & CO., NEW YORK.

Soil and the Florist.

Synopsis of a paper read by L. C. Corbett, of the Bureau of Plant Industry, Washington, D. C., before the New York Florists' Club, March 9.

Natural soils do not answer the purpose of the florist and the greenhouseman. We cannot afford to take nature's product, because in few instances are we able to secure an ideal combination, strange as it may seem, for the particular crop with which we are dealing. Nature builds not for special purposes but for general purposes, hence when we specialize in the cultivation of a particular crop and place it under extreme conditions where great profit must be derived it requires other factors than those found in nature. In field practice as well as under glass, too little attention is given to ideal mechanical conditions of the soil. The mechanical condition of the soil determines, first, the water-holding capacity of the soil, and the water-holding capacity of the soil which is dependent upon the mechanical condition determines the availability of the plant food which the soil contains, provided of course the plant food is there in sufficient quantity. Other considerations are freedom from weeds, freedom from detrimental insects and germs of disease. By special methods in the handling and preparation of greenhouse soils, these requirements and difficulties can be largely attained or overcome as the case may be. The mechanical consistency of the soil can be produced by a proper combination of sand, of compost, leaf mold, peat, loam, and manure, depending upon the ideal to be attained. The available plant food can be supplied through the use of thoroughly decomposed manure, of nitrates, potash salts, and the phosphates. In general, however, it should be the aim to combine the ingredients entering into a compost several months in advance of the time when it is to be used in the greenhouse in order that nature may have opportunity to prepare the materials contained in it for use by the plant. In other words, the materials which are to be combined in the greenhouse soil should be thoroughly composted before they are used in the benches or in the pots.

SOIL BACTERIA.

Soil bacteria are of all classes, those which are beneficial and those

which are injurious to crops, to man and to animals, and it is fortunate that these are confined to the surface soil and that the water-bearing strata of the earth is comparatively free from them. In other words, the water of the soil drawn from a strata 10 or more feet below the surface is comparatively free from contamination by soil bacteria or surface bacteria, provided there is no surface drainage to it, hence the value of the deeper soil providing an uncongenial place for these organisms. In soils to which new supplies of organic matter are not frequently added these organisms after years of continuous action deplete the quantity of humus contained so that it has been found that the rich prairie soils when taken up for agricultural purposes may contain as high as 20 per cent of humus and after 20 years of cultivation this supply was reduced to 2 or 2½ per cent. An important function which these organisms play in cultivated soil is to bring the organic forms of nitrogen into forms

ESTABLISHMENT OF WIETOR BROS.. CHICAGO.
House of White Cloud Carnations.

available for plant use, which is that of nitrates. Without going into the discussion of the methods by which this is accomplished it is sufficient to say that these organisms thrive best in soils where there is an abundant supply of moist organic matter which does not become highly acid. The benefits from the use of lime, gypsum and other materials which correct acidity may largely be attributed to the benefit which they work upon these minute organisms in the soil.

The alkaline condition brought about by the application of lime and gypsum gives a more congenial home for the bacteria than do the acid conditions which are brought about by fermentation and decomposition. These bacteria work only upon the products of decomposition and fermentation and transform them into those forms of nitrogen which are available to plants. All of these steps are essential, but if one is excessive the other suffers in consequence. This operation of transforming the products of decomposition and combustion is called nitrification. If our compost heaps are made somewhat in advance of the period at which the soil is to be used in the greenhouse opportunity will be given for this digestive operation, which is carried on by the soil bacteria, to take place. Nitrification will take place, but in order that nitrification may go on it is essential that the compost heap be made not too deep and that it be kept moist rather than dry. Excessive heat is detrimental to their existence and causes a cessation of nitrification. Excessive cold operates in the same way. The height of the work is accomplished under July and August heat conditions with the normal moisture. Excessive moisture is quite as detrimental as lack of moisture so that attention should be given to the condition of the soil while it is in the compost heap in order to make an ideal greenhouse soil.

SOIL ANALYSIS.

Years ago it was thought that the chemists could supply us information concerning the composition of our soils and the requirements of the plant. True it is, he can analyze plant products and tell us of what they are composed; he can analyze the soils and tell us what they contain but his analysis is so far reaching that it does not tell us the relation which the constituents of the soil bear to the living organism—the plant. The fertility of the soil cannot be determined by chemical analysis. The plant alone is the only means of telling us what the soil contains so far as plant requirements are concerned. Mechanical analysis can tell us the fineness of the soil, the proportion of sand and of clay and of organic matter but it can go no further. For the ultimate analysis in which we are most interested we must constantly return to the plant and by noting its behavior, its growth and its color, determine from experience what the soil lacks in order that we may secure the growth desired.

As noted, the mechanical condition of the soil determines to very great extent its moisture holding properties, or in other words, its drainage. This is a very important consideration for upon the moisture content of the soil depends the soil solution which is the minute quantity of water which surrounds the soil particles and which carries in solution the plant foods. In many agricultural operations, including greenhouse work, proper moisture conditions for the plant determine more than any other factor the resultant crop, for if everything else is satisfactory, temperature, sunlight, food supply, and moisture alone lacking, none of these have any beneficial effects. In fact, as soon as the moisture supply is withheld the beneficent action of the sun becomes deleterious, the heat which we attempt to supply to stimulate growth becomes injurious and the large amount of available plant food in the soil, instead of proving a benefit becomes a factor of unrest. The temperature of the water, so long as it is above the freezing point, has no very marked influence upon the character or growth of the product. In fact, plants watered with water at 32° and those watered with water at a temperature of 70° show very little difference in the rate of growth, maturity or yield of product. The benefit which might be expected to come from the addition of warm water to the soil is only temporary. The temperature is only temporarily raised by the amount of water necessary for the requirements of the plant. When cold water is applied the temperature of the soil is for the time being slightly reduced, but it soon recovers its normal, and in the case of the use of very warm water the temperature is temporarily increased, but very quickly returns to the normal, whatever that may be, according to the

ESTABLISHMENT OF WIETOR BROS., CHICAGO.
Young Rose Plants in 2-inch Pots.

temperature at which the house is maintained, so that it has been found that the time and expense necessary in heating water for use on greenhouse crops is not justified.

SOIL STERILIZATION.

In those portions of the United States, where the soil does not freeze during the winter months, or freezes only slightly, low organisms, called nematodes, are able to maintain themselves in the soil throughout the winter. Under such environments these organisms have become parasites upon a great variety of plants and interfere seriously with the commercial cultivation of many crops throughout the southern portion of the United States, and in other sections where winter conditions of the character above described prevail. These little eel worms, by attacking the tissue of the roots of the plants, cause galls or enlargements to appear upon the roots and the normal function of the root is interfered with. In the open there is no satisfactory way of combating these organisms except in the development of resistant strains of plants. On small areas it is possible to add materials which are more or less effective in the control of these organisms, and in some instances it is possible to sterilize the soil by means of heat, but on large commercial areas this is a different question. In greenhouses, however, the problem is quite different. As has been noted the soil is prepared artificially and the question of keeping it free from nematodes is much more easily handled than in field practices. It has been determined that by freezing the soil in which nematodes were abundant they could be destroyed and a clean crop then grown in the same soil, but as not all the soil which is used in the greenhouse can be annually frozen, the idea of sterilizing the soil by heat took hold upon the growers and has been practiced with good results. The first idea was to sterilize the soil by heating it over an open fire in a shallow pan. This is effective for sand to be used in propagating beds and for sand to be scattered upon the surface of seed pans and flats where germinating seeds or spores are to be handled.

This practice is, however, almost abandoned for the seeming better one of sterilizing the soil by the use of live steam. This work can be done either upon the benches when proper provision for doing the same has been provided, or it can be accomplished by means of a specially constructed sterilizing box. If the work is to be done upon the benches it can be accomplished by the use of drain tile laid at intervals lengthwise or crosswise of the benches and provided with an opening through which a pressure hose carrying live steam can be inserted. The steam passes through the tile and out into the soil, heating it to a sufficiently high degree to destroy these organisms. One difficulty with this method is that it requires a large amount of steam and it is not easy to cover the bed so as to hold the temperature in the surface soil at the same point that it is in the deeper layers. It has this advantage, that it does not necessitate the removal of the soil, but in ordinary greenhouse practice where raised beds are used and the soil is annually removed, this advantage is of little consequence.

STERILIZING BOXES.

The specially constructed sterilizing box is undoubtedly the most satisfactory system of soil sterilization. The boxes, of which there should be two, can be constructed of such size as to enable the operation of filling and emptying to go on simultaneously; that is, while one is being sterilized the other can be emptied and refilled so that while the soil in one box is becoming thoroughly cooked the other will be ready for the admission of the steam. In the construction of boxes different plans have been followed and those best suited to the particular conditions will of course be adopted by the grower. In general, however, a box 2½ feet deep, 6 feet wide, and 12 to 16 feet in length will be found satisfactory. The steam can be admitted either through drain tiles laid in the bottom of the box, or perhaps better through 1½-inch pipes perforated 6

F. H. Kramer.
President-elect Washington Florists' Club.

inches apart, with 3/16-inch holes. The holes in the pipes should all be made along one side and in line and when the pipes are placed in the manifold from which the steam is to be drawn the orifices should all look down; the pipes being arranged at intervals sufficiently wide apart to admit of the use of a standard size shovel or spade between, and the rows about 1 or 1½ inches from the bottom of the box. The object in placing the holes downward is to prevent them becoming clogged by earth packed about the pipes. The customary method of determining the point to which sterilization should be carried is to place a medium size potato in the surface two inches of the soil and when it has become cooked by the heating the soil is considered to be sufficiently sterilized.

High pressure steam is more effective than low pressure steam for this work and the conditions usually recommended are 40 to 60 pounds pressure which gives a drier steam and does the cooking more rapidly than does low pressure. These organisms are of a low order and like all low forms of life multiply very rapidly. It, therefore, requires but a small number of nematodes to be introduced into a bench or greenhouse to thoroughly infest the entire bench or house. If it is found that the plant is infested by these enemies the precaution should be taken to not only sterilize the growing soil; but the potting soil and the sand in the propagating bench, as well, should all be thoroughly sterilized. If any one of these steps is omitted it becomes an easy matter for the nematodes to be introduced either from the sand adhering to the roots of the plants when they are transferred from the propagating bench, or through the soil used in the first handling before the rooted cuttings are finally transferred to the field or growing bench. It is necessary in the latitude of New York to make compost heaps that are to be exposed in this way not more than 12 or 15 inches in depth and 10 inches would be better.

There is an objection to this: if the heaps are exposed to the weather more leaching takes place than in deeper and more compact heaps so that it is undoubtedly a wise plan to follow the customary system of composting to make sure of freedom from nematodes by the use of steam fertilization. This of course can be carried on quite economically in greenhouses heated by steam, but where a supplemental boiler must be provided in order to secure steam at proper pressure a very considerable item of expense will be incurred. There is, however, an added advantage in sterilizing the soil over that of mere freedom from nematodes, weeds, and disease germs, all of which, or a large percentage of which, are destroyed by sterilization. Sterilized soil when steam is employed has been observed to produce a more luxuriant growth than similar soil not so treated. The process of sterilization seems to hasten the liberation of plant foods and to render the physical condition of the soil better than that not so treated. In a great majority of cases the natural processes are beneficial. Only when they become excessive in some particular, do they delay or interfere with the preparation and liberation of plant food. The grower should be on the alert to take advantage of every opportunity offered him to supplement and to stimulate the work of nature for his own benefit.

Frederick H. Kramer.

Frederick H. Kramer, president of the Florists' Club of Washington, was born at Alexandria, Va., 41 years ago. His parents were natives of Germany, and possessed that spirit of industry and thrift which is characteristic of the fatherland. Fred, as he is generally spoken of by his intimates, learned the cigar-making trade and worked at it for eight years. At the expiration of that time he went into the florist business in a small way in his home city of Alexandria. He, however, longed for a wide field and leaving the business he had worked up with his parents, went to Washington and secured employment with Nicholas Studer at $8 per month, with board. After several years with Mr. Studer he bought several greenhouses from A. Gude & Bro., and has since made additions till he now has over 50,000 square feet of glass. In addition, he conducts a store at 916 F street, N. W., and has stalls in Center Market. He is a successful grower of roses, chrysanthemums and other stocks and is an energetic salesman. Mr. Kramer is an enthusiastic sportsman and was chairman of the committee on ladies' bowling for the S. A. F. convention tournament in 1905. About five years ago he gave a handsome silver cup to be contested for jointly by the Philadelphia, Baltimore and Washington teams. At a meeting of the florists' club, July 24, 1905, he presented another silver cup to be contested for by the teams

at the convention. He is a member of the Masonic and Knights of Pythias fraternities, and on the reorganization of the Washington Florists' Club, over three years ago, was elected vice-president.

American Rose Society.

SPECIAL PREMIUMS AT CHICAGO.

For 50 blooms American Beauty Rose, the American Rose Society's prize.—$50; $25.

For display of cut roses, all varieties.—The Dorrance challenge prize, valued at $250, offered by Benjamin Dorrance; the winner to hold the prize a year and on relinquishing it to the society for another competition at the end of that period to receive a silver shield suitably engraved, as a permanent record of his having held the prize. The names of the winners will be engraved consecutively on the prize.

For outdoor roses in bloom, in pots.—First prize, by Philip Breitmeyer, of Detroit, $200 cash; also $100 cash for second prize, by Arthur T. Boddington, of New York. Exhibits to consist of 150 plants, not more than five plants of one variety; each to be correctly labeled, but may include all types and classes suitable for outdoor planting.

For best vase of Richmond, not less than 100 flowers.—By E. G. Hill Co., Richmond, Ind., $50 in gold.

For 50 blooms of any variety of American origin now in commerce.—Silver cup, value $25, offered by Alexander Montgomery, Natick, Mass.

For the largest and most varied collection of cut roses of all classes, one or more blooms in a vase, the variety to count 65 points.—Silver cup or $25 in gold, offered by W. A. Manda, South Orange, N. J.

For 25 blooms La Detroit.—Prize of $25, offered by John Breitmeyer's Sons, Detroit, Mich.

For the vase of roses showing the most artistic arrangement in the exhibition.—Prize of $25, offered by Welch Bros., Boston, Mass.

For the most beautiful exhibit in the hall; each lady visiting the show to cast a vote on leaving the hall and the exhibit receiving the largest number of votes to receive the prize.—Twenty dollars offered by Miss M. I. Hammond, Fishkill-on-Hudson, N. Y.

For 100 blooms of Killarney, $50 is offered by Robert Simpson, Clifton, N. J.

For 50 blooms of Liberty, $25 is offered by Adolph Farenwald, Hillside, Pa.

For 50 blooms of Killarney, $25 is offered by Dingee & Conard Co., West Grove, Pa.

For 50 blooms of Bridesmaid, $25 is offered by Traendley & Schenck, New York.

For 50 blooms of Bride, $25 is offered by Emil Buettner, Park Ridge, Ill.

For 50 blooms of Liberty, $25 is offered by the John Davis Co., Chicago.

For 50 blooms of Kaiserin Augusta Victoria, $25 is offered by The Globe Coal Co., Chicago.

For 50 blooms of Golden Gate, $25 is offered by J. A. Budlong, Chicago.

For 50 blooms of Ivory, $25 is offered by J. F. Wilcox, Council Bluffs, Ia.

For the best 100 blooms of pink roses in the show, $50 is offered by Poehlmann Bros. Co., Chicago.

For 50 blooms of red roses, Richmond and American Beauty excluded, $25 is offered by Poehlmann Bros. Co., Chicago.

For 100 blooms of Richmond, $50 is offered by Poehlmann Bros. Co., Chicago.

For 100 blooms of Kate Moulton, $25 is offered by Wietor Bros., Chicago, as first prize; $25 is offered by Geo. Reinberg, Chicago, as second prize.

For 100 blooms of Uncle John, $25 is offered by Wietor Bros., Chicago.

For 100 blooms of Mme. A. Chatenay, a silver cup, value $25, is offered by Vaughan's Seed Store, Chicago.

For 50 blooms of American Beauty, $50 is offered by The Mogg Coal Co., Chicago.

For 100 blooms of Bride, $25 is offered by The Pulverized Manure Co., Chicago.

For 100 blooms of Sunrise, $25 is offered by The Florists' Review, Chicago.

For the 25 blooms of Bridesmaid exhibited by growers with less than 50,000 square feet of glass, $25 is offered by Bassett & Washburn, Chicago.

For 25 blooms of Bride exhibited by growers with less than 50,000 square feet of glass, $25 is offered by Bassett & Washburn, Chicago.

For 100 blooms of Mrs. Potter Palmer, $50 is offered by S. Freeman & Sons, Chicago.

For the best new rose not in commerce and never exhibited before the American Rose Society—vase to contain not less than 12 and not more than 25 blooms.—Silver cup, value $25, offered by F. R. Pierson Co., Tarrytown, N. Y.

For 50 blooms of American Beauty.—Cyclopedia of American Horticulture by Prof. L. H. Bailey, value $30, offered by THE AMERICAN FLORIST Co., Chicago.

For 25 blooms of pink roses not disseminated prior to 1908.—Silver cup, value $15, offered by J. B. Deamud Co., Chicago.

For 25 blooms of Bridesmaid, $10 is offered by Geo. Keller & Son, flower pot

For 25 blooms of Richmond, $10 is offered by Geo. Keller & Son, flower pot manufacturers, Chicago.

For 25 blooms of Sunrise, $10 is offered by Leonard Kill, Chicago.

For 25 blooms of Uncle John, $10 is offered by F. R. Newbold, New York.

For 25 blooms of Killarney, $10 is offered by Kroeschell Bros. Co., Chicago.

For 25 blooms of Bride, $10 is offered by A. Dietsch Co., Chicago.

For 50 blooms of Mme. A. Chatenay, $10 is offered by Weiland & Olinger, New Castle, Ind.

For 50 blooms of American Beauty, two tons of florist bone are offered by Darling & Co., Chicago.

For 12 named varieties, of hybrid perpetuals in pots, $10 is offered by Kroeschell Bros. Co., Chicago.

For 25 blooms of Killarney, $10 is offered by Holten & Hunkel, Milwaukee, Wis.

For the best exhibit of cut roses, four varieties, 12 blooms of each variety, open to private gardeners only, $25 is offered by Harry O. May, Summit, N. J.

For the best 200 lily of the valley, $10 is offered by H. N. Bruns, Chicago, as first prize; $8 is offered by Poehlmann Bros. Co., Chicago, as second prize.

For 50 roses never before exhibited for competition, Heller Bros., New Castle, Ind., offer a silver cup, value $20.

Crane & Co., Jefferson street, Chicago, offer $100, the disposition of this being left to the executive.

A. L. Randall Co., Chicago, offers $10, the disposition of this being left open.

The above prizes are in addition to those already published and we look for still further additions.

BENJAMIN HAMMOND, Sec'y.

To be Done Now.

IN THE GREENHOUSES.

Avoid over-watering Chinese primulas. Keep the atmosphere fairly moist except in dull weather or where seed sowing is in progress.

Watch the seeds that are covered up and see the covering is not left on after germination has begun.

Look under the leaves of cyclamens and other plants for insects as well as on top.

Never cut back geraniums to the hard wood after the plants commence growth in spring if this can be avoided.

Pinch the young fuchsias frequently if bush plants are needed. For pyramid or naturally grown plants take the flower buds only and never pinch the growth.

Let the asparagus benches dry out well occasionally. It will not harm the plants, but will greatly help the roots.

Where hot water is used see that the fires are not driven hard on bright mornings even though the temperature may be low.

Thin the shoots a little on tuberous rooted begonias, gloxinias, gesneras and other bulbous plants of this nature.

Do not allow young carnations to get hard in the small pots. If the benches are not ready give them a small shift into larger pots.

IN THE STORE.

When using ribbon in connection with flowers see to it that it either matches in color or is a good contrast.

Plants of Azalea mollis, with their bright, yet soft colored flowers are excellent for associating with bulb stock in the windows.

Boxes that fall open when the cover is removed, showing a bunch of violets or other choice flowers, have been good sellers.

When decorating large halls or rooms always use flowers and foliage of a bold character. Large numbers of smaller flowers or foliage have not such a good effect.

OBITUARY.

L. D. Robinson.

L. D. Robinson, of Springfield, Mass., and a former member of the legislature died suddenly, February 26, at his home, 175 North Main street, of heart failure, following grip. His death was entirely unexpected, though he had been ill for some time and had lately been confined to his room. He was taken with the grip about four weeks before his death and later erysipelas developed. Death came as Mr. Robinson sat up in bed. He fainted and did not again recover consciousness.

Richard C. Carroll.

Richard C. Carroll, for 19 years superintendent of horticulture at the State Agricultural School, Hamline, Minn., died at his home, 1315 Cleveland avenue north, St. Paul, February 26. His associates at the college declare the results of his years of constant endeavor to multiply and develop the rare and beautiful flowers had its effect in leaving the reflection upon the beauty of his nature. They say he loved all that was beautiful in the world, and was never so happy as when surrounded by sunshine and the fragrant buds and blossoms that he loved so well. His work was fully appreciated by the faculty of the college, many of whom accompanied the body to Lake City.

Robert B. Lenchars.

Robt. B. Lenchars, founder of the Burns memorial fund and first president of the Burns memoral association, died March 3 at his home in Brookline, Mass., following a prolonged illness. He was 85 years old and had lived in Boston and its vicinity about 50 years. Mr. Lenchars was at one time an expert landscape gardener and following his retirement about 25 years ago became well known for his prolific writings on matters pertaining to horticulture, floriculture and arboriculture. In his earlier days. Mr. Lenchars laid out a large number of private parks in New York state. His services were in great demand and he frequently worked for prominent families along the Hudson river. He served his apprenticeship with his father in Scotland, was later bound out to another gardener and still later did work on some of the finest estates in England.

MAVOURNEEN is one of the names that has been suggested for the rose White Killarney. We approve of this name or any name that has distinction and no incumbrance. The practice has grown of late years, of calling plants or flowers by their color, White Lawson, Red Lawson, etc., and these names are to be condemned, because of the confusion and expense (telegraphic) which arises from their use.

THE National Sweet Pea Society of England will hold its annual show in London July 24.

WHAT will happen to Rhinebeck growers if this connection between violets and the divorce court keeps up?

MULTIFLORUM LILIES show a greater disposition to give way at the tips of the leaves than other varieties.

WHITE PERFECTION is perhaps the most sought for white carnation today and in the opinion of some growers young stock is worth more money than is being asked for it.

ROBT. CAMERON, of the Harvard Botanic Garden, in a recent address said that annuals are the poor men's plants and give more pleasure, are cheaper and easier to grow than any other class of plants.

CARDINAL is a superb rose without doubt. The fine flowers, produced on long vigorous stems, and deep green, handsome foliage that are now being sent to the Chicago market are about the high water mark of rose stock.

COMPRESSED AIR as a means of getting rid of the old leaves at this time on American Beauty roses is being used in one of the large growing plants near Chicago. The air is forced through the water service pipes and the hose attached in the usual way to the faucets.

THE St. Louis Horticultural Society is out with its first bulletin, a business-like looking little booklet of 16 pages, setting forth the aims of the society and giving concise instructions to home makers and gardeners, followed by a planting table for flowers, vines, trees and shrubs and plans of a 100-foot city lot, treated in various ways. The spring show of this society is in progress this week and a report of it will be found elsewhere in this issue.

The Argentine Ant.

ED. AMERICAN FLORIST:—

I wish to call the attention of your readers, and particularly that of all florists and nurserymen in the southern states, to the danger which threatens their business in the introduction of the Argentine ant. This insect has already become established at New Orleans and vicinity and while it is not known how far north it will thrive in the open air, it certainly is greatly to be feared as a pest in northern greenhouses. It is very injurious to many cultivated flowers and ornamentals, destroying the calyces, while in the south it threatens the fruit growing industry as it feeds upon fruit buds as well as fruit.

The Argentine ant is also a fearful pest in the household, and indirectly favors the development of many species of coccidæ and aphididæ. Its dissemination in shipments of groceries, foodstuffs and household goods cannot well be prevented, but precaution should be taken against its introduction in greenhouse plants and nursery stock. It is reported upon reliable authority that in many greenhouses in the infested region every plant has more or less of the ants upon it, and serious losses may result if greenhouse plants are purchased in New Orleans or vicinity.

L. R. TAFT.

Agricultural College, Mich., March 6, 1908.

Dutch Bulb Growing at Bellingham, Wash.

Various reports, some of them misleading and all more or less inaccurate, have been circulated by the Bellingham chamber of commerce, and newspapers of that locality, respecting the establishment by the government of bulb farms there. We are indebted to Dr. B. T. Galloway, chief of the Bureau of Plant Industry, Washington, D C., for the accompanying letter which shows exactly what has been done in the matter and what the prospects are:

ED. AMERICAN FLORIST:—

This department has for a number of years been trying to determine where the various classes of bulbs can be commercially produced in this country. Our results show that Holland bulbs seem to be best adapted to the Puget Sound region in the state of Washington, although very good results have been secured as far east as Spokane. We have experimental work going on at Spokane, Bellingham, and Tacoma. It is our plan at present to do some special propagating work at Bellingham on a bulb farm furnished to us by the citizens for the purpose. It will be leased by the government at a nominal rental for a period of 10 years for work in experimental bulb and seed culture.

While we believe this region to be well adapted to the culture of hyacinths and tulips and perhaps some other classes of Dutch bulbs, we have not said and do not expect that "it will within a short time become the center of the bulb industry of the world." The methods of culture must be modified if possible, so as to demand less labor, which is not at present available on the Pacific coast. More machinery must be used; transportation rates must be lowered; a class of men experienced in bulb culture must be developed. It is an industry which requires intelligence and skill, which can only be gained by experience. Even if we can demonstrate that the bulbs can be profitably grown in this territory, it will be some time before the section will supply the bulb markets of even the western portion of the United States. B. T. GALLOWAY.

Meetings Next Week.

Boston, Mass., March 17.—Gardeners' and Florists' Club of Boston,

Boston, Mass., March 21, 11 a. m.—Massachusetts Horticultural Society, Horticultural Hall, 300 Massachusetts avenue, spring show.

15 Province St. and 9 Chapman Place, BOSTON, MASS.

St. Louis.

BUSINESS DULL.

The week just ended, the first of the Lenten season, proved to be a very dull one. All kinds of flowers are now coming in. Roses and carnations are very plentiful, and prices are, therefore, down. Long stemmed American Beauty roses seem to be scarce. Lilies and bulbous stock are plentiful. Good fancy ferns are now bringing $3 per 1,000. Violets have been very plentiful and sell from 75 cents to $1.50 per 1,000. The blooms are daily becoming smaller, and it is only a question of a little time and they will be done for this season. Sweet peas are much more plentiful. At the market, flowering plants of all kinds are coming in and from now on to Easter we can look for an increasing supply. Asparagus Sprengeri and A. plumosus bunches are selling well, but trade, as reported generally by the retailers, is very slow. There has been a lack of funeral work the past week.

SPRING FLOWER SHOW.

The second annual spring exhibition given by the Horticultural Society was opened March 11 at noon at the Grand Avenue Masonic Temple, Otto G. Koenig and other officers being in attendance. The hall was very tastefully decorated and the display of palms and flowering plants was fully up to the standard. Exceptionally beautiful were the displays of F. C. Weber, Koenig Floral Co., Wm. Schray & Sons, and the Bentzen Floral Co., while the baskets of F. H. Weber and the corsage bouquets of Theo, Miller were works of art. The attendance for the first day was good. The judges were Robt. F. Tesson, A. Meyer, Sr., and Alexander Waldbart, who gave general satisfaction. Their awards follow:

PLANTS.

Collection of bulbous plants in flower, accessories admissible.—Wm. Schray & Sons, first; Koenig Floral Co., second; Geo. B. Windler, third.

Fifty foliage and flowering plants.—Wm. Schray & Sons, first; A. Young & Sons, second; Koenig Floral Co., third.

Ten geraniums in flower.—Koenig Floral Co., first.

Twelve mignonette.—John Held, first.

Twelve cyclamens.—John Held, first.

Specimen flowering plant. — Wm. Schray & Sons, first; Koenig Floral Co., second.

Display of lily of the valley.—Wm. Schray & Sons, first.

Display of pansies.—Geo. B. Windler, first.

Display of violets—Wm. Schray & Sons, first; Koenig Floral Co., second.

Rothenheber's Nurseries, and Sander's Nurseries all had fine exhibits of nursery stock.

Mehl & Muskopf had a special display of deciduous and evergreen trees, magnolias and hedge plants arranged as a miniature landscape which was much admired.

NOTES.

The Horticultural Society is certainly doing a great work in floral education and building up the trade. Special prizes are offered from April 1 to November 1 for best garden, front yard, back yard, etc., and plant and window boxes. By this means the officers are building up what this society is intended to be, one of floricultural education.

Martin Moran, well known both in the wholesale and retail trade and for years in the employ of Ayres Floral Co., is now with the St. Louis Seed Co., in the retail department. It is to be very much regretted that this company, owing ing to the rush of business, will be unable to make an exhibit at the flower show this week.

Isaac Cooper a widower 63 years old, who worked for Ben Schloomer at 7221 Florissant avenue fell dead at midnight on Monday while at his work.

The Florists' Club will meet next Thursday. A rose show will be the feature.

Ellison Floral Co. was very busy with a ball last week at the Louis club.

Visitor: Geo. A. Kuhl, Pekin, Ill.

W. F.

Grand Rapids, Mich.

BUSINESS GOOD.

February certainly was the worst month of the winter by all odds; no let up from beginning to the end. Blizzard after blizzard, rain, snow, then 10° to 20° below zero. Every florist in this vicinity had plenty of work to keep warm, but no fatalities except some minor instances from heavy snow. Business has been very good so far and St. Valentine's Day brought an extra good trade. There is now at all the stores and greenhouses a heavy stock of carnations, and as there is very little outside trade just now, quite a number goes to waste. Bulb stock simply wont go; usually the output has been Chicago, but that market is simply out of the question. One firm who has 20,000 lilies, says they do not bring two cents a flower; that means a great loss. The department stores are handling a great many carnations and bulbous flowers which helps some, but they are sold in large quantities and at such very low prices that it hurts the regular store trade.

NOTES.

Eli Cross, has a very fine house of 10,000 lilies which will be in steady crop until Easter. He has thrown out one house of carnations and planted it to early cucumbers. A house of California violets are extra fine.

Crabb & Hunter Floral Co. is very busy just now with out-of-town orders. Arthur Crabb, secretary of the company says that trade so far this winter has been very satisfactory.

Henry Smith has just planted a 300-foot house to Kaiserin, La France and Richmond for summer bloom; they are very busy at the store on funeral work.

Peter Kunst's Sons are sending in some very fine Lady Bountiful and Lawson carnations. They are very busy with bedding stock.

James Schols states he has had so far a good season in violets. James Schols, Jr., has spent a week in Detroit with his sister.

WE ARE ON WITH A BIG CROP OF

EXTRA FANCY RICHMONDS

All other **Roses** in big supply. **Carnations,** too, are in full crop with us.
We can take care of your orders, large or small. Let us have your regular orders.

PETER REINBERG, 51 Wabash Ave., Chicago.

The Grand Rapids Floral Co. does not make a very loud noise, but is doing a very nice business. B. S.

HORTICULTURAL SOCIETY.

The Grand River Valley Horticultural Society held its March meeting at the home of John B. Martin, with "Glass Farming" as the general topic, under the leadership of Chas. W. Garfield. In opening the discussion Mr. Garfield referred to the possibilities in gardening under glass for the young man who has energy and industry with a good knowledge of the business, and mentioned several who, starting with nothing but willing hands and good head-pieces, had within 10 years accumulated from $10,000 to $20,000.

Miss Jennie Livingston spoke on "My Experience in a Small Greenhouse" in which she had been very successful in growing violets, sweet peas, pansies, lettuce and seedling flower and vegetable plants. The violets were transplanted into the houses in July and by September flowers began to show on the single varieties. Lettuce was grown in 2-inch pots between the violets. Clarence Hills spoke of "The Window Garden as a House Accompaniment," and told how flowers could be grown in window boxes. He had also built a small greenhouse in which he was able to grow quite a variety of flowers and to force vegetables for his table. He had even been able to grow a large collection of orchids with considerable success.

"The Hotbed" was the subject of the talk of Thos. Gunson, the instructor in floriculture at the Michigan Agricultural College. After explaining the methods of constructing the beds and preparing the heating material, he told of the use of the hotbed for growing lettuce, radishes and other vegetables in the spring, as well as for starting various bedding and vegetable plants. The hotbed was treated as a very useful adjunct to the greenhouse for a florist or gardener, as well as being almost indispensable to the amateur.

Miss Madge Dolan told "How I Came to Start My Greenhouse and What I Am Doing with It." Although busy during the day as a bookkeeper, she had always had a love for plants and spent her spare time in the garden. Believing a small greenhouse would not only prove a profitable venture, but afford her pleasure, especially during the winter, she has erected a small house in which she is growing a variety of crops for which she finds a ready sale at remunerative prices.

"Some of the Forward Movements in Glass Farming" were enumerated by Prof. L. R. Taft, who spoke of the increase in the acreage devoted to the production of vegetables and flowers, and the developments along the line of greenhouse architecture, such as the introduction of iron for posts and purlins, as well as for gutters, rafters, sills, and even for the ridge and sash-bars in some cases. Cement is now being extensively used for walls, beds and benches, and the size of the glass multiplied nearly tenfold from what it was 40 years ago. This enables the florist, with improved heating and ventilating apparatus, to give each variety of plants the exact conditions it should have for its perfect development, and by proper attention to supplying the proper soil, and to giving the plants the amount of water and plant food required, the development has been so great that it is hard to recognize some of the new and improved varieties of today.

Frank J. Cook, in speaking of "The Outlook, Who Will Succeed?" claimed that although the prices rule low at the present time, it is caused by the hard times. This condition cannot last long and everything indicates a great increase in the demand and better prices in the near future. The man with up-to-date ideas, who makes a study of his trade will succeed. Eugene Davis and other speakers spoke in a hopeful way of the future of the greenhouse industry in this locality. SPECTATOR.

The Florist Mariner.

The swarthy bee is a buccaneer,
A burly velveted rover,
Who loves the booming wind in his ear
As he sails the seas of clover.

His flimsy sails abroad on the wind
Are shivered with fairy thunder;
On a line that sings to the light of his wings
He makes for the lands of wonder.

He harries the ports of the hollyhocks,
And levies on poor sweetbrier;
He drinks the whitest wine of phlox,
And the rose is his desire.

He woos the poppy and weds the peach,
Inveigles daffodilly,
And then like a tramp abandons each
For the gorgeous Canada lily.

There's not a soul in the garden world
But wishes the day were shorter,
When Mariner B. puts out to sea
With the wind in the proper quarter.

Or, so they say; But I have my doubts;
For the flowers are only human,
And the valor and gold of a vagrant bold
Were always dear to woman.

Out in the day, hap-hazard, alone,
Booms the old vagrant hummer,
With only his whim to pilot him
Through the splendid vast of summer.

He drones along with his rough sea-song
And the throat of a salty tar,
This devil-may-care, till he makes his lair
By the light of a yellow star.

He looks like a gentleman, lives like a lord,
And works like a Trojan hero;
Then loafs all winter upon his hoard,
With the mercury at zero.

—VAGABONDIA.

CLEVELAND, O.—The Home Gardening Association began its distribution of seeds in every public and parochial school in the city March 2.

GREENHOUSEMEN!

The Perry Pneumatic Water System.

THE Perry Pneumatic System absolutely eliminates the storage of water. Consider what this means; consider what must be the interior state of a tank that has done duty for years. One glance at the inside of such tank would be the most convincing argument and the strongest object lesson that we could give in favor of the Perry Non-Storage System.

The distribution of water under pressure, **without storage**, was made possible through the invention of the Perry Pneumatic Pump. Placed in the well, or any source of water supply, this pump is operated by compressed air, which, by means of an automatic valve, forces the water alternately out of the two cylinders, producing a steady, continuous flow at high pressure.

It is the only pump that will maintain an evenly high pressure of water at the faucets. It operates only when water is drawn, starting automatically when a faucet is opened and stopping when it is closed.

The equipment consists of any motive power capable of one-half h. p. or more, a small air compressor, a storage tank for air, a Perry Pneumatic Pump and the required piping and faucets.

The Power, Compressor and Tank may be located at any convenient place. The Pneumatic Pump is submerged in the well. Having connected these properly and started the Compressor, the air is stored in the tank to any pressure desired, then the Compressor is stopped. This compressed air is now stored power, which operates the pump and is used only when water is drawn from the faucets. The Compressor need not again be started until the tank requires recharging. A pressure Reducer on the air line maintains an even pressure of water at the faucets, regardless of the amount of air pressure in the tank.

Now, the questions naturally arise — What is the efficiency of the Perry System, and how does its capacity compare with that of others?

The Perry System has a much greater capacity than any water storage system can possibly have, for the simple reason that the entire volume of the tank is charged with air to a tension that will deliver much more water than the tank would hold. With the water storage system only two thirds, at most, of the volume of the tank is water and, therefore, that is all that can be delivered.

To demonstrate — Suppose we use a 500-gallon tank for our air storage and charge it to a pressure of 70 pounds, and assume that we must deliver the water thirty feet above the source of supply: This 500-gallon tank, with one charging, will deliver over 1,000 gallons of water. At a lift of ten feet this same tank, at like pressure, will deliver nearly 1,700 gallons. By increasing the pressure to 100 pounds, 2,500 gallons can be delivered with this 500-gallon tank.

The element of "elasticity" in the Perry Pneumatic Water System is perhaps its strongest feature in point of practicability. If a Perry System has been installed to supply well water, and at any time it is desired to have soft water in the house, it is merely necessary to add the required air and water piping and a Pneumatic Pump for the cistern; or, more wells may be added to the water supply, making the System as extensive as there is need for, using the ONE ORIGINAL POWER STATION.

With a water storage system, this would be impossible, as it would require two separate and distinct water reservoirs or hard and soft water.

POWER

The power necessary to operate a Perry Pneumatic Water System of minimum capacity (500 gallons per hour), in very few cases exceeds one-half h. p. and this work can always be added to the load of an existing power equipment. In cases where new power is installed, the expenditure is very low, as only the smallest type of engine or motor need be used.

For larger Perry Plants the power required is proportionately small, as 10 h. p. operates a system having a capacity of 300,000 gallons per day.

When a Wind Mill is used, it need not be placed over the well, but may be located at any distance necessary for good exposure. We make a special, patented air compressor for wind mills that adjusts itself automatically to the speed of the wind, taking in a large volume of air in a high wind and diminishing the amount of air compressed as the wind decreases.

When the Compressor is operated by an Electric Motor, a much smaller air reservoir may be used, as our Automatic Electric Controller keeps the air pressure up to any given tension. For instance, if it is desired to keep the pressure between a minimum of 40 lbs. and a maximum of 60 lbs., the motor will stop automatically when 60 lbs pressure is reached, and will start automatically when 20 lbs. pressure has been used. This Controller operates perfectly at any adjustment, and can be set to "cut in" and "cut out" at a variation of 1 lb. if desired.

The Perry Pneumatic system is adapted to a varied number of conditions. We have associated with us an Engineer who has been recognized by the United States Government as an authority on water problems. His advice and experience are yours for the asking.

Chicago.

MARKET VERY QUIET.

The market conditions of the past week have only been a logical development of those of the week previous. The carnations were more than plentiful and roses were coming on. Carnations are still over-plentiful, although the supply does not quite reach the proportions of the glut of a week or 10 days ago. White are, in some instances, held back in the hope of realizing better prices for St. Patrick's Day. Prices are still at a very low level, excellent stock being offered in 1,000 lots as low as $10 and $12.50 to make a sale. Of course strictly fancy and selected stock brought better prices, white, Lawson and Enchantress hold up best. Roses are at last coming in big quantities, all growers seeming to be in crop at once. Long American Beauty is fine in quality with prices weaker. Bride, Bridesmaid, Richmond and Killarney are also of excellent grade and prices shaded a bit from those of a week ago. The demand for bulbous stock does not seem to improve much if any. Callas and Harrisii lilies are particularly noticeable, all ice boxes storing more or less of them. The milder weather seems to have created some demand for violets, commission dealers having sold out more closely than for several weeks past. While prices are still low they are slightly firmer. Taking the market as a whole and very much in all classes of stock the volume of trade is about as large as it was a year ago, but prices are much lower, especially in carnations which average about one-half their values of a year ago; consequently sales do not total the money expected by growers.

THE CLUB MEETING.

The Union hotel, the new meeting place of the Florists' Club, attracted a good attendance to the special meeting held March 5. This special meeting was called primarily to discuss the matter of changing the place of meeting and to change the meeting night from the second Thursday to the first Thursday of the month. The members in attendance voted in favor of the proposed changes and they will be adopted when the amendment to the by-laws, as to the time of the meeting, has been voted upon at three regular meetings. The new meeting place is located at 111 Randolph street, second floor.

Among the new members elected were John Kruchten, 51 Wabash avenue; Herman Schiller, 897 W. Madison street; A. G. Schillo, 218 Mohawk street; W. G. Hening, of Blue Island. Applications for membership were filed as follows: John Michelson, 32 Randolph street; R. Schiller, 890 W. Madison street; Chris. Peterson, 1551 Kenmore avenue; Harry P. Prescott, Twenty-second and Halsted streets; Henry C. Blewitt, Des Plaines; Emil Pielke, Geneva, and A. Aggerholm, Onarga.

Aug. Poehlmann, for his committee, reported on the coming annual exhibition and convention of the American Rose Society, to be held at the Art Institute March 25-27, in co-operation with the Florists' Club, stating that in addition to the numerous special prizes already announced, amounting to over $600 in value, there had been received one amounting to $100 from R. T. Crane Co., $10 from the A. L. Randall Co., and silver cup from Heller Bros., New Castle, Ind. The banquet, to be held in connection with the exhibition, was also discussed.

The committee on the rose show met Monday noon at the Union restaurant to further final arrangements for the exhibition, including the matter of tickets and advertising. August Poehlmann, J. C. Vaughan, Leonard Kill, Geo. Asmus, Jas. Burdett, T. E. Waters and N. H. Carpenter were present. The committee will meet again next Monday at 12 m. at the same place.

Growers may obtain entry blanks for the exhibition of the American Rose Society to be held March 25, 26 and 27, by addressing T. E. Waters, secretary of the Florists' Club, 21 East Randolph street.

NOTES.

Windland & Keimel is the title of a new firm of wholesale growers at Elmhurst, which has secured 4½ acres of land and is erecting four houses thereon 25x200 feet, for rose growing, making specialties of Richmond and Killarney. Mr. Keimel, formerly with Poehlmann Bros. for a considerable period, is managing partner of the concern, and is well known as a successful rose grower. The present condition of the building operations indicate that the place will be in working order about May 1. Grafted stock will be used exclusively.

Mrs. George S. S. McReynolds, whose alleged extravagances in the operation of a violet farm at Highland Park are said to have been in part responsible for her husband's downfall, was granted a divorce March 5 by Judge Gibbons. Mr. McReynolds, formerly a well-known board of trade man, was convicted of issuing fraudulent grain receipts, and is serving a term in the Joliet penitentiary.

The J. B. Deamud Co. has been showing a vase of A. E. Hunt's new salmon pink seedling carnation. This is a splendid keeper and is known to have attained a diameter of 4¼ inches. The petals are fringed.

Wm. McGovern, formerly with growers at Chatham and Madison, N. J., is now with Poehlmann Bros., succeeding W. J. Keimel. Mr. McGovern is favorably known as a rose grower in the east.

Wietor Bros. will have a fine lot of white carnations for St. Patrick's Day. They also have an excellent crop of American Beauty roses to cut from.

The Geo. Wittbold Co.'s giganteum lilies for cutting at Easter are coming along in fine shape and promise an excellent cut at just the right time.

Superintendent Jensen of West parks entertained a committee of the Peoria Park Board last week who visited the city inspecting playgrounds.

Forty carloads of Umbach's tufa stone have been used by Superintendent Jensen in the rockery work of the new conservatories at Garfield park.

The spring crop of American Beauty roses is now coming in with Bassett & Washburn and a large quantity of long stems are being cut daily.

Lacey Young, who had been confined to his room for 10 days with grippe, was out again Monday. He left that night for Thompsonville, Mich.

John Sinner, of Sinner Bros., instead of growing Killarney roses as so many growers are now doing or about to do, will grow more Bride.

Phil. Foley, despite the many worries incident to his business, is not losing any flesh, turning the scales now at 335 pounds.

Judging from the way that supply orders are coming in it appears that florists are preparing for a good Easter trade.

Geo. Reinberg is still cutting some fine Cattleya Schroederæ. Bride, Bridesmaid, and Richmond roses are all in excellent crop.

Frank Johnson, of the A. L. Randall Co., left Monday night for a two weeks' business trip.

Peter Reinberg has a fine crop of Mrs. Marshall Field roses coming on.

NATIONAL SEED CO., 117 5th Ave., CHICAGO.

Chicago Notes.

John T. Withers, of Jersey City, N. J., gave a most interesting lecture on the care of trees at the Academy of Sciences, Lincoln park, on the evening of March 7, to a very attentive and deeply interested, though not large, attendance. So busy was Mr. Withers answering questions after the lecture that it was very difficult to get hold of him, showing the great interest that trees have for a number of people. We refer to his lecture more fully in the nursery trade news, page 352.

Barney Myers, manager of W. J. Palmer & Sons' greenhouses, at Lancaster, N. Y., who spent a few days in the city visiting the leading growers, returned to his home March 9 well pleased with his visit. Mr. Myers, who is trustee of his township, has been 24 years with his present employers and is not now looking for a new job. That is a record which speaks well for Barney as well as his employers.

The E. H. Hunt corporation has just received a consignment of silk ribbons in a variety of new shades, including Enchantress, Killarney, Uncle John and American Beauty. All these ribbons show a skilful blending of the lightest and darkest shades in each class.

Visitors: H. Will and Ralph T. Latham, of Will Bros., Minneapolis, Minn.; Joseph Pollworth and Will Kennedy of C. C. Pollworth Co., Milwaukee, Wis.; J. T. Withers, Jersey City, N. J.; I. C. Kemble and wife, Marshalltown, Ia.

Kansas City.

TRADE FAIR.

The most noticeable feature of last week's trade conditions was the general falling off in business, marking the Lenten season, the observance of which is becoming more strict each year. In the small retail stores, the conditions appear altogether different, the effect hardly being noticable. Perhaps it is well that the period occurs at this time of the year, giving the craft opportunity to rest and prepare for the days and nights of hard work in handling the rush of business at Easter. Prospects are for a prosperous condition at that time. A glance into the "flower factories" will convince one that conditions are more promising there than ever before. At present stock is in good form, especially the staples. Roses in all classes, save American Beauty, are plentiful and remarkably good. Carnations are better than at any time this season, but not so plentiful as they have been, which accounts for their upward inclination in price. Bulb stock cannot be very highly commented upon, although a slight improvement is apparent. Some growers assert their intentions of cutting out this class if an improvement in both quality and demand is not soon occasioned. Violets have begun to show the effects of the bad weather and unless a change comes they will be out altogether in a few weeks. Sweet peas have been in good demand and some good stock has been noted. Smilax is scarce at present.

Alpha Elberfield and wife returned recently from a short vacation spent in the south, which included a visit to New Orleans for the festivities. Mr. Elberfield reports a fine trade during his absence.

It is rumored that a florist has the option on one of the rooms in the Scarritt arcade on Walnut street. In one instance this location proved a good one and there is no reason why it should not be more desirable at present on account of the great improvement in the locality.

K. C.

Carnation Exhibition at Ithaca, N. Y.

The horticultural department of Cornell University held its fourth annual carnation exhibition March 4-6. The exhibit was in charge of the students in floriculture, who managed, staged, and judged the blooms. The exhibit was purely for educational purposes and no prizes were offered. However, many growers took advantage of the opportunity to place their stock before a class of interested students.

The exhibition was well advertised about the city and many visitors were present during the three days. After the exhibition the blooms were put to good use by the students, in packing demonstrations, design making, etc. At the weekly meeting of the Horticultural Club (Lazy Club), carnations were the subject of discussion. An interesting talk on carnation breeding was given by Dr. Weber, and the varieties from a commercial point of view were discussed by L. D. Batchelor.

Among the exhibitors were C. W. Ward, of Queens, whose two winners at the Washington show, Mrs. C. W. Ward and Alma Ward caused a great deal of comment and expressions of admiration from the visitors. His President and Beacon also showed excellent growing.

R. Witterstaetter, of Cincinnati, O., exhibited Afterglow which showed itself to be one of the coming varieties.

The excellent scarlet variety, Andrew Carnegie, was exhibited by the Chicago Carnation Co., Joliet, Ill. The blooms made a fine showing and were much admired by the visitors.

F. R. Pierson, Tarrytown on Hudson, sent a very creditable exhibit of Variegated Lawson, Enchantress, Winsor, Beacon and Red Lawson.

The horticultural department of New Hampshire College exhibited a very interesting lot of seedlings with their pedigrees attached. Many of these give promise of becoming good commercial varieties. They made a very creditable showing for the plant breeding department of that institution.

John E. Haines, Bethlehem, Pa., exhibited a fine lot of well grown blooms. Among the most prominent were Pink Imperial and Variegated Imperial which showed a remarkable stem and very durable bloom. His bright scarlet variety, John E. Haines, White Perfection and Light Pink Seedling No. 102, made an especially creditable showing.

James D. Cockcroft, Northport, exhibited Carnation Harvard in excellent form.

Frank H. Kimberley, New Haven, Conn., staged an attractive class of Enchantress and White Enchantress, also the violet Marie Louise.

Among the varieties exhibited by the horticultural department of Cornell were Harlowarden and Mrs. Thos. W. Lawson.

New Castle, Ind.

We have experienced some very bad weather of late. March to date has been decidedly gloomy, raining or snowing almost continuously with occasional sunshine. The dark weather has had practically no effect on the stock in this locality and a visit to the various establishments found everything (with the possible exception of American Beauty roses) in a very healthy and good growing condition.

MILFORD, CONN.—Roger Comstock is ill at his home.

PATTERSON, N. J.—The Second Ward Dahlia and Flower Growers' Association entertained a large number of friends at a smoker and entertainment in Mungersdorf's hall, 106 Redwoods avenue, February 28. This was the first affair of the kind given under the auspices of the association and it was a success. Walter Hickson, president of the association, acted as chairman for the evening.

BUFFALO, N. Y.—The practice of collecting and selling frames that have been used for floral designs from the cemeteries outside the city has become frequent and the health authorities are taking the matter up as they say it constitutes a grave danger to health. There was formerly a law forbidding this practice, but it was repealed in 1886. The health authorities are satisfied that such floral frames, which have been on caskets and in rooms containing the body of a person who has died of a contagious or infectious disease, are capable of retaining disease germs and of spreading disease on that account. Hence, an appeal is to be made to the state health authorities to have the old law revived.

CUT FLOWERS received twice daily. Can fill your orders to your satisfaction. Also headquarters for Wild Smilax, Boxwood, Galax Leaves, Hardy Fancy Ferns. Prices quoted on large quantities.

JACKSONVILLE, FLA.—Sawyer & Payne have completed arrangements to erect in Evergreen cemetery five large greenhouses for the growth of flowers and plants. This firm has also secured the services of A. N. Duncan, who has till recently been employed by C. D. Mills, a thoroughly good grower of plants and trees.

New York.

LENTEN BUSINESS.

The advent of Lent has made no marked change in the condition of the cut flower market. There have been days in which conditions were below the average, poor as that is, due more to bad weather and other incidentals than to the donning of sack-cloth and ashes by the society folk. Prices seem about as low as they can get and nothing short of a miracle can raise them again this season, possibly excepting a few Easter stocks. Between the beginning of Lent and an increase in the supply of American Beauty roses, the price of the best, has dropped from 50 cents to 25 cents. It was supposed some time ago that nearly everything had struck bottom, but it appears that there were depths not then sounded. Further comments on the condition of the market, would merely be platitudes, excepting that other stocks are in the same dismal condition. There was considerable activity on Saturday, but it was a mere scramble to unload, values being out of the question.

FLORISTS' CLUB MEETING.

The monthly meeting of the club was held on the night of March 9, in the Murray Hill lyceum, President Weathered in the chair. While the attendance was fair it was not what it should have been considering the previous announcements that Prof. Corbett, horticulturist, of the Department of Agriculture, Washington, D. C., would lecture on the preparation of soil for greenhouse purposes.

What the meeting lacked in numbers, however, was supplied in the interest and enthusiasm of those present over the speaker's masterly treatment of his subject. At the close of Prof. Corbett's address there were questions and discussion, W. R. Du Rie, John Birnie, E. V. Hallock and Patrick O'Mara participating. Again taking the floor, Prof. Corbett said, among other good things, that the department with which he is connected is at all times ready and willing to assist the growers of New York or any other state, in scientifically solving problems that may confront them in the selection and preparation of soils. He advised some form of co-operation among florists, to the end that the services done for a few would benefit many. He was tendered a vote of thanks.

Chairman Sheridan of the committee having in charge the recent club banquet made his report, from which it appeared that in proportion to membership in the club, there is no wild and tumultuous enthusiasm for banquets. Vice-president Marshall and others talked of the club's outing which will be held July 1 at Witzel's Point Grove. A hearty co-operation in this affair will be sought from the members of horticultural societies and clubs in the vicinity of greater New York. There was considerable talk on bowling, with no definite conclusions, though it seems plain that on this question the club has cold feet.

Anton Schultheis of College Point, exhibited fine plants of his imported polyantha rose Apple Blossom. William Eccles, gardener to Mortimer Schiff, Northwood, Oyster Bay, exhibited remarkably large blooms of Beacon carnation. W. A. Manda exhibited his pink seedling carnation No. 20. Arthur T. Boddington exhibited primulas "Queen of the Whites."

NOTES.

The sales of the Fruit Auction Co., Franklyn street, will present an opportunity for the proper disposal of the product of the growers hitherto unequalled. Evidently the sales will be conducted with due regard to the rights of the consignor as well as the purchaser and the establishment will doubtless prove a great help in disposing of stock.

Hanft Bros., are now well settled in their new store corner of Sixty-second street and Madison avenue. Viewed from the avenue, it is a broad expanse of plate glass; a crystal palace is not an exaggerated term for it. The firm deserves and is receiving hearty congratulations on their splendid enterprise.

Roger W. Peterson, son and representative of J. A. Peterson of Cincinnati, O., spent some time in this city during the past week. The Peterson range has attained national celebrity for the quality and beauty of the flowering and foliage plants which it sends out.

E. H. Smith who has taken the store on Twenty-ninth street formerly occupied by Chas. Millang, has got everything in good shape and opened with a good stock of cut flowers, flowering and foliage plants.

Russin & Hanfling, the supply firm of 114 West Twenty-eighth street, have had a force of carpenters at work enlarging their facilities to handle the Easter business. They are busy and do not talk hard times.

Wm. Elliott & Sons' spring plant auctions will be inaugurated March 17, in the morning, and shamrocks and many other good things will be plentiful.

There is considerable complaint from the growers who force bulbs for this market that a large proportion have turned out worthless.

Buffalo.

TRADE VARIABLE.

Weather conditions are about as variable as the trade. Lent is with us and society away from us. Funeral work has been quite good and plenty of stock. Prices are away down on some certain article every day which has a good effect as far as drawing a crowd and making the florists think they are busy.

NOTES.

On Friday evening the annual election of the Florists' Club was held at Kastings' hall. After routine business and the election of 23 new members, making a total of 43 new ones the club got down to the election of officers when the following were elected for the ensuing year: Chas. H. Sandiford, president; David J. Scott, vice-president; J. Roland Cloudsley, secretary; E. C. Brucker, financial secretary; Wallace Eiss, treasurer. Trustees—W. F. Kasting, W. A. Adams, C. H Keitsch. The only contest was for vice-president, when D. J. Scott was opposed by Geo. McClure, Jr.

After the election the committee on entertainment gave the members a good time by having two good boxing bouts and a wrestling match, also some fine singing. At the conclusion of the entertainment all adjourned to the banquet room where a bounteous repast was served. When the cigars were lighted Ex-President Neubeck who acted as toastmaster, in a few well chosen remarks on hybridizing and the results with the B. F. C., introduced Wm. Scott, Sr., who honored us with his presence and replied to the toast of "The Second President of the Club."

The remarks of Messrs. Kasting and McClure on what the club should do were timely and should be followed. The attendance was about 75, the largest in many years. It was in the wee sma' hours when a toast was drank to Wm. Scott as the oldest living president of the club and as ex-President of the S. A. F., followed by the song "For He's a Jolly Good Fellow," the meeting adjourned and all voted it a good entertainment and a good time.

The dog show last week gave Palmer and Anderson a good chance to decorate their windows. At Palmer's upper store there was a bull dog made of violets and held with a chain by a dashing society lady dressed in the latest fashion. At Anderson's there was a frame about eight feet long and six feet wide with a large pointer dog in the center made of white and red carnations which was so natural that other canines on the street were continually barking at it.

It was a great pleasure to have Mr. Scott with the club after his long illness. Speeches were also made by W. F. Kasting, Wm. Legg, C. H. Keitsch, Edward Slattery, Chas. H. Sandiford, president-elect, George McClure, Jr., D. J. McCarty, Lockport, N. Y., and Wallace Eiss.

At the next meeting of the club President Sandiford will announce his committees for the year. With the 43 new members and the old members there is every indication of big meetings and a good paper on some subject at nearly every meeting.

The automobile show this week will be an excuse for decorating the windows with automobiles.

Visitors: R. J. Irwin of H. H. Berger & Co., New York; S. B. Green of H. B. Bayersdorfer & Co., Philadelphia, Pa.; White Bros., Gasport; D. J. McCarty, Lockport. BISON.

Rochester, N. Y.

This city has a new organization of the florists and allied trades—the Rochester Commercial Florists Association. After holding several preliminary meetings a permanent organization has been effected, with officers as follows: Fred W. Vick, president; Fernando J. Keller, vice president; Geo. B. Hart, secretary and treasurer. Meetings will be held the second Monday of each month at 24 Stone street. At these meetings the officers will endeavor to have for inspection and discussion the newer varieties of carnations, roses, and other items in the flower and plant line, that will be of interest to the members. And it is one of the objects of the new club to bring together the growers and retailers for the good of the business.

A look in at Geo. B. Hart's, our local commission man, convinced us that there is plenty of stock for all. George says that he manages to clean up pretty well. Hart's handy handles for florists are a feature at this place, and the demand for them is heavy.

We are glad to announce that Miss Daisy Fry, the popular bookkeeper of Vick & Hill Co., will soon be back at her desk. Miss Fry has been confined to the house for several weeks suffering from a severe attack of grip.

The store window display is certainly a credit to the firm of Salter Bros., as A. Salter takes a pride in keeping a good stock of both flowering and ornamental plants on exhibition.

It was quite a surprise to Jacob Thomans' many friends when they read his advertisement in a recent trade paper offering his business for sale.

Chas. Suhr is heavy on bulbous stock; his tulips are hard to beat.

F. W.

DERRY, N. H.—Wm. J. Kingsbury has engaged Wm. Ferguson to take charge of his greenhouses.

HUNTINGTON, N. Y.—The annual carnation show of the Horticultural and Agricultural Society was held February 25. The winners in the carnation classes were H. T. and A. H. Funnel, White Bros., of Gasport; Chas. Weber, of Lynbrook; Henry Weston, of Hempstead; August Heckscher (Adolph Alins, gardener), and Walter Jennings (Richard Cartwright, gardener). A. Heckscher was given the award for tea roses. Walter Jennings was placed first for double and single violets. A. Heckscher won for mignonette and for best flowering plant with Begonia Gloire de Lorraine; Dracæna Lindenii from his greenhouse took first for foliage plants. The greenhouse vegetable display was a tempting one. The premium went to A. Heckscher; second to W. Jennings. The exhibits included cauliflower, tomatoes, string beans, mushrooms, radishes, lettuce and parsley.

SPOKANE, WASH.—A card party with all the adjuncts of a Washington's birthday celebration was enjoyed by about 40 members of the Spokane Floral Association at the home of Mrs. W. R. McRoberts, E418 Indiana avenue, February 23, the house being decorated with red, white and blue, with the word "Welcome" over the door. The souvenirs were cardboard hatchets adorned with cherries. Prizes at cards were bouquets of jonquils and daffodils.

PORTLAND, ORE.—President E. B. McFarland of the Rose Society has made plans to have the coming rose show eclipse that of the previous year in every respect, having a far greater range of varieties in the display, with a correspondingly greater number of cash prizes and trophies. To avoid needless confusion, time, and expense the gathering of roses for decorative and display purposes will be accomplished by dividing the city into districts where the members of the society residing in that district will be held responsible for the collection of the flowers.

BUSINESS VERY POOR.

The outlook is very discouraging in all branches of the business, and with only one reason, the commencement of the Lenten season. No further dependence can this year be placed in other than the demand for funeral work. This is the unfailing standby and without this no house can be successful. We have heard much of this present depression, but with the very satisfactory progress of the season until February, strong hopes were held out that a recovery rather than further plunging would occur to the benefit of the business world. While curtailing expenses where possible it is most commendable to the spirit of employers that, so far, there has been no reduction either in number or wages of conscientious employes. The market is heavily burdened and but sparingly patronized. Consignors have become greatly alarmed at the meagre returns received from their representatives. Roses of all varieties are abundant and vast quantities of carnations are coming in, a large portion of which bring less than half their usual market value. Bulb stock of every description is being handled in quantities and moves slowly.

NOTES.

Norris F. Comley of Lexington, was the contractor for furnishing the hall decorations for the automobile exhibition. Marking the aisles of the main building were hedges of laurel and privet growing in boxes built for the purpose. Trellised arches were erected in places of advantage and through these were hung a combination of southern smilax and artificial wisteria clusters producing a most pleasing and suitable arrangement, calling forth many favorable comments.

One of the most attractive wagons exhibited at the automobile show is that built and owned by the firm of Pierce Bros., Waltham. Weighing two tons with a carrying capacity of three, the car is capable of traveling 25 miles an hour and is driven by a 40 h. p. engine of four cylinders. This firm is the first to provide a practical use of the combined van and auto facilities of an up-to-date delivery system.

Fine Bros., retailers, who have in the past conducted stores in different sections of the city are now located on Massachusetts avenue in the block cornering Boylston street in the Back Bay district.

Max Bros., the well known Tremont street retailers, have added to their always attractive window display a unique and artistic fountain, the body of which is colored glass, and when sprinkled with the light spray of water a most interesting result is obtained.

B.

Baltimore.

PRICES A LITTLE BETTER.

The weather of the past ten days or so has been full of the usual eccentricities of the season, alternating snow, wind and hail, with balmy air and southern skies. Except for a few weddings and one or two largely attended funerals, where flowers were profusely in evidence, the demand for cut stock has been very moderate, and Lent, that season of abeyance from display and luxuries, seeming to be this year celebrated with much of its old-time vigor. The big dances are over and the majority of social events is made up of quiet teas, receptions and card parties where, as a rule, the decorations by the florist are not large or imposing. The great glut of carnations seems over, and this makes some improvement, though it is due rather to more restricted supplies than to larger demands.

NOTES.

Our park system, thanks to the efforts of Major Venable, the president of the commission, who lately resigned his place, has been so largely extended that the chain of parks pretty nearly surrounds the city. Recently, in the northeastern section of the city, 152 acres have been acquired along the Harford road and Herring Run, at a cost of about $90,000. This addition makes the recent increase to our municipal pleasure grounds aggregate nearly 950 acres. The new purchase includes some very picturesque scenery, and lends itself readily to improvements in accord with the remainder of the system. A parterre, which is level and well adapted to the purpose, will be fitted up for playgrounds for young men and boys. Similar provisions will be made in other parks. The city will have soon eight large parks with connecting boulevards, and the results will equal in effectiveness, it is claimed, those of any other American city.

Wm. Madsen, of Govanstown, long one of our best rose growers, and who formerly was celebrated for the high quality of his American Beauty, has discontinued the production of that variety and confines himself to Bride, Bridesmaid, Ivory and Golden Gate, all of which are in the best of condition. On these, this intelligent cultivator concentrates his attention, growing nothing outdoors. He is one of the very few gardeners who has reduced the area of glass on his place, instead of extending it, as is the tendency of the day.

J. J. Harty & Company

Wholesale and Commission

.FLORISTS.

1312 G St., N. W., Washington, D. C.

Phone Connection Main 5011

The exhibition of the National Society of American Sculptors will be held in this city in the Armory of the Fifth regiment of the Maryland National Guard, from April 5 to 26, and the members of the Gardeners' Club and others interested have offered to contribute largely of plants and flowers, potted evergreens, bay trees, etc., to decorate the immense building, which covers about 60,000 square feet of floor space. Chas. L. Seybold is chairman of the committee having the matter in charge.

Early next winter there will be, in the Armory, a display of horticultural and orchard products by the Maryland State Horticultural Society, an association which, in effect, is a state institution, being maintained by appropriations from the public treasury, and whose members are not called on for any fees. A spring show of the same organization will take place at the place of R. Vincent, Jr., & Sons Co. at White Marsh, a few miles from this city.

Wm. Fisher, for more than 50 years gardener at Evergreen, the beautiful estate of the Buckler family near this city, died a few days ago, to the regret of all who knew and respected this faithful worker. Instances of such long service in one place are very rare in this country, and deserve notice.

Anders Anderson, of Govanstown, devotes his space to American Beauty, Richmond and General MacArthur roses. His success with Richmond has been so marked that he will hereafter devote more of his space to that variety. He is raising grafted plants, doing his own grafting.

All Seasonable Flowers.

WANTED

Consignors of Trailing Arbutus and Southern Lilac.

JOHN W. McINTYRE,

1601 Ranstead St., PHILADELPHIA.

The business done by the Florists' Exchange for the month of February, notwithstanding the general dullness and financial stringency, exceeded by about 10 per cent the volume of the corresponding month of last year—certainly a very encouraging result.

James Hamilton, of Mount Washington, who has now one of the largest plants in this vicinity, is turning more of his space to roses and is sending the Exchange some good Bridesmaid and Golden Gate.

S. B.

Pittsburg.

NOTHING DOING.

There is still nothing moving in the cut flower line; in fact, business is at a standstill. The oldest person in the business cannot remember such a bad market this time of the year. The commission men seem hit the worst, as they cannot reduce their supply, no matter how poor business is. Carnations and lilies are the worst features, as they do not seem to move at any price. Other bulb stock, excepting daffodills, are about the same. Roses fare a little better. American Beauty is not so much in evidence, but it is just as well, as there is little demand.

CLUB MEETING.

The Florists' Club at its regular meeting March 3 discussed bulb stock and seasonable plants. Ernest Fisher, manager of the South View Floral Co., had a magnificent vase of callas, which were awarded special mention. J. Burch also had a nice collection of these. John Walker, Youngstown, O., gave an interesting talk on a strain of callas he is growing, saying they were far superior to the California stock. John Bader had a nice collection of ferns and azaleas. H. Hein had Baby Rambler roses and azaleas. He was awarded a first prize certificate on the latter. A table of very fine cinerarias, from the Phipps Conservatories, caused much favorable comment. David Fraser got a special mention on Primula obconica. N. C. Madsen, Sewickley, showed the finest Cineraria radia ever shown in this city, for which he was awarded special mention. H. L. Blind & Bros. had azaleas and tulips taking first and second prizes, respectively.

In commenting on the tulips a lively and interesting discussion of tulip bulbs took place between John W. Jones, of Phipps Conservatories, and a Dutch bulb agent. The latter had little to say after Mr. Jones stated the amount of bulbs he had planted and the actual experience he has had with them from when they were planted until they were thrown out. Mr. Jones brought a wagon load of plants from the park—all of them a treat—which included Lilium Harrisii, crown imperials, gesneras, tulips, Dutch, Roman and grape hyacinths. In narcissi he showed Ajax Princeps, Von Sion, Henry Irving, Sir Watkin, Emperor, Paper White and Rugulosus.

NOTES.

Ernest Ludwig and family returned from California March 9 via New Orleans, taking in the Mardi Gras. While away Mr. Ludwig overlooked nothing of interest to florists, and tells of some interesting things in this line.

Chas. Erheart spent several days in Cleveland last week attending the funeral of his father-in-law, who died at Mr. Erheart's residence here.

F. H. Westhoff, De Haven, is disposing of a large lot of carnation cuttings. He is also building a small house for young stock.

A. Weaver, Massillon, O., stopped off a couple of days on his way home from Philadelphia. J.

PHILADELPHIA, PA.—Leslie W. Miller, president of the Pennsylvania Museum and School of Industrial Art, delivered an illustrated lecture, February 19, on "Philadelphia of the Future," before the City History Club in the lecture room of the Normal school. The keynote of Mr. Miller's remarks was to build boulevards or imposing avenues radiating from common centers, as well as playgrounds and to take advantage of the natural beauties of the scenery in the immediate vicinity of the city. "The hideous gods of flatness and the gridiron system of streets worshipped here since the founding of the little village by Penn," said Mr. Miller, "must be departed from. In the present haphazard way of doing things the city sprawls out into the suburbs. There is no careful planning for the city beautiful, the city convenient to traverse or the city healthful." With the aid of lantern slides Mr. Miller explained the beauties of Paris and Washington, and told how the latter city was carefully and scientifically planned while yet a dream.

CUT FLOWERS OR DESIGNS will be Delivered for the Trade on Wire or Mail Orders in Best Qualities and Prices.

Milwaukee.

CARNATIONS IN OVER SUPPLY.

During the week there has been an over supply of carnations due to the fact that every grower is now in full crop. The growers all state that the present heavy cut is of only short duration, when we will again be down to normal conditions. There has been a slight drop on roses. Bulbous flowers are slow sale at present.

NOTES.

The carnation exhibition held by the Florists' Club, March 5, was a decided success. The hall was crowded with carnations, roses, bulbous flowers, etc. Only the stock of the local growers was up for competition, with the following results:

Twenty-five red carnations.—N. Zweifel first, with Victory, and second with Robt. Craig. August Manke & Sons third, with Craig.

Twenty-five white carnations.—N. Zweifel first, with White Perfection; Heitman & Baerman second, with White Perfection; C. C. Pollworth Co. third, with Lady Bountiful.

Twenty-five Enchantress.—N. Zweifel first; Aug. Manke & Sons second; Mueller and Schroeder third.

Twenty-five pink carnations, Scott color.—Heitman & Baerman first, with Rose Pink Enchantress; N. Zweifel second, with Winsor, and third, with Rose Pink Enchantress.

The flowers shipped in by out-of-town growers were not judged, but particular mention was made of the splendid showing made by carnations Winona, from F. Dorner Co., La Fayette, Ind.; Afterglow, from E. G. Hill Co., Richmond, Ind.; Lucille, from Fritz Bahr, of Highland Park, Ill., and Aristocrat, White Enchantress and Andrew Carnegie, from the Chicago Carnation Co., Joliet, Ill. Poehlmann Bros., Morton Grove, Ill., showed Mrs. Potter Palmer, and the E. G. Hill Co. Rhea Reid roses, both of which were much admired. Other exhibitors were: Alex. Klokner, with stocks, snapdragon and mignonette; F. P. Dilger, a variety of bulbous flowers; Holton & Hunkel Co., Bride and Bridesmaid roses of splendid quality; Wm. Edlefsen, four vases of carnations; C. C. Pollworth Co., lily of the valley and assorted roses; Heitman & Baerman, bulbous flowers; Hunkel's Seed Store, bulb exhibit. The entertainment committee had provided for liberal refreshments, which were much enjoyed by all present.

Both Heitman & Baerman and F. P. Dilger, who grow the majority of the bulbous flowers in this vicinity, are cutting immense quantities every day. Holton & Hunkel Co. are handling this stock. This firm is also receiving splendid cut Bride and Bridesmaid roses.

The money realized at the florists' dance will be used by the entertainment committee at the coming May dance.

Mrs. Baumgarten, of West Water street, has been forced to remain at home on account of sickness.

Nic. Zweifel is now right in the midst of a crop of carnations, and the stock is of extra quality.

Wm. Edlefsen intends replacing the greenhouse in the rear of his store by a modern structure.

John Rost intends adding one more house during the coming summer.

Robt. Zepnick is sending in some very fine pansies. H.

DAYTON, O.—There was a meeting of the Florists' Club, March 2, in the establishment of J. E. Young, on Fifth street. Business of a routine nature was transacted and the following officers were elected for the ensuing year: H. H. Ritter president; Mrs. Elizabeth Young, vice-president; George Bartholemew, treasurer, and H. Frank, secretary.

BUSINESS DULL.

Business conditions the past week have been very slow, nothing moving very lively with the possible exception of green goods, which are still scarce. Roses are in good supply. They are of good quality and find a fair demand. Carnations are of very good quality, and are in good supply, but the demand is very slow. Violets and lily of the valley are in good supply, but have little demand. Bulbous stock, especially narcissi, is very plentiful, and brings a very low price. The only encouragement we find is that other markets are in about the same shape.

SOCIETY MEETING.

The regular monthly meeting of the Kentucky Society of Florists was held at Fred L. Schulz's wholesale house last Tuesday, with an unusually good attendance, which was very gratifying to the officers, who have been working hard to have the meetings well attended. The show was discussed for some time, and it is hoped the members will have more to report at the next meeting than the last. It will never be a success if three or four are depended on to do all the work, the balance doing nothing but criticising. The secretary was the subject of some very uncalled-for remarks at the last meeting, which the real live and hard working members denounced. When it came to the subscriptions received for the show, it was found that the secretary was not sleeping, and that he had about three or four times as much subscribed as the balance of the members together. This kind of knocking does not do much good, and the secretary is not discouraged, but will work with all his might to make this show a credit to the society, and one long to be remembered.

F. L. S.

Cincinnati.

STOCK OVER PLENTIFUL.

The least said about business the better. Flowers pour in from all directions and are sold for whatever they will bring. There are no fixed values with the possible exception of good American Beauty roses and fancy violets. The carnation glut still continues and roses are in over supply. Bulbous stock is sold at any old price just to get rid of it. Callas and Harrisii lilies are plentiful with little or no demand for them. Smilax, Asparagus Sprengeri and A. plumosus are in good demand and are pretty well cleaned up every day.

NOTES.

Edward Ellison who for years conducted a greenhouse establishment out in the beautiful suburb of Clifton has returned from England whither he went last November with the intention of spending his declining years there. He states that conditions in England are a great deal worse than in this country.

Our old friend Henry Schwarz of Norwood, came down town last Saturday, the first time we have seen him in several weeks and says business has been so good with him that he could not spare the time to get away.

George & Allan claim that despite the immense amount of disease in the Easter lilies, they will have enough to go around as they planted enough bulbs to counteract all losses by disease.

F. C. Ludwig and his son of Allegheny, Pa., stopped off on their way home from California and were delighted with their trip, stating it was money well spent.

C. J. Ohner of Gillett's is again at his desk after a two weeks' tussle with tonsilitis and other complications.

S.

SANDUSKY, O.—The city greenhouse is in a very bad way, on its last legs in fact, and a new one is badly needed. The board of public service is seeking an appropriation for a new one, to be located in one of the parks.

The Seed Trade.

American Seed Trade Association.

Geo. S. Green, Chicago, Pres.; M. H. Duryea, New York, First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-sixth annual convention, June 23 to 25, at Hotel Ponchartrain, Detroit, Mich.

WISCONSIN seedsmen are nervous over the possibilities of prosecution under the new law.

SEED ORDERS by mail are reported coming in freely everywhere and counter trade is making a start.

A CRUSADE has been organized in Texas to eradicate mistletoe which has became a serious menace to the forests of the state.

IT is reported that the Braslan Seed Growers' Co. has booked three individual orders for lettuce seed which together total 43,000 pounds.

OUR New York representative states that there is considerable complaint from the growers who force bulbs for that market, a large proportion having turned out worthless.

NEW YORK.—Wm. Elliott & Sons will move May 1 from Fulton street to 42 Vesey street. The change is made necessary by the requirements of their large and increasing business.

THE FRENCH BULB crop, according to advices dated February 22, gives little indication yet of the probable harvest and it is thought that firm prices will be fixed late in the season and undoubtedly depend considerably on what the advance demand is from the United States for this stock.

THE pure seed bill introduced in the Maryland legislature by Chas. A. Duvall is designed to insure against the selling of adulterated, impure or weak seeds. The general plan of the bill follows the line pursued by the fertilizer and pure food law which commands the manufacturer and dealer to have a guarantee placed on their packages and it places upon the director of the experiment station the work of doing as much inspection as is necessary to see that the guarantees are carried out.

New Seed Growing Firm in California.

Articles of incorporation of the California Seed Growers' Co. were filed in the county clerk's office recently. The company is capitalized at $100,000 and the principal place of business is Gilroy. Following are the directors and the amounts they have subscribed: Ah Him, $15,000; H. M. Wolfe, $10,000; Ed Rohi, $5,000; L. W. Wolfe, $2,500; John J. Wolfe, $2,500.—San Jose Mercury.

[Ah Him, the first named incorporator, has been for years connected with Kellogg & Morse and C. C. Morse & Co., as foreman-grower on certain ranches. Ah Him plans a six months' trip to China returning in the autumn.]

SAN JOSE, CAL.

Destructive Fire at Clinton, Wis.

Respecting the serious fire that occurred at the L. L. Olds Seed Co.'s establishment at Clinton, Wis., March 5, we have received the following from Messrs. Olds: "The fire started on the second floor of our main 3-story warehouse at about 6:30 Thursday evening. How it originated we do not know, but think it started in a private room of our watchman. We had been out of the building but a few minutes when the alarm was given. The fire company turned out promptly and we have a fairly good water supply, but it was difficult to locate the fire. At one time it was thought everything was under control, but later the flames burst through the roof and it was then evident that the building was doomed. We saved all our office furniture, mailing list, safe, etc., and a few bags of seeds on the first floor. The total loss is probably about $30,000, fairly well covered by insurance."

AFTER THE FIRE AT L. L. OLDS SEED CO., CLINTON, WIS.

Boston.

Trade has opened up well this year and we look forward to a good season, though the florists' trade around here has been quiet of late.

James H. Cheyne, who has been employed by Schlegel & Fottler for a few years severs his connection with them to take a position in the office of E. L. Beard, landscape architect, 155 Milk street, Boston, Mass.

Peter Miller, secretary of the Thomas J. Grey Co., attended a reception of the Caledonian Society in New York March 6 as representative of this city. G.

Chicago.

Grass seed contract prices on the board of trade March 10 are noted as follows: Prime timothy, $4.75 (no bids); medium red clover, $20; choice white clover, $15.

Onion set prices for immediate delivery are about as follows: Yellow, $2.50; red, about $2.75; white, $3 for 32 pounds.

Visitor: Chas. P. Braslan, San Jose, Cal.

Wholesale Seedsmen's League.

THE NOMENCLATURE QUESTION.

A special meeting of the directors of the league, F. W. Bruggerhof presiding, was held February 18, consequent on the following communication received from Messrs. Dreer and Burpee:

"Philadelphia, February 8, 1908.

Mr. Burnet Landreth, Secretary Wholesale Seedsmen's League, Bristol, Pa.

"Dear Sir:—Through a misunderstanding, an unfortunate difference of opinion arose between our two houses as to the cataloguing of the 'Fordhook Bush Lima Beans,' which has been amicably adjusted; but, to prevent any confusion or difficulties of this kind in the future among the seed trade, both houses feel that the executive committee of your league should take up this question immediately, and endeavor to formulate a plan which shall control the naming, cataloguing and selling new varieties of seeds, so that the proprietary rights of the original discoverer or introducer of such new varieties shall be recognized and protected in the best interests of the seed trade.

"Yours very truly,
"W. ATLEE BURPEE & Co.,
"HENRY A. DREER, INC."

At this special meeting there were passed the following resolutions:

"Whereas, The Society of American Florists as long ago as 1891 accepted the report of the committee of nomenclature on 'The Right to pre-empt the Names of New Plants,' worded as follows:

" 'In the case of new species of plants, the first published botanical name takes precedence, but this publication must be technical and made in a recognized botanical or horticultural periodical or work, and not in a trade catalogue. In the case of florists' varieties, or garden varieties as they are more commonly termed, a botanical description is unnecessary, but the plant should be pointedly described, and the first authenticated name published, either in the way of reading matter or as an advertisement in a general horticultural or floral magazine or widely circulated trade catalogue, or officially noted when the plant is exhibited at some prominent horticultural exhibition, or before some regularly organized public body of horticulturists should be recognized as the true varietal name, and no matter should the same variety originate elsewhere, the originator in the second case must not disseminate his stock under any other than the original name.'

"Resolved, That as the business of growing, selling and distributing seeds has become such an important pursuit, it now seems absolutely necessary that those of us having the interests of the business at heart should recommend our fellow seedsmen to respect the energies

The Picture's the Thing in Selling Flowers

TASTY printed matter, reproducing flowers from photographs, will create increased demand for the flowers themselves. If the photographic reproductions are made in the natural colors, by modern processes, an even greater increase in demand will result.

The live and up-to-date florist has stationery and printed matter in harmony with his stock. The McFarland organization makes such stationery for this kind of florists. The average job printer cannot begin to do it—he doesn't know how and hasn't the facilities.

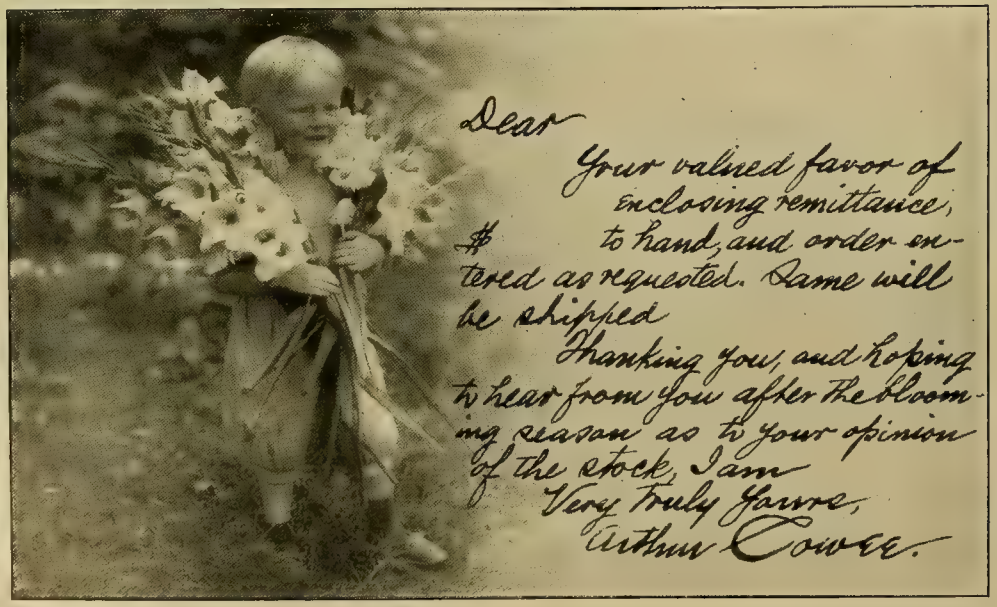
The surpassing equipment and trained men at our service enable us to turn out work of a quality not obtainable elsewhere at any price—whether on a job of 500 postcards or 100,000 big catalogues.

Here are some specimens with prices. Over 10,000 photographs of other good subjects from which to choose are awaiting your call. Further information cheerfully supplied.

There's a form of printed matter your business needs. Ask The McFarland Publicity Service!

A couple of cents spent in giving every order the courtesy of acknowledgment will help you to secure additional business from chance and regular customers. Postcards are the ideal form.

Price f.o.b. Harrisburg: First thousand, $15; additional thousands, $3.50 each. Cash with the order.



Postcards are a splendid medium through which to tell the people where you are and what you sell. All the back and one-half of the front of the card may be used for your message.

Price f.o.b. Harrisburg: First thousand, $15; additional thousands, $3.50 each. Cash with the order.

We have in stock a large number of engravings suitable for the illustration of postcards. When these are used, with a type instead of an engraved message, we can give better figures.

Price f.o.b. Harrisburg: First thousand, $6.50; additional thousands, $3 each. Cash with the order.

In our stock of over 10,000 original horticultural photographs, there are thousands which no florist in your section has used. These photos enable us to give endless variety to postcards.

Only a few examples of our designs can be shown hereon. Write us, and we will submit others to suit your needs.

THE McFARLAND PUBLICITY SERVICE, HARRISBURG, PENNSYLVANIA

and progressive methods of each other; and it is further

"Resolved, That the originator, discoverer, or introducer of a new variety of seed, grain or plant has the sole right of naming said variety, and that this name should be the one under which this variety is to be known in the trade thereafter, and the name not altered (except that it may be optional to leave off the name of the individual or firm, when used as a prefix) or changed in any way until it is absolutely demonstrated by continued selection the variety has been so improved or changed as to warrant its being given a new name.

"Resolved, That where a seedsman spends time and money in search of new and distinct varieties of seeds, that it is his right to name any variety he may discover which has merit and which has not heretofore been catalogued or offered by the American seed trade.

"Resolved, That we, the board of directors of the Wholesale Seedsmen's League, hereby express our strong disapproval of the practice that has occasionally obtained with some dealers of offering under new names such varieties of seeds, or plants, which should be known only under the names given to them by their introducers; which original names may be fairly considered as trademarks, and the property of the originator or introducer.

"Resolved, That we hereby pledge the influence and the support of The Wholesale Seedsmen's League to the end that, when introducers of newly discovered or improved varieties of seeds shall have disseminated the same under special names, they should be protected against unwarranted and unfair competition through the offering of these novelties by others under other names than those given to them by the originators or introducers.

"Resolved, That the secretary of the league be instructed to take up this subject with the American Seed Trade Association, with a view to having said association pass suitable resolutions at the next annual meeting in June, to the effect that every new variety of seeds, either vegetable, flower or grain, that may be introduced and catalogued hereafter by an American seedsman should be registered under its proper name, with a full description and source of origin, with the secretary of either the Wholesale Seedsmen's League or the American Seed Trade Association, as may be decided upon after conference of committees to be appointed by the presidents of the two organizations, said joint committee being authorized to fix the amount of the nominal charge to be made to cover cost of such registration and attendant expenses. It is recommended that either said joint committee or a special committee, be made a standing committee to consider all questions in dispute as to the naming of varieties, and if impossible to adjust same amicably between the disputants, to submit reports to the board of directors of both organizations.

"Resolved, That copies of these resolutions be sent to each member of the Wholesale Seedsmen's League, and that a sufficient number of copies be sent to the secretary of the American Seed Trade Association for mailing to each member thereof.

"Such distribution of copies of these resolutions to be accompanied by an explanation from the secretary that we seek the co-operation of all honorable houses, in the interests of all, in an earnest endeavor to fix firmly the usages of the American seed trade upon the highest plane of business ethics."

The secretary was instructed to mail a copy of this action to all members of the league, and to other seedsmen in close affiliation.

MARKET GARDENS.

AILSA CRAIG onion is a very profitable variety—start early in hotbeds.

A GLUT in the cantaloupe crop the coming season is predicted. California and Arizona will furnish the earliest, and, it is said, the best quality; one Tennessee cantaloupe association has given up truck growing for 1908.

Prices of Indoor Vegetables.

The prices of indoor vegetables at leading points March 7 were as follows: New York, cucumbers, No. 1, $1.50 to $1.87 per dozen; No. 2, $3 to $5 per box; lettuce, 15 cents to 60 cents per dozen; mushrooms, 25 cents to 55 cents per pound; mint, 50 cents to 75 cents per dozen bunches. Chicago, cucumbers, $1.35 to $2 per dozen; radishes, 30 cents to 45 cents per dozen bunches; mushrooms, 25 cents to 85 cents per pound. Cincinnati, cucumbers, $2 to $2.25 per dozen; mushrooms, 40 cents to 50 cents per pound. Pittsburg, cucumbers, $15 to $18 per box. Boston, tomatoes, 30 cents to 40 cents per pound; cucumbers, $9 to $12. St. Louis, cucumbers, $1.25 to $1.75 per dozen. Minneapolis, cucumbers, $2 per dozen. Denver, cucumbers, $2.50 per dozen.

Green Fly on Lettuce.

ED. AMERICAN FLORIST:—

I am troubled with green fly destroying the lettuce in my greenhouse. I have tried a good many things, such as whale oil soap, tobacco extract and tobacco juice, also Carman's Antipest; the latter I used first as directed, but it did not destroy the fly, so I increased the mixture from 1 to 80 to 1 to 30, but yet I found many of the pests alive after the last application. Would you kindly inform me what to use to get rid of the plague? D. W.

Greenfly on lettuce is easily controlled if done timely, that is, never given any headway; once this pest has a good start on lettuce of fair size, it is quite difficult to dislodge. There are so many twists and hollows in a lettuce leaf that the insects find an almost impenetrable hiding place. To attack them with anything like spraying is useless because most of them will not be reached. The only way is to poison the air they breathe, and this must be done in such a way that the long duration will finally reach every nook and corner. For this purpose there is nothing so cheap, safe and sure as tobacco smoke properly made. As generally applied it is ineffective against an established brood of greenfly; the quick burning will force the heat and smoke to the roof and the best part is lost; what is needed is a slow, steady smoke of long duration, to overcome every insect, no matter how well hidden.

I would advise you to thoroughly study instructions given in these columns last fall [See issue of September 28, 1907, page 517. ED.] for using chopped tobacco stems in stove-pipe smoker. You should use these every night for one week; if at all possible, have them refilled each night, to give two charges a night. Then twice a week; then once a week thereafter. A course like that, faithfully carried out, will do the work. To succeed with lettuce, you must learn to start with clean plants, and then keep them clean, which can be done by faithfully smoking once a week. The rule should be to have not a single greenfly on the place. It can be done and is the cheapest way. Further, to allow lettuce to dry out badly, or to permit temperatures to run too high, or to fluctuate much, or to have poor soil; all these will breed greenfly almost faster than they can be killed. Insects do not like well fed and well cared for plants.

MARKETMAN.

Imports.

During the week ending March 7, imports were received at New York as follows:

McHutchison & Co., 234 cases plants, four bls. plants, six cases flower roots.

P. Ouwerkerk, 168 cases trees.

Frank H. Darrow, 61 cases, nine bls. plants.

Rolker & Sons, 23 cases plants.

Wm. Elliott & Sons, 13 cases plants.

Vaughan's Seed Store, 11 cases plants, four cases bulbs, two pkgs. two cases seed.

P. Henderson & Co., four pkgs. plants, three pkgs. seed, 10 bags seed.

J. M. Thorburn & Co., six cases, two pkgs. plants; one case, two bags seed.

Elliott Nursery Co., four pkgs flower roots.

A. T. Boddington, one case bulbs.

To others, 526 cases plants, 74 pkgs. 60 bls. plants, 34 cases trees, 39 cases flower roots, 18 cases bulbs, one bskt. flower roots, 159 pkgs. 93 bgs. six cases seed, 205 bags sunflower seed, 100 bags poppy seed, 300 bags clover seed.

Trouble with Easter Lilies.

ED. AMERICAN FLORIST:—

What can we do to get our Lilium longiflorum multiflorum to grow taller? They are only from two and one-half to nine inches high and are already showing buds. How will they come for Easter? We keep our house about 65°-68° at night and about 70°-72° by day. Would nitrate of soda help them or would that bring the buds out too soon?

R. P.

There are often a few bulbs that come in the way you describe, but, if there is a large percentage, either the bulbs were of poor quality or they were not well rooted before bringing them into heat. Plants showing flowers now will be in time for Easter if kept in quite a cool house and in the heat you are keeping up will probably be too early. Nitrate of soda will not help you any now. The best thing you can do is to let them come along as slowly as possible in the coolest house you have and not attempt high feeding.

G.

Trimming Bay and Box Trees.

ED. AMERICAN FLORIST:—

When is the best time to trim bay and box trees?

SUBSCRIBER.

Unless the plants will be exposed to frost do it now. If they are to go outdoors trim them as soon as danger of frost is past.

G.

The Nursery Trade

American Association of Nurserymen.
J. W. Hill, Des Moines, Ia., President; C. M Hobbs, Bridgeport. Ind., Vice-President; George C Seager, Rochester, N. Y., Sec'y.
Thirty-third annual convention to be held at Milwaukee, Wis., June, 1908.

BEAUMONT, TEX.—The Southeastern Nursery Co. has been incorporated with capital stock $6,000. The incorporators are E. McMickin, J. W., T. A. and A. S. Sporlock.

Miami Valley Nurserymen Meet.

The Miami Valley Nurserymen's Association met February 28, at the Phillips house, Dayton, O. Theodore Densmore, of Tippecanoe City, was chosen president, and William M. Scarff, of Yellow Springs, secretary. J. W. McNary, of Dayton, Charles Peters, of Troy and M. F. Barnes, of Hamilton, were chosen as the executive committee.

Chicago.

The rapid growth of the landscape department of the Peterson Nursery has been such that the firm has found it necessary to establish branch offices at Detroit, Mich., and Toledo and Cleveland, O. The firm has also been fortunate enough to have recently secured room enough on the thirteenth floor of the Stock Exchange building to unite its local landscape office with the general offices, at the same time increasing its force. This broadening out of the work is directly due to the rapid extension of landscape work in the west. To this same cause is also due the fact that the business depression seems to have had no effect on this line of trade.

Visitors: J. H. Mumm, president and manager of the Spokane Nursery Co., Spokane, Wash., which is adding a range of 12 greenhouses each 35x100 feet to its nursery; John T. Withers, Jersey City, N. J.

John T. Withers on the Care of Trees.

John T. Withers, the well known landscape architect of Jersey City, N. J., gave a most interesting and instructive address on the care of trees at the Academy of Sciences, Lincoln park, Chicago, on the evening of March 7. Commencing with some very beautiful slides of trees of historic and general interest, he passed to the effects of trees upon the landscape in various positions, showing how trees give an excuse for winding a walk; how they round out a beautiful picture, form a background for flower beds and make otherwise unattractive streets beautiful. He speaks with all the earnestness of a tree lover and later he tells in plain and simple language, illustrated by views of the trees during every stage of the process, how to repair the ravages of time in our monarchs of the forest. And here, as a practical man of long experience, is where Mr. Withers shines more particularly. His methods and the reasons for practicing them are so clearly explained that no one of ordinary mental capacity could fail to grasp them.

Among the notable trees shown on the screen were the famous Charter oak of Connecticut which is in a very bad state of preservation but which, Mr. Withers said, could have been saved had proper measures been taken. A grand specimen oak at Ogden, N. J., was also shown and the magnificent red oak growing at Graceland cemetery, Philadelphia, the finest specimen perhaps in the country. The live oak of Florida was also shown, single specimens and a fine avenue with the moss hanging from their branches in the manner characteristic of the tree. The weeping elm was shown and Mr. Withers states that there are not as many distinct species of this tree as is sometimes thought. seedlings raised by himself having shown great mutation. The pin oak he instanced as doing well

John T. Withers, Jersey City, N. J.

at Rochester, N. Y., and other eastern points and recommended it as a fine street tree. The tulip tree (Liriodendron tulipifera) he says does better in the state of Maryland than anywhere else either north of there or in the Carolinas and Alabama.

Many trees were shown that are growing at Mt. Vernon, having been planted by George Washington, and also fine specimens and avenues at Washington, D. C. The Ginkgo, with its characteristic habit of spreading lower branches and erect top was among these and the oriental plane, the red maple and a number of others were given. The rock maple makes too many shoots and needs a deal of pruning, but the pin oak, red maple and oriental plane Mr. Withers thinks highly of as street and shade trees. The lovely yellow wood (Virgilia lutea or Cladrastis tinctoria) of which a fine tree was shown, Mr. Withers referred to as very handsome "But," he said, "it does not flower every year." Mr. Withers later paid a very high tribute to the parks at Hartford, Conn., and showed us many beautiful views therein, each showing the value of the tree in different aspects of the landscape. Other lovely peeps were given down the Hudson river and beautiful instances of wild gardening where the tree helps to protect and also to enhance the beauty of hardy ferns and other plants. The grand clumps of Rhododendron maximum from eastern gardens make Chicago growers envious as this finest of all hardy shrubs will not thrive where lime is so plentiful in the soil as in many parts of Illinois and Wisconsin. The Carolina poplar was described as a quick grower and useful as a nurse for better trees, but should, the lecturer remarked, be cut out early and not left to damage the permanent plantings.

Coming down to practice Mr. Withers was even more interesting. Photographs of the great Liberty tree of Annapolis, Md., were shown and he explained in detail the measures adopted to preserve it. The great specimen tulip tree had an immense hole in its trunk. For a great part of its height, in fact, it was completely rotten inside and only 13 inches of wood, cambium and bark remained of its original immense bulk. This decayed wood was all taken out, the inside scraped and thoroughly washed with a solution of copper sulphate and lime. Iron rods were then driven into the ground and taken up the hollow tree; a brick wall was built in front as a form and the whole of the interior filled with cement concrete, 53½ tons being used in this tree alone. It is easy to see that this grand old tree will now be safer from storm than it has ever been, the great strength of the artificial heart forming a safeguard in this way and also

keeping out disease and decay. The front wall has been colored like bark and the cement roughened to imitate it, and Mr. Withers calculates that in about 18 years the bark will have again covered up the wound entirely. We have not space to go into all the details of tree surgery as Mr. Withers explained it, but it was quite an education along this line. He deprecates the use of tar for covering old wounds; tin nailed over them is also bad as the extremes of temperature draw the nails and loosen the tin. Board is also unsuitable as it cannot be so closely fitted as to exclude air. Good metallic paint of a slate color he regards as best for clean cuts and the concrete for cavities. One frequent mistake Mr. Withers cited was that of allowing the concrete to extend too far out. It should come to the inner surface of the bark to enable this to spread naturally over it. Many other intensely interesting topics were touched on by Mr. Withers, who received the hearty thanks of an interested and appreciative audience. R.

WOOD BROTHERS
FISHKILL, N. Y.

Orange, N. J.

The regular monthly meeting of the New Jersey Floricultural Society was held March 6. Carnation night was observed with 29 exhibits of this flower alone, and roses and other displays. W. A. Manda sent a vase of 100 of his new seedling No. 20, soon to be introduced by John N. May. John E. Haines, of Bethlehem, Pa., sent his specialties, Imperial, the new striped, and John E. Haines, red. James D. Cockroft, of Northport, N. Y., sent Harvard, a dark red, and Oscar Carleson, of Fairfield, Conn., a new pink seedling, No. 14.

Among those exhibiting carnations were: Chas. Munn, John Hayes, gardener; T. A. Gillespie, George Oakley, gardener; Colgate brothers, William Reed, gardener, first prize; Wm. Runkle, D. Kindsgrab, gardener, second prize: Chas. Hathaway, Max Schneider, gardener, third prize: John Crosby Brown, Peter Duff, gardener, and Chas. Bausher, Philip Cox, gardener. Roses and sweet peas were shown by A. C. Van Gaasbeck, John Gervan, gardener: Antirrhinum by T. A. Edison, Frank Drews, gardener: Cineraria, cyclamen and violets by Chas. Hathaway, Max Schneider, gardener.

Lager & Hurrell, Summit, showed Odontoglossum crispum and O. Cervantesi, Dendrobium splendidissimum and D. nobile Rothwellianum, Laelio-Cattleya Pallas and Oncidium fuscatum. Julius Roehrs Co., Rutherford, showed Cattleya Schroderæ, Surprise and Rose Newport Fairy. A strong sentiment prevailed to continue the special flower nights and W. A. Manda placed $10 in the treasurer's hands to be used for cash prizes.

LLOYD Will Not Disappoint You.

The only ever blooming **White Carnation** in existence. It is the bread and butter white of the future. Size and stem of Enchantress, with the freedom of McGowen. Easy Rooted. Excellent keeper and shipper. Best seller of any carnation on the market.

Rooted Cuttings, **$2.00** per doz., **$12.00** per **100, $100.00** per 1000; unrooted **$6.00** per **100, $50.00** per **1000.**

H. A. JAHN, New Bedford, Mass.

CARNATION CUTTINGS.

We are in unusally good postion to supply exceptionally well-rooted, healthy stock. We have such a large quantity of flowering plants that we propagate only from heel cuttings from flowering shoots. Our cuttings are rooted in light, sunny, airy, houses, and we are sure will satisfy the most critical buyer.

A prominent carnation grower writes: "You seem to be **the only firm in the business that knows how to pack stock and have it reach the buyer in good condition,** and I have always found your cuttings cheaper than the same varieties at much lower figures.

While our prices may not always be the cheapest, we certainly can give, quality considered, as good value if not better, than is obtainable anywhere.

WINSOR, which we introduced last year has proved to be the finest novelty introduced in years. We think it is the most profitable variety grown to-day, considering its fine color, splendid keeping qualities and productiveness. When properly grown it leaves little to be desired, and almost every one succeeds with it.

White Enchantress, the best all-round White Carnation, on account of its large size, long stem, earliness and productiveness. Our White Enchantress exhibited at the Carnation Convention at Washington, was the only White Enchantress exhibited that received an award.

Strong rooted cuttings, now ready for delivery, from sand, $6.00 per 100, $50.00 per 1000; from soil, $7.50 per 100, $60.00 per 1000.

We offer, also, **Beacon** and **Red Chief,** from sand, $6.00 per 100, $50.00 per 1000; from soil, $7.50 per 100, $60.00 per 1000, also **Victory, Melody** and **White Perfection,** from sand, $4.00 per 100, $35.00 per 1000; from soil, $6.00 per 100, $45.00 per 1000; **Variegated Lawson, White Lawson** and **Red Lawson,** from sand, $3.00 per 100, $25.00 per 1000; from soil, $4.00 per 100, $35.00 per 1000. We can supply, also, **Winona** and **Afterglow,** at $12.00 per 100, $100.00 per 1000.

Buyers will find transplanted stock offered from soil well worth the difference in price.

F. R. PIERSON CO., Tarrytown-on-Hudson, N. Y.

St. Paul.

LENT STARTS WELL.

If the Lenten trade continues as well as it has started out, nobody here will have any complaint to make. Stock continues plentiful with some surplus in bulbous flowers and violets. Carnations also are rather in oversupply, but we have not heard of any cut prices on local grown flowers as yet.

NOTES.

The next club meeting will be held at Holm & Olson's store March 17, and a continuance of a big attendance is hoped for; some interesting committee reports will be made. Jim Souder will read a paper on "Easter Stock From the Retailers' Point of View" and J. Jorgensen on the same subject from the wholesalers' side of the question.

The main topic in the trade here last week was the opening of a new flower store. The firm name is Leeb & Co., and is located at 370 Minnesota street, and in addition to flowers will handle fruit. The two young ladies making the venture were formerly employes of E. F. Lemke.

Holm & Olson have been favored with lots of funeral work of late; G. A. Colberg has recently taken charge of the conservatory and the windows and L. G. Venzka is the designer.

L. L. May & Co., report business as very good with hardly enough stock to take care of orders. O.

TRINIDAD, COL.—The Trinidad Floral Co., composed of Henry Klein, president; J. H. Drury, treasurer and business manager; and L. R. Gottleib, secretary, have about 18,000 feet of glass largely devoted to roses and carnations. The firm has an excellent location and will increase its glass plant to 25,000 feet in the spring. The company was incorporated in 1906.

THE NEW ...CARNATION **AFTERGLOW**

WAS AWARDED A

Gold Medal by the Rhode Island Horticultural Society, at Providence, Nov., 1907.
(Exhibited by Wm. Nicholson)

Craig Silver Cup by the Penn. Horticultural Society at Philadelphia. Nov., 1907.
(Exhibited by Dailledouze Bros.)

First Prize by the St. Louis Horticultural Society at St Louis, Mo., Nov., 1907.
Exhibited by The E. G. Hill Co.)

First Prize by the State Florists' Association of Indiana at Indianapolis, Nov., 1907.
(Exhibited by the Originator.)

Scored the highest number of points of any seedling exhibited at the Toronto Exhibition of the A. C. S. Jan., 1907, after arriving 24 hours late from Framingham, Mass.

Aside from these honors, the fact that it has been grown successfully wherever it has been tried is the best proof of its commercial value. Orders now booked by the undersigned, to be filled in rotation for well grown, well rooted cuttings at

$2.00 per doz.; $12.00 per 100; $100.00 per 1000.

ALBERT M. HERR, Lancaster, Pa.

DANBURY, CONN.—Theo H. Judd is making arrangements for the erection of another new large greenhouse on Grand street to adjoin his other houses. Mr. Judd now has six large houses, one of which was completed only a few months ago. The new house will be devoted exclusively to roses and violets.

NEW YORK.—The Sun has a long and interesting illustrated article on the business career of Le Moult, the Bowery florist. It is quite an historical sketch going back over the 30 odd years that have passed since he began business at a flower stall on Tenth street and tells of his poetic advertising in the early days, of the theatrical celebrities who were among his first customers and other interesting and readable happenings.

PITTSBURG, PA.—Hugh McCall, aged 60 years, gardener for H. J. Heinz and H. C. Frick, died March 4, at his home on Hamilton avenue, Homewood, from a complication of diseases, after a short illness. He was a native of Sterling, Scotland, where he lived until 40 years ago, when he came to Pittsburg. He had been employed as landscape gardener for the last six years by H. C. Frick and for the last three years by H. J. Heinz. Eighteen years ago he married Miss Mary McKee, who survives with one son, Alexander Ray McCall, at home.

NEW YORK OFFICE: Room 1, 236 Broadway. **T. MELLSTROM** Agent.

PORTLAND, ORE.—Good prizes are to be given to nurserymen in the open classes at the coming rose show in June including $200 in premiums for a general exhibit of roses and shrubbery. Mrs. Herbert Holman is the secretary of the Rose Society here.

SPOKANE, WASH.—Fireproof concrete buildings, over 23,000 square feet under glass and fine grounds, with private water system, to be completed at an outlay of between $50,000 and $60,000 are included in the plans of the Spokane Nursery Co. for its plant on the north side. Plans have been completed and work has begun for the most modern buildings, show rooms and greenhouses. The ground has been secured at an outlay of about $20,000, and with the improvements and stock will represent an investment of about $100,000. The officers of the company are: J. H. Mumm, president; H. C. Rice, treasurer, and J. M. Harris, secretary.

New "MY MARYLAND" Rose

"My Maryland" Has More Good Commercial Points Than Any Other Rose.

PRICE: 2½-inch pots, $25.00 per 100; $200.00 per 1000; $5.00 per dozen.

JOHN COOK, 318 N. Charles St., Baltimore, Md.

Nashua, N. H.

Business has been very quiet during the past week. Stock of all kinds is plentiful, in particular carnations, which are hard to move, and a market has to be found out of town. The weather has been and is very favorable for a large crop.

NOTES.

August Gaedeke & Co. are preparing for a large Easter trade. Lilies are looking fine, also carnations, Baby Rambler and other roses, azaleas and all kinds of bulb stock in pans.

Geo. E. Buxton is cutting some fine carnations which in part go to the commission houses in Boston.

Stephen Chase is busy planting early vegetables and is already picking some fine cucumbers.

A. G.

ROOTED CUTTINGS. Prepaid per 100. Heliotrope German Ivy, 75c; Alternanthera, 50c; Coleus, Ageratum, 60c; Salvia, 85c, Fuchsia, $1.00. Seedling **Verbena,** Mammoth mixed 35c per 100, prepaid, Cash. Special price on 1000. List Free.

E. S. MILLER, Wading River, N. Y.

STREATOR, ILL.—The Hill Floral Co. has leased part of a building on North Vermillion street as a retail store and has moved in.

DETROIT, MICH.—An unusually beautiful display of flowering plants is to be seen in the horticultural building on Belle Isle now and thousands of people visit the place every day. The Easter stock is coming along nicely. Lilies, azaleas, hyacinths, tulips, narcissi and other seasonable plants will be the main features.

MADISON, WIS.—Contracts were closed March 4, for another addition to the Capital City Greenhouses, Baldwin and Williamson streets. The new part will be 83½ feet on Baldwin and 100 feet on Jenifer, occupying the vacant corner. The new structure will be constructed almost entirely of steel and glass, the only wood being that used for window casings. Seven years ago the Capital City Greenhouses were established by Fred Rentschler at the present location. The business has steadily increased and additions to the original plant have been made annually. The contract for the new greenhouse which is intended for roses will cost $8,000.

Albany, N. Y.

The Florists' Club the past week contributed two handsome designs for the funerals of relatives of the members. A large standing wreath of lily of the valley and roses was made and sent to the funeral of Mrs. George Sambrook at Watervliet. Mrs. Sambrook was the wife of one of the oldest growers in this vicinity and mother of the Sambrook brothers, Fulton street, Troy, and of Mrs. William Hannell, Watervliet. The club also contributed a handsome cross of lily of the valley and violets for the funeral of the mother-in-law of Fred Henkes in Troy.

The Young Men's republican club of Proctor, Vt., on March 5 sent a telegraphic order to Eyres for a 36-inch wreath for the funeral of United States Senator Redfield Proctor which took place on the following afternoon at 3 o'clock at the Proctor homestead. The wreath was of bronze galax, seven dozen Richmond roses, and 500 violets, tied with a bow of No. 120 violet ribbon. The design had to be made very quickly to catch a train in time for delivery the following morning. R. D.

PELARGONIUMS.

We have a fine lot of good strong plants in 3 in. pots at $1.50 per doz., $6.50 per 100. such varieties as Purity, Gloriosa Countess of Crew, Tommy Dodd. Duke of Cornwall, Lady Carrington and others.

CHAS. SHERWOOD,
WATERLOO, IA.

Red Bank, N. J.

The fourth annual banquet of the Monmouth County Floricultural Society was held at the Sheridan hotel March 3, and it was the best the society ever had. The proprietor, Fred Fisk, eclipsed all previous efforts in the dinner he prepared. It was the unanimous opinion of the guests that they had never sat down to a finer spread. The decorations were splendid and admired by everybody. They were made by Wm. Turner, Geo. Hale, H. S. Kettel and N. Butterbach.

Following the feasting there was a short season of speech-making. Every one was only permitted five minutes. Among the speakers were: A. Herrington, Madison; Rev. J. A. Reynolds, Red Bank; J. Kenney, Henry Wood, G. Steele, H. S. Kettel and N. Butterbach. The Rickards brothers entertained us with the newest songs. Visitors were: The Scollay brothers, Dr. E. Fields, Rev. J. A. Reynolds, W. Woods, W. L. Rementer, of Vaughan's Seed Store, New York; Geo. Corliss, R. Stryker, Hardiall, N. Y., and many others, about 65 in all.

JANESVILLE FLORAL CO.,
JANESVILLE, WIS.

Columbus, O.

TRADE DULL.

There have been no society events of any importance during the past week; all stock is moving slowly and prices are low. Carnations are bringing anything from 25 cents to 75 cents per dozen. Violets are fine but the demand light. Bulbous stock is very plentiful and the demand fair. There has been an over supply of primroses on hand lately and plants are being sold at almost any price to get rid of them. Plants that would under ordinary circumstances bring 50 to 75 cents are now being run off at 15 cents each. Azaleas and callas are looming up in fine shape, but unless trade picks up there will be a slight over supply of the former. Cut callas seem to be very popular this year for both vases and flat sprays. There has been a very heavy demand for fernery plants this winter and in some cases the demand exceeded the supply. Cinerarias are coming into flower now, plants selling at about 25 cents each.

Livingston Seed Co. have been running Saturday specials for some time. Carnations were last Saturday's special.

CARL.

PREPARE FOR EASTER

Araucarias, Azaleas and the Cultivation of Choice Easter Plants Our Specialties.

Never mind hard times. Look for a big Easter trade. Secure your supply early. All our houses are full to their utmost capacity with the choicest plants in **bud.** Just right for Easter—in fine condition; finer than ever before. With a little forcing they can be brought into bloom at any time, according to your requirements.

Araucarias Robusta Compacta and **Glauca,** a perfect marvel and wonder of nature. We are one of the heaviest importers and cultivators of this beautiful decorative plant. Our plants are about the same in height as in width.

Robusta Compacta, 7-in. pots, specimen plants, 6-year-old, 5 tiers, 27 to 30 in. high, $2.00 to $2.50 each.

Excelsa Glauca, specimen 7-in. pots, 6-year-old (the fine bluish-green color makes or gives this variety a fine, striking appearance—sells at sight), 30 to 40 in. high, 4, 5 and 6 tiers, $1.50, $1.75, $2.00, $2.50 to $3.00 each.

Araucaria Excelsa, 6-in. pots, 4 to 5 years old, 20 to 25 in. high, 4,5 and 6 tiers. 75c to $1.00 each; 5¼-in. pots, 3 years old, 3 to 4 tiers, 7, 8, 10 to 14 in. high, 40c to 50c each.

Azalea Indica. We make a specialty of importing every year an immense stock of the choicest varieties popular in America, grown under contract for us by an Azalea specialist in Ghent, Belgium. If you need Azaleas, don't look around in vain all over the country for bargains, but come or write direct to us. We will be able to supply you with the best obtainable in the American market; full of buds; in good, healthy condition, right for Easter; all planted in October or November in 6 to 7 in. pots.

☞ **Take Notice.** We do not sell Azaleas in the fall, having the best picked out (and having the rubbish left for Easter), but we keep them all full of buds for our customers for Easter. Mme. Van der Cruyssen (2,500 of them), this is the best double pink variety known to the market, round as an apple, covered with buds; Simon Mardner (dbl. pink), Vervæneana (variegated dbl. rose), Bernard Andreas Alba (dbl. white), Niobe (dbl. white), Deutsche Perle (dbl. white), Empress of India (dbl. variegated), Professor Wolters, and about six more varieties. Price: 6-7-in. pots, 60c, 75c, $1.00, $1.25, $1.50, $1.75 to $2.00 each.

Kentia Belmoreana and **Forsteriana,** Belgium and home-grown stock, 4-in. pots, 18 to 20 in. high, 35c; 5¼, 5½ and 6 in. pots, bushy plants, 50c, 60c and 75c each.

Latania Borbonica, 5-in., 30c.

Asparagus Plumosus Nanus Compacta, 4-in. pots, $10.00 per 100.

Dracena Bruanti, from Belgium, full of green foliage from bottom to top, 6-in. pots, 22 to 25 in. high, 40c each

Cineraria Hyb., 4-in., $5.00 per 100; 5-in., 20c each; 6-in., $3.00, $4 00 to $5.00 per doz.

Choice Nephrolepis, all pot-grown.

Boston Ferns, 8-in., as big as a washtub. $1.25 to $1,50 each; 7-in., $1.00; 6-in., 50c; 5 to 5½-in., 35c to 40c.

Whitmani Ferns, 8-in., $1.50; 6-in., 50c.

Scottii Ferns, 7-in., $1.00 to $1.25; 6-in., 50c; 5½-in., 40c.

In Philadelphia there's a florist noted,
Aschmann his name, his plants beyond compare;
To a sweet girl his heart is all devoted,
Next rank his Araucarias, passing fair;
When seen together they're a pair so charming—
Brimful of beauty—both he cannot keep;
So to his heart he'll hold his winsome darling,
While you may have the Araucarias cheap.

Ficus Elastica or **Rubber Plant,** home grown and Belgium stock, 5, 5½, 6 and 7 in. pots, 30c, 35c, 50c, 60c and 75c each.

Begonia Improved Erfordii, 4-in. pots, very large, $2.00 per doz.; 5¼-in., in bloom and bud, 25c each, or $3.00 per doz. **Begonia Flambeau,** 5½-in. pots, sells on sight, 25c.

Cyclamen Grandiflora, 4-in., in bud and bloom, 20c.

Hydrangea Otaksa, 6 to 7 in. pots, in bud, 35c, 50c, 75c and $1.00 each; right for Easter.

EASTER LILIES. Japan Multiflorum, of our own importation, raised from special 10-in. bulbs, 6-in. pots, right for Easter. This year I can say we have the finest lot we ever had. Have about 5,000 to offer. Please send your order in time this year, as we have such a big demand every year for Lilies that some cannot be supplied. Prices as usual. Plants above 5 buds, 10c; plants under 5 buds, 12c per bud. (Medium height).

Spirea Gladstone. 6 to 7-in. pots, large stock, right for Easter, in bud now, 50c to 75c.

Watch adv. for Hyacinths, Tulips and Daffodils later on.

Please mention if in or out of pots. All goods must travel at purchaser's risk. Cash with order, please

GODFREY ASCHMANN, 1012 West Ontario Street, **Philadelphia**

The Grand New Double Geranium

"FENICAL"

Since I am willing to introduce this new and excellent variety to the public, I am sure it will bring joy, gladness and satisfaction to all who are willing to take hold of it.

IN SIZE IT IS THE LARGEST ON RECORD,

Clusters measuring from three to five and one-half inches in diameter.

BORNE ON LONG STEMS, FROM SIX TO FOURTEEN INCHES LONG. **Color, Bright Sage, stands the weather, foliage is fine, making a nice, bushy, shapely plant.** Plants bear from one to seven clusters at a time. It has become A STANDARD VARIETY. IT HAS BEEN TESTED FOR SEVEN YEARS TO ASSURE ITS QUALITY before being placed on the market.

A large sum has been refused for the sole right of this plant.
Try a lot of them and be convinced.
If you wish something good, now is your chance.
I must sell owing to the crowded condition of my greenhouses.

All plants will be delivered strictly in rotation.

PRICES ARE AS FOLLOWS:

Fine 2½-inch plants.....$2.00 per doz.
Fine 3½ inch plants..... 2.75 per doz.
Fine 5-inch plants..... 3.50 per doz.

Kindly remit with order.

VAUGHAN'S SEED STORE, 84-86 Randolph Street, CHICAGO. 14 Barclay Street, NEW YORK.

Greenhouses and Nurseries: Western Springs, Ill.

SPRINGFIELD, MASS.—Mrs. Beals of Eastern avenue has raised a fine seedling carnation, a cross between Lawson and Prosperity, which has attained some local fame.

BROOKLINE, MASS.—James Quinn of Harvard street is a candidate for the office of selectman. Mr. Quinn's sympathy will be with the working and small business classes.

OWENSBORO, KY.—The Nanz Floral Co. will move from its present location to the corner of Main and Allen streets, the building having been remodelled to suit the trade of the firm.

Omaha.

The trade here reports the best February ever had and many report an increase of from 10 to 20 per cent over last year. Valentine's Day was the best we ever had and it seems it is getting better every year. Violets took the lead and sold for $2 per 100 (single), which is certainly a big price. Roses and carnations did not go up in price and sold, roses $1 to $2; carnations, 75 cents to $1. Bulbous stock sold well all winter and it seems the mild winter had lots to do with its perfection. Roses are at their best now. American Beauty is scarce and mostly short stock is seen in the stores. Carnations are getting scarcer and will be until warm weather sets in. Pot plants in bloom are selling better now than during January, but their price is 20 to 30 per cent lower than last year. Funerals take the best of the flowers, although we had considerable parties during February. The outlook for Easter is good, but the lilies need a lot of sunny days to bring them on in time, as there are more Japanese than Bermudas grown in this vicinity.

NOTES.

There will be very little greenhouse building done this season. Most people are still uncertain of the outcome of the money crisis and presidential election.

The Florists' Club will have a bowling night this month and a good time is promised.

Hess & Swoboda contemplate erecting a storage building this season. GRIPPE.

Madison, N. J.

At Chas. H. Totty's range there is great activity in chrysanthemum plants; thousands are being sent out, while the work of propagation goes steadily forward. The many new and standard varieties that are handled so successfully by Mr. Totty, always insure a heavy demand for his stock. This season, his cut of winter flowering sweet peas, has been very heavy.

Robt. M. Schultz is making a record with Richmond rose. Though his cut throughout the winter has been heavy, he now has two houses that show splendid possibilities for Easter.

Ordonez Bros., will this year handle a record breaking importation of orchids, their collector being now meeting with gratifying success in his work in South America.

Though the growers of this city are, in common with many others, dissatisfied with prices, they are keeping busy and hopeful.

At the Villa Lorraine Roseries (T. W. Stemmler, proprietor), a fine cut of Bridesmaid roses is being made.

Righter & Barton, are showing good stocks of American Beauty and tea roses.

At the range of A. H. & W. S. Schultz, there are good stocks of roses in sight.

TRADE VARIABLE.

Business during the past week was rather dull in most houses; here and there a little spurt. The beginning of Lent causes a falling off of receptions, etc., and so cuts off a lot of trade from the retailer. Added to this a number of people have left town for the south, not to return until Easter. Bulb stock and violets still flood the market; carnations are not as plentiful as the two weeks before; roses are first class and plentiful. The greenhouses are getting in shape for Easter, and the fine weather is pushing stock along at a rapid rate. The predictions are for a good spring trade, with plenty of stock.

NOTES.

Wm. Gray, since the first of the year with L. L. May Co., St. Paul, formerly of Winnipeg, is now associated with the Minneapolis Floral Co. Geo. E. Valker, for the past two years packer for this firm, is going into business for himself with Ernest Ekman of this city, at Minot, N. D. Their store opens March 23.

R. A. Latham has taken a vacation, going to Indiana for a week, and will take in the show at Chicago on his return trip.

Lakewood Cemetery Association is putting in a gold fish pond in one of its new greenhouses. M.

Toronto.

TRADE STEADY.

Trade the past week has been more steady, and the few days when the weather was favorable helped the transient trade considerably. Roses are about equal to the demand with the quality excellent. The new price list takes effect March 9, when $12 will be the price for No. 1 stock and $6 for No. 2, excepting Richmond which will be $8; American Beauty, select, $40 with the other grades at $10-$30. Carnations are listed at $5 per 100 for select, but few are going at this price except special cases. Carnations were never more plentiful than at present, the increased amount of glass which has been devoted to their production, the heavy crop which is on and the many lines of other flowers has decreased the value of them to such an extent that in quantities they can be bought for very low prices. Lilies are coming in very good shape both Harrissi and longiflorum there being very few diseased bulbs this year. Flowering plants are plentiful and good rhododendrons, azaleas, spireas, primulas and many other varieties give the stores a spring-like appearance and are meeting with fairly good sale.

NOTES.

The Steele-Briggs Seed Co. is sending in fine Primula obconica; this, as grown by this firm, is a decided novelty, many of the trusses of flowers being as large as hydrangeas, while the foliage is larger and a darker green than is usual with this plant. John Riggall, the foreman, has been working on them for years and now has an excellent strain.

J. S. Simmons had the Worts-Davies wedding, the decorations in the house being elaborate. A large canopy was used, from which was suspended a large bell made of white hyacinths; many white azaleas and roses were used. The church was banked with palms and three large arches were made of white carnations and smilax.

Chas. Tidy had the Falconbridge wedding, the event of the season. Marguerites were the favorite flower, and they were used by the thousand.

J. H. Dunlop has some fine lilac; his store has been showing many of the newer varieties of carnations.

Japanese air plants are all the go in this city, and are having a very good sale.

There is a scarcity of medium-sized palms, the demand being brisk lately.

THE CARNATION.

Commercial Carnations.

A paper read by Wallace R. Pierson, Cromwell, Conn., before the Florists' and Gardeners' Club of Boston, February 25, 1908.

I have no intention, in writing this paper, of giving history. That branch may be useful, but it has been covered so many times that to go back to Lizzie McGowan and Mrs. Fisher is useless. We wish to consider just what working materials we have before us at the present time, and to learn how to make the most of what we have. The carnation after the advent of Mrs. Lawson and the carnation before that time are as different in all essential characteristics as the light of a grey day in winter is to the brilliancy of the houses in full sunlight with the glare from the February snow. Daybreak before Mrs. Lawson, as the sun breaking through the fog.

We have today a grand collection of varieties and there are so many new stars appearing and asking recognition that we are tempted to ask, "Where will it stop?" "Because of the success of some new varieties, and because I have a good seedling, am I not justified in putting it on the market?" is the question we are so frequently asked. Let the owner of the seedling think of the number of horses bred from fast stock which are never entered. They are tried out, and if they have not the ability to deliver the goods they are never entered in the race. So with the carnation seedlings. Raise them, if fancy leads you to do so. Try your hand at it, but know before they are presented to the public what their powers really are.

I believe that the qualities which go to produce a good seedling are, to a large extent, due to the inherent good qualities of the parents, but with the seedling there is apt to be an increase in vigor. The best articles and papers on the subject of seedlings can only be from those men who handle and study them most, and, although a haphazard seedling may make good commercially, the best variety is more apt to be produced by one who understands the varieties he works on, and who makes his crosses with certain definite points in view. The dissemination of a seedling being decided upon, the future success of it, as a variety, depends as much on the manner of producing and sending out the stock as on any inherent good qualities it may have, granted, of course, that it would never have passed the seedling stage had it not some of the inherent qualities which go to make up a commercial carnation.

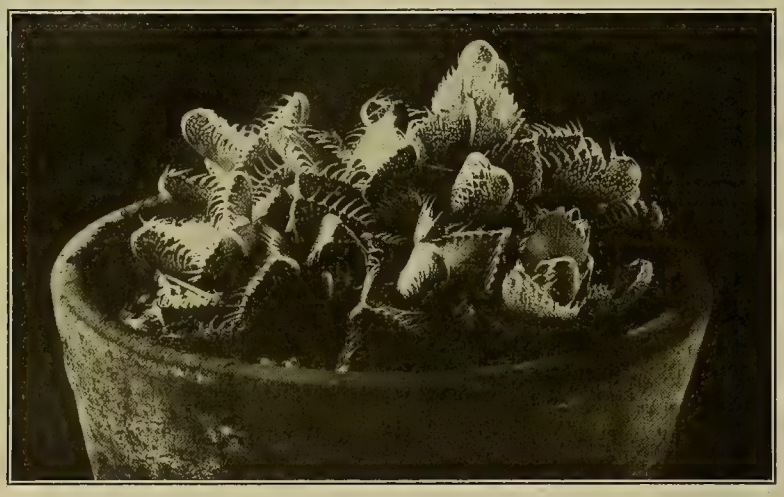
WHAT IS A COMMERCIAL CARNATION?

What then is a commercial carnation? To be brief, it is one which the grower can handle so that it is a paying proposition for him, and this necessitates it being one which the public will buy with profit to the retailer. This definition is broad, and yet it covers, I believe, the entire situation. It does not exclude the fancy sorts, providing they can meet the terms, which the public will buy, and which is a paying proposition to the grower. A very large bloom is not, as a rule, obtained in the same quantity from the same space as a smaller one. Here then, seems to be the size limit. Can we secure enough extra money for the individual bloom to warrant the growing of only such varieties as produce flowers larger than the ordinary? Perhaps, with some growers there would be such a demand, but not as a rule would this be true. The commercial carnation in its broadest sense is the medium sized bloom, the average length stem, the non-bursting calyx, the even-colored bloom, with the keeping and shipping qualities which are usually a part of the make-up of such bloom as I have tried to describe. Light pink, intermediate pink, dark or cerise pink, scarlet, dark red and white we must consider standards. Variegated we must class as fancy, for both white and yellow variegated are profitable only when grown where there is a market which calls for them.

The number of flowers per square foot of bench, and the number of dollars per year is the only question the commercial grower should consider. The average number of blooms per plant is a deceiving method of calculating the profit from a variety, for one plant of some varieties will occupy the same space as three of a different type which run to bloom and not to plant. Then, too, one year's experience with a novelty is not always a proper guide, if the results be shown merely on paper. A different handling may produce different results. Very few varieties become disseminated without having some good

features, and while one variety may do well in a locality, another may not. This is the nature of the beast, and having in mind several that have failed me, and done well elsewhere, I will drop the subject.

Given, then, a stock of standard varieties, what is the best method of handling them all the way through? To this I reply, with consideration for the individuality of each and every variety in your list. I will try to explain myself on this subject.



MESEMBRYANTHEMUM TIGRINUM.—See page 384.

Three distinct classes of varieties appear to me. One inclined to soft heavy foliage and curly leaves. This type is inclined to come short jointed, and to require an unusually heavy body of roots to produce early bloom with stems long enough to be worth the handling. For these there is nothing but indoor culture to secure the best results.

The second class is the doubtful one. The thin foliaged, loose jointed specimen which makes only bloom if grown inside and very little plant. It needs less soil, and with less top makes correspondingly less root. Field culture with early benching seems the best, as the production of plant is easier to accomplish in the field.

As a type of the third or variable class, I wish to mention Enchantress, a variety which will be found superb for indoor culture, and an easy variety to lift from the field, even as late as September to fill the last ends and prevent loss of space.

Classing these varieties, then as we do, we plan our planting as soon as we can determine how much room we can count on after Easter. The condition of the breaks from 10 to 12 inches above the soil in February will determine this. Get the heavy foliaged varieties ready for an early start. Then comes the wait for after Memorial Day, when the summer's shifting is in full blast, aiming always to leave a part of a house of white and some Enchantress for the last of June.

We like to handle young stock in pots for the April benching, and 3-inch is a convenient size to handle, this stock having been shifted from 2-inch, or 2¼-inch, as the case may be. Where this stock has been in 2-inch, however, a shift to 2½-inch and then to 3-inch is to be preferred to a single repotting. For later use, benching in shallow soil about four inches apart gives a better chance for the plants, and means less work, and danger of loss or stunting, due to being pot bound, is avoided.

Field planting from 2-inch pots is the next in order, and then the care in the field. Summer watering I do not approve of, and for the following reasons: It is very seldom that the soil takes up this moisture to any depth. If done at night, the sun of the next day takes more even than was given. A continual wetting of the foliage at night is a great incentive to leaf spot, and growth under these conditions will be soft and therefore an easy subject to such fungus. The best plants come from the field that gets the most hoeing, and I do not think a well cultivated field can be improved upon, except, by more hoeing.

Our system, then, is a combination of the two, or rather three, methods. Pot culture, bedding them out in the houses intended for chrysanthemums, and field culture. "Would you plant them all inside if you could?" is a question I am often asked, and I can only answer it by saying that it is an impossibility to handle all our stock with any one method. Our supply of bloom is broken for only two months, as we cut by September from the first planted houses, and our last houses we aim to plant in early July, and do not care to cut from them until November. Last season we planted one bench in March, and the plants are still looking well and producing the bloom.

"Do you prefer the bench to the solid bed?" is another. I will answer it by saying that for early planted stock the bed is superior; for field plants I prefer the bench. The heavy foliaged varieties seem to be in their element on the beds, while the others seem to even up matters.

TEMPERATURE.

Temperatures can almost be figured by classes, the heavy foliaged varieties, as a rule, standing for a little more heat. The evenness of the night temperature is perhaps the most essential. Very seldom have we had any trouble with bloom which could not be traced to this source. Softness in such varieties as Enchantress usually means an overabundance of water at the root, or a too high temperature at night. A hard bud is usually a check from contact with glass, or cold draughts of air at some time, due, perhaps, to a sudden drop in temperature, or broken glass. If we would grow carnations well, we must watch them nights.

The producing of the best is one long struggle. Insects, fungi and temperature all make it a never ending fight. Watchfulness, combined with common sense and the willingness to do hard work, will succeed in meeting these troubles, and coming out with success and credit.

To the retailer I would say, "help your grower." What sells best with you? What colors are you wanting most? Advise him how they keep, and he'll know how to run the houses. And growers, let me say to you that it is

COLLECTION OF SUCCULENT PLANTS.—See page 384.

poor economy to grow second class stock because business is dull this season. On good stock depends your future, for it is one of the essential elements of success.

Fixing a Carnation Sport.

ED. AMERICAN FLORIST:—

I have a carnation sport on Enchantress, a deep pink, speckled. Please state the best way to get a stock of it. All the rest are Enchantress flowers; only one shoot produced the sport.

SUBSCRIBER.

Cut the flower with a short stem and encourage the lower part of the same stem to throw side shoots. Then take these off and strike as cuttings in the usual way. Mark the stem after taking the flower off with raffia or in some other way to ensure no mistake being made. It is by no means certain that all the cuttings will be true. Possibly you may not get one the same as the sport. It will take several years of propagation and selection to fix it and work up a good stock. G.

CHRYSANTHEMUMS

Cross-Fertilization of Chrysanthemums.

The past fall has been a favorable one for producing seeds and that is doubtless due to the many bright days, which give an abundance of pollen. The most suitable plants for cross-fertilizing are those grown in 4-inch pots and restricted to one flower. The labor involved in the manipulation of composite flowers is more complicated than with carnations, geraniums and many others, which have a less number of reproductive organs, which are so constructed as to be visible and under the complete control of the operator. The single and semi-double varieties will self seed but the large and double ones cannot, owing to the long petals and their congested arrangement, which prevents the pollen from reaching the minute style, located at the base of the flower.

The most tedious part of the work is to prepare the flower to receive the pollen, and owing to the construction previously referred to, it is necessary to dispense with the greater part of the long petals, so that the stigma (the upper surface of the styles), to which the pollen is applied, are exposed. (See fig. 1.) This is best accomplished with a rather heavy pair of manicure scissors, care being taken not to injure the styles. The great object in artificial pollenizing, is to have complete control of the parents, so as to be assured that the seedlings are a result of their union. The staminate (pollen producing) florets are usually located in the center of the flowers and while they produce the pollen, they also have styles the same as the outer petals and if the pollen is allowed to develop, self-fertilization is likely to take place. To prevent such action, it is necessary to emasculate the flower of the seed bearing plant with the point of the scissors.

This operation must take place prior to the developement of the pollen, and, for this reason, the trimming is usually done when the outer row of petals is fully expanded. The styles are very minute, located at the base and attached to the petals. At maturity the upper portion divides and assumes a horizontal position, much the same as the top of the capital letter, "T," the upper surface being the stigma. (Fig. 2.) As soon as the styles have completed their growth, pollen is selected from the most desirable varieties with a camel's hair pencil and applied to the stigma. In four to five weeks the seed will be ripe when it should be harvested and sown early in the new year.

The question has been asked, "does the operator know what results he will obtain?" He does not know. The ways of nature are so obscure that it is impossible to imagine the bloom of his seedlings. We can adopt a few simple rules that appear rational and must then await results. By using pollen of a large exhibition bloom upon a pompon, we would expect to increase the size of the latter, but not of the former. Crossing narow and broad petalled varieties, would doubtless enlarge the petals of one but not the other. The same would apply in uniting incurved and reflexed forms, long and short peduncles or stems as well as extremes in color. The nearer the parents are to the character we wish to establish, the greater the probabilities of success.

Fig. 1.—Chrysanthemum Trimmed Ready for Fertilization.

Often it is difficult to make the most desirable selection, as there are usually several characteristics of equal importance. We may have two varieties, which, united, would give an improvement in color but one has a poor stem or is not the best form, so it seems wise to make such crosses as appear practicable and select from our seedlings those which show improvement in the characteristics which we are endeavoring to promote. Fortunately the new varieties produced from seed are perpetuated by cuttings and thus the trials, often so perplexing, in the development of annuals (which must come true from seed year by year to be of great value) are eliminated.

The dominant power of the parents, as manifest in the seedlings, is very interesting, but it is not in the power of man to grasp and put into operation a set of rules which will give assurance of the desired results. If it were possible to know the proportion of the two colors entering into the union, that would be assimilated in the construction of the color cells of the offsprings, then it might be easy to breed colors to order. We know the laws which govern the mixing of colors, but we do not know what proportion of these colors will be utilized in the establishing of color in the seedling. Will we have a perfect blending of the red and yellow, or will nature spread a few splashes of red over the yellow and give us a bronze effect? Such questions continually arise and remain unanswered until the new creation is before us.

ELMER D. SMITH.

Chrysanthemums in Germany.

The all-absorbing subject discussed in recent issues of German trade papers is the autumn queen of flowers. Of interesting facts thus brought to light those forming the theme of the many reports and remarks written by well-known chrysanthemum growers of extended experience seem most worthy of note. In their opinion nothing really new had been seen at the various fall exhibitions held in recent years. Many of the novelties introduced and shown as such for quite a number of seasons, it is averred, were but duplications of older sorts, reproductions in fact of varieties that had

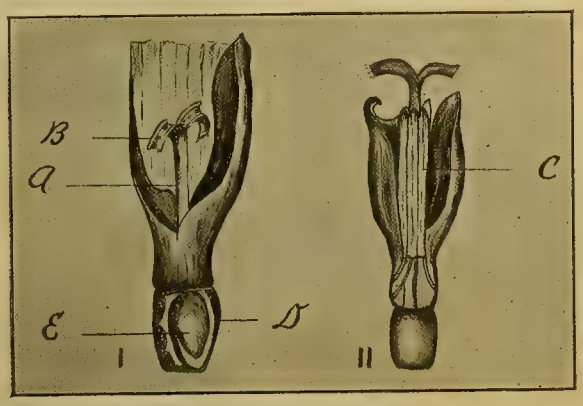


Fig. 2—(1) Pistillate Floret; (2) Staminate Floret. (a, style; b, stigma; c, stamens; d, ovary; e, seed.)

already existed and were under cultivation everywhere. In consequence lack of distinctive characteristics in the sorts now grown commercially prevails, many varieties passing under two and even three names. But last fall things took a turn, and all admit it. The year of 1907 brought its surprises in novelties to the wonderment of even the most critical of adepts. Although the number of novelties exhibited last fall did not exceed those seen in former years they far surpassed them in point of excellence. Not only were the greater number examples of astounding improvement in nearly all the classes as shown, as respects form and size of bloom, length and strength of stem and compactness and vigor of growth, their principal claim to being strikingly new varieties rested in the grand array of novel colors, combinations of shades and exquisitely blended tints, such as the most sanguine of chrysanthemum enthusiasts had never expected to behold in the flowers of his adored queen. As perfect marvels of beauty in this class are named Lady Lennard, Mary Masson, Mrs. W. Wells, Excelda, O. H. Bromhead, R. F. Felton, Reginald Vallis and W. Meredith.

Another very attractive feature of all the chrysanthemum shows held last fall were the many fine exhibits of single varieties in bush-form, standards and half-standards. It is a type which more than any other has proved of great value for the general trade in potted market-plants, especially to German growers, since these kinds can with least effort be worked into the best of stock under even the most trying conditions such as they are compelled to contend with. Among the most easily grown of the brightest colored and most floriferous singles: Ada Owen, light rose; Annie Holden, yellow; Horatio, brown; Mary Anderson, pink; Edith Pagram, white and rose variegated; Daisy, white, and Scarlet Gem are most highly spoken of. Leading sorts of large flowered chrysanthemums, extensively grown for cutting in Germany, are Mme. Gustave Henry, Lady Selborne, Miss Alice Byron, Princess Victoria, Western King and Snowdrift in white. Mlle. Marie Liger, Mrs. Barkley, Duke of York, Jean Calvat, Mermaid and Margot in red and rose. Queen Alexandra, Le Grand Dragon, Mme. G. Rivol, J. R. Upton, Bonnie Dundee and Sparklets, yellow shades. None of the varieties are grown under constant bench culture in the summer. Propagation ends in April, and while some of the stock is shifted along from pot to pot during the summer and placed in outdoor frames, most of it is planted out in the open field, where it receives close attention as to staking, disbudding and general culture. Many of the kinds are grown to but one stem and one flower, others to three or five, the smaller percentage into shapely bush-plants. In the fall all are lifted, potted and eventually housed. The damp and chilly days of autumn, as usually experienced in Germany, are more dreaded than even early frosts. To combat mildew in finishing up overhead heating must be resorted to, after the plants have been brought in.

FREMONT, OHIO.—J. R. Sprout claims the largest apple tree in the state; the tree measures nine feet 3 inches in circumference at the base and bears well each year.

A Tribute to the Late Reuben H. Warder.

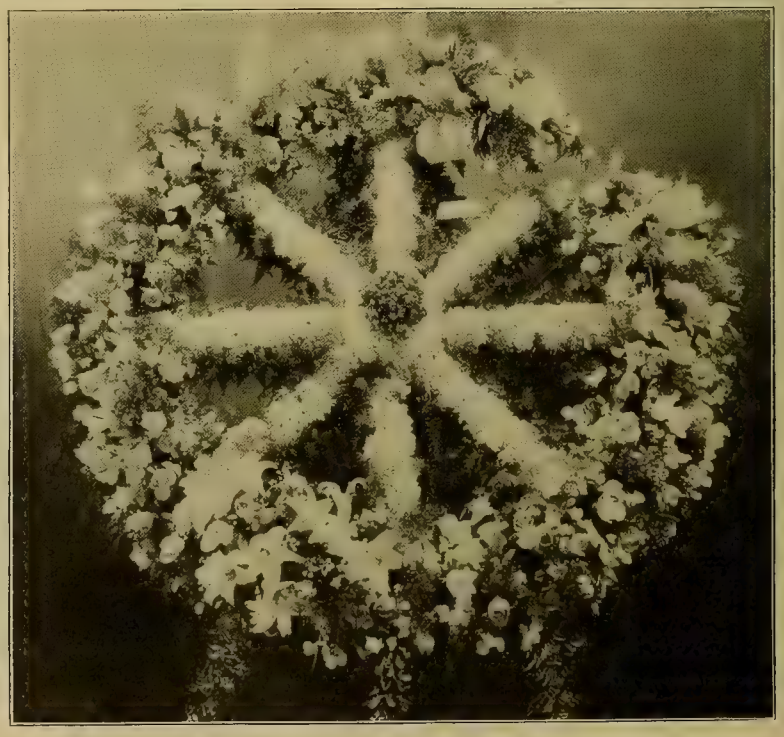
The following is the text of the address given by Slason Thompson at the memorial services, held at the Academy of Science building, Lincoln park, Chicago, March 15, for Reuben H. Warder, late superintendent of Lincoln park, who died December 26.

Others have spoken of Reuben H. Warder, the worker, the public servant and benefactor—let me speak of my friend, the man. Happily, in so speaking, the words we would wish to be spoken of ourselves when there is an end to flattery, are intrinsically true of him. Would we be esteemed sincere? Mr. Warder was the soul of sincerity. Vain pretense found no lodgment within that steadfast breast. Would we be deemed modest, gracious, just—above a lie, a stranger to meanness, deceit or pettiness of spirit? So in every last particular and relation of life was he. Would we each be regarded as citizens for our fellows to trust; for men to admire; for women to love? Such was Reuben Warder.

A most companionable man was he—welcomed in all circles where men esteem manly worth, and women recognize that true chivalry abides only in purity, gentleness and courage—children were devoted to him because he spread the ripest fruits of his comprehensive knowledge of field and forest before their wondering minds. Nevertheless this man in some phases of life was singularly alone. Despite his many and true friendships he lived a solitary being. He seems never to have known a home of his own since he left his father's roof. No man, so far as I know, got far within the outworks of his affection—or woman either, for that matter. And yet, he had all the attributes that would seem to preclude this strange anomaly. Explain it I cannot, unless it be that "nature was his goddess." From his earliest youth he had worshipped at her shrine. He had walked amid the groves of nature, and held communion with her in the open fields and in her hidden wilds. Nature unlocked her secrets to him as she has done for few—the happy few, who, when gifted with the gift of imagery in words, color, or music, are enrolled among the immortals.

I have no doubt that many times in his experience Reuben Warder felt the same emotion that thrilled Robert Burns when his plow crushed the "wee, modest, crimson tipped flower." There was a living sympathy between this man and all that sprang from the bosom of mother earth that I have never seen equalled. He loved the lichen and the oak. His eye, ever alert, searched out the blades of grass and the tall tops of the rustling pines with quick and accurate comprehension. No book-taught botanist was Mr. Warder. He had held familiar converse with his mistress nature from the day he first saw the light—where the Ohio rolls—until his eyes rested for the last time on the snow garbed vistas of Lincoln park.

To such a lover of nature all seasons were summer. Glint of sun, drip of rain, soughing of the wind had their responses in the nature of this strong man with the weather seamed face. He loved the summer, but he felt what was going on under the snow and ice, just as surely as though it were visible to those searching gray eyes. And what eyes they were, with their shaggy brows! On his last visit to Lake Forest, some three weeks before his death, I remember how for almost an hour he sat looking out over the lustrous lake, changing to every hue Michigan alone knows. Scarcely a word was spoken as the shadows wheeled slowly across the face of the water. But those keen gray eyes seemed to respond to the softening shadows. Far out on the restless waves they seemed to find rest. It was such an hour as poets sing and lovers love. And this man was a true poet, for he was a true lover of nature. And that evening when the lake was hidden from our eyes, and the table had been cleared, and the lamps were lit and the oak log he loved blazed upon the hearth, and each was recalling some treasured scrap of song or verse—then Mr. Warder drew from his pocketbook a newspaper clipping, brown with age, and scarcely holding together at the creases, and with his voice broken with emotion and the difficulty of making out the blurred print, he read three stanzas describing the coming, the being and the passing of man, that seemed almost the summing up of his idea of life. He said he had carried that clipping in his pocket-



SIX-FOOT BROKEN WHEEL BY A. LANGE, CHICAGO

book for more than 30 years and that it had been a source of infinite consolation to him. We asked for a copy and he said he would have it reprinted. But I fear it never was.

I have ventured to give this little glimpse of Reuben Warder in private life that you who only knew him as an official, a master of his craft, an artist, whose canvas was the landscape painted by nature's "own sweet and cunning hand," who recarpeted this beautiful park with grass, from which the weary were never forbidden; who toiled late and early that the myriad toilers of this city might here find rest for their bodies and souls; that you might know him as one who saw visions and heard melodies in nature that are given to few to see and hear. That such a man should have been endowed with the gift of practical administration was nothing short of marvelous. Such men "feed the high traditions of the world." When shall we look upon his like again?

THE RETAIL TRADE

Suggestions to Retailers.

In a season when flowers are as cheap as at present, designers should redouble their efforts to advance the use of cut flowers in funeral work, in preference to metal designs, or any other material. It is no injustice to anybody to state, that the person who lays other than a bunch or design of natural flowers on the bier of a loved one, or a respected acquaintance, misses the real spirit of the loving tribute. We grant that the intentions may be of the best, but wax, metal and other dead matter, fall far short of conveying the sentiments of the esteem, and affectionate remembrance that is expressed by nature's blossoms. To some it may seem that this advice is unnecessary, but we have in our great cities an element that clings to the artificial.

The present time is a good one for the intelligent designer who frequently does business with the poorer classes to do effective missionary work along these lines. There is now no restriction on what may be used in funeral work. Lily of the valley, beautiful in any combination, is now being sold on the streets of our great cities. It is to the interest of every branch of the trade, that these and other flowers should be used in funeral work, rather than go to the hawkers. Carnations, sweet peas, freesias, violets, stocks and other flowers are all very cheap and can be effectively used in designs.

John Walker, Youngstown, O.

John Walker, of Crab street, Youngstown, O., who conducts a very large wholesale and retail business reaching to all points of eastern Ohio and western Pennsylvania, has arranged to open up a fine retail store on West Federal street. Mr Walker has at times a greater amount of stock than his shipping trade calls for and this accounts for the decision to open the retail store. Recently the hospitals and charitable institutions of the city have been benefiting by Mr. Walker's liberality in the way of large quantities of flowers. His greenhouse plant at the Wick avenue extension is always worth a visit. There are 18 large houses in all filled with all kinds of stock. Carnations and violets are specialties, several houses being filled with the former and one large structure with the latter.

ST. PATRICK'S DAY BOX, BY JOHN MANGEL, CHICAGO.
Green Carnations, Maidenhair Ferns, Potato and Pipe, Tied with Green Ribbon.

The Pussy Willow.

Not within my recollection has anything been placed in the hands of the decorators, that is cheaper and can be used more effectively than the pussy willow. Its cheapness, it may be added, in no way interferes with the sale of fine plants or cut flowers as it fills a place distinctly its own. Recently in one of the New York stores, we noticed combination baskets of Azalea mollis, A. Indica and other plants on which imitation handles of pussy willow had been skilfully executed. On several of these, bows of ribbon, of a shade to match the willows, had been tied. The pliability of the wood makes its manipulation an easy matter.

Design by A. Lange, Chicago.

A notable funeral piece, executed by A. Lange, Chicago, represented a broken wheel, and was six feet in diameter, standing on its easel nearly eight feet high. The rim was of adiantum, Uncle John roses, La Reine, tulips, sweet peas, callas, Harrisii lilies, lily of the valley and freesia. The spokes were of Enchantress carnations and Asparagus plumosus, while the hub was of white carnations with the axle of violets.

Another design, also executed by Mr. Lange, was that of a broken column. The column was of white carnations, the broken end being finished in violets. The base was of bronze and green galax leaves, Asparagus plumosus, Easter lilies and snapdragon. Around the column wound an elaborate garland of adiantum, American Beauty roses and freesias. This piece stood five feet high and cost $100, as did also the broken wheel above described.

"WHAT a shame to color those lovely roses green," said a lady recently looking at the green roses and carnations in a florists' store in Chicago.

The Gladioli in Wisconsin.

ED. AMERICAN FLORIST:—

As noted in the AMERICAN FLORIST a year ago, I went to Shiocton, Wis., to superintend the trucking on a 3,500-acre farm and to grow my gladioli there. Early in April a large part of my bulbs, over 1,000,000, were shipped from here by freight. They were sacked and then put in boxes and barrels. When they arrived in Shiocton, the sacks were taken out of the barrels and arranged in a barn so as to get air, as there was no place to spread them out. The spring was cold and wet, and it was the end of May before we could commence to plant. Even then there was no way to make drills but to draw a heavy sled over the soft mud and let the runners sink from two to four inches.

I rented half an acre of land where I put most of my named varieties. These were the last to be planted, and the work was not finished till the middle of June. But, as some of each kind were of large size, they made a rapid growth and were soon in bloom. For the good of the bulbs the flowers were cut early and very few were wasted. The children came for loads of them every day, and grown people as often as they could use them. They were carried all over the county and into distant parts of the state. Some went to adjoining states and even beyond. They were free to every one, but I did the cutting. Parties came in automobiles long distances to see them, and all were delighted. The gladiolus was very much in evidence in Shiocton until freezing weather came in October. The last one to succumb was Augusta. Thousands of them bloomed after very hard frosts.

The Wisconsin State Horticultural Society held its summer meeting in Shiocton at the last of August when the flowers were at their best. This gave all who attended an opportunity to see the collection, and I am sure they enjoyed it.

It is quite an undertaking to dig seven acres of bulbs, many of them small, with untrained help, no flats to dry them in, and no suitable buildings on the farm. We rented a building in town with six rooms on the lower floor, in which the bulbs were dried, cleaned, graded and packed. At the storage warehouse, where farm products are bought, we found hundreds of onion crates, all of which were at our service. My assistant suggested that we try a sugar beet lifter to do the digging. It was a great success. As fast as a team could walk the row was raised about two inches and left standing in loose soil without disturbing the bulblets.

During November we kept a fire day and night to dry the bulbs. By Thanksgiving I had them carefully packed, and on the next day they were put into a refrigerator car with at least one foot of hay packed all around them as well as underneath and above. I think they might have stood on the track in Wisconsin all winter without injury. I and my bulbs started for Cuyahoga Falls, O., December 2. I stopped in Chicago and when I reached home a week later I found them in the cellar. The season was too short. Bulbs did not grow large enough, and many of the bulblets failed to mature. But as for flowers I never saw finer. In an ordinary season the gladiolus can be grown to perfection in any part of Wisconsin.

M. CRAWFORD.

Cuyahoga Falls, O., Mar. 10, '08.

The Henry F. Michell Co. Trophy.

We figure in this issue the Henry F. Michell Co. trophy, for the best 50 Kate Moulton roses, exhibited at the annual convention of the American Rose Society, Chicago, March 25-27.

It is distinctly different in many respects from prizes ordinarily given. In the first place, it is most practical, having a base of six and a quarter inches in diameter, and an opening at the top of six inches. The vase is 12 inches in height, and will not only take considerable stems, but will hold a goodly quantity of water.

The trophy, which was designed and made by Maxwell & Berlet, Inc., Philadelphia, Pa., has a beautiful hand-chased representation of Kate Moulton rose on the front. The entire piece is finished in French gray and reflects great credit on the donors, Henry F. Michell Co., 1018 Market street, Philadelphia, Pa.

Cement Benches.

ED. AMERICAN FLORIST:—

I have noticed an article in your issue of December 14, which has just lately been called to my notice, in regard to concrete benches for greenhouses, saying that plants will thrive on them as well as on boards, with which I heartily agree, having experimented with these benches for the last four years, both as to their growing qualities and construction. Your correspondent says "Do not be led into the belief that stationary or permanent constructions are most practical." With this I do not agree, as I am positive that benches built in one solid piece are cheaper, by so large a margin, that if the question is thoroughly gone into, sectional benches would not be considered. They are much stronger as the entire structure is all bound together into one solid piece, so that they will withstand any weight to which they may be subjected. They are neater in appearance as they can be built lighter, and they do not need the expensive reinforcing material necessary in sectional benches.

They are cheaper because they can be built with the cheapest kind of reinforcing material, because they can be built with less material and because the cement can be handled more quickly; having a large space to work on, it can be smoothed out on a bench as fast as it can be mixed by four or five men; with 10 men as much as 700 to 800 square feet can be finished in two or three hours. They are cheaper also because the cement is handled only once, as it is poured on the place it is to remain, and not first poured into small moulds, then set aside to dry then taken out and stored away, and then carried to where bench is going to be erected, and then handled again in erecting bench; also because there are no beams of cement necessary to carry a permanent bench which are needed when sections are used.

For the benefit of your readers, I am willing to argue on any point your correspondent might bring up by actual figures on time in erecting and mode of construction, as I am firmly convinced that cement will supersede wood in the greenhouse as it is already doing in all other building operations.

LOUIS WITTBOLD.

THE HENRY F. MICHELL CO'S ROSE SHOW TROPHY.

American Rose Society.

THE ANNUAL MEETING.

The Chicago men certainly have acted in the spirit which has made their city the imperial city of the west. The beautiful Blackstone hall in the Art Institute is to welcome the treasures of the best rose cultivators of the nation. The exhibition will be opened on Wednesday, March 25, at 5 p. m. The first session of the annual meeting will be called at 7:30 p. m. sharp, the second session at 2:30 p. m. March 26, and a third meeting will follow. The headquarters of the society will be at the Stratford hotel opposite the Art Institute on Jackson boulevard.

President Simpson will open the meeting with an address. Papers or addresses will be offered by J. A. Valentine of Denver, on "Roses in Colorado"; W. A. Manda of South Orange, N. J., on "Rose Gardens"; George A. Maynadier of the Department of Agriculture, Washington, D. C., on "Soils"; Robert Craig, of Philadelphia, Pa., on "Roses in Pots for Easter"; W. H. Elliott of Brighton, Mass., on "The Proper Size of Greenhouses for Commercial Purposes"; J. F. Sullivan of Detroit, Mich., on "Roses for Decorative Purposes."

There has been offered a special growers' prize for the men who actually grew the flowers, by Peter Reinberg of Chicago, a first prize of $25, second $15, third $10.

A sweepstake by the Horticultural Society of Chicago, of a silver medal. A. L. Randall Co. offers a prize of $10 as a second for Ivory—and there was omitted in the printed list a prize by H. F. Michell Co., seedsmen of Philadelphia, Pa., for the best display of 50 Kate Moulton, a silver vase, valued at $25.

The ladies vote prize is a feature which seems to have elicited considerable attention as it calls for personal interest in the actual show.

There has been mailed to each member of the society the final list of special premiums, members admission tickets and a copy of the programme. It is hoped that we may receive a substantial addition to the membership. A. P. Budlong sends his check for a life membership.

During the meetings the secretary will lay before the convention the matter of the Rose Journal as a quarterly missive; one third of the members required to start the work for a year have enrolled.

George Asmus is manager of the exhibition.

Exception is made in favor of Killarney, to the rule "all cut flowers in the competition classes must be from a single growth of the current season."

BENJAMIN HAMMOND, Sec'y.

To be Done Now.

IN THE GREENHOUSES.

Roses as they begin to grow more freely may be more liberally fed.

A good clean-up for the spring in all departments is in order.

Look out for the leaf miner in marguerites and other plants which it most affects.

Mark the best spikes of mignonette for seed and thin the bells a little.

Commence feeding pelargoniums as soon as the growth is getting well away.

Tobacco stems should be placed around the pots on the benches where calceolarias are growing to discourage green fly.

Cyclamens potted as recently advised need all the light possible now, and as the roots get well through the soil plenty of water to prevent check to growth.

IN THE STORE.

Only a month to Easter. Have all preparations made and be ready with everything necessary to facilitate quick delivery.

Tastily arranged baskets of bulbous plants should sell well this season, but they must be tasty. There are too many cheap looking attempts about already.

Pussy willows and forced shrubs were principally used in a very fine window decoration recently noted.

Landscape and rustic scenery in the windows are effective when well done, but, unless they are really good, are the reverse of pleasing.

Don't hold out for long prices when stock is cheap and then blame the wholesaler for selling to street men.

OUTDOORS.

Good clumps of Caltha palustris may be planted in boggy positions where they will flower early in the spring and make a fine display.

The trays of gladiolus bulbs may be brought out and given a good airing and sun bath on a mild, bright day.

Geo. Asmus.

Manager Chicago Rose Show.

Lift all specimen conifers with as large a ball of roots as possible and see that the soil is thoroughly moist.

Berberis aquifolium should be planted in sheltered positions in the north, if only for the sake of its bright yellow flowers in spring.

Head back apple and pear trees in mild weather to within a few inches of where they are to be grafted.

Lobelia cardinalis thrives best on a somewhat heavy, moist soil, but is not perfectly hardy in such positions.

When dividing old clumps of herbaceous plants pull out all perennial weeds such as twitch grass, mallow and bindweed.

When planting herbaceous borders leave room for the plants to attain full development. The space may be sown to annuals the first year or two.

Cut back Clematis Jackmani, where it has become untidy, before growth starts.

OBITUARY.

William A. Kellerman.

William A. Kellerman, head of the botanical department at the Ohio State University, died at Guatemala City, March 8. Prof. Kellerman went to Guatemala about a month ago to study the flora there. He was born at Ashville, O., on May 1, 1850. He graduated at Cornell University in 1874 and received the degree of Ph. D. from the University of Zurich in 1881. He taught natural science at the Wisconsin State normal school for five years and was professor of botany and zoology at the Kansas State Agricultural College for eight years. For one-half of this time he was state botanist of Kansas and botanist at the Kansas Experiment Station. In 1891 he became professor of botany at the Ohio State University. He was founder and editor of the Journal of Mycology and the author of "Flora of Kansas," "Elementary Botany," "Phyto-Theca," and "Spring Flora of Ohio."

J. M. Gasser.

J. M. Gasser, head of the J. M. Gasser Co., Cleveland, O., died at Flint, Mich., March 12, at the age of 65. Mr. Gasser, although a native of Switzerland, came to this country when a child, his parents having emigrated here in 1854. He was a man of wide interests and knowledge gained by much study and travel. Beginning at the bottom, he gradually advanced in his business until he was regarded as one of Cleveland's most active and successful business men, this being brought about by his own skill, industry and integrity.

He started in business for himself in 1872 in quite a small way with a stationery and candy store. Flowers were used to beautify the store and gradually customers were asking for them. At first they were given away but later the demand increased so that he had to charge for them and this led to the establishment of the great business of which he was the head. A few years ago 250,000 feet of glass were built at Rocky River about nine miles out of the city and here the flowers for both wholesale and retail business were grown. Unfortunately, of late years Mr. Gasser's health has been far from good and he has at times had to leave his business to others.

Alfred Hildred.

Alfred Hildred, a florist for the past 25 years at or near the corner of Thirty-first street and Indiana avenue, died suddenly early the morning of March 17. About a quarter of a century ago he began working for E. Hobbs, and 12 or 13 years ago he began business for himself, later building at 3030 Indiana avenue, where he has since conducted a successful retail trade. Funeral services were arranged to be held at Perrigo's chapel, 2973 State street, March 19, at 6 a. m., and burial will take place at Concord, Mich.

Julius C. Gerlach.

Julius C. Gerlach, for many years junior partner in the firm of Begerow & Gerlach, St. Augustine, Fla., died at his home March 9. Mr. Gerlach was a German, 63 years of age, and came to this country when about 20. Since his retirement from business he has enjoyed good health, and the announcement of his death was a shock to his friends, of whom he had many, being a man much esteemed for his personal qualities.

C. T. C. Deake.

C. T. C. Deake, for years manager of the Idlewild Floral Co.'s greenhouses at Asheville, N. C., died March 11 at the ripe age of nearly 84. Mr. Deake was born in Providence, R. I., and entered the florist business in 1887. He afterwards formed the Idlewild Floral Co., which was maintained until two years ago, when the greenhouses were leased.

PROVIDENCE, R. I.—A fire at the establishment of T. F. Keller, 190 Mathewson, caused considerable damage to his stock and fixtures.

Idle Unfretted Flowers.

Let us dream on, then,—dream and die
Ere the dream pass.
Let us for once, like idle flowers,
Let slip the unregarded hours,
Like the wise flowers that lie
Unfretted by a feeble thought,
Future and past alike forgot,
Drinking the dew contentedly
In the cool grass.

FOUR WEEKS to Easter.

GREENED CARNATIONS is a much more acceptable term and more truthful than green carnations.

WING HOP, a Chinese gardener, near Fresno, Cal., is said to have produced an odorless onion.

THERE are rumors in Europe of a new white single violet, said to be as large as Princess of Wales.

ONE of the Philadelphia street flower sellers handled 10,000 carnation blooms last Saturday in his day's business.

THE Argentine ant referred to by Prof. L. R. Taft in our issue of March 14, page 332, is attracting considerable attention just now.

THE jewelers are blaming the increased expenditure on automobiles for slackness in their trade but florists are buying automobiles.

IN the note on "Early Outdoor Sweet Peas" which appeared in our issue of February 29, page 223, for "8-inch" nails read "8-penny" nails.

THE CHICAGO ROSE SHOW next week will join the rose hands of north, south, east and west as they were never joined before. Get your berth and ticket early.

WE have frequently alluded to the value of soot as a fungicide. We note now that English growers are recommending it as a preventive of rust in chrysanthemums.

THE March 7 issue of the Rural New Yorker is a notable one, both in its broad collection of valuable horticultural matter and the advertisements therein of representative American firms.

MAGNIFICENT Bride roses with fine, long stems and grand foliage, draggled in a washy green dye and parading so disgraced in many first class flower shop windows in American cities this week! St. Patrick save us!

THE annual spring flower show of the Massachusetts Horticultural Society is in progress, March 20-23. Spring bulbs, orchids, Easter flowering plants, roses, carnations and violets are specialties and the schedule calls also for collections of winter apples and vegetables.

THE Proceedings of the Congress of Horticulture held at the Jamestown Exposition September 23, 1907, have been published and bound in a volume of 108 pages. Copies at 25 cents each may be had by addressing H. C. Irish, secretary National Council of Horticulture, Missouri Botanical Garden, St. Louis, Mo.

WE have several inquiries respecting a remedy from poisoning owing to handling Primula obconica. Some time ago a writer in our columns mentioned that he had obtained relief by using freely a lotion made of equal parts of carbolic acid and glycerine, and we trust sufferers may find this of service. Should any readers know of another or better remedy we will be glad to hear from them.

Glass.

Glass prices are still easy about as follows, F. O. B. Chicago: 16x18 A, $2.70; 16x18 B, $2.52; 16x24 A, $2.96; 16x24 B, $2.70. For large lots proportionately lower quotations can be secured.

National Flower Show.

PRELIMINARY PREMIUM LIST OUT.

Secretary W. N. Rudd, of the Society of American Florists, has a huge task off his hands in that the premium list of the National Flower Show is out. It is quite an imposing and comprehensive publication but doubtless needs some revision and all those interested should at once apply for a copy. It can be secured on application to J. H. Burdett, 1411 Frst National Bank building, Chicago. All suggestions for revision work should be mailed as early as possible to Willis N. Rudd, Morgan Park, Ill.

National Council of Horticulture.

PRESS BUREAU SCHEDULE.

The schedule of articles to be sent out by the press bureau of the National Council of Horticulture during the next three weeks is given below. The object of these papers is to arouse popular interest in the subjects noted and compilers of catalogues and others will find it of benefit to obtain and peruse them as they tell in plain and easily understood language what the garden maker and amateur wants to know. They are prepared under the direction of Professor Irish of the Missouri Botanical Gardens, St. Louis, and among those who aid him in the work we find such well known names as: S. A. Beach, Iowa Agricultural College; L. R. Taft, Michigan Agricultural College; S. B. Green, St. Anthony Park, Minn.; E. J. Wickson, Berkeley, Cal.; W. W. Tracey, Washington, D. C.; J. Horace McFarland, of the American Civic Association, and J. H. Hale, of South Glastonbury, Conn.

March 21.—"Germination of Seeds," "Home Vegetable Garden," "Hybrid Perpetual Roses," "Viburnums."

March 28.—"Good Plants for Garden of Annuals," "Lawns," "Apple Orchard Management," "Dietetic Value of Fruits."

April 4.—"Golden Bell and Sweet Shrub," "Tea Roses," "Phlox," "The Home Orchard."

Meetings Next Week.

Baltimore, Md., March 23, 8 p. m.—Gardeners' Club of Baltimore, Florists' Exchange hall, St. Paul and Franklin streets.

Chicago, March 25-27.—American Rose Society, Art Institute, annual meeting and exhibition.

Cleveland, O., March 23, 7:30 p. m.—Cleveland Florists' Club, Progress hall, 2610 Detroit street.

Denver, Col., March 27, 8 p. m.—Denver Floral Club, 323 Charles block.

Hartford, Conn., March 27, 8 p. m.—The Connecticut Horticultural Society.

Lake Forest, Ill., March 25, 8 p. m.—The Horticultural Society of Lake Forest, Council Chamber, City hall.

New London, Conn., March 25.—New London County Horticultural Society, Elks' hall.

Succulent Plants.

ILLUSTRATIONS ON PAGE 376.

One writer has described succulent plants as the caricatures and cartoons of the plant world and such they are in many respects. Their many and varied forms are decidedly striking as compared with the rest of the vegetable world. A few, indeed, have gorgeous, waxy, delicately tinted flowers and the flowers of all are beautiful though for the most part they are too small to be attractive. So, after all, it is the grotesque forms of the plants themselves that attract one's eye. To many people cacti—a name quite commonly applied to all succulent plants, regardless of their botanical relationships—give an impression of ugliness and repulsiveness. Many who at first held this antipathy, afterwards, through closer association with the plants, have become attached to them through observing the perfect symmetry of their plans of growth. They discovered that in the mammillarias, for instance, the little tubercles, occupying the entire surface of the plant are arranged in a definite and pleasing pattern; that at the summit of each tubercle is a cluster of spines not thrown in in a haphazard manner, but regularly arranged in perfect symmetry. Among the agaves they have noticed that there is not only a great variation in the color and forms of the leaves but that the margin of the leaf for each species shows characteristic features. One is entirely without spines while another is furnished with spines quite regular in form and set at quite regular intervals. These may be straight or curved, pointing outward, upward, or downward, varying with the species. So it is with all the other subgroups of succulents. Each has its interest emphasized by comparison with other similar forms.

Ever since these oddities of the vegetable world first came to the notice of plant lovers there have been those who were so interested by them that they have gathered together most interesting collections. Such collections have become quite common in Europe and today there is a goodly number in America. Already these collectors have reached a number sufficiently large to warrant several commercial growers in making a specialty of furnishing this class of plants to the trade. This interest in these plants is manifoldly increased if one has the conveniences for growing the plants from seed. The marvelous diversity of forms among adult plants is surpassed by the additional marvelous manner in which these have developed, through successive changes, from very small seed.

The accompanying figure of Mesembryanthemum tigrinum serves well to illustrate one type of succulents—one in which the fleshy leaves constitute the bulk of the plant. In most instances the common name applied to a plant designates its resemblance, in some portion, to its namesake. In this particular plant the form of the leaves, their position on the stem and the marginal row of fang-like processes clearly explain the name "tiger-jaw." Close allies to this are the "cat-jaw," "dog-jaw," etc. To this same type of succulents belong also the agaves (century plants), aloes, haworthias, gasterias and echeverias. The second great division of succulents comprises those with a thick, fleshy, stem, with leaves very much reduced in size or entirely absent. This division is made

up chiefly of three groups—the euphorbias of Africa and India, the stapelias and their allies of Africa and the cacti of America. They all have a similar habit of growth and are natives of regions of similar climatic conditions.

Probably no one other family of plants produces such a variety of forms in the plant itself as does that of the cactaceæ. As their name implies the mammillarias are the "nippel-cacti"—referring to the regularly arranged tubercles on the plants' surface. The "living rock" with its apparently dry and fissured tubercles resembles nothing so closely as a handful of pebbles. The dumpling cactus is also a self-explanatory name, as is that of bishop's cap. The Turk's head is a spherical plant surmounted by a large oblong or round growth which is covered with a felt-like wool of a reddish color, altogether not unlike the Turkish cap. Fish-hook cactus has reference to those in which some of the spines are curved at the end in the form of a hook. Others of this group grow large and tall like the giant cactus of Arizona which reaches a height of 50 feet. Others grow more slender and are climbers, climbing to the tops of very tall trees. To this group belong the popular night-blooming cereus and kindred plants, with their gigantic, fragrant, white flowers. Not all cacti are desert plants by any means. One group of a considerable number of forms, is strictly tropical and like its neighbors, the orchids and bromeliads, grows high up on the trunks and branches of trees, and, like them, are air-plants. Among the individuals of this group is to be found the rat-tail cactus, the crab or Christmas cactus, and the mistletoe cactus. This last grows in great clusters clinging for support to the branches of trees. Its stems are small, smooth, slender and round. In every way this plant so strikingly resembles its namesake that it is not at all strange the early botanists considered it a true mistletoe.

And so the list of common names might be prolonged but these suffice to show how varied are the forms of plant growth and it is this peculiar variation which becomes the attractive feature of the succulent plants in all divisions. Occasionally a person may be found who will grow a night blooming cereus for many successive years, solely for the pleasure of seeing it unfold its wondrous flowers one night only during the year, but as a rule this group of plants is not grown for the beauty of its flowers but more for the fascinating character of the plants themselves.

The comparative ease with which these plants may be grown, their fewer demands for constant care and attention, recommends them very highly as house plants. In the summer months they may be placed out in the open and in winter they are content with a small space at the window. A very interesting small collection may be planted in one vessel. Such a group is shown in the accompanying illustration. This has the advantage of being readily moved from one place to another. The greater surface, allowing the roots to spread out horizontally, even though they intermingle, has many advantages over growing each plant in a separate pot. When such a miniature collection is artistically arranged it may occasionally be taken from its place behind the window curtain and preside with grace at the center table.

C. H. T.

London.

At the meeting of the Royal Horticultural Society, March 3, Geo. Mount received a silver floral medal for the new rose Joseph Low, grown by Lowe & Shawyer, a very fine rose of great depth and color, with a good perfume. A good stand of Richmond was also shown and for comparison, one vase of Liberty was put up, but was not in it with Richmond. Low & Son were given a silver flora for a good collection of carnations, pot and cut. Aristocrat was the best yet seen here. Helen M. Gould, Victory and Mrs. Burnett were also of high quality. H. Cannell & Sons, Swanley, were awarded a silver flora medal for fine Primula stellata.

At Covent Garden trade is good, especially in foliage and flowering plants which are abundant. The best azaleas are worth up to $3 each. Climbing roses sell at $7.50 per dozen. Good long stemmed Richmond roses are worth $3.25 per dozen. Hampshire White sweet peas are in at $1.25 to $1.50 per dozen small bunches. Asparagus is very scarce and maidenhair fern is worth $1.75 to $2 per dozen bunches. French flowers arrived in large quantities, this week totalling 22,500 packages. S.

French Horticulture.

FROM THE FRENCH TRADE PAPERS.

THE CHEVRIER BEAN.—Since 1878 a very large proportion of the market garden tracts south of Paris have been devoted to the so-called Chevrier haricot, an ordinary flageolet bean grown and cured in such a manner as to retain when ripe a fine green color and give the consumer the illusion of the fresh product, after having been soaked in water for 24 hours and cooked in the ordinary manner. These beans are served the year round in all restaurants and hotels, and no one suspects that he is not eating the fresh vegetable. Its discovery was purely accidental. Pere Chevrier happened to cover with straw some plants which had been pulled and left to dry; five or six days later he uncovered them and found the opened pods to contain beans of a fine green color, which, also by accident, he dried in the shade. Finding that they retained their color and germinating power, he introduced them as a new variety at one cent per seed. Since that time the demand has grown enormously, 50,000 sacks a year being grown in the Seine-et-Oise alone. The pulling and curing, as well as the picking, must be done by careful and experienced people, no machine having been found which does not bruise the beans. They are beaten with the flail and hand-picked, all white or mottled ones being discarded. In 1904, a considerable sensation was caused by the discovery that sometimes the green color of the Haricots Chevrier was increased by chemical means. Nevertheless it is now one of the principal items in the fastidious Paris market.

NEW HYBRID FREESIAS.—The introduction of Freesia Armstrongi from South Africa, a rather small pink variety, with white tube, shaded orange and not fragrant, has made possible some very interesting hybridization, and a race of brilliantly colored freesias has resulted. Hybrids of F. refracta, F. refracta alba, F. Leichtlini and others with the new F. Armstrongi have been shown by Van Tubergen of Haarlem and M. Ragionieri of Florence, which have attracted much attention and promise to become very popular in England and France. They were illustrated in a colored plate recently in the Revue Horticole.

THE FLOWER TRADE IN PARIS.—The French capital is one of the greatest markets in the world for flowers and plants. The central market, 10 flower markets in different quarters, 500 flower

Fancy Carnations

We have big cuts of the Finest Carnations seen on this market in years; our prices are down to $1.50 to $2.50 per 100, according to grade. LONG BEAUTIES also in good supply. ROSES, of A1 grade and in good crop. Note the following prices:

	Per doz.
American Beauties, extra long stems	$4 00
30-inch stems	3 00
24-inch stems	2 50
20-inch stems	2 00
18-inch stems	1 50
15-inch stems	1 00

All other stock at lowest market rates. No charge for packing. Prices subject to change without notice.

WIETOR BROS.,

Wholesale Growers of..... CUT FLOWERS 51 Wabash Ave., CHICAGO

stores and numerous little stalls supply the Parisians with their blossoms. The local markets are held twice a week, and the Quai Aux Fleurs alone receives 200,000 flowering plants a day. These plants are grown mostly in the outskirts of the city and special plants and flowers are sent from the south, from Nantes, Orleans, Angiers, and even Belgium and Italy. It is estimated that 30,000,000 potted plants are used annually in Paris.

ROSE ERRINNERUNG AU BROD.—This is a Hungarian climbing rose, dating from 1886, growing about seven feet high, strong, foliage dark and vigorous, flowers medium to large, fragrant, purplish blue or violet with darker center. It certainly verges on a genuine blue. At a recent French rose show, the Paris journalists announced that the blue rose had arrived, and it was visited by throngs of the curious.

ROSE SHOW.—An exhibition of the new roses of 1907-8 will be held at the public rose garden in Paris the first two weeks of June. Invitations have been sent to all rosarians obtaining new varieties to send plants for competition, which will receive proper care and be judged during the exhibition by a competent jury appointed by the municipal authorities of Paris.

TO HASTEN THE GROWTH OF BRUSSELS SPROUTS.—Market gardeners may profit by the experience of some French growers, who select from among their Brussels sprouts the best developed plants, and by removing the heart of the leaf growth, divert their strength to the partially formed rosettes and considerably advance their season.

ASTILBE HYBRIDA.—This is a pink-flowering variety introduced by M. Lemoine and is the result of fertilizing a cross of Astilbe Sinensis x Lemoinei with pollen of A. Davidi. It is as bright a pink as Davidi but the foliage is handsomer and the inflorescence larger and more compact. It is expected to have a great future.

CATS IN MISCHIEF.—Is it true, as stated in a French horticultural paper, that cats have a decided liking for Actinidia polygama, and will devour all the young shoots within their reach?

QUERIES.

Greenhouse Heating.

ED. AMERICAN FLORIST:

Will a cast iron boiler containing five sections, length, 38 inches; foundation, 31x35 inches; fire pot area, 25x28; outlets 2-4 inches; total height, 52¼ inches; total width, 36 inches; size of smokepipe, 10 inches heat to 60° 5,000 square feet of glass with zero outside? I. B. A.

So much depends upon the arrangement and amount of fire surface that no exact reply can be given, as the only figures that apply of those given are the dimensions of the grate. In most cases 4,000 square feet of glass would be a maximum for a 25 by 28-inch grate.

L. R. T.

Greenhouse Shading.

ED. AMERICAN FLORIST:—

What is the best and cheapest shading for a greenhouse, easy to apply and remove? SUBSCRIBER.

Thin lime wash is the cheapest shading and may be applied or removed very easily. To large houses difficult to get at it may be applied with an old syringe, but can be more regularly applied with a brush. Do not use it hot and let it be thick or thin as the occasion demands.

G.

Cucumbers Under Glass.

ED. AMERICAN FLORIST:—

I planted a house of lettuce this fall and wish to grow cucumbers after the last crop of lettuce is cut. Kindly explain the planting and culture. B. A.

It is customary to plant the seed in 4-inch pots, placing them where they will have a temperature of 65°. This can generally be secured in a lettuce house, but shutting off with hotbed sash a portion of one of the benches in the warmest part of the house, or a manure hotbed could be made in the house, if the desired heat could not be obtained in this way. When the lettuce is taken off transplant to the benches, giving each plant six square feet. L. R. T.

Water for Greenhouse Crops.

ED. AMERICAN FLORIST:—

I am sending you an analysis of the city water here and would like the opinion of an expert as to the effect of this water on roses, carnations, palms and ferns and general stock. Do you consider this water as good as rain water?

	Parts 100.	Grains per Gal.
Silica	5.50	3.20
Iron	1.50	0.87
Lime	10.25	5.98
Magnesia	3.62	2.11
Sulphuric Acid (not free)	5.14	3.00
Chlorine (not free)	2.04	1.22
Carbonic acid and alkali	6.85	9.82
Total solids	44.90	26.20

INQUIRER.

Kearney, Neb.

The water in question should not give any bad results when used on greenhouse stock. It only contains very small quantities of the salts that are considered to be injurious to vegetable life. Rain water is of course purer than this water and would practically not contain any salts at all. H.

Heating Rose House by Hot Water.

ED. AMERICAN FLORIST:—

Please tell us how many runs of 2-inch pipe will heat two rose houses and two carnation houses 21x100 feet, even span, with 2-foot cement wall and four feet of glass all around, the temperature going to 17° below zero occasionally. Economy considered, should we put boiler in center and heat both ways 50 feet or will hot water travel 100 feet and back without losing efficiency of last part of returns? Can we get as good service from flows under benches as along eaves or side glass as if we carry them high up in gables? How much below returns should top of boiler be? Our ground has three feet fall. Should we use all this fall in flows and returns or should they lay level with all the fall at boiler? How many returns will a 2-inch flow feed, 50 or 100 feet? Is it economy to use same size flow as returns and use more of them? Have been told that by using valves on returns so as to contract capacity of returns at boiler, we can use steam in severe weather and hot water in mild, saving many runs of pipe. Is this practical? T.

For a house such as described it should be possible to maintain a temperature above 60° by using four 2½-inch flows and 16 2-inch returns, or it could be done with 21 2-inch pipes of which seven should be flows.

In the carnation house, four 2½-inch flows should be used with 12 2-inch returns, or the same temperature could be maintained by means of 18 2-inch pipes, including six flows. For houses 100 feet long it will be better to have the boiler at one end. While the circulation will be somewhat better if the flow pipes are in the ridge, it will answer if one flow is placed upon each of the plates and the others about nine feet from the ground. It is always desirable to have the lowest part of the coils three feet above the top of the boiler, but less than this would answer. The fall given to the pipes does not help the circulation, provided it is sufficient to free the pipes from air. In fact it is better to carry the pipes with a slight fall, keeping them as high as possible, rather than give them a steep pitch and bring them to the level of the boiler.

If the flow pipes are as high as the plates it will be better if they are given a slight fall rather than to have them rise, the average height being the same in both cases. A 2-inch flow pipe, 100 feet long, should not supply more than two 2-inch returns, unless at a considerable elevation. As a rule, for houses of this length it will be rather better to use one 2½-inch flow for four 2-inch returns. Of course steam requires considerably less radiation than hot water, but it could be arranged by using 2-inch flows and 1½-inch returns. Valves should be placed upon both ends of about one-half of the returns, and a water column, steam gauge and safety valve will be required for the boiler. L. R. T.

WE ARE ON WITH A BIG CROP OF

EXTRA FANCY RICHMONDS

All other **Roses** in big supply. **Carnations,** too, are in full crop with us.

PETER REINBERG, 51 Wabash Ave., Chicago.

Gardenias.

The chief requisite for gardenias is a constantly hot and moist house. Plants in a dry or cool structure never make satisfactory growth; they are stunted, often insect infested and in every way unsatisfactory. Old fashioned gardeners used always to like their gardenias in a house heated by manure—a forcing pit as it was called—but doubtless the reason for their success in this class of structure was simply the hot and ammonia-laden atmosphere, caused by the fermenting material, and an atmosphere strongly impregnated with ammonia is doubtless the best for these plants. Growth is quick; fine stems and foliage are produced and the flowers are large and of good substance. It is necessary to be always bringing along young stock to take the place of old and worn out plants, and semi-ripened shoots without flower buds strike readily in brisk bottom heat at any time. These may be potted when rooted, grown briskly along until they fill 4-inch pots with roots and planted out on a bench of firm soil. This is really all there is to the culture of this plant, strong heat and moisture and a constant succession of young growth. When plants get old and hard and do not throw up strong shoots from the base turn them out, clean the benches thoroughly and start a new lot in firm rich soil. The plants when well established like plenty of feeding, the ordinary liquid manure, changed when necessary to soot water, being as good as anything. Damping with soot water is also excellent practice, this being good for the foliage and helping to keep ammonia in the atmosphere as noted. Although shading is required for young and recently potted plants the mature growth will stand almost complete exposure to sun. When the flowers are forming and just before they show color light shade and a rather drier atmosphere are necessary or the flowers will turn brown.

Lily of the Valley for Easter.

Where space is limited, and a large cut is needed for Easter, smaller batches of lily of the valley may be planted for the next week or 10 days, thus leaving room in the frames for a large lot about 25 days before it is wanted for cutting. With a bottom heat of 80° the flowers will be in plenty of time to get thoroughly finished. Without doubt many growers change the sand in the forcing beds too often. Although it may seem a minor point, there is no doubt that old sand that has been used several times fills in more firmly about the roots than new and is superior in every way. There is no need for changing as long as it keeps sweet but should it sour or become infested with mould or fungus then get it out at once, clean the frames well and renew the sand. After planting give a thorough soaking of water and cover up with shutters to keep the interior perfectly dark. The pips must be kept quite dark until the flower is well thrown up above the foliage when the shutters may be tipped a little for a couple of days then replaced with frames covered with light muslin through which sufficient light filters to gradually bring the green tint to the foliage. In a few days these may also be removed and the plants will stand the full light. Never purchase any but the best pips; there is no saving but the reverse, in buying second rate stock and getting perhaps three out of five fair flowers and the others waste.

Sowing Annuals.

A good start in life is as necessary for an aster, a zinnia or any other annual plant as for the choicest rose or carnation. And such an abundance of fine salable stock can be cut from good strains of annuals later on that it pays to take all the care necessary to obtain best results. Sow the seed thinly, on benches if a large quantity is needed, in flats if less is required in a temperature of 60° or thereabout. Before sowing thoroughly soak the soil right through and when the surplus water has run off sow the seed. Cover this with a thin scattering of sandy soil, about one quarter of an inch being ample for almost any seed, and cover this with some loose material, newspapers or shutters, until germination takes place. Watch the seeds closely, however, after the first few days and see that the covering is removed directly signs of germination appear, or the young seedlings soon become drawn and useless. It will be necessary to keep the plants cool in an airy house, right along, so as to have sturdy stock for planting out at the proper season. As soon as the rough leaf appears the young plants should be pricked out in cool frames or on benches in a cool house. If they get starved or drawn up in the seed bed they soon run up to flower and are useless. Seed sown now will produce plants in ample time for planting outside and these will be more satisfactory than others from earlier sown seed kept littering about the houses for months.

Chicago.

TRADE SLOW, PRICES WEAK.

The market at present is in a deplorable condition—all wholesalers' ice boxes being full to overflowing. The quantity of flowers of all kinds coming into the market has never been equaled at this time of the year. Prices are far below those of any previous March and some absurd prices are being quoted. White stock has moved fairly well for dyeing purposes for St. Patrick's Day with a little stiffer price than could be obtained for colored stock. The American Beauty rose crop is coming heavier day by day and long stemmed stock is of excellent grade; medium and short stemmed have improved very little. Richmond roses, too, are coming in larger numbers and for the main part are excellent in quality. The demand for Bride is better than for Bridesmaid on account of funeral work, but the latter are exceptionally fine for the time of year, have excellent color and long, stiff stems. Killarney is not quite as much in evidence as it has been. Prices of all varieties are at rock bottom. Easter lilies have been coming in very freely with almost no output. Southern daffodils have appeared which help to increase the glut in bulbous stock. Single violets, while low in price, are beginning to lessen in quantity. Fancy ferns are better than in any previous spring and there is a very good supply at $2 per 1,000. There has been a quantity of very finely grown shamrock plants in 2½-inch pots which found a ready sale at $10 per 100.

FRIDAY, THE THIRTEENTH.

"I knew if they got me in here today things would go hard with me," murmured George Rozakles, otherwise known on the market as "Greek George," a florist in McVicker's building, as he left Judge Hume's courtroom March 13. "Thirteen always was my bugaboo."

Bassett & Washburn, wholesale flower dealers, have a judgment against Rozakles for $200. When questioned by Attorney Harry A. Biossat he acknowledged he had a watch, stick pin, ring, household furniture, one suit of clothes, a wife and eight babies.

"What have you in your store?"

"Nothing but flowers."

"Your honor," said the attorney, "we ask that the flowers be turned over to the bailiff to be sold for my client."

"All right," said the judge, "but they'll wilt before you can sell them."

REINBERG'S "CAMPAIGN BEAUTIFUL."

A new phase of the "campaign beautiful" is being introduced to voters of the Twenty-sixth ward by Ald. Peter Reinberg, democratic candidate for re-election, who won national fame four years ago as the "carnation candidate." Determined to uplift his constituents, while soliciting their votes, the alderman has added to his distribution of flowers a series of grand opera parties which is giving 2,000 residents of his ward an opportunity to hear the singers of the Metropolitan opera company now at the International theater. Every visitor to the theater is also given a carnation as a reminder that Chicago has an exponent of the "campaign beautiful."

TRIBUTE TO THE LATE R. H. WARDER.

Memorial services for former superintendent, Reuben H. Warder, of Lincoln park, were held last Sunday at the Academy of Science building. Bryan Lathrop, former president of the park board, presided and other speakers were: Franklin H. Head, Judge Howard C. Hollister, of Cincinnati, O., J. Frank Foster, superintendent of South park, and Slason A. Thompson, whose address will be found in another column of this paper. Francis T. Simmons was the bearer of a letter from Jens Jensen, of the West parks, and O. C. Simonds of one from Chas. W. Garfield.

NOTES.

E. E. Pieser, of the Kennicott Bros. Co. says that present market conditions demonstrate the necessity of wholesalers getting together to hold the market to some reasonable price for stock and again advocates that they meet and prescribe some method of enforcing the observance of certain minimum prices for various classes of stock. He does not think that any appreciably large lots of stock are moved on account of their low prices, but that a better return could be secured to all parties by a little concerted action.

The rose show committee of the Florists' Club met at noon, March 16, at the Union restaurant. Chairman Aug. Poehlmann, N. H. Carpenter, Leonard Kill, Geo. Asmus, J. C. Vaughan, J. H. Burdett, W. N. Rudd and T. E. Waters were present. Arrangements were made for some poster publicity, and Mr. Burdett reported that the newspaper work had started. Chairman Poehlmann stated that the outlook was favorable for a grand show.

Louise Malcher on the occasion of her birthday last Saturday was the recipient of a huge bouquet of every kind of flower now on the wholesale market, including Bride roses dyed green, with the compliments of the office force of Bassett & Washburn. The lady reciprocated with a decanter of wine and an apple streudle.

E. R. Chappell, who has been employed by C. A. Samuelson for the past five years, has accepted a position with Clark Bros., 289 Morris St., Portland, Ore., and left Chicago, February 14. He was formerly employed by Mann & Brown, Richmond, Va.

Lacey Young, who intended to return to Michigan last week, after being confined to his room with grip, is now suffering from rheumatism, and on Tuesday was removed to the Drexel hospital at Forty-first street and Drexel boulevard.

M. H. Mann, of Zech & Mann, is trying out two new popular carnations. From Jensen & Dekema he has just bought a lot of W. N. Rudd's Defiance, and from the east he has had shipped a similar lot of R. Witterstaetter's Afterglow.

E. C. Amling says that sweet peas are a grand sight at the greenhouses of three or four of his growers, and the display on his counters just after he opens his stock each day bears out the statement.

Weiland & Risch have just invested in 1,500 boxes of glass, with the view to erecting a new range on land recently acquired adjoining their present establishment.

The A. L. Randall Co. is right in line for a big Easter trade in florists' supplies; the firm is daily expecting the arrival of three large shipments of Easter baskets.

Louis Winterson's familiar face is again seen at the E. F. Winterson Co.'s place. He has been west for the past nine months, and returned March 11.

The Eaton Flower Shop on Saturday closed a lease for another two years for the place at the corner of Jackson boulevard and Plymouth place.

Chr. Lund, of Wausau, Wis., was in the city this week arranging for the exploitation of his patent "Common Sense" carnation support.

The J. B. Deamud Co. is receiving heavy consignments of stock and is shipping out of the city some very large lots of carnations.

A. L. Randall Co. 19-21 Randolph St., **Chicago.**

Chicago Notes.

The plant of J. F. Kidwell, at 3806 Wentworth avenue, is showing a fine lot of pot stock. Thousands of pterises in 2-inch pots are coming along in fine shape. Nephrolepis Whitmani is a grand sight as here grown, it being a favorite of Mr. Kidwell's in this class of stock. He says the new firm in which his son Frank is interested will be known as Kidwell & Ellsworth. Five houses of their new range at Belmont, not far from Hinsdale on the C., B. & Q., are already completed and work will now be rushed on four more houses, all 27x200 feet.

The Poehlmann Bros. Co. is cutting fine lots of long-stemmed American Beauty roses. Mrs. Potter Palmer rose is also showing fine form and color.

At Geo. Reinberg's Richmond roses never looked better than now; all have long straight, stiff stems and perfect flowers.

Wietor Bros. report a very heavy carnation crop still on with Bride and Bridesmaid roses just nicely coming into crop.

The sudden death Tuesday morning of Alfred Hildred, of 3030 Indiana avenue, is noted in our obituary column.

O. P. Bassett and wife are due to arrive home Sunday after their winter's sojourn at Pasadena, Cal.

Visitors: Wm. Edlefsen and Radeke, Milwaukee, Wis.; Chr. Lund, Wausaw, Wis.; H. E. Philpott, Winnipeg, Man., Wm. Lindsay, Birmingham, Ala.

Toledo, O.

Business has not been very good with the retailers, but in general there is little complaint. Prices for flowers have been low, especially for bulbous stock, so that wholesalers realize little or no profit from them. "I guess I won't grow them any more another year," is heard rather often.

NOTES.

The club members paid visits recently to four different florists. C. Kaminski was the first one on the list. He has two houses and grows miscellaneous stock, as every retail trade demands. His carnations and roses looked well and also his bedding stock. John Gratopp has quite a range and a reputation as a first class carnation grower; the carnations looked well but will soon have to make room for cucumbers. He says it pays him better to grow cucumbers in summer than bother with carnations, when they are cheap. He has added, last fall, a large house, 41x125, which is intended for roses; for the present it contains lettuce. Harry Heinl's place was in fine order; carnations and roses are his main crops, besides material for the store. Large quantities of bedding plants are raised here every year, which are sold at planting season for five cents each. He has a lot of very nice hydrangeas coming on for Easter; antirrhinums are grown here to perfection. Harry is a great believer in pot grown carnations, and he certainly can show the stem. Chas. Koelker & Sons was visited last and the boys have the place in good order. Roses and carnations take up four houses and two houses are devoted to miscellaneous stock for their retail place.

The recent floods here, when the weather opened up last week, have caused considerable damage and J. Fischer, whose greenhouses are located rather low, has our sincerest sympathy. His boiler room was full of water for two days. No fire could be kept going. Fortunately during that time the weather was mild and no loss from frost is reported. One of his houses with carnations in solid bunches, was under water, covering the plants for about 18 inches.

The Schoen Floral Co. has removed to 409 Adam street, not very far from its old location. Its new store is decidedly larger and also better located.

O. B. Wisner has closed his city store this month and will devote his entire time to his greenhouses, with which a store is also connected. SCH.

Dayton, O.

We have recently experienced some real spring weather, the temperature for about a week 60° outside and 50° at night. Bulbous stock that was to be for Easter began to draw through the covering to an alarming extent, so much so that many had to get their full force out and place it in the open to save it at all, with light covering of boards to keep the stock dark and cool. This is the warmest winter we have had in years; one scarcely knows how to manage. Lilac, hyacinths, tulips, etc., will be in bloom naturally, if this weather continues. Business in general is not discouraging. We are helped with a continuous call and good demand for funeral arrangements. Good flowers of most any variety and color are sought for in this locality for funeral purposes, from the whitest flower to the reddest one.

NOTES.

At a recent funeral flowers were strictly forbidden; the deceased belonged to eight organizations and they sent such an array of flowers that the casket was almost hidden from view. The emblems were very elaborate and required the two largest floral wagons of Matthews, the Florist, to convey them to the church and cemetery.

H. H. Ritter, who conducts a store in the Algonquin hotel, had a spring opening, March 11, which was a grand success. Carnations and roses were the souvenirs and over 10,000 were handed out.

John Boehner is recovering rapidly from his recent accident. Chas. E. Pease, president of the Miami Floral Co., is also able to be out again from an 8-week siege of neuralgia.

W. W. Horlacher sold the National Cash Register Co. a splendid bill of palms last week, aggregating several hundred dollars.

A St. Patrick's Day banquet was held March 16 at the B. P. O. E. banquet hall, orange colored flowers and neckties barred.

Miami Floral Co.'s business of February was double that of the same month 1907.

Visitors: Will Lampert, Xenia; D. Rusconi, Cincinnati; C. F. Mahan, Bellbrook; James Frost, Greenville; J. E. Thomas, Wellston. M.

Milwaukee.

TRADE IMPROVING.

There has been a slight change for the better in the conditions prevailing in this market. While stock has sold at very low figures, still it has been possible to clean the stock out much better. Roses are coming in much heavier, but the quality of the stock is very fine and this helps a good deal to keep it moving. Violets are selling better than they have for some time, although the prices realized for them is rather low. There is enough green stock for all demands. Owing to St. Patrick's Day there has been a very heavy call for white carnations, and this has helped the market very much.

NOTES.

Holton & Hunkel Co. has a very large and fine lot of flowering plants for Easter. The lilies are extra fine this season.

The Loveland Floral Co. is making a fine display of baskets filled with flowers and plants.

Miss Anna Brown, for five years bookkeeper for Holton & Hunkel Co., has gone to her old home in Ann Arbor, Mich., where she will shortly be married.

The East Side Floral Co., on Farwell and North avenue, is well satisfied with the plant business this spring.

Mrs. Ennis has rented a fine new store in the Casewell building, just nearing completion.

James Chacona is handling large quantities of violets these days in his two stores.

Arthur Leideger has returned from his wedding trip.

H.

Milwaukee Florists' Club.

The meeting March 5, as reported in our last issue, was gratifying to all in attendance, there being but few members absent. The bountiful free lunch, the auctioning of the flowers at the close, all excited the personal interest of everyone. It is seldom so much good fellowship and business progress can be enjoyed at the same time. Although one of the growers present is continually alluded to as "the pickle man" there were no pickles there that evening. One florist thought it would not worry him so much to look at a few there as it did to pay for some a few weeks ago. Quite a number of humorous remarks founded on expensive experiences between growers and dealers, thrown out at random, found their "affinity," and no harm done. Such gatherings broaden one's horizon and small acts are displaced by things of a larger cult. It seems to the writer that this sort of a meeting is a beginning of what may solve the flower show problem.

Zepnick's pansies, Poehlmann Bros.' lily of the valley, Dilger's and Heitman's narcissus and Klokner's mignonette were particularly choice. Perhaps the most original success of all was Klokner's snapdragons; four to six feet long, in good foliage, perfect form and well colored, as well as white; these will surely become a great factor in decorations when the supply becomes larger and more constant. A vase of the red rose, Rhea Reid, by E. G. Hill Co., with strong stems

and beautiful foliage, merited much favorable comment. Bride and Bridesmaid from Albert Lies, Niles Center, Ill., were a credit to their grower.

Nic Zweifel's carnations, Enchantress, White Perfection, Victory and Pink Perfection, won blue ribbons. Heitman & Baerman and others drew other colored ribbons, some contests being too close for the judges' ease and comfort, but Zweifel got the most blue this time. Those from out of town were not in competition, such as Dorner's Winona, Chicago Carnation Co.'s Aristocrat and White Perfection, for which a ribbon could not have been made blue enough. Andrew Carnegie was also excellent. E. G. Hill's Afterglow was also good. Highland Park Greenhouse Co.'s Lucille attracted much attention. Heitman turned out to be an excellent auctioneer; by getting more than some things were worth he pleased the grower; by getting considerably less at times he pleased the storekeeper, so they were all pleased.

Frank Berndt accomplishes the one thing in life this week that ensures the good wishes of all the local florists who have made his acquaintance during the past 20 years of careful growing. Mrs. Berndt will be welcomed as soon as we may address her by that title. C. B. W.

HAZELTON, PA.—Howard E. Smith has purchased a wholesale flower store on Twenty-ninth street, near Broadway, New York, which handles the output of 100 greenhouses. Mr. Smith will continue his retail store in this city, and will divide his time between here and the metropolis.

New York.

PRICES VERY LOW.

Last week brought delightful spring weather and also an increased volume of stock. American Beauty roses and violets are in the "doldrums," as a sailor man would say. Good American Beauty at 15 and 20 cents seems like a great sacrifice, but there is no help for it. It is hard to keep violets cleaned up even at $1 and $1.50 per 1,000. Carnations have gone down to such a low figure, with no prospect of improvement this season, that it has become a matter of grave concern to the growers. It is hard to understand, however, what can be done to remedy the conditions that now prevail. A Seventh avenue retailer advertised a carnation sale, at 35 cents per dozen, last week, and sold 6,000 in three days. He says it is the only way to do, and educates the public to buy flowers.

AN ORCHID SOCIETY.

At a preliminary meeting held at the American Institute, March 14, steps were taken to organize a permanent society of orchid growers and fanciers. The following were appointed an organizing committee: Clement Moore, Hackensack, N. J.; Geo. Schlagel, Brooklyn, N. Y.; Dr. Kitchen, Orange, N. J.; W. E. Rothwell, Boston, Mass.; Mrs. G. B. Wilson, Philadelphia, Pa.; G. V. Nash, Bronx Botanical Gardens, New York; H. A. Siebrecht, New York; J. A. Manda, West Orange, N. J.; J. E. Lager, Summit, N. J. The committee meets at the Grand Union hotel March 19. Edward Roehrs, Rutherford, N. J., is secretary pro tem.

In connection with the meeting at the American Institute, March 14, for the purpose of organizing an orchid society, there was a very interesting exhibit of orchids. The Julius Roehrs Co., Rutherford, N. J., exhibited beautiful specimens of phalænopsis, cattleyas, cymbidiums and others. Noteworthy in the exhibit was the new Cymbidium insignis. Lager & Hurrell, Summit, N. J., had a fine exhibit, among which were dendrobiums, cattleyas and cymbidiums. Cypripedium, Mrs. W. A. Roebling should appeal to fanciers who are on the lookout for novelty. Joseph A. Manda, West Orange, N. J., made a fine exhibit of standard varieties. Mr. Manda during the past season made great improvements in his range and is now well prepared to handle orchids for commercial and private purposes. Seth Borden, Fall River, Mass.; Clement Moore, Hackensack, N. J., and Chas G. Roebling, Trenton, N. J., all private growers, each made fine exhibits. Particularly attractive were Mr. Borden's Dendrobium thyrsiflorum.

ST. PATRICK'S DAY GREEN.

From shamrocks—"the original plant coming from the cemetery of Downpatrick in Ireland,"—that is what the advertisers say—to green dye for carnations, we have during the past two weeks been offered ample material with which to decorate for St. Patrick's Day. The stock for properly celebrating the day is of various colors. Some of the most elaborate displays in shamrocks were made by the down-town seed stores.

NOTES.

L. W. C. Tuthill, of the Horticulture A. D. Agency, 1133 Broadway, made a trip to Pomfret, Conn., last week to examine and photograph the model private range of Mrs. E. A. Clark. The houses were erected by the Lord & Burnham Co., and are unsurpassed in design and execution. One of the particularly interesting points of this large range, which is superintended by John Ashe, is the orchard house, of potted fruit trees. There are grown, with phenomenal success, apples, pears, peaches, nectarines, cherries and other fruits. With the improved methods now in vogue, not only in greenhouse construction, but also in the handling of the stock, there should be a great revival in this branch of horticulture on large private estates.

Robert A. Keiser, a musical composer, has inscribed a recent production, entitled "Flowers and Ferns," to Mrs. Frances Warendorff, the mother of florists. Mrs. Warendorff, who is now 72 years old, but sprightly and active, has six sons, all of whom are active in the retail trade of this city. They are: Alexander, Herman, Benjamin, Richard and Edward Warendorff, and Jos. Fleischman, a half-brother to the others.

John Mollers, a gardener employed by Siebrecht & Son, fell from a shade tree which he was pruning, March 10, and received injuries from which he died 36 hours later. The limb which was supporting him broke and he struck on the sidewalk. Deceased was a native of Germany, about 60 years old, and had been in the employ of Siebrecht & Son for 15 years.

The next monthly meeting of the Florists' Club will be held in the Grand Opera House building, Eighth avenue and Twenty-third street, April 13. This is the former meeting place of the club, and it is hoped that the members will celebrate the return to old quarters by a rousing attendance.

H. E. Jaeger, of Seventh avenue and One Hundred and Twenty-fifth street is making preparations for a big Easter trade. There are many attractive features about this store and the bridal bouquets and other design work sent out are very good.

W. P. Sears, of 729 Sixth avenue, is offering a number of very attractive features in the line of imported twig baskets filled with flowers.

The Fruit Auction Co., New York.

A movement that promises to be of widespread interest to plant growers has been inaugurated in New York by the Fruit Auction Co., which owns a splendid building at the corner of Franklin and Washington streets. The company will, about April 1, begin daily auction sales of plants at wholesale. This of itself might seem a small matter as plants have been previously sold at auction; but, considering the many improved methods which will be introduced in this venture, it may be safely stated that it will mark the beginning of a new era in the horticultural activities of the metropolis.

The main exhibition room is 70x96 feet and the basement floor, for temporary storage, of the same generous dimensions. The salesroom, arranged as an amphitheater, contains 500 individual seats for patrons, each with writing desk attached. This room is two stories high and fitted up with every convenience. Being on a corner and the windows being very large, the light is excellent. Three high speed electric elevators bring the samples of stock directly in front of the auctioneer's rostrum and in full view of the audience or prospective bidders. The facilities for loading and unloading are perfect, four large wagons being handled at once; in fact, every detail is complete, and marketing facilities, hitherto unknown, are provided the plantsmen. The building, with its ample facilities for a twentieth century plant exchange, is well worthy of inspection by any man or body of men who wish to see horticultural products disposed of in a more remunerative and dignified manner than street peddling.

The company extends a cordial invitation to all branches of the trade, to call at any time and inspect their facilities and methods. The first sale takes place on April 1 at 8 p. m. and promises to be one of such magnitude that it will obliterate some moss-grown and hoary superstitions, not only as to that date, but likewise, in reference to the successful and profitable marketing of plants. An important feature in the conduct of the business is the fact that growers will be paid for every consignment, promptly on the day following the sale. This company employs seven auctioneers, among them John P. Cleary, well known to the horticultural trade, who will preside at the plant sales.

Lenox, Mass.

The annual rose and carnation night of the Horticultural Society was held March 7 in the society's rooms and was the most successful of any ever held. Some 60 vases were shown of the leading varieties and the quality was very high. In carnations Beacon seemed to be the most popular scarlet, Winsor pink, White Perfection and White Enhcantress whites, Pink Imperial in the dark pink class, and Enchantress in the light pink. Mrs. Patten as a variegated out-classed the variegated Lawson, and Halowarden as a crimson showed strongest among the older varieties. The new crimson, Harvard, shown by J. D. Cockcroft, of Northport, N. Y., as well as the beautiful new variety, Wanoka, exhibited by Wa-no-ka Greenhouses, Barneveld, N. Y., were much admired by all the growers present, and were given the society's highest award. It was the general opinion that both these varieties had a great future before them. The flowers shown indicated all the good qualities of stem, calyx, and substance that the most critical could desire.

A splendid vase of gardenias was shown by F. Heeremans, whose success with them has been far above the average. Stocks cut from 4-inch pots running from two- and one-half to three and one-half feet in length were shown by A. H. Wingett, the varieties being Queen Alexandra, Beauty of Nice and Princess Alice. A mammoth bunch of single violets, Princess of Wales, 300 flowers, which for length of stem and general good quality could not be surpassed, was shown by F. Heeremans. The new Boston violet was sent by Wm. Sim, Cliftondale, but unfortunately it arrived in poor condition. Roses were exhibited by A. H. Wingett and F. Heeremans, also a salmon pink sport of Beacon carnation by the former. The following is the list of prize winners:

CARNATIONS.

Twenty-four Winsor.—F. Heeremans, first.

Twenty-four Enchantress.—F. Heeremans, first.

Twelve Robert Craig.—F. Heeremans, first.

Twelve Helen Gould.—F. Heeremans, first.

Twenty-four White Perfection.—A. H. Wingett, first.

Twenty-four Pink Imperial.—A. H. Wingett, first.

Twelve Mrs. M. A. Patten.—A. H. Wingett, first.

Twenty-four Beacon.—A. J. Loveless, first.

Twelve White Enchantress.—A. J. Loveless, first.

Twelve Winsor.—D. Dunn, first.

Twelve Red Lawson.—D. Dunn, first.

Twelve Harlowarden.—G. Breed, first.

Twelve Daheim.—G. Breed, first.

Twelve Enchantress.—S. Carlquist, first.

ROSES.

Twelve Bride.—A. H. Wingett, first.

Twelve Bridesmaid.—A. H. Wingett, first.

Twelve Richmond.—A. H. Wingett, first.

Twelve American Beauty.—F. Heeremans, first.

Twelve Liberty.—F. Heeremans, first.

Certificates of merit were awarded to J. D. Cockcroft for new crimson carnation, Harvard: to Wa-no-ka Greenhouse, for new crimson carnation Wanoka.

Certificate of cultural commendation was awarded to A. H. Wingett for a vase of mixed stocks; a diploma to F. Heeremans for a vase of 100 Enchantress carnations, vase of gardenias, and violets, a diploma to Wm. Sim for Boston violet. The judges were G. H. Thompson, E. J. Norman and R. Speirs.

George Breed and Arthur Smith were unanimously elected members of the society.

Newark, N. J.

Broad street may be classed as well up in the list of the great business thoroughfares of this country; every line of trade is well represented and none better than the florists. On a recent visit we found the Broad street retail florist stores doing a business that would not suffer by comparison with that of any other metropolitan city.

Geo. Penek, whose store is at 757-759 Broad street, with greenhouses at West Arlington, had a store full of customers and the whole force was very busy waiting on them.

H. C. Strobell & Bro., Phillips Bros., August Begerow, Wolfinger and Chas. Witheridge all have good stores, carry fine stocks and seem to be prospering.

The Cornish Seed and Floral Co., as its name indicates, carries a diversified stock and is looking forward to good spring business.

New York.

The Florists' bowling club will meet Friday evenings at the Albion alleys, 117 West Twenty-third street, assembling at 7 p. m., at W. E. Marshall's office, 146 West Twenty-third street.

MARKET HEAVILY GLUTTED.

The shipments and consignments to this market, of cut flowers, all along the line from long stemmed American Beauty roses to the latest spring blossoms, continues (as they say of blizzards) with unabated fury. There seems to be no end to the carnation stream that is continually pouring in. Orders for extra dozens of receptacles to "pot" them up are given at intervals, until there is scarcely room to stand another jar. What would happen if the order against the street men was rigidly enforced, is a question. One such merchant purchased from one commission house 10,000 blooms for his last Saturday's trade at a price not over $5 per 1,000 and possibly considerably lower and we venture to say never was such quality in such quantities seen on the street before. Everything else is greatly overstocked and prices are very low. American Beauty is high at $2.50 per dozen, but in quantity first class stock sells much lower. The first southern daffodils of any account are in, variety Princeps, fairly good stock $5 and $6 per 1,000. If this weather continues the market will be flooded in a few days. Southern arbutus has made its appearance and is of very good quality, in fact as good as it is ever seen from the local woods. It comes from North and South Carolina. This is shamrock week and all the stores are making displays of this Irish emblem, put up in all sorts of ways. Potatoes are hollowed out and planted with as much as they will hold. Clay pipes are filled and the stem tied with a green ribbon. Shamrock shaped pots or pans, a Harris idea, are filled and are great sellers.

NOTES.

From the advance orders that are being taken by the growers, it looks as if the Easter trade will quite equal, if not exceed, that of any previous season. So many worthless bulbs have developed among the lily crops that it is thought there will not be any excess when the time for delivery comes around. Many growers have suffered a loss of as high as 50 per cent, others even more, while some, more fortunate, say 10, 15, 20 and 30 per cent of the bulbs thrown out will cover it. Another bad feature is the small amount of buds many of the plants carry. A great number are seen with only one or two flower buds showing which will allow of no profit to the grower. Taking it all in all the lily seems to be very much of a lottery. As noted before, the commission houses have their hands full in getting the large stocks on the market at a price that leaves something to return to the growers.

Pennock Bros. offer a novelty in the shape of a miniature stove pipe or Irish tile hat, made of birch bark with a green ribbon band filled with shamrock. It is very unique and attractive. The usual supply of greened carnations, tulips and other blossoms, all of which present a freaky, ghastly appearance, particularly when they are allowed to stay in the coloring water a good while, are in evidence in all, or nearly all, the stores. The demand must be greater than usual as there was not a particle of the dope to be found in the town, outside of that in use on the morning of March 16, as all the commission houses had sold out completely by that time Greened flowers, such as carnations, sold for from $3 to $4 per hundred, and white carnations were actually scarce on account of the demand for this purpose.

The Leo Niessen Co. says it is keeping the surplus down, but have to work hard to do it. This firm has a large out-of-town clientage, who are taking advantage of the low prices, to run half price and special sales, once or twice a week, and much stock is worked off to supply this demand. The firm is handling a splendid lot of long American Beauty roses, which at prevailing prices are great bargains.

John McIntyre is handling some very choice southern arbutus and says he finds a ready sale for it. His supply of southern daffodils has commenced, and he expects to handle them in large quantities while they last.

So the club dinner fell through, and we have not had one for so long. Well, we will have to compromise on a smoker in the near future. Just after Easter will be a good time. What say you, Adolph?

Wm. McKissick says his out-of-town customers are taking advantage of the extremely low prices and his shipping trade is very satisfactory. A splendid assortment of sweet peas is to be seen here.

Berger Bros. are keeping well up in front, their Bride and Bridesmaid roses being distinctly in the special class. A large shipment of southern Narcissus Princeps was a feature this week .

Quite a number of the retail stores are taking advantage of the low prices to make a drive, and are advertising special sales of flowers by the dozen, or flowers in boxes at attractive figures.

The Florex Gardens are sending E. Bernheimer some very long stemmed American Beauty roses. He says he can furnish any length up to eight feet or longer, if desired. K.

Pittsburg.

A SLIGHT IMPROVEMENT.

A little change for the better occurred at the end of the last week, although the market is not what anyone could call active. White carnations are scarce on account of St. Patrick's Day, bringing from two to four cents. More green carnations are being used each year, the street men not being able to get near enough. Easter lilies are also scarce, but there are plenty of callas. The American Beauty rose market is dead and other roses but little better. Green stock continues plentiful.

NOTES.

The subject was very ably presented by seven members of the society, who were also teachers of botany in the high schools of the city, the subject being thus presented from the point of view of the teachers individually in relation to their apportioned work in the school. The work done by the pupils was described in a very interesting manner, in the order of the subjects studied, by Misses Allabach, Bard, Hunter, Gasser, Spence, Lewis and Deans. The advantages of the high schools for the study of botany were dwelt upon at considerable length. It was explained that the classes each spent one period a week at the Phipps school of botany where there is available a building with fine laboratory equipment, and recitation facilities, and where an abundance of material, such as twigs, leaves, flowers, seedlings, etc., is always promptly available from the conservatories, or from Schenley park in just the condition desired, and where the great indoor and outdoor collections are excellent for the purposes of getting acquainted with plants by actually seeing and comparing them.

The botanical work in the high school course is given in the first year, preceding chemistry and physics, so that certain experiments of a general nature are carried on by the pupils regarding not only the plants themselves but also their food, how they get it, how it is stored up in the plant, how it is moved in the plant to a point where needed, and many similar experiments for the successful carrying out of which the facilities of the Phipps school and conservatories are essential and invaluable. Dr. J. F. Shafer exhibited a beautiful specimen of Odontoglossum luteo-purpureum with 60 perfect flowers in a dense cluster about 18 inches long. The room was tastefully decorated for the occasion with foliage and flowering plants from the Phipps conservatories through the kindness of Superintendent Burke. Gardener Jones called attention to several fine varieties of daffodills, allium, Frittillaria meleagris, nicotiana, etc., and at the conclusion of the meeting distributed a liberal supply of cut flowers to the ladies present.

The regular monthly meeting of the Botanical Society of Western Pennsylvania, was held March 12, in the Herbarium room of the Carnegie museum, the subject for discussion being "Botany in the Public Schools of Pittsburg." The society is making much progress under President Otto E. Jennings, whose policy is to have an interesting topic discussed each month.

E. Niggel, of the Pittsburg Florists' Exchange, was married, March 12, to Miss Heart, of De Haven. J.

BUSINESS STILL POOR.

The week just passed has been productive of nothing encouraging, but rather a continuance of the inactivity of the last month. There has been absolutely no demand for flowers outside of a very limited call for funeral work, and this is mostly of second class quality. Spring is practically here, as evidenced by a welcome stretch of warm and bright weather, the effects upon stock being plainly noticeable, bringing it two weeks in advance of an ordinary season. The outlook for Easter is being considered by the growers and, from present appearances, various lines of usual favorites will have passed when that week arrives. Violets are rapidly reaching their last stages and, as Easter this year is very late, it is now doubtful whether single ones will be available. Bulbous stock also is advancing in spite of the efforts of producers to hold it in check. The most important result of the continued depression is the long looked for drop in the price of roses. Richmond and Killarney with an excellent line of the favorite Ulrich Brunner offer the greatest attraction in this list. American Beauty is moving very slowly and an excellent grade is easily obtainable; carnations are overlooked completely and the present market offers no encouragement to producers of this stock. The last of the mid-season flowering plants are rapidly being closed out and bulbous plants are in full control of this end of the business.

NOTES.

A representative delegation of rose growers and enthusiasts is planning a trip to Chicago to attend the rose exhibition. Among those who have announced their intention of being members of the party are W. H. Elliott, of Brighton, and Madbury, N. H., and his sales manager Alfred Hutson; P. Welch of the firm of Welch Bros., wholesale commission merchants; Alexander. Montgomery, Jr., of the Waban Rose Conservatories.

A. Leuthy, the well known plant specialist of Roslindale, is distributing an excellent collection of gardenias, a line not extensively cultivated by the local growers. They are well furnished with healthy foliage and supported by an abundance of perfect flowers.

Mann Bros. are showing samples of their lilies for Easter, of which stock they are extensive producers.

Visitor: Albert Pochelon of the Bemb Floral Co., Detroit, Mich. B.

JOHN W. McINTYRE,

1601 Ranstead St., PHILADELPHIA.

Southern Daffodils, Trailing Arbutus, Single Violets and Yellow Daisies in any quantity.

Rutherford, N. J.

The Julius Roehrs Co. has now a splendid stock of the new rambler rose, Newport Fairy. There are a number of fine plants of it in bloom. It is an everbloomer and of a delightful pink shade; the flowers are single but last a long time. The small stock that is being shipped is in splendid condition, a noteworthy feature of this rose being its glossy green foliage. In the many other stocks which have made the name of this firm world-famous, it is keeping up a well-earned reputation. There is a great expanse of glass devoted to orchids and many beautiful varieties are to be seen. Very noteworthy, also, are hydrangeas, lilac, rhododendrons, Crimson Rambler roses, spireas, and a daily cut of lily of the valley of splendid quality.

Bobbink & Atkins are keeping their large force very busy, as their spring trade promises to assume gigantic proportions. The fanciers of fine nursery stock should be greatly interested in visiting their place this spring as a more complete collection of everything necessary to beautify public and home grounds cannot be found. In addition to their immense nursery they have also a great amount of stock under glass, coming on for Easter. This comprises azaleas, hydrangaes, lilies, Otaheite oranges, spireas and many fine foliage plants.

Huntington, W. Va.

J. A. Peters reports business good but that February was below the corresponding month last year. March has opened up well. B. Haley, foreman for Mr. Peters, has had the misfortune to lose his wife at the early age of 25.

There has been a great lack of society functions and funeral work has also been very scarce. P.

BETHLEHEM, PA.—John E. Haines has opened a first-class store at 13 East Fourth street. The south part of the city has felt the need for a long time of an establishment of this kind, and Mr. Haines is in a position to give the town as good a flower store as there is in the country. The store is stocked direct from his greenhouses with fresh and choice flowers, which will be on display daily.

Worcester, Mass.

The spring show of the Worcester County Horticultural Society, March 5, was somewhat smaller than usual on account of the main hall being engaged for the lecture. The feature of the exhibition was H. F. A. Lange's exhibit, including an exceptionally fine azalea, the largest one shown. Edward W. Breed and Matthew J. Whittall also showed some good azaleas. Mrs. John C. Whitin had a splendid showing of orchids, including a large Dendrobium nobile. H. F. A. Lange also had a fine showing of roses, carnations and lily of the valley. L. C. Midgley of the Worcester Conservatories had a good showing of roses, carnations and sweet peas. The awards were:

Cut flowers.—H. F. A. Lange, first; E. W. Breed, second; Allyne W. Hixon, third.

Carnations.—H. F. A. Lange, first; L. C. Midgley, second.

Orchids.—Mrs. John C. Whitin, first.

Azalea, one plant.—H. F. A. Lange, first; E. W. Breed, second; Matthew J. Whittall, third.

Azaleas, three plants.—Edward W. Breed, first; M. J. Whittall, third.

Cineraria, four plants.—H. F. A. Lange, first; E. W. Breed, second; Mrs. Percy G. Forbes, third.

Cyclamens, four plants.—H. F. A. Lange, first; E. W. Breed, second.

Cyclamen, single plant.—E. W. Breed, first; H. F. A. Lange, second.

Hyacinths, six plants.—H. F. A. Lange, first: E. W. Breed, second; Francis E. Jones, third.

Orchids in bloom.—Mrs. J. C. Whitin, first.

Primula Sinensis, four plants.—E. W. Breed, first; H. F. A. Lange, second.

Primula, any other variety, four plants.—Matthew J. Whittall, first; E. W. Breed, second; Allyne W. Hixon, third.

Display of roses.—H. F. A. Lange, first; L. C. Midgley, second.

The last lecture of the season was given by Philip W. Ayres, Concord, N. H., his subject being "Forestry." Mr. Ayres is forester for the Society for the Protection of New Hampshire Forests and had many pictures to illustrate his talk. There was a large attendance and President George Calvin Rice presided.

STOCK PLENTIFUL.

The market the past week has been but a repetition of the previous one; all varieties of flowers were very plentiful and therefore sales had to be made at low prices. A change which was welcomed by the wholesalers came Sunday and prices stiffened, caused, perhaps, from March 17 being St. Patrick's Day. This year, however, there will be no parade. A banquet at the Planters hotel, dances and meeting of the Hibernian society will help to dispose of flowers. The death and injuries of several firemen will cause a demand for white and other flowers. Violets are getting daily smaller, and if warm weather continues will be a thing of the past in a few days. Several growers stated that should hot weather continue all flowers would be scarce at Easter, but this is always the old cry and when Easter arrives there is generally sufficient to go around. Callas, however, have been very plentiful, and good ones could be purchased at six to eight cents. Green carnations are now popular, thereby causing prices on white carnations to stiffen. Sweet peas are increasing in supply; a great many of the pink varieties arrive with short stems and are hard to dispose of. Some very fine lily of the valley is now in. Southern jonquils have arrived and sell at low prices.

NOTES.

The attendance at the recent flower show given by the Horticultural Society was good. A great deal of interest in the prizes offered by the society to amateurs is taking place. The competition will be great and the judges' lot a hard one.

In the exhibit from Vaughan's Seed Store, Chicago, at the flower show last week, Baby Rambler roses less than two inches high but flowering freely were much admired. Shamrock in small pots was another feature.

The Florists' Club held its monthly meeting March 12. Two vases of roses were shown by Fred Ammann of Edwardsville, Ill., and E. W. Guy, of Belleville, Ill. Twenty members were present. Will Young in the chair.

Beyer & Sons are in the market with a fine lot of flowering plants. Carl has now entirely recovered from his sprained ankle.

City Forestry Department expects to enlarge its working force this summer. Andrew Meyer, Jr., has his hands full.

W. F.

Springfield, Ill.

The Florists' Club held its regular monthly meeting March 16. The committees in charge of the state convention show reported and were discharged, President Brown complimented the club on the able manner in which it handled the show. The subject of a fall show next November was discussed and laid over till next meeting for further consideration.

The following officers were elected: Carl Rauth, president; R. T. Donnell, vice president; Frank A. Friedly, secretary; Geo. Van Horn, treasurer. The next meeting will be held the second Monday in April.

F.

Clifton, N. J.

Robert Simpson is making a fine cut of Killarney, Richmond, Uncle John and other roses. A leading feature is the cut he is having from a pink seedling rose, which seems, in Mr. Simpson's hands, to be more prolific than most of the old varieties. Preparatory work for the approaching convention and exhibition at Chicago is keeping the genial president busy, but the work of growing roses by the most up-to-date and successful methods goes steadily forward at his range.

The Seed Trade.

American Seed Trade Association.
Geo. S. Green, Chicago, Pres.; M. H. Duryea, New York, First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-sixth annual convention, June 23 to 25, at Hotel Ponchartrain, Detroit, Mich.

THE Erie Preserving Co., of Buffalo, N. Y., has failed. The firm had been a large user of seed peas.

PHILADELPHIA, PA.—The Henry F. Michell Co. reports its business as showing an increase of 10 per cent.

VIRGINIA BULB growers report that the crop of bulbs is well advanced and shipments should begin about March 25.

MINNEAPOLIS, MINN.—Northrup, King & Co. report trade better than last year with a very active demand for high grade agricultural seeds.

MARBLEHEAD, MASS.—Jas. J. H. Gregory & Son say that while January and February showed a slight decline the first 10 days of March more than made up the deficiency.

BALTIMORE, MD.—The Duvall seed bill will practically prohibit the selling of seeds in this state, it providing that germination, impurities, etc., must be guaranteed by the seller.

LARAMIE, WYO.—The Wyoming Plant & Seed Breeding Co., with farms at Worland, held its annual meeting here March 3. Aro Haley of this city is director. Experiments are being made in raising alfalfa in this state.

SHENANDOAH, IA.—We are having a larger business than we have ever had before in all of our experience, and have so far this season shipped out over 150 carloads of seed corn to seedsmen all over the south.—RATEKINS SEED HOUSE.

CLINTON, WIS.—The L. L. Olds Seed Co. rented the Ishman building on Main street March 6 and in a few days will have its force at work. It is thought that the fire started in the women's cloak room, possibly, from stepping on a match.

FRANCIS BRILL, the veteran seed grower of Hempstead, L. I., N. Y., writes: "I have worked 50 years for wealth but without great results; still, the world owes me nothing. I cannot say as much of the people in it. I am working now just enough to keep out of mischief."

TOLEDO, O.—A delegation from this city visited Columbus to appear before a meeting of the legislature with a protest against the new proposed state law making it a crime to sell clover, grass, vegetable or flower seeds containing more than two per cent of foreign seeds.—S.

PRESIDENT F. W. BRUGGERHOF, of the Wholesale Seedsmen's League, has appointed a committee provided for in resolutions of February 18 on the nomenclature question (for which see pages 348 and 349 of our issue of March 14) as follows: W. Atlee Burpee, J. C. Vaughan and Chas. H. Breck.

A MICHIGAN bean grower writes as follows under date of March 15: "Trade for both spot and future is good. Stock in hand of both peas and beans is very light. Farmers who grew garden varieties of beans last year will not be likely to repeat it again this year, as they can grow crops that pay better."

AS TO THE ODORLESS ONION, mentioned by the daily press, "they'll be getting up a self-peeling orange next," said L. A. Budlong, owner of extensive onion farms in North Chicago. "What we need is a pumpkin big enough to feed cattle in. But, seriously, I don't take any stock in a report that any one has amputated the smell of an onion. I've raised millions of 'em and I ought to know whether it can be done or not."

Braslan Seed Growers' Co.
Growers for the Wholesale Trade Only.
SAN JOSE, CAL.

Chicago.

Grass seed contract prices on the board of trade March 17 were noted as follows: Prime timothy, $4.75 (no bids); medium red clover, $20.85 (nominal); choice white clover, $15.

Onion sets for immediate delivery are easy at about as follows: Yellow, $2.50; red, about $2.75; white, $3 to $3.25 for 32 pounds.

Winterson's Seed Store has just received a large shipment of caladium, canna and tuberose bulbs.

Trade visitors.—F. L. Hogue, Carpinteria, Cal., on his way east; A. J. Pieters, Hollister, Cal.; A. J. Brown, Grand Rapids, Mich.

Establishing Grades of Onion Sets.

In answer to a recent letter from The Produce Reporter suggesting an onion set inspector be secured for the set shipping season at Chicago, J. J. Budlong of the L. A. Budlong Co., Chicago, writes as follows:

"As to the advisability of trying to establish standard grades on onion sets, we do not believe it possible to get any set of grades that will apply to the onion set crop of the United States, or even of Chicago alone. Take, for instance, the first grade mentioned in your list of grades: Who is there that knows whether or not an onion set is ripe?

"Second.—What constitutes natural color? On the Red Wethersfield alone, there are at least 50 different strains of seed in the United States which produce all sorts of variations in color from the deep dark red that properly belongs to this variety, to a pale yellowish red onion, mixed more or less with yellow and white varieties, and all grades between these two extremes are represented, and they are all sold as red. This applies equally well to at least 10 definitely recognized varieties that are grown and sold in the United States.

"Third.—The questions of dry and sound at the shipping points are easier settled, but we do not believe that any carload of sets that ever left Chicago to stay in the car five days in the winter time, ever arrived at destination in the same dry condition that they left this city.

"Fourth.—Free from tops, dirt, and chaff.—The best harvested onion sets are never entirely free from top, dirt or chaff, though the way that they are topped at harvest time varies all the way from twisting the tops off carefully to such harvesting as does not remove the tops at all. The matter of dirt and chaff is taken care of by nearly all shippers by so-called milling machines which screen out the majority of the dirt and blow out the chaff, but if one wished they may be put over the mill time and time again, and always blow out some chaff and screen out a little dirt so that your first grade of sets mentioned is a practical impossibility.

"Onion sets are used for planting purposes, not to eat and not to look at, and the test of their value is what kind of a crop they will produce when they are planted. There is also a wide variation in the value of the goods screened through any given sized screen, thus for instance a certain lot of onion sets screened through 1⅛-inch screen might count 125 sets to the pound, and have nothing in them excepting large sets near the size of the screen used, while another lot would count 250 to the pound on account of the large number of small sets contained, and be worth just twice as much to the buyer as the lot first mentioned. You might just as well try to establish a grade on seedsmen's seeds of any kind as on onion sets, and would encounter the same difficulties. We might go on indefinitely with the above kind of facts and would talk it over with you if you wish in full, but in practice the following facts are what grade the buyers are satisfied with:

"Goods that will pass through the screen contracted for with a fair proportion of small ones contained among them. They are very particular in the matter of sprouted or growing sets, and more rejections occur on this account than any other one cause.

"The next point is their freedom from rotten sets. Too many of these are objectionable for the reason that the rotten ones injure the sound ones, and any shipper who will take pains to put his stock in good merchantable condition before shipping, will find rejection on account of qualities of goods, a thing of the past. We might add that some of the best shippers hand-pick their goods before shipping, for the sake of physical appearance, but that the majority of them are shipped after being milled over a machine such as described above.

PROCEEDINGS
Of the Congress of Horticulture held at the Jamestown Exposition, September 23, 1907,
Linen Bound. 108 pages. Price, 25c.
This publication includes the formal addresses and discussions of the papers read at the meeting which covered the various phases of Horticulture. This meeting was pronounced by Horticultural authorities as one of the greatest Horticultural meetings ever held in a single day.
For copies address
H. C. IRISH, Sec'y,
National Council of Horticulture, Missouri Botanical Garden, **St. Louis, Mo.**

"There are several men in Chicago who are expert in the business, who could (if they could be induced to), accept the position of inspector, pass on goods shipped, and tell very quickly whether the shipment would fulfill the contract, but outside help, such as would have to be employed, would be a long time learning to do this.

"We believe that establishing of inspection on the lines you suggest, to apply to grain, fruits, vegetables or other articles for consumption of the goods sold, either in manufacturing purposes or to eat would be of value to both buyer and seller, but do not see how it could possibly be applied to sets or to any other article of commerce that is used for planting purposes. Take for instance the purchase of seed corn, oats, wheat, or potatoes for planting purposes. What buyer ever thinks of accepting the standard grade that exists on these goods in purchasing them for the above purposes? They invariably go to some reputable seedsman or grower, and accept his representation as to quality and strain of goods sold without paying any attention to the grades established by law and usage, and furthermore pay a heavy premium over the current prices on standard grades of these goods for the sake of the representation which is made by the seller.

"Our own experience is that where the buyer is in doubt about the representation of sets that a sample settles the question and is much more satisfactory to him than any standard of grading that can be devised."

Diseased Plants Confiscated.

Marysville, Cal., March 5.—Because they were infested with mites which are particularly dangerous to bulbs and roots, Horticultural Commissioner Stabler of Yuba City and State Entomologist Carnes have confiscated five lots of choice chrysanthemums imported from Japan. The plants were intended for the E. B. Starr Ranch in Sutter county. The duty on the package which came by parcels post, was $3.59. The inspectors at San Francisco had overlooked the diseased condition of the consignment. Postmaster Meyers was first to grow suspicious of the plants.—Sacramento Bee.

HAMBURG, GERMANY.—Julius Hansen, of Pinneberg, is in financial difficulty and is offering to settle on a basis of 33 1/3 per cent. Liabilities are 10,000 marks, assets probably nil. It is said that his losses were made through being stuck on 100,000 lily of the valley pips the past season.

MARKET GARDENS.

THE few fine dry days have led to increased activity in the truck farms around Chicago.

IN 1903 the value of vegetable exports from the United States to Cuba was $481,595; in 1907, $1,476,401.

THE last dove sent out by the market growers in the low places around Chicago presumably did not return.

ONION GROWERS of Pasadena, Cal., it is stated, have found a solution of tobacco extract so perfect an antidote to the fly that they are using it in preference to kerosene emulsion and other sprays.

IN past years the bureau of statistics has made no attempt to investigate the supplies of potatoes carried over the winter. There has been some inquiry for this information, and the bureau therefore mailed, in the latter part of February, schedules of inquiry regarding stocks of potatoes on hand to about 800 correspondents in the principal potato-growing counties in the United States. If sufficient interest is manifested in such a report, and if sufficiently accurate data can be secured to make the information of practical value, this investigation may be made yearly upon a more extensive scale than the one made the past month.

A New Mushroom.

At a recent meeting of the Dutchess County Horticultural Society were exhibited mushrooms of violet color, found in Peter Devoy's violet house east of Poughkeepsie, N. Y., where they were considered a great nuisance, according to the Country Gentleman. Some were sent to State Botanist Peck, who identified them as Tricoloma sordidum, a French mushroom, never found in this country before. Mr. Devoy cannot account for their presence, but thinks the spores may have come with bulbs imported from Europe.

Prices of Indoor Vegetables.

The prices of indoor vegetables at leading points March 14 were as follows: New York, cucumbers, No. 1, $1 to $1.25 per dozen; No. 2, $3 to $4.50 per box; lettuce, 25 cents to 65 cents per dozen; mushrooms, 20 cents to 50 cents per pound; mint, 30 cents to 40 cents per dozen bunches; radishes, $2 to $4 per 100 bunches; tomatoes, 15 cents to 25 cents per pound. Chicago, cucumbers, $1.35 to $2 per dozen; radishes, 30 cents to 40 cents per dozen bunches; mushrooms, 25 cents to 50 cents per pound. Cincinnati, cucumbers, $1.75 to $2 per dozen; mushrooms, 40 cents to 50 cents per pound. St. Louis, cucumbers, $1 to $1.25 per dozen. Boston, tomatoes, 30 cents to 40 cents per pound; cucumbers, $9 to $12 per box. Detroit, cucumbers, $1.25 to $1.50 per dozen. Minneapolis, cucumbers, $2 per dozen. Denver, cucumbers, $2.50 per dozen.

Pollination of Forced Tomatoes.

It is well known that greenhouse tomatoes do not set fruit freely during the midwinter season. The only satisfactory method for correcting this trouble is to fertilize the blossoms by hand. A description of this method, together with a discussion of the conditions favorable for pollinating, is given in a farmers' bulletin on "Tomatoes" of the Department of Agriculture. It is here desired to emphasize the importance of pollinating carefully and thoroughly. In house-grown tomatoes there is often a considerable percentage of one-sided and small fruit, which greatly detracts from the value of the crop. The general inferiority in size of winter-grown tomatoes can undoubtedly be attributed to the comparatively short periods of sunshine during that season of the year. On the other hand, the results of station investigations along this line show that imperfect pollination is an important cause of one-sided and small fruits. While working at the Cornell station, W. M. Munson found that the amount of pollen used may have an important bearing in determining the form and size of the fruit.

"In the winter of 1890-91, while crossing tomatoes, two stigmas in the same cluster of flowers were given different amounts of pollen. The first was given a very small amount—10 to 20 grains—on one side of the stigma; the other was given an excess of pollen, the stigma being well smeared. The effect on the form and size of the fruit was very marked. The fruit receiving the large amount of pollen was of normal size and nearly symmetrical in form, while the other was small and deformed. The larger fruit produced an abundance of seeds and all of the cells were well developed; the smaller developed seeds on one side only, while the other side was nearly solid."

The experiments were repeated several times during the following winter, and similar results were obtained, both when "the flower nearest the base of the cluster received an excess of pollen, while the other received a very small quantity on one side of the stigma" and when "the flower at the base received the small amount of pollen, while the other was given an excess," thus indicating that the relative position of the flower had no influence in determining this point.

No conclusion was reached by Munson as to the exact number of pollen grains necessary to insure proper fertilization, but in no case was fruit secured "when all pollen was excluded, and in every case the size of the fruit was in direct proportion to the amount of the pollen used."

Experiments with greenhouse tomatoes, recently reported from the Michigan station by S. W. Fletcher and O. I. Gregg, not only confirm the results secured by Munson, but also appear to show, as indicated by earlier experiments by J. Tropp of the Indiana station, that there is no decided advantage to be gained by the cross pollination of varieties as compared with self-pollination. Six varieties of tomatoes were included in these experiments, viz: Ignotum, Stirling Castle, Earliana, Best-of-All, Lorillard, and Frogmore. "Four plants of each variety were used to determine the effect of using varying amounts of pollen. All the flowers on one plant of each variety were emasculated and pollinated on one side of the stigma only. These invariably produced lop-sided and small fruits. All the flowers of one plant of each variety were pollinated with from one to five pollen grains. These produced very small, solid fruits, with an average weight of but 34 grams (about one ounce) and having no seeds, or but one or two. All of the flowers on one plant of each variety were pollinated with a large amount of pollen, spread all over the stigma. These produced fruits that were smoother and averaged 12 grams heavier than fruits produced from flowers that had but a small amount of pollen applied all over the stigma." The conclusions deduced from this work are that "when pollen falls upon one side of the stigma only, a one-sided tomato always results. The larger the stigma the greater the irregularity. The amount of pollen applied to the stigma determines to a great extent the size and smoothness of the tomato; but after applying a certain amount of pollen no further increase in size or weight results

OTTO MANN, Leipzig, Saxony, Germany

by applying more. The small, irregular tomatoes grown under glass are caused largely by insufficient pollination."

With the view of throwing some light on the relative value of cross and self-pollination, "the blossoms on four plants of each variety were self-pollinated, and the blossoms of eight plants of each variety were cross pollinated with two other varieties. All set fruit equally well. The 265 fruits produced from self-pollination on all six varieties had an average weight of 77.3 grams. The 534 fruits produced from cross pollination on all six varieties had an average weight of 79.1 grams," from which it will be seen that there was practically no gain in the total number of cross pollinated fruits secured, and but a slight difference in the weight of the individual fruits in favor of cross pollination.

Although it does not appear necessary to raise several varieties for the purpose of cross pollination, there is no harm in alternating such varieties as are grown, and in some cases a possible benefit may be obtained, such as a slight increase in the average weight of the fruit. All of the experiments, however, do show most conclusively that the setting of a good crop of smooth, heavy fruit depends very largely upon the care taken in distributing the pollen, especially during the cloudy weather which is likely to be of frequent occurrence in midwinter.

ASTER SEED

Our descriptive price list of High Grade Aster Seed is now ready, and will be sent free on application.

It will soon be time to sow your main crop of Aster Seed. Give our strain a trial. None better.

The Nursery Trade

American Association of Nurserymen.
J. W. Hill, Des Moines, Ia., President; C. M Hobbs, Bridgeport Ind., Vice-President; George C Seager, Rochester, N. Y., Sec'y.
Thirty-third annual convention to be held at Milwaukee, Wis., June, 1908.

MANTUA, PA.—James Griscom will plant an orchard of 1,200 Kiefer pears.

NEWARK, N. J.—The North Jersey Nurseries now have offices at 188 Market street. E. D. Pennell, the manager, reports a promising outlook for spring.

WAPATO, WASH.—The Wapato Nursery Co. has secured a 5-year lease of the Jesse Peam French 80 acres and another 40 acres, giving them in all 200 acres of ground.

SCOTTSVILLE, TEX., March 9.—Up to this writing prospects for a good peach crop are excellent. The weather has been warm, plenty of sunshine and good wind, insuring pollenization.

MONROE, MICH.—Clarence J. Kirby, field superintendent of the I. E. Ilgenfritz Nursery Co., fell from the top of a 20-foot ladder recently. His arm was fractured and his scalp torn.

VALLEY CITY, N. D.—The Northwest Nursery Co. has been incorporated with capital stock $50.000. The incorporators are Ernest C. Hillborn and E. A. Pray of this city and P. A. Pickett of Lead, N. D.

THORSBY, ALA.—The Alabama Pecan Growers Co. has been formed with headquarters here and capitalized at $100,000. The incorporators are C. W. Jacobs, J. E. Peterson, E. H. Thomas and W. P. Sterling.

NORTHAMPTON, MASS.—The plans of John Nolan, Cambridge, were the most acceptable to the authorities having in hand the work of laying out Smith's Agricultural School grounds and he has in consequence been appointed landscape gardener.

E. A. KANST of South park, Chicago, says that, in his opinion, the San Jose scale will not live in the latitude of that city. He bases this on the fact that the pest has seemed to disappear instead of increase where it was formerly seen in the park.

KANSAS CITY, MO.—The contract for the nursery stock, consisting of trees and shrubbery to be planted in the city parks, was let, March 2, by the park board to M. E. Chandler Elmhurst nursery, Argentine, Kans. The amount of the contract was $1,350.

HOUSTON, TEX.—If the plans of John J. Duncan of Minneapolis materialize, one of the largest nurseries ever established in Texas will soon be located in the vicinity of this city. Mr. Duncan is a practical fruit man and has been in this vicinity looking over the prospective field.

TORONTO, ONT.—At a recent inquiry, expert evidence was brought forward to show that purchases of stock by the park department from nurserymen were charged for at rates enormously increased over those asked by others in the trade. The city, it was said, had paid $10,164 for stock that should have been purchased for $3,000.

LOS ANGELES, CAL.—The horticultural commissioners here are jubilant over the success attained with the black fly, imported from China, as a parasite of the purple scale that attacks the trees in the orange orchards.

NEW ORLEANS, LA.—The new carousel and refreshment hall at Audubon park are nearing completion and the removal of the old buildings devoted to these purposes will materially enhance the entrance to the conservatory, with its fine live oaks on either side. Jules Fonta, the veteran superintendent, is now in his seventy-third year.

THE American Society of Landscape Architects held its quarterly meeting and dinner at the Brunswick hotel, Boston, March 10. It is customary for this society to meet in New York, but as many of the members desired to study the Boston park system and the proposed park improvements along the Charles river it was decided to hold the meeting in Boston. The president of the organization is F. L. Olmsted, Jr. He introduced T. M. Clark, of Boston, who spoke on Boston parks. Arthur Shurtleff spoke on the proposed improvements in the Boston landscape as worked out by the committee of Boston architects. Both speakers illustrated their subjects by means of lantern slides.

E. M. Sherman.

Claim for Damage for Untrue Fruit Trees.

In the United States circuit court at Knoxville, Tenn., there is pending the case of J. T. Triplett, of Virginia, against the Knoxville Nursery Co., of which company Congressman N. W. Hale is the president. It has been tried once and a verdict was given the plaintiff for $3,500. Judge Clark cut the amount down to $2,500, which the plaintiff would not accept. Hence a new trial.

The case was continued on re-trial from the September, 1907, until the present term. On March 4, John W. Green, attorney for the defendant, stated that N. W. Hale, was sick in Washington, and asked that the case go over. This was agreed, and it is now set for trial in September.

The case grows out of a contract for the nursery company to furnish 4,000 Elberta peach trees, which was done according to the claim of the defense. On the previous trial the plaintiff swore, that he bought the trees as Elbertas; that he planted them and that when, after care and attention, that they bore, that they were found to be largely natural fruit. This was denied by the defense, but the jury gave a verdict for $3,500.

Sherman Nursery Co., Charles City, Ia.

The grounds and buildings of the Sherman Nursery Co., Charles City, Ia., are most interesting at all times, very fine stocks of everything in trees and shrubs, hardy roses and perennials being grown on a large scale. The Iowa State Register recently published a long and interesting illustrated article on this famous nursery, describing the various branches. The packing shed is 150x300 feet, and is built between two hills with solid masonry making it absolutely frost proof even in the coldest weather, and is well equipped with tracks and cars for handling the stock with economy of labor and dispatch. The stables are built for 35 horses used by the company and there is a fine range of greenhouses. There are over 10 acres devoted to tree seed beds, from 8,000 to 10,000 apples are annually grafted, with other hardy fruits in quantity, all of the "ironclad" varieties needed in this section, while millions of seedling trees of the forest and ornamental types are turned out annually. The territory covered by the sales of this company runs far north into Canada besides covering practically the whole of the northern United States.

New Nursery Firm at Dansville, N. Y.

W. J. and A. E. Maloney, of Danville, N. Y., and F. Walter Wells, of Rochester, have organized a three party copartnership company under the name of Maloney Bros. & Wells, for the purpose of carrying on a general retail and wholesale nursery business. W. J. and A. E. Maloney were members of the wholesale firm of Thos. Maloney & Sons, which was a very successful firm. Thos. Maloney, having retired from business, sold his interest to F. Walter Wells, of Rochester. Mr. Wells has been identified with Green's Nursery Co. in that city for years. Some few years ago, when this company was incorporated, Mr. Wells was elected secretary and treasurer, in which capacity he has acted ever since. During these years he has proven himself to be one of the best catalogue men in the nursery trade. W. J. and A. E. Maloney have had extensive experience in the nursery line and they are good shrewd business men. With a combination like this the new firm ought to be a financial success.

Preserving Trees.

ED. AMERICAN FLORIST:—

I noticed you recently spoke of a method of restoring decayed trees. I have a valuable camellia that some years ago got quite a large branch broken off and it has been neglected so that now the trunk has considerable decay in it. What can I do for it? M.

You probably refer to the restoration by means of concrete or cement. The method practiced by tree men is to remove every particle of decayed wood, carefully avoiding injury to the cambium layers and bark, and wash the cavity out thoroughly with a weak solution of sulphate of copper and lime. Then fill in with cement and sand, mixed as concrete in the usual way. Finish the cement slightly below the level of the bark in

order that this may grow over and effectually close the wound. See to it that the work is carefully done to exclude any possibility of air or moisture reaching the wound or the decay will go on as before. G.

Small Parks and a Divided City.

Three small parks are being established in the west division of Chicago as the result of the $1,000,000 bond issue authorized in 1906. In park No. 3, a 4-acre tract at May and West Twentieth streets, a small field house has been erected and other work is far advanced. In park No. 1, eight acres at West Chicago avenue and Noble street, improvements are well under way. Condemnation proceedings to secure four acres at Jefferson street and Fourteenth place for park No. 2 have been begun.

Jens Jensen, the landscape architect and general superintendent of the west parks, in an address at the City club the other day, told of this progress and of the benefits which such small parks would afford when conducted as neighborhood centers. He called attention to the small number of these pleasure grounds provided for the congested districts of the west division. He declared that park consolidation was the only means of remedying this condition, the west division being financially unable to pay sufficient park taxes to provide the needed recreation centers.

The funds for park purposes derived from the great values in the down town districts of Chicago in justice should go to the parks in all parts of the city. Yet this important source of revenue is enjoyed exclusively by the south division under the present absurd system of divided control of the parks. Evidently the people of the south division recognize the injustice of this arrangement. Last September, several wards in the south park district, returned majorities at the polls for the proposed new charter, with its provisions for centralizing the control of all the parks.—Chicago Daily News.

South Dakota Nursery Law.

"The supreme court holds that the nursery stock law, passed at the last legislative session, is good so far as it was drawn as to make it effective, but was so loosely drawn in part to make that particular feature of it innocuous and of no effect," says a Pierre, S. D., correspondent of the St. Paul, Minn., Pioneer Press, "The law contained three main features: First, requiring all nursery stock offered for sale in the state to have been inspected by some competent entymologist and the condition of the stock as to its healthiness to be certified to by such authority; second, to secure a certificate for the privilege of sale by application to the State Board of Agriculture, and the payment of a fee of $10 for such certificate, with an additional fee of $2.50 for copies of such certificate for each agent of the nursery operating in this state; third, requiring the nurseryman to put up a bond of $5,000, presumably to protect his customers against poor stock.

"But while the court holds the two provisions of inspection and a certificate to do business to be good, it holds on the bond provision that it is so provided in the law that the bond demanded does not require any sureties of any description, or that the nurseryman shall incur any obligations in any manner whatever in giving it; that by the giving or writing of such a bond as the law demands could not in the slightest degree affect the liability of the nurseryman, or the recovery by anyone who may have sustained damage by any of the acts of the nurseryman in violation of the act. It is further held that the State Board of Agriculture could not be clothed with power to modify an exact statute."

YOUNG ROSE PLANTS

All propagated from wood taken in the FIELD from blooming plants.

JULIUS ROEHRS CO., Rutherford, N. J.

West Grove, Pa.

Weather conditions are favorable; the frost is out of the ground and outside digging has commenced. Mailing trade to date shows an increase over last year.

At the Conard & Jones greenhouses J. Pernet Ducher's new rose, the Lyon, has given several fine blooms; it is fully up to expectation, magnificent in its rich coloring. The flower is also of good form. One of the charming features at this place has been the grand blooms on the hybrid perpetual roses in 5-inch pots; especially fine were Frau Karl Druschki, Jubilee, General Jacqueminot, Capt. Hayward, Prince Camille de Rohan, John Hopper, Mrs. John Laing and others. These were all field grown plants on own roots, potted last December, and this stock was used for propagating.

We notice that the advocates of budded and grafted roses are more numerous in this country than 40 years ago. Antoine Wintzer says own-root roses for him always. A.

Halifax, N. S.

Trade has been good during the past month. Funeral work was apparently about the same as February, 1907, but we noted an increase in the demand for cut flowers. There appears to be a good stock of shamrocks for St. Patrick's Day; some growers have already booked orders for all they have.

The Nova Scotia Nursery has found a ready sale for some exceptionally fine primulas and wallflowers. The stock of azaleas, spireas and all bulbous stock looks promising for a good show at Easter.

Our largest dealer in hats and caps advertised that he would give a shamrock with every sale beginning March 14.

The Fenwick Nursery has a good lot of Easter lilies. R. M. K.

Greenhouses and Nurseries: Western Springs, Ill.

Albany, N. Y.

The Florists' Club at its last meeting decided to prepare a special circular for distribution to customers of the members in the retail trade. The circular is intended to contain short and simple hints on the care and watering of the commoner plants that the public buys, with hints as to seasonable varieties to purchase and a few other matters of interest to the dealer and his customer. A committee was appointed to prepare the circular, consisting of Fred A. Danker, chairman; Herbert A. Whittle, Patrick Hyde, Fred Henkes, H. Barthell and Samuel Goldring. It is expected that the first lot of circulars printed will be 2,000. These will be distributed among the retailers in the city. The call for the circular and its necessity have been pointed out at a number of meetings held by the club. Customers buying plants at different stores often received different instructions for the care of the same varieties in the same season. The circular, it is expected, will provide uniform instruction for the care of the same varieties at each season of the year. The members at the meeting also discussed with enthusiasm the project of holding a flower show this fall. It will be the first thing of the kind to be held by the club and it is expected that a number of prizes will be provided. It is proposed to hold the show in some hall available to the public, which will be invited to view the product of the florist's art.

Alfred E. Whittle, 1020 Madison avenue, is planning to build this spring a new house 30x120 feet for chrysanthemums and Easter lilies. Mr. Whittle has some of the material already on hand.

R. D.

DYERSBURG, TENN., reports their city, containing 7,000 inhabitants, an excellent location for an active, energetic florist. S. G. Latta may be written at that point concerning same.

DAVENPORT, IA.—A flower show is now on at Central park, which even exceeds in beauty the chrysanthemum display there last fall. A large number of people are visiting the park daily to view the exhibition.

R. Witterstaetter, Station F, Cincinnati, O.

Kansas City.

STOCK VERY PLENTIFUL.

For the first time this winter the shops are experiencing the greatest difficulty in keeping their stocks down to the consumption. The warm weather of the past two weeks has served to bring most all kinds of stock hustling to the market, especially bulb stock, which at the present rate will be almost out before two weeks. Trade has not been up to the usual standard, but an improvement is shown over the first week in the Lenten season. Flower sales were very much in evidence last Saturday. Both the large department stores and the Alpha Floral Co. advertised specials.

NOTES.

An up-to-date florist's establishment is to be opened at Kansas City, Kans. A. T. Holmes, who has conducted the place at 512 North Sixth street, is building a fine place on Minnesota avenue, which he expects to occupy in time for the Easter rush. A conservatory will adjoin the store, which in itself is of good dimensions and should be fully up to the demands of the growing business.

R. S. Brown's Sons expect to rebuild their plant on Wabash avenue this summer. This is one of the oldest plants in the city and has decreased considerably with the growth of the city. Mr. Brown expects to do away with the east wing of the plant facing Prospect avenue, but they will increase the size of the Maywood plant.

M. E. Chandler of the Elmhurst nurseries was awarded the contract for furnishing the park board with its supply of hardy plants and trees to be used this summer in several of the large parks which are yet incomplete.

Arthur Newell is busy preparing plans for his new store in the Baltimore hotel annex. Mr. Newell expects to be able to occupy the new quarters during the summer.

Max. Eller says that he is well satisfied with his present location and that his business has shown a good increase each month. The display in the store is creditable.

A. F. Barbee is on the ticket for upper house alderman in his ward. The trade extends best wishes and success in the race.

J. M. Gasser, of the Gasser Co., Cleveland, O., died last week. Mr. Gasser was an uncle of Wm. L. Rock.

Wm. L. Rock made a most successful visit to the southern part of the state last week, in quest of ducks.

K. C.

PEORIA, ILL.—Bruno Juergens is ill with the grip.

DES MOINES, IA.—There has just been issued by the State Horticultural Society the first number of a journal to be published monthly, entitled "Iowa Horticulture." The editor is Wesley Greene, secretary of the society.

H. A. JAHN, New Bedford, Mass.

Cleveland.

BUSINESS FAIR.

Business the past two weeks has been fair; stock moves fairly well, especially the better kinds, but the demand is not good enough to consume nearly all the flowers that are being sent into the market. Some extra fine callas and Lilium Harrisii are seen now but they do not bring as good a price as they should. Roses were never better, but the price is very weak; the same can be said about carnations. Sweet peas are moving better than they have done in the past. Smilax is in over supply. Asparagus plumosus and A. Sprengeri are none too plentiful at this writing.

NOTES.

Westman & Getz, Euclid avenue, are having a series of very beautiful window displays. Their aim is to have something unique and attractive and they certainly succeed in carrying out their ideas.

The Ehrbar Co., Lorain avenue, reports a prospering business. Funeral work is very good, keeping Mr. Ehrbar busy.

The florists of this city showed their generous nature by contributing flowers for the victims of the recent Collinwood fire.

Smith & Fetters had quite a number of luncheons for St. Patrick's Day. The decorations were mostly green.

FORESTER.

FARMINGTON, CONN.—Mrs. Hugh Chesney has sold her greenhouses and her house on Canal street, to Joseph Haworth of Yonkers, N. Y. Mr. Haworth will continue the business.

Extra Fancy Carnation Blooms

Shipped direct to all points. Special attention to telegraph orders. Give us a trial and be convinced.

J. D. THOMPSON CARNATION CO., Joliet, Ill.

Baltimore.

TRADE IMPROVING.

Bright suns, genial southern breezes and a temperature ranging from 65° to 70° make things look as though the winter was a thing of the past, but we may have a rude awakening from our peaceful dream of birds, flowers and zephyrs before boisterous old March is past. There is some improvement manifest in trade. This is true of trade in general as well as in cut flowers. There is still some evident observance of the restrictions of Lent, but it is the earlier days of this penitential season that are marked with most rigor. Stock grows in abundance and the demand increases, though it is in a see-saw sort of way, sometimes up and sometimes down. Prices sag, too, and there is not much vim in any department. A large opening or two of department houses made some extra work.

NOTES.

Last Monday occurred the annual meeting of the Gardeners' Club, the election of officers, and the customary banquet. John J. Perry, who for some ten or more years has been the secretary of the club, declined to serve longer in that capacity, and his friends thought a proper method of showing their appreciation of his faithful service was to elect him president of the club, and this was done. Mr. Perry is also manager of the Florists' Exchange, has long been connected with the florist's business here and is widely known. The other officers elected are George Morrison, vice-president; F. G. Berger, treasurer; N. F. Flitton, recording secretary; George Talbott, financial secretary, and Chas. M. Wagner, librarian.

An ordinance has been introduced into the city council authorizing the park commission to use decorative plants from its several conservatories for the embellishment of the Fifth Regiment armory during the exhibition next month of the Society of American Sculptors. The building is an immense one and the quantity of plants of fine stature which would be needed to make an effective display seemed to exceed the available resources of individuals, and the city is to be called upon to supply the deficiency from the park collections.

Richard Vincent, Jr., of White Marsh, Md., with his wife and daughter, has started for a tour of several weeks through England, Belgium, Holland and France. Mr. Vincent is the head of the well known corporation which makes a specialty of vegetable and bedding plants. His purpose is to select new geraniums and other plants, suited to his trade from the great establishments on the other side.

S. B.

Southampton, N. Y.

The first bi-monthly meeting of the Horticultural Society was held March 5, President Clark in the chair. After the election of members and other routine business was disposed of J. Griffin read a very interesting paper on vegetable growing. After a very interesting discussion on the subject it was decided to hold a banquet after our next meeting.

U. G. A.

HARRISBURG, PA.—J. A. Kepner's new address is 1108 Market street, not 1110 as recently announced.

FRANKLYN, MASS.—Walter Slade has sold his greenhouses to Wm. Stewart of Mt. Vernon, N. J.

"THE TEST is what TELLS THE STORY."

E. S. MILLER, Wading River, N. Y.

NEW YORK.—The Van Praag Florist Co. has been formed, with capital $500. The incorporators are Marcus Van Praag, Edward McInnes and James F. Carroll, all of this city.

HILLSIDE, N. J.—The greenhouses belonging to John Bennett here caught fire and were blown up by about 50 pounds of dynamite which was stored there, March 6. Mr. Bennett had a remarkable escape from death. He had run out in his night clothes on the first alarm of fire, but seeing he could not cope with it, returned to dress and turn in an alarm. While he was away a terrific explosion occurred, shaking the ground and blowing the greenhouses into the air in sections. According to the Long Branch Record: "There is not a whole stick left of the once fine greenhouses. They lie scattered in every direction. In the house there was also considerable damage. The pictures, mirrors and bric-a-brac fell off the walls and were broken to bits. The home of Superintendent Bildernack, near there, was damaged also. The loss, according to Mr. Bennett's computation, will be over $5,000."

E. E. STEWART, RIVES JUNCTION MICH.

Morris Co., N. J., Gardeners and Florists.

The March meeting of the Morris County Gardeners' and Florists' Society was devoted to carnations, as the March meeting has been carnation night for a number of years. The tables were filled and the quality of the flowers was fully up to last year. Everybody wanted to see the new ones, so we had the hall filled to the doors with members and visitors. A. R. Kennedy read a paper on the subject and as we all know him as an expert grower, we were anxious to hear him and were not disappointed. Report of the judges was as follows:

From A. Roper, Tewksbury, Mass.—Carnation Bay State, in extra fine form, scaled 90 points; certificate of merit. Seedling No. 21 scaled 76 points; honorable mention. Seedling No. 1,000, vote of thanks.

From John E. Haines, Bethlehem, Pa.—Carnation Imperial, Pink Imperial and John E. Haines; brought by A. A. Miller, of Orange, N. J., shown in excellent form, had been previously certificated; vote of thanks.

From James D. Cockcroft, Northport, N. Y.—Carnation Harvard scaled 85 points; certificate of merit.

From John Green, Morristown, N. J.—Red Seedling No. 1, White Seedling No. 2. Shown in good shape, judges would like to see more of them in large quantity.

From W. A. Manda, Orange, N. J.—Seedling No. 20, scaled 80 points; honorable mention.

From Baur & Smith, Indianapolis, Ind.—Carnation May, shown in good condition; honorable mention.

From Dailledouze Bros., Flatbush, N. Y.—Carnation Afterglow, shown in excellent condition; had already received certificate from the society; vote of thanks.

From Dr. L. D. Ward, A. R. Kennedy, grower.—White Lawson and Victory, shown in excellent condition, cultural certificate.

From R. M. Schultz.—Carnation Enchantress in good shape; vote of thanks.

From Dr. McAlpin, J. Downing gardener.—One vase carnation Winsor and one vase mixed, in good condition; vote of thanks.

From John R. Mitchell.—One vase Rose Pink Enchantress and one vase Winsor, in excellent condition; cultural certificate.

From Florham Farms, A. Herrington, Supt.—Four vases carnations in four varieties: Beacon, Robt. Craig, White Perfection and Enchantress, in excellent condition; cultural certificate.

From A. C. Van Gaasbeck, Orange, N. J., John Dervin, gardener.—One vase mixed roses, fine shape; cultural certificate.

From A. R. Whitney, H. B. Vyse, gardener.—Cineraria hybrida, a well grown lot; cultural certificate.

From Mrs. Julius Carlin, H. Entwhistle, gardener.—Primula obconica, specimen plants; cultural certificate.

From Florham Farms, A. Herrington, superintendent.—A lot of Anemone St. Bridgid; vote of thanks. One vase Cattleya Trianiæ, showing exceptionally fine type; cultural certificate. Five vases Stock Queen Alexandra, shown in excellent condition; cultural certificate; three dishes of cauliflower, Dwarf Erfurt; vote of thanks.

Next meeting, April 8, will be rose night. John R. Mitchell, whose abilities as a grower we all know, will read a paper on the subject. We will try for all the new things in the market and members promise to bring from our own vicinity samples of their productions in standard varieties. The city ought to be able to put up a good rose show.

E. R.

STAMFORD, CONN.—A. Hans has accepted the position of superintendent at the Hodenpyle estate, Locust Valley. Mr. Hans takes charge April 1.

GERANIUMS.

Notice to Florists

THE FRUIT AUCTION COMPANY, New York City, beginning this spring, will inaugurate daily Auction Sales at Wholesale of Plants, etc.

Exceptional facilities provided in our new building, centrally located at **200, 202** and **204 Franklin Street** (corner Washington Street).

Date of initial sale **Wednesday, April 1, 1908,** at eight o'clock in the morning. Sales daily thereafter at same hour until further notice. For terms and all other detailed information address:

THE FRUIT AUCTION CO.

P. O. Box 640, NEW YORK CITY.

Correspondence and personal interviews cordially invited. **Payments will be made to sellers of plants the day following sale.**

The movement to sell Plants by Auction at Wholesale has the support and commendation of Leading Growers and Importers.

MILWAUKEE, WIS.—The annual show of tulips and other bulbous stock is now on at Mitchell park, many thousands of fine flowers being shown in the east conservatory.

CROMWELL, CONN.—A. N. Pierson has interested himself in a large orphanage for homeless Swedish children. It was through Mr. Pierson's generosity that it was started.

RIVERSIDE, CAL.—Chas. Howard, of Pasadena, has bought five acres of land north of town and will devote them to roses. He will also build a greenhouse and a residence on the property.

JANESVILLE, WIS.—Dr. C. G. Dwight has completed his plans for his three immense greenhouses, which will be built immediately. Thirty thousand square feet of glass will be used in the structures. This glass will be shipped in one car lot and will be one of the largest shipments ever received in the city. His heating plant will be double the capacity of the three houses, which will be 27x 261 feet. It will take over 10,000 feet of 1¼-inch piping for heating. The structures of the three houses will be of iron and steel and the whole equipment of modern and approved type.

SPRINGFIELD, O.—The committee on general improvements reported to the city council at its session, March 10, that it has agreed to accept the proposition of the Florists' Club to furnish the esplanade with flowers for a period of five years, but that it desired to wait until such time as the expert, now being employed by the commercial club in the matter of mapping out the city as to beautifying it, should return his report. This, the committee thought would be in a few days, and it was moved to accept the Florists' Club's agreement before April 1. It was decided to have the Florists' Club meet with the general improvement committee.

Vaughan's Seed Store Chicago and New York

Dallas, Tex.

The cut flower business in this part of the country has been beyond expectation.

The Green Floral Nursery Co. has about 200,000 square feet of glass and this is the first season the company has grown roses and carnations to any extent. It has been the impression here that roses could not be grown to compete with the flowers grown in the north, but Alex. Miller, manager of the above company, has demonstrated the fact that as good roses can be grown here as anywhere in the country. His American Beauty, Bride and Bridesmaid have been exceptionally fine. Through a lack of boiler capacity he was handicapped with his carnations; he grows about 75,000 and is cutting from 5,000 to 8,000 per day. The company has a large wholesale store at 221 Commerce street, where all the cut flowers from the greenhouses are handled; up to the beginning of Lent carnations and roses were short though since then there has been a little surplus of carnations and to remove this on March 7 the company made a deal with one of the large department stores which took 20,000 and wanted more.

Davenport, Ia.

The Tri-City Florists' Club held its annual meeting March 5 at the residence and greenhouses of Harry Bills on North Brown street, a good attendance being a feature of the meeting. Officers for the ensuing year were elected as follows:

William Knees, Moline, Ill., president; Harry Bills, vice-president for Davenport; H. Gaethje, vice-president for Rock Island; Peter Baker, vice-president for Moline; J. T. Temple, Davenport, secretary; Theodore Ewoldt, financial secretary; C. O. E. Boehm, treasurer.

It was decided to hold the annual banquet of the club on the evening of March 19 at the Rock Island Turner hall. The discussion was, "What Are the Best Pot Plants for Spring Sale?" Some fine refreshments were served by the host. The guests went through the greenhouses, inspecting his stock, upon which they commented very favorably, finding everything in good condition.

We make a specialty of importing every year an immense choice stock of this so well favored Easter plant.

Azalea Indica. We make a specialty of importing every year an immense stock of the choicest varieties popular in America, grown under contract for us by an Azalea specialist in Ghent, Belgium. If you need Azaleas, don't look around in vain all over the country for bargains, but come or write direct to us. We will be able to supply you with the best obtainable in the American market; full of buds; in good, healthy condition, right for Easter; all planted in October or November in 6 to 7 in. pots.

☞ **Take Notice.** We do not sell Azaleas in the fall, having the best picked out (and having the rubbish left for Easter), but we keep them all full of buds for our customers for Easter. Mme. Van der Cruyssen (2,500 of them), this is the best double pink variety known to the market, round as an apple, covered with buds; Simon Mardner (dbl. pink), Vervæneana (variegated dbl. rose), Bernard Andreas Alba (dbl. white), Niobe (dbl. white), Deutsche Perle (dbl. white), Empress of India (dbl. variegated), Professor Wolters, and about six more varieties. Price: 6-7-in. pots, 60c, 75c, $1.00, $1.25, $1.50, $1.75 to $2.00 each.

Come on! Mail your orders direct to headquarters. Our reputation over the entire country, from the Atlantic to the Pacific, in growing Easter plants for the wholesale market, for the last fifteen years, ought to be sufficient guarantee as to the truth of what we say and advertise. Be wise. Never mind about that nonsense—hard times talk! ☞ Look for a big Easter trade, which is sure to come. ☞ Secure your orders in time while we have plenty of stock. All our houses are full to their utmost capacity with the choicest plants in bud and bloom, just right for Easter or earlier if wanted.

Araucarias Robusta Compacta and **Glauca**, a perfect marvel and wonder of nature. We are one of the heaviest importers and cultivators of this beautiful decorative plant. Our plants are about the same in height as in width.

Robusta Compacta, 7-in. pots, specimen plants, 6-year-old, 5 tiers, 27 to 30 in. high, $2.00 to $2.50 each.

Excelsa Glauca, specimen 7-in. pots, 6-year-old (the fine bluish-green color makes or gives this variety a fine, striking appearance—sells at sight), 30 to 40 in. high, 4, 5 and 6 tiers, $1.50, $1.75, $2.00, $2.50 to $3.00 each.

Araucaria Excelsa, 6-in. pots, 4 to 5 years old, 20 to 25 in. high, 4,5 and 6 tiers. 75c to $1.00 each; 5¼-in. pots, 3 years old, 3 to 4 tiers, 7, 8, 10 to 14 in. high, 40c to 50c each.

Choice Nephrolepis, all pot-grown.

Boston Ferns, 8-in., as big as a washtub. $1.25 to $1,50 each; 7-in., $1.00; 6-in., 50c; 5 to 5½-in., 35c to 40c.

Scottii Ferns, 7-in., $1.00 to $1.25; 6-in., 50c; 5½-in., 40c.

Whitmani Ferns, 8-in., $1.50; 6-in., 50c; 4-in., 25c.

Neph. Amerpohli, the new lace fern, 5¼-in. pots, 50c to 60c.

Ferns for Dishes, 3-in., large, 7c,

Primula Obconica, 5¼-in., in bloom, $2.00 to $2.50 per doz.

Hyacinths, raised from first-class bulbs of our own importation. These hyacinths cannot be compared with the ordinary stock raised from cheap bulbs flooding the market. King of the Blues (dark). Grand Maitre (lavender blue), Gertrude (pink), La Grandesse (white), 4-in. pots, $12.00 per 100.

Tournesol Tulips, red and yellow variegated. This is the best selling double tulip on the market; it will stay in bloom and in good condition for ten days. Price: 3 bulbs planted in 4-in pot, $1.50 per doz. pots, or $12.00 per 100.

Our immense stock of choice Easter plants, blooming Easter week or earlier if desired, are now ready for immediate shipment.

Double Von Sion Daffodils, the best selling double yellow narcissus on the market; sells at sight; 3 double nosed bulbs planted in one pot. 5, 5½ to 6-in. pots, $2.00 to $2.50 per doz. pots.

Ipomea Noctiflora, or pure white Moonflower, very fragrant, and big as a saucer. On this variety we have a world-wide reputation as a grower and shipper for the last twenty years. Price; 2½-in. pots, $5.00 per 100.

Ficus Elastica or **Rubber Plant**, home grown and Belgium stock, 5, 5½, 6 and 7 in. pots, 30c, 35c, 50c, 60c and 75c each.

Begonia Improved Erfordii, 4-in. pots, very large, $2.00 per doz.; 5¼-in., in bloom and bud, 25c each, or $3.00 per doz. **Begonia Flambeau**, 5½-in. pots, sells on sight, 25c.

Cyclamen Grandiflora, 4-in., in bud and bloom, 20c.

Hydrangea Otaksa, 6 to 7 in pots, in bud, 35c, 50c, 75c and $1.00 each; right for Easter.

Spirea Gladstone. 6 to 7-in. pots, large stock, right for Easter, in bud now, 50c to 75c.

Dracena Bruanti, from Belgium, full of green foliage from bottom to top, 6-in. pots, 22 to 25 in. high, 40c each

Cineraria Hyb., 5-in., 20c each; 6-in., $3.00, $4 00 to $5.00 per doz.

Kentia Belmoreana and **Forsteriana**, Belgium and home-grown stock, 4-in. pots, 18 to 20 in. high, 35c; 5¼, 5½ and 6 in. pots, bushy plants, 50c, 60c and 75c each.

Latania Borbonica, 5-in., 30c.

EASTER LILIES. Japan Multiflorum. of our own importation, raised from special 10-in. bulbs, 6-in. pots, right for Easter. This year I can say we have the finest lot we ever had. Have about 5,000 to offer. Please send your order in time this year, as we have such a big demand every year for Lilies that some cannot be supplied. They are 13 to 40 inches in height, and we can meet all wants if ordered before supply runs out. Prices as usual. Plants above 5 buds, 10c; plants under 5 buds, 12c per bud. (Medium height).

Have **Azaleas** White Deutsche Perle and Vervæneana now in bloom if wanted. 60c, 75c to $1.00 each.

We Print No Catalogue. These are our lowest prices to all. Strictly no preferences. Complaints will be investigated.

Cash with order, please. To save express charges, please mention if in or out of pots.

GODFREY ASCHMANN, **1012 West Ontario Street,** **Philadelphia**
Importer, Wholesale Grower and Shipper of Pot Plants.

OMAHA, NEB.—Frank Sahan, florist at the city parks, died suddenly March 13.

WESTPORT, CONN.—Niel Jacobson, who has been employed as foreman the past few years at E. J. Taylor's greenhouses, has resigned.

JACKSONVILLE, FLA.—The Times-Union has an interesting illustrated article on the fine plant of Mills, the Florist, showing views of his greenhouses and residence.

WILKESBARRE, PA.—Announcement has been made that W. M. Eldridge & Co., who have been in business here for the past 25 years, will, on April 1, discontinue business. Eldridge & Co. have been recognized among the leading florists of northeastern Pennsylvania and their retirement is greatly regretted. The entire stock and fixtures will be sold before April 1.

NEW HAVEN, CONN.—Egbert Thrall, of 106 Willard street, a landscape gardener employed by the Elm City Nursery Co., was found lying unconscious near the railroad tracks at Stony Creek, March 6, as a result of a fall over an embankment. The engineer of the Shore Line express saw Thrall near the tracks and thought he had been hit by a train. When picked up it was found that his injuries consisted of a few cuts on the face and head. After his cuts were dressed at the hospital Mr. Thrall went to his home.

HOLLYWOOD, CAL.—A flower show with a gorgeous floral parade and a tournament in which society horsemen and horsewomen will strive for honors, the period of festivity to wind up with a ball, is planned by the woman's club in conjunction with the Hollywood club, composed of the leading men of the city, to be held April 30, May 1-2. This festival of flowers will be the crowning effort of the year on the part of this public-spirited organization of women, to whose efforts in the last three years the city owes its library, the cleaning-up and beautification of the city accomplished on Arbor day and other public benefits.

Boiler Capacity.

ED. AMERICAN FLORIST:—

What size of boiler will be sufficient to heat a commercial greenhouse plant which covers 35,000 square feet of ground, (1) by hot water and (2) by steam? B. H. I.

The size of the boiler should be about the same, whether steam or hot water is used for heating, but nearly twice as much radiating surface should be used with water as for steam.

The size of the boiler will depend a good deal upon the temperature desired, as well as on the outside temperature, while the amount of glass in the walls and gables should be considered. Under average conditions a 100-h. p. boiler would answer, but for a high temperature in a cold climate, it will be safer to have one rated at 120 h. p., or more if the walls have much exposed glass.

L. R. T.

Greenhouse Heating.

ED. AMERICAN FLORIST:—

I have a small greenhouse 16x38 feet, heated with hot water, three lines of 3-inch pipe under outside benches, no pipe under middle bench. Ideal heater rated at 1,000 feet of glass. Will piping be sufficient and how much would I make out of it per week or month, doing all the work myself, or is there any other way I could make more out of it? I intend to wholesale lily of the valley. Competition at retail is very keen.

E. A. S.

If the three pipes extend entirely around the house they should keep up a temperature of about 60°. Just how much could be made from the house will depend upon the skill used in growing the crop, and what is the best crop will depend largely upon the location.

L. R. T.

NORWOOD, R. I.—The office and heating plant of the Norwood Floral Co.'s greenhouses were completely destroyed by fire March 3. The loss on the building alone is stated to be about $1,000, and in the aggregate will probably reach $5,000.

Paper Birch and Its Uses.

The paper birch is a tree whose importance in the lumber and wood-working industries is often not fully appreciated. In comparison with such trees as the southern pine, Douglas fir, and other conifers, or even with the principal hardwoods, such as oak and ash, its total annual cut is very small indeed. Probably there are some people who do not realize that it is used at all except for fuel, birch bark canoes, baskets, and other similar useful and ornamental articles. It is, however, an exceedingly important wood in a number of wood-working industries, and there are certain articles for the manufacture of which no satisfactory substitute has yet been found, the most important of these being the spool industry. Practically every spool used in this country is made from this species. In the neighborhood of 20,000,000 feet of it, board measure, are cut every year for this purpose, and of this about 4,000,000 feet are shipped to England in the form of spool bars for use over there.

Another industry which uses nothing but paper birch is that of the manufacture of shoe pegs and shoe shanks. These are used quite largely in this country in making the cheaper grades of shoes; they are also exported to quite an extent to foreign countries, principally to Germany and Japan. The industry does not consume so much wood as the spool industry, but it is nevertheless an important one in the northeast and helps to make inroads into the forest. The toothpick is still another article for which the paper birch is used almost exclusively. Perhaps it may seem to some that so small an article as the toothpick can not consume very much wood. In comparison with many other things, this is relatively true of course; yet a single mill in Maine uses 2,000 cords of birch every year for this purpose alone. Quite recently shipments of toothpicks to England, France, and Germany, have begun to be made, and this is now an important part of the industry.

The dowel and novelty mills also use paper birch very largely in their work, although many of these also use other hardwoods to a limited extent. The bobbin and shuttle manufacturers may also be included in this same class, which altogether consumes nearly as much paper birch as the spool industry. A very interesting peculiarity of these industries, is that they not only confine themselves to paper birch, but that they are also limited almost entirely to a very small section of the country, Maine and eastern New Hampshire. Although paper birch is one of the few North American trees with a transcontinental range, being found from Newfoundland and Labrador on the east to Alaska on the west, it occurs in the United States only along the northern border, and is most abundant and most accessible in the extreme northeast. This is due to the fact that the birch readily takes possession of land that has been burnt over, and the great Miramichi fire in 1825, together with other similar fires of about that same period, gave it a chance to obtain quite a foothold there.

Unfortunately the paper birch is a short-lived tree and becomes red-hearted quite early in life, so that many of these stands are now over-mature, and ought to be cut. The decreasing supply is beginning to make itself felt, and care in its use must be practised if the wood-working industries now dependent upon it are to continue.

Indianapolis.

BUSINESS SATISFACTORY.

Business for the last two weeks has been very satisfactory; violets especially were in good demand. Sales of Crimson Rambler and American Beauty bushes by dry goods houses and street merchants are among the signs of spring; the American Beauty is always labeled "the celebrated New Castle stock," but generally does not look its part.

STATE FLORISTS' ASSOCIATION.

The March meeting of the State Florists' Association was well attended. Of the flowers and plants exhibited, the judges reported as follows:

Poehlmann Bros. Co., Morton Grove, Ill., honorable mention for Mrs. Potter Palmer rose.

H. W. Reiman, honorable mention for pink carnation seedling, also orchid flowered cyclamens.

R. Witterstaetter, Cincinnati, O., special mention for Afterglow.

The new white carnation, Shasta, of Baur & Smith, scored 85 points. Further exhibits attracting much attention were a vase of Bauer & Smith's seedlings and a vase of their fine shell-pink May; also a vase of Winona from F. Dorner & Sons Co., a beautiful pink, with excellent stem.

NOTES.

Smith & Young Co. will make a number of improvements at their Cumberland plant, including an extensive drainage system, planting of a couple of acres of spruce for Christmas trees and a propagating house.

John Hartje has closed a deal for 10 acres four miles south from city, and is making preparations to erect a modern range of glass for general stock and carnations.

The meeting of the Florists' Club held at F. Hukriede's place was, as usual, a great success; the attendance was very large, in fact, only a few were missing.

H. Wiegand, of Wiegand & Sons, is justly proud of his orchid section. G. Wiegand is on his way home from California.

Bertermanns are planning an addition to their Cumberland place.

John Elsner has bought a number of Evans ventilator machines.

F. Conway continues to cut fine callas in great numbers.

Visitors: F. Dorner, Jr., Lafayette, E. G. Hill, Richmond; H. Stuart, Anderson; J. Evans, Richmond; S. S. Skidelsky, Philadelphia, Pa.

LOUISIANA RED CYPRESS

Says Bobbink & Atkins, of Rutherford, N. J., "Lasts with us from two to three years longer than any other wood for table purposes, and its life seems to be endless when used in ordinary greenhouse construction. We use cypress solely in our Plant Tub Department and manufacture tubs of all sizes, from the smallest to the largest, of cypress."

It Is Best for Greenhouse Building.

It is the only wood that successfully withstands the almost intolerable alternate wet and dry conditions incident to this work.

It Is the Most Durable Wood Known.

Ask about it at your local lumber yard or write

LOUISIANA RED CYPRESS CO.

Hibernia Building, NEW ORLEANS, LA.

Decay in Wood Prevented.

It is estimated that a fence post, which under ordinary circumstances will last for perhaps two years, will, if given preservative treatment costing about 10 cents, last 18 years. The service of other timbers can be doubled and often trebled by inexpensive preservative treatment. Today, when the cost of wood is a big item to everyone, this is a fact which should be carefully considered.

It is estimated that 150,000 acres are required each year to grow timber for the anthracite coal mines alone. The average life of an untreated mine prop is not more than three years. By proper preservative treatment it can be prolonged by many times this figure. Telephone and telegraph poles, which in 10 or 12 years, or even less, decay so badly at the ground line that they have to be removed, can, by a simple treatment of their butts, be made to last 20 or 25 years. Sap shingles, which are almost valueless in their natural state, can easily be treated and made to outlast even painted shingles of the most decay-resistant woods. Thousands of dollars are lost every year by the so-called "bluing" of freshly sawed sapwood lumber. This can be prevented by proper treatment, and at a cost so small as to put it within the reach of the smallest operator.

In the south the cheap and abundant loblolly pine, one of the easiest of all woods to treat, can by proper preparation be made to take the place of the high-grade longleaf pine for many purposes. Black and tupelo gums and other little-used woods have a new and increasing importance because of the possibility of preserving them from decay at small cost. In the northeastern and lake states are tamarack, hemlock, beech, birch, and maple, and the red and black oaks, all of which by proper treatment may help to replace the fast-diminishing white oak and cedar. In the states of the Mississippi valley the pressing fence-post problem may be greatly relieved by treating such species as cotton-wood, willow, and hackberry.

Circular 139 of the forest service, "A Primer of Wood Preservation," tells in simple terms what decay is and how it can be retarded, describes briefly certain preservatives and processes, gives examples of the saving in dollars and cents, and tells what wood preservation can do in the future. The circular can be had free upon application to the Forester, Forest Service, Washington, D. C.

Heating Greenhouses.

ED. AMERICAN FLORIST:—

In making changes in the plant, we are going to use a carnation house for roses. The house is 21 by 80 feet. At present we have 18 2-inch pipes to heat the building and these run nearly the full length of the house. How many more pipes will we require to get a night temperature of 60°? The thermometer here often runs down to 20 below zero. How do you figure on heating a greenhouse? Is it the number of square feet of glass or the cubic contents of the structure?

S. & P.

So much depends upon the arrangement of the piping and the location and efficiency of the boiler, that it is difficult to give a very definite answer to questions like the above. Under fair conditions it would seem that there is enough piping for a temperature of 55°, unless the house is considerably exposed to sweeping winds. In that case only three more pipes would be required to furnish 60°, but if only 50° can be kept up, about six additional pipes will be required, of which two should be flows and four returns. In determining the radiation, the number of square feet of glass is considered, rather than the cubic contents of the house, although if there is anything that will affect the heating of the house it should be taken into account.

L. R. T.

Greenhouse Building.

THE NATIONAL FLOWER SHOW.

CHICAGO, November 6-15, 1908.

Wm. F. Kasting, Buffalo, N. Y., is chairman of the general committee in charge. Chairmen of sub-committees follow:

EXECUTIVE AND FINANCE—Wm. F. Kasting, Buffalo, N. Y.
AMERICAN EXHIBITS—Ph. Breitmeyer, Detroit.
FOREIGN EXHIBITS—E. G. Hill, Richmond, Ind.
PREMIUM LIST—W. N. Rudd, Morgan Park, Ill.
ADVERTISING AND PUBLICITY—J. H. Burdett, 1411 First Nat'l Bank Bldg., Chicago.
LOCAL MANAGEMENT, PRIVILEGES AND CONCESSIONS—J. C. Vaughan, Chicago.
SPECIAL FEATURES—Otto G. Koenig, 6471 Florisant Ave., St. Louis, Mo.
RECEPTION—Aug. Poehlmann, Morton Grove, Ill.
AUDITING—J. A. Valentine, Denver, Colo.
TREASURER—I. C. Bertermann, Indianapolis, Ind.

The above chairmen have power to select their various committees from the general committee of 50 or the members of the S. A. F. at large.

Legend of the Moss Rose.

The angel of the flowers one day
Beneath a Rose bush sleeping lay,
That spirit to whose charge is given
To bathe young buds in dews from heaven.
Awakening from his light repose
The angel whispered to the Rose:
"O fondest object of my care,
Still fairest found where all are fair,
For the sweet shade thou'st given me,
Ask what thou wilt—'tis granted thee."
"Then," said the Rose with deepening glow,
"On me another grace bestow."
The spirit paused in silent thought—
What grace was there that flower had not?
'Twas but a moment—o'er the Rose
A veil of moss the angel throws;
And robed in nature's simple weed,
Could there a flower that Rose exceed?

American Rose Society.

NINTH ANNUAL MEETING, CHICAGO, MARCH 25-27.

A Fine Exhibition.

A most pleasing feature of the splendid convention and exhibition of the American Rose Society now in progress at the Art Institute, Chicago, is the pleasant meeting of eastern and western growers. The growers of the east have come out nobly with their splendid flowers, and these, with the wealth of flowers from Chicago and the middle west, have made up an exhibition worthy of the best traditions of the American Rose Society. "It is the grandest show of cut roses ever seen," one well known exhibitor remarked, and his opinion seemed to be that of a great many more. Very beautiful the hall looks at the time we are going to press; the lovely groups of various roses of the rambler and similar classes, the immense vases of American Beauty, Richmond, Killarney and other popular sorts take on an added beauty owing to their suroundings of fine carving and statuary in the hall, while viewed from above the show is exceedingly bright in its artistic surroundings. The display of pot roses, outside the rambler classes, was disappointing and it is much to be regretted that the class for which Philip Breitmeyer and Arthur Boddington offered such liberal prizes was not filled. The collections of roses were extremely interesting and there were many rose species not often seen.

We were much interested in the fine exhibit of Newport Fairy, the lovely single polyantha or rambler rose exhibited by Julius Roehrs Co., Rutherford, N. J. Plants in various sized tubs were shown, some of them from field grown plants, others plants that had been kept in pots, and both appeared to have stood the forcing equally well. The plants were literally covered in flower, the small bottom shoots even being crowned with a cluster. The color when first open is of a very deep rosy pink, becoming paler with age, and it is difficult to say which is the most beautiful. The illustration of this lovely rose sent out by the firm is by no means overdrawn; it is a truly beautiful variety, its excellent foliage being not the least of its merits.

The group of rambler and other roses in pots put up by Vaughan's Greenhouses, Western Springs, were excellent. In place of the flat, heavy and crowded groups sometimes seen, sloping back from front to rear, this was broken in outline, relieved by neat light standards and taller plants, the front being finished with tiny plants of White Baby Rambler and similar very dwarf varieties. Among the more prominent varieties we noted Tausendschon, a lovely pink flower, shading to nearly pure white in the center. There were tall and medium standards of the now well known Dorothy Perkins. Philadelphia Rambler, with its very double, red, daisy-like flowers, is worth noting, though the color is a little dull. Hiawatha and La Fiamme are two lovely single ramblers or polyanthas most delightful in their delicacy of shading. The former is the darker of the two and both are extremely free flowering. Lady Gay and Sweetheart are two beautiful things and these are only a few of the best of the 30 varieties in this excellent group.

In the cut flowers, perhaps the most noticeable exhibits are the grand vases of Killarney from the east. W. H. Elliott, of Brighton, Mass., has certainly the finest Killarney ever shown in the west and these grand flowers were cut and packed on Sunday and opened here on Wednesday, three days in the boxes. But they made a grand showing, the flowers being simply immense and, beyond being slightly open, showed absolutely no signs of their long journey. The color, so well displayed by this grand variety when partly open, is perfect and the stems and foliage could not be better. These grand flowers are shown in the class for 50 and for 100 blooms and were certainly an eye-opener. This noted grower also shows, among other varieties, a pretty vase of Safrano, reminding one of old times.

W. A. Manda, South Orange, N. J., has an interesting exhibit of the Cherokee rose, R. Sinica or lævigata. The pure white petals of this fine single rose are most beautiful and well set off by the yellow center stamens and the grand, deep green foliage. Mr. Manda says he has this fine rose in good condition in his greenhouses, where it makes a very pretty show, and we can quite believe it.

The old green rose is also exhibited, but this is not by any means showy, simply a botanical curiosity. A vase of a promising looking bright pink seedling carnation, No. 20, is also included.

The 25 vases shown by the E. G. Hill Co., Richmond, Ind., consist of many fine varieties and are very interesting. Rhea Reid takes a prominent position and there are several promising seedlings. Franz Deegan is not often seen, the flowers being of a deep yellow that is very attractive. Betty, a very pale pink or rose suffused with coppery yellow, looks well, and another handsome globular pale rose variety is seen in Pharisaer. Phyllis is a pretty red polyantha, and Countess of Gosford and Mlle. Simon Beaumerz (white) are worthy of note.

Grand exhibits of American Beauty are among the prominent features of the Chicago growers. The Poehlmann Bros. Co. has excellent flowers and the same may be said of Bassett & Washburn, Weitor Bros., Peter Reinberg and others. Geo. Reinberg's exhibit of Bride, Bridesmaid and Kate Moulton was very fine and this noted grower has some of the grandest Richmond ever seen here. The flowers are of the richest color and the foliage is deep, almost black green, the stems stiff and perfect in every way. Cardinal, shown in the Dorrance cup class by Poehlmann Bros., is also grand and perhaps the finest of Peter Reinberg's exhibits are the grand flowers of Uncle John and Ivory.

Wm. P. Craig, Philadelphia, shows two vases of Mrs. Jardine in good order, and among other novelties shown are Alice Roosevelt and Wyndmoor. Several important consignments of flowers had not arrived at the time of writing, owing to delay on the railroad. The Florex Gardens, North Wales, Pa., and Weiland & Olinger, New Castle, Ind., were among the names we heard mentioned as having suffered in this respect.

The Annual Meeting.

The annual meeting was called to order by President Simpson in Fullerton hall of the Art Institute at 8 p. m., March 25, with a good representative attendance.

President's Address.

Fellow members of the American Rose Society: Another year has rolled around and we again meet in our annual convention to look and talk over the work of the year that is past, and to plan the policy and work of the society in the future. Last year we met in the capital of our country and many of us felt honored by having the privilege of taking the hand of the president of the United States in ours and receiving his kindly greeting and good wishes for ourselves, and noting his appreciation of the work being done by the American Rose Society and many of the individual members. It was said by many of our members that the Washington meeting was in many respects more enthusiastic, and gave promise of larger permanent results than any of its predecessors.

This year, through the generous invitation of the Chicago Florists' Club, the American Rose Society plants its banner in the city of Chicago, the great and magic city of the west, where more roses are produced under glass, and distributed over a larger area, than perhaps can be said of any other center in the country, not even excepting New York. It seems, therefore, eminently fitting that this society should honor this city and this rose growing center by holding its exhibition and convention here this year. Many of you have seen the splendid exhibitions given in the city of Chicago in the past and have felt certain that the rose exhibition this year would be a distinct advance over anything hitherto attempted or seen in this city of big things.

I wish most heartily to express my appreciation of the work done by the Chicago Florists' Club and the rose show committee appointed by the club to secure special premiums and arrange the many details incident to an undertaking of this kind. When we remember that the local florists have on their hands and minds the National Flower Show to be given here next November, and that they will have to give much of their time and means to put it through in a manner befitting the occasion and the scope of the undertaking, we are constrained to take off our hats to the men who have secured such an array of special premiums as our list shows, and have made possible such a splendid exhibition as that we have seen today.

August Poehlmann.

Chairman Executive Committee American Rose Society.

The meeting of our society here in this western center, for the first time in its history is a good augury for the future of the society, I am very sure. We shall miss a good many faces here that have become familiar through meeting them so frequently at the annual gatherings in the east, but we are to make new friends that will join with the old in making this society a tower of strength, and make it truly national in scope and character, as well as in name.

In seeking to make recruits to our organization one frequently hears the remark, "What is the use of having so many societies anyway, and what benefit would it be to me if I should join the American Rose Society?" The only answer that I can give is, "That practically every grower of repute who has had his attention called to the aims and purposes of this organization has become a member of it, and if we give the matter a very little thought we will find that, with a very few exceptions, the men who hold aloof are back numbers in the trade. You will find that the brainiest and most progressive men in the business today are members of the rose, the carnation, the chrysanthemum, or some other society devoted to their specialty. An orchid society is now being projected as a necessary adjunct to the orchid business. Read the printed matter on the back of the American Rose Society's letter paper and you will find its aim is "To increase the general interest in the cultivation and to improve the standard of excellence of the rose for all the people. To foster, stimulate and increase the production in every possible way of improved varieties of the rose suitable to our American climate and requirements." A very noble aim this surely, and one that should naturally tend to the benefit of every man engaged in the growing or selling of roses for a living. The annual exhibitions, affording as they do to raisers of new roses the very best opportunity of getting their novelties before a critical tribunal, and the opportunity offered the searchers for novelties to see these and judge of their merit is a very important feature of the work of such societies, and the man who follows up these exhibitions and has the judgment to discern the good and bad points of both new and old varieties, and will gauge his planting accordingly, discarding the varieties that have become old and common and giving space to newer sorts of undoubted merit, is the man who will have money to build more greenhouses and buy automobiles.

Very few of the visitors to the Washington or Boston exhibitions returned home without receiving inspiration to strive for a higher grade of flowers as the product of his skill, with the feeling of satisfaction with his calling, and with a determination to add dignity to it, and to make his business stand for something in the community.

The American Rose Society certainly claims a share in the good work of making conditions more favorable for the rose grower of today. What has been done up to the present, however, is as nothing compared to the work that lies before it when, with increased membership and available funds, it is in a position to disseminate knowledge that will enable lovers of the rose, and that includes practically every citizen of this country, to plant varieties, and cultivate them in such a way as to give joy and satisfaction to the planter. There will then be sold by the nurseryman and florist for outdoor planting more roses than we can at present conceive of, and the prophecy will be fulfilled, "The desert place shall rejoice and blossom as the rose."

More has been done during the term of our present secretary to put the society upon a sound and permanent basis, and to present its claims and benefits to the florists of the entire country, and to many who do not grow roses for a living than most of you are aware of; the volume of correspondence and the amount of clerical work done would stagger most of us, if it should be put upon us, and he certainly deserves the thanks of every member of this body for his painstaking work, done entirely for love of the good cause, and refusing any pecuniary compensation therefor.

During the past year the expenses have been out of proportion to the income, the officers having advanced money to meet obligations and carry on the work, trusting to the receipts of this meeting to balance accounts; failing in this I suggest that a few friends of the society meet here in Chicago, and together lift the treasury out of its awkward predicament. Certificates for new varieties authorized at our last meeting and life membership certificates, have been provided at considerable expense, but we think to the credit of the society.

A resolution was favorably received at the Washington meeting requesting the executive committee to consider the proposition of establishing a Rose Journal. This matter has received considerable thought and discussion during the year at the hands of the committee, and the secretary was authorized to go ahead and issue a prospectus, which has been sent out broadcast and has been commented on very favorably. The secretary will present to you a fuller report on this proposition; I would ask for it your care-

AMERICAN ROSE SOCIETY.

Poehlmann's Vases of American Beauty at the Chicago Show.

ful and thoughtful consideration. If the members will support it in sufficient numbers it can be put through, otherwise it must be dropped.

A committee was appointed to confer with the Association of American Nurserymen relative to the holding of an exhibition of outdoor roses in June, under the joint auspices of the two organizations. E. G. Hill, as chairman, will report on the work of this committee. Through the good offices of Ex-President Newbold an invitation has been extended to the American Rose Society by the Horticultural Society of New York to hold a June show this year in Bronx Park, New York, the latter society to furnish the money and take care of all the details, and our society to offer certificates, medals, etc., and assist in arranging the schedule. The offer was accepted and the exhibition is assured, but the executive committee of the Rose Society authorized the offering of certificates, bronze and silver medals for new varieties only.

It is the wish and desire of the members of the committee that the nurserymen, and all others who grow outdoor roses extensively will keep this exhibition in mind and arrange to make extensive displays of roses in Bronx Park next June. The educational features of such an exhibition that is free to all should be very great, and as an advertising medium it is not to be despised.

In arranging the programme for this meeting the commercial rose grower has perhaps been brought to the front more than the amateur, which probably is as it should be at the present stage, but it will not do at all I think to allow this society, now or in the future, to drift into a trade organization and have its work restricted to the holding of exhibitions and exploiting of new varieties; that would be praiseworthy work, but it can do that and a great deal more by opening wide its doors, and seeking the co-operation of every man and woman in this broad land who has roses in his heart or in his garden. We should have in our ranks every authority on roses in the country, and the secretary should have a list of these authorities to whom he could refer questions that are too difficult for him to handle.

Finally, gentlemen, let us take a wide outlook, let us be broad in our views, and in our discussions at this meeting; let us be considerate of each others' feelings, remembering that we have but one object in view, the placing of the rose on the pedestal where she rightfully belongs, and the ennobling of our calling and profession.

Secretary's Report.

The secretary first and foremost desires to publicly acknowledge the value of the service rendered by the trade papers, AMERICAN FLORIST, Florists' Exchange, Florists' Review and Horticulture, named in order of their age, for the courteous consideration which one and all have given to matters pertaining to the American Rose Society. It has been the effort of your secretary to get before the public as much publicity as we could, because this society was founded with the idea of its becoming an extensive popular association to spread the love of the beautiful rose among the people.

And another important fact is that the work of co-operation and patronage incumbent upon a national society cannot be done unless the society is provided with revenue and the revenue depends upon its membership. The American Rose Society should be able to patronize local societies by offering its medals freely, but all this takes revenue. The life membership fund gradually increases and this affords a revenue of four per cent on the investment per annum, and the fund is now close to $3,000. our life membership stands at 50, the annual membership paid for the year 1907 was 110, and the associate membership was 10.

The money awarded by the society at its last show reached the sum of $309 for stated premiums, besides the specials.

The bulletin of the annual meeting, which was begun under Secretary W. J. Stewart's term of office, has been continued and 600 copies issued. These books seem to be highly appreciated, secretaries of kindred societies asking for them in various instances. To get out these books nicely is considerable expense, and part of this cost was met by soliciting a half or full page advertisement. Out of 60 letters sent out favorable replies came back.

CERTIFICATES OF MERIT.

At the Washington meeting last March the desirability of issuing a certificate of merit, for new roses which did not reach the score required for such novelties to win a society medal, was discussed and recommended. The executive committee acting upon that recommendation prepared such certificates and issued seven; E. G. Hill Co., Richmond, Ind., Rhea Reid; F. H. Kramer, Washington, D. C., Queen Beatrice; Myers & Samtman, Wyndmoor, Pa., Wyndmoor; M. H. Walsh, Woods Hole, Mass., Paradise, La Fiama, Delight and Juniata. This recognition seemed to please everyone.

Up to last year there had not been any certificate of life membership nor any society seal; a handsome certificate was made, a special seal prepared and adopted and 54 of these life certificates have been issued to persons who have paid the $50, which is the amount that is creating the permanent fund of the society. The certificate was sent to the family of deceased members.

The American Rose Society has been invited to hold a June show in the Botanical Garden in Bronx Park, New York, in connection with the New York Horticultural Society. Ex-President Frederick R. Newbold attended one of the executive committee meetings and formally extended the invitation and the same was duly accepted.

The executive committee held five meetings in New York; these meetings were always attended by some from a distance and such members as were not personally present invariably reported by letter.

Early in the year, Vice-President Philip Breitmeyer of Detroit set the pace for a fine special premium list, seconded by Arthur T. Boddington of New York, which under the fostering care of Messrs. Poehlmann, Asmus and others of Chicago swelled to very satisfactory dimensions.

At the last annual meeting a rose journal was a topic which grew out of the question given by President Simpson, "How to increase the interest and

thus the membership." The secretary assumed the responsibility of issuing a prospectus and mailing the same to all the present membership. The details of the results will be taken up more fully separately.

The record of the year shows that after nine years the American Rose Society lives; it has crossed the Alleghanies. Born on the ocean shore, holding its earliest exhibit in the metropolis of America, going to the garden city of Pennsylvania, then to the scholarly city of Boston, from there to the capital of the nation, welcomed by President Roosevelt, then accepting the cordial invitation from Chicago. Here we are in this imperial city of the west with such a show before our eyes as maketh the heart glad, and our motto is "A rose for every home, a bush for every garden"; and this if carried out means beauty and grace in the homes of all the people.

Treasurer's Report.

The following is the report of Treasurer Harry O. May. In addition to the general account given below seven new life members have joined the society making a total of 55 life members to date.

STATEMENT.

Cash received on gen'l account $1,332.62
Disbursements 1,077.07

To balance on hand.....$ 253.55

The Awards.

The following are the awards as far as these were procurable at the time of going to press.

CUT FLOWERS.

Twenty-five blooms Mme. Chatenay.—Robt. Simpson, Clifton, N. J., first; A. Farenwald, Roslyn, Pa., second.

Twenty-five Richmond.—W. H. Elliott, first.

Twenty-five any other tea or hybrid tea.—W. H. Elliott, first.

Twelve Bride.—W. G. Badgley, Chatham, N. J., first; J. F. Ammann, Edwardsville, Ill., second.

Twelve Killarney.—J. F. Ammann, second.

Twelve Richmond.—J. F. Ammann, first.

Twelve Ivory.—J. F. Ammann, first.

Twelve Uncle John.—J. F. Ammann, second.

SPECIAL PRIZES.

Fifty blooms American Beauty, American Rose Society's prize.—Myers & Samtman, Chestnut Hill, Philadelphia, first.

Display of cut roses, all varieties (the Dorrance Challenge prize), valued at $250, offered by Benjamin Dorrance; the winner to hold the prize a year and on relinquishing it to the society for another competition at the end of that period to receive a silver shield suitably engraved, as a permanent record of his having held the prize. The names of the winners will be engraved consecutively on the prize.—Poehlmann Bros. Co.

Vase of Richmond, 100 blooms, $50 in gold, offered by E. G. Hill Co., Richmond, Ind.—Poehlmann Bros. Co.

For the largest and most varied collection of cut roses of all classes, one or more blooms in vase, the variety to count 65 points, silver cup or $25 in gold, offered by W. A. Manda, South Orange, N. J.—E. G. Hill Co., Richmond, Ind.

One hundred blooms Killarney, prize of $50, offered by Robert Simpson, Clifton, N. J.—W. H. Elliott, Brighton, Mass.

Fifty blooms of Killarney, $25, offered by Dingee & Conard Co., West Grove, Pa.—W. H. Elliott.

Fifty blooms of Bride, $25, offered by Emil Beuttner, Park Ridge, Ill.—Bassett & Washburn, Chicago.

Fifty blooms of Liberty, $25, offered by the John Davis Co., Chicago.—A. Farenwald.

Fifty blooms of Ivory, $25, offered by J. F. Wilcox, Council Bluffs, Ia.—Peter Reinberg, Chicago.

Best 100 blooms of pink roses in the show, any variety.—Poehlmann Bros. Co., Chicago, with Killarney.

Fifty blooms of red roses (Richmond and American Beauty excluded), $25, offered by Poehlmann Bros. Co., Chicago.—E. G. Hill Co., Richmond, Ind.

One hundred blooms of Uncle John, $25, offered by Weitor Bros., Chicago.—Peter Reinberg.

Fifty blooms of American Beauty, $50, offered by the Mogg Coal Co., Chicago.—Myers & Samtman.

One hundred blooms of Mrs. Potter Palmer, $50, offered by S. Freeman & Sons, Chicago.—Poehlmann Bros. Co.

Twenty-five blooms of pink roses not disseminated prior to 1908, silver cup, value $15, offered by J. B. Deamud, Chicago.—Myers & Samtman, with Wyndmoor.

Twenty-five blooms Killarney, $10, offered by Kroeschell Bros. Co., Chicago.—Poehlmann Bros. Co.

Fifty American Beauty, two tons of florists' bone, offered by Darling & Co., Chicago.—Poehlmann Bros. Co.

One hundred American Beauty, silver cup, valued at $100, offered by Crane & Co., Chicago.—Poehlmann Bros. Co.

Twenty-five blooms of Killarney, $10, offered by Holton & Hunkel Co., Milwaukee, Wis.—Poehlmann Bros. Co.

Fifty blooms of a new forcing rose never before exhibited for competition, a silver loving cup, offered by Heller Bros., New Castle, Ind.—Myers & Samtman, with Wyndmoor.

Specimen climber, trained or not, in tub or pot (not less than 12 inch).—Vaughan's Greenhouses, Western Springs, Ill., second.

Two hundred lily of the valley—Poehlmann Bros. Co., first; H. N. Bruns, second.

SOME PROMINENT MEMBERS OF THE AMERICAN ROSE SOCIETY.

Pot Roses for Easter.

BY ROBERT CRAIG, PHILADELPHIA, PA.

It was thought by the officers of the rose society that some notes on this subject would prove useful to beginners in the business, and in accordance with that idea, I give the results of my observation and experience: The principal obstacle in the way of having fine specimen roses at Easter lies in the difficulty of obtaining sufficiently strong plants. In roses of the Crimson Rambler and Wichuraiana types, strong canes can be had by planting out in the open ground in heavy soil, well manured and leaving the plants out at least one winter; when they are left out for two winters they make extra strong plants, with long, strong canes suitable for training into large specimens.

Magna Charta, which is undoubtedly the best of all the hybrid roses as an Easter pot plant, may be treated in like manner; this also applies to Clothilde Soupert, which is deserving of special mention on account of its freedom of bloom, distinct color, and above all, its good keeping qualities; it may be kept, in a cool house, for two weeks in full bloom, which cannot be said of many of the varieties. Among other good Easter hybrids for pots (I know of but few) may be mentioned Mrs. John Laing, Ulrich Brunner, of fine color but a poor keeper; Rodocanachie, Mlle. Gabriel Luizet, General Jacqueminot and Killarney; if sufficiently strong canes of the latter can be had it is one of the most attractive; but these varieties do not make strong plants on their own roots in the open ground, especially in the northern states.

IMPORTED PLANTS.

For such varieties as cannot be obtained from nurserymen in this country, recourse must be had to importing the strongest plants possible from Europe in the fall, preferably from England or Ireland, budded low on manetti. Those from Holland are generally budded too high on the stock to make attractive pot plants. Plants which are packed for shipment should have their roots surrounded by damp moss, and should be exposed to the air as little as posible from the time of lifting until they are potted; many failures result from lack of this precaution. The plants should not be lifted until they have had some frost to thoroughly ripen the wood; in the latitude of Philadelphia this is usually from the middle to the latter part of November. I have never been able to get, however, plants uniformly strong enough to force them the first season after importing; the plants are not graded into sizes and many sent are too small to make suitable plants the first season after importing.

It is our custom to take only the stronger plants and the others are wintered over, as cheaply as possible in cold frames or houses, to be grown in pots the following summer, which treatment greatly benefits them. Crimson Rambler, if carefully handled, will make fine plants the first season from the open ground, but the other varieties will bloom more freely if grown in pots one season. The cost of wintering imported plants in frames is about $50 per 1000, and the cost of growing them through the summer about $50 per 1000 additional, but the improvement in the character of the plants fully justifies the expense, for Easter purposes. Air should be given during the winter whenever the weather is mild enough, and every precaution taken to prevent the tops from growing as long as possible; after the young roots have started they should not be allowed to freeze, as they are thus easily killed; the pots should stand on a dry bottom and be packed in leaves, sawdust, ashes or other suitable material.

The Crimson Rambler has been for many years a very popular Easter plant, but its popularity is waning; it will still be grown, but in smaller quantities than formerly, but fortunately there are a number of climbers that may be grown profitably, and which have the charm of novelty. Among the very best are Lady Gay, Dorothy Perkins, Tausendschon and Hiawatha; the last named is especially charming; although the bloom looks frail, it is a fine keeper, and I look for it to increase in popularity. The new variety, Newport Fairy, will undoubtedly be largely grown when its merits become known. Another very fine one is M. H. Walsh's Juniata, and no doubt there are other hybrids in the Wichuraiana section which I have not had the opportunity of seeing.

FORCING CULTURE.

The culture of pot roses for Easter is very simple, but there are certain rules, as to temperature, airing, and the prevention or destruction of insects, which must be faithfully followed. The soil should be a clay loam enriched with well decomposed stable manure, and I like to add a liberal sprinkling of bone dust and fine sheep manure; the latter gives the foliage a rich dark color. The plants should be carefully and very firmly potted, using a potting stick to pack the soil about the roots. It is well to shade the house either with slats or by whitewashing the glass with whiting and coal oil, and sprinkle frequently with water to keep the wood plump until the young roots start; they should never be allowed to shrivel. Keep the plants for five or six weeks in a night temperature of 40° to 45°; the plants should by this time be well rooted and the temperature may be gradually increased, if necessary, to 60° or 65° at night. When we have a late Easter, as this year, it may be at no time necessary to exceed 60°; the lower the temperature at which they can be flowered in time, the better.

Crimson Rambler and Wichuraiana roses may be trained in various shapes, globular, oval, or in the form of fans, etc., or they may be cut back to about one foot from the pots and grown without any staking. In these severely cut back plants the clusters of flowers will be larger than where more of the wood is retained and the lighter branches allowed to bloom. Use tobacco stems between the pots, to keep down insects, cleaning out and removing about once a month. Give always plenty of air if weather permits; if this is regularly attended to, mildew is not likely to appear, and when the buds are set an occasional watering, say once in two weeks, with manure water is beneficial. Soot water is also excellent to improve the foliage and color of blooms and serves also to destroy worms.

To recapitulate, I should say the principal points to be observed are: Lift carefully, pot promptly and firmly, start at low temperature, always as much air as possible, use tobacco stems between the pots which should have some space between them from the very start.

Proper Size of Commerical Rose Houses.

BY W. H. ELLIOTT, BRIGHTON, MASS.

What is the proper size of a greenhouse to grow roses for commercial purposes? This is the question assigned to me. What I think is really wanted in this case is to know how large one really thinks a greenhouse should be built. My answer will be more on this line: First, I wish to apologize for coming as an eastern man to Chicago to answer a question of this kind, for, if there is anyone who knows how large greenhouses should be, it is the Chicago man. I can, however, give you an answer in very few words. A greenhouse, for commercial purposes, should be as large as a man has money to build. That is, whatever money he is going to in-

AMERICAN ROSE SOCIETY.

Roehrs' Newport Fairy.

GROUP OF OMAHA FLORISTS AT HESS & SWOBODA'S PLACE.

vest in commercial houses might best be put in one house. I would not hesitate to put 150,000 feet under one roof. In fact, one could build a greenhouse to good advantage as long as it can be heated from one central station. One can heat 1,000 feet each way with a gravity system, provided you had fall of 10 feet from the radiating pipes to the water line of the boiler. With a vacuum system I presume they might be carried a great deal further. Just how much I could not say, as I have not used that system.

RIDGE AND FURROW VS. SINGLE ROOF.

The continuous ridge and furrow houses need only be limited by the money to be laid out as the heat could be carried 1,000 feet each way. Much can be said in answer to the question of the advantages of the ridge and furrow houses as compared with the wide single roof. I shall speak in favor of the wide single roof, although I must admit that the well constructed ridge and furrow ranges around Chicago are as fine houses as I would expect to see anywhere and I expect a strong argument in favor of that style from those using them. What influences me most in favor of the single roof is the snow. A roof that will clear itself of snow in midwinter, at a time when the days are short, and prices high, is certainly to be desired. Another advantage to the single house is that it is easier to fill and empty; also that high houses are less expensive to heat. The variation of heat in the day time is not so great. They should be easier ventilated and handled. Larger amount of air space inside the greenhouse has proved to be an advantage rather than the disadvantage most growers supposed it would be. E. Holmes, in his address on "Rose Culture" before the Gardeners' and Florists' Club of Boston, stated as his opinion, that 40 per cent of the improvement in rose growing in the past 20 years was due to the up-to-date greenhouse, and I think he was right. It is one of the facts that we must accept that better stock can be grown in a large greenhouse than in a small one.

WIDTH.

In regard to the width: It is hard to predict how wide greenhouses will be built in the next 25 years. Of course, with the ridge and furrow plan, the width is really unlimited as the ventilation is taken care of as you go along; but how wide do you suppose greenhouses will be built and depend upon a single run of ventilators to ventilate them? We have already seen them built up to 150 feet in width. Unfortunately, this wide house was not well constructed and is not considered a success, but it is really not the width. It is the question of construction. If a house was thoroughly and properly constructed could a house of this size be handled to advantage? I have not seen this wide house during the winter season, and have no idea how the stock is growing. I looked this house over thoroughly at the time of the convention last summer. It seemed to be considered an impracticable house, but the only reason given was its construction.

The question really is, if the house was strong and securely built would a house of that kind grow good stock? I would say that in that house at the time I saw it, was growing as nice a lot of American Beauty as I could find anywhere. If the house will grow the stock, then that is really the vital question. The next question is, can a house of that size be constructed and run as cheaply as a narrower house? There are a good many questions there that would need more knowledge and experience than I have had to answer. I cannot recommend the construction of houses of any such remarkable width. Sixty feet wide, with a pitch of six inches to the foot, I find to be thoroughly satisfactory. I would not hesitate very much to increase that width considerably, but, as soon as I increase that width, I must splice my bars, which I have not done on any of my large houses. Ventilation seems to be good. The air in these large, high houses always seems better than in the small ones. I do not quite understand why we need to ventilate greenhouses except to reduce the heat.

THE QUESTION OF AIR.

Should the air in a greenhouse keep pure and good without being renewed? If not, what is it that spoils it, and should it not be much more serious in houses with much less air space? I think it only fair that I should state what seems to be the most serious drawbacks in the construction of these large houses. In the first place, the unequal expansion of ridge, purlins, plates and sills. It is also a long distance to drive around them with a cartload of soil: leakage is increased if roofs are not kept in the best of repair. There is also great danger from the wind, in houses of this size. The movement of so large a body of air as is contained in these houses strains the glass much more from the inside than in the smaller houses. They need to be built strong and glazed thoroughly. I have made up my mind to double nail the glass at the end of these houses.

COST OF ERECTION.

Horticultural builders charge more to cover the same ground with houses of this kind than they do with a number of smaller houses. They are right in this, for they need stronger and more thorough construction. I do not like the iron frame with heavy rafters for this construction. We must guard carefully against the enlarging of our houses without properly strengthening all parts. My first large houses were weak in the outside walls. Thorough and permanent construction is what is needed, for many reasons—not alone on account of wind and weather, but because this business has grown to be permanent and important enough to have a place of its own and not built up with the idea that it

will some day be torn down and the land used for building purposes. A man building a factory does not have any such idea and our establishment should be just as permanent, or more so, than any factory. A proper location should be selected with great care; then get the best to do with and build so thoroughly that the place can be inherited by your children and grandchildren. The fact that the growing of cut roses as a business was born inside of the last 50 years is no reason to suppose it will die out inside of the same time. While I am wandering away from the question, allow me to impress on you the importance of taking the best of care of your house when built, especially in regard to painting.

Notes.

Grace Hammond, daughter of Secretary Benjamin Hammond, is a successful practicing dentist at Fishkill, N. Y.

Judges Emil Buettner and John Dunlop were ably assisted by Peter Crowe and Alex. Montgomery, Jr.

W. A. Manda was speaking of a green sport of Rosa Wichuraiana he has, the flowers a pure pea green.

Geo. A. Maynadier had many interesting things to say about soil besides those mentioned in his paper.

The eastern growers made a grand showing, notwithstanding the long journey.

The absence of White Killarney was much commented upon early in the day.

Safrano was well shown by Wm. H. Elliott and attracted much attention.

Liberal premiums should be offered for decorative work at these shows.

Roehrs' Newport Fairy was one of the gems of the show.

Philadelphia is on hand with the lion's share of visitors.

Elliott's vase of Killarney was simply superb.

The fair models proved a great attraction.

Killarney appears to be the favorite.

National Association of Gardeners.

A very interesting event, March 19-20, was the meeting and fourth convention of the National Association of Gardeners held at Allairi's hall, New York. Five states were represented, one in the middle west (Wisconsin), Charles Elliott, of Lake Geneva, having been the one selected by the Wisconsin members to represent them. Three meetings were held on Thursday, one at 1 p. m. for the benefit of those who were obliged to leave for their homes. This meeting was conducted by Carl Shaeffer, superintendent of R. Mortimer's extensive country home at Tuxedo Park, N. Y.

Mr. Shaeffer had many words of encouragement and advice to the younger members of the profession and from his vast experience and long service as a private gardener and superintendent no one is better fitted to advise.

At 5 p. m. P. O'Mara made one of his characteristic interesting talks. He said in part: "I personally always feel at home when I am with gardeners. When a boy my work in the greenhouse brought me into constant contact with them. In 1883 I made my first trip among the gardeners of the east. The first place I visited was Inwoods, N. Y. I shall never forget my reception. The pleasant remembrances of my first trip remain indelibly stamped on my mind. I am thoroughly in sympathy with the National Association of Gardeners. I believe it is working along the right lines and bound to succeed.

"I remember another effort to establish a national association of gardeners which was started on a more intricate and a largely more expensive scale, which provided for the payment of a national secretary, with permanent headquarters, the establishing of a library in New York and many other cumbersome features, so cumbersome that the asosciation fell of its own weight. As I said, the policy outlined by the National Association of Gardeners with an organ circulating among the members and voicing their sentiments with an administration economically administered, should be supported by all gardeners and commercial growers of all classes and no doubt will be.

"Horticulture is an ideal vocation and when the spirit of trade creeps into associations and other bodies the real object of such bodies becomes to a certain extent imbued with that spirit and for that reason, as I have already stated, it is my firm conviction that nearly every branch of horticulture, if not all branches of it, must look to the private gardener and the employers of the private gardeners for all that is highest along horticultural lines. Many men in the trade love horticulture for itself and would probably have chosen that calling because of its closeness to nature and their love of the same notwithstanding the fact that their financial success might and no doubt would have been greater in other fields; still the spirit of selfishness is bound to creep in to such a degree that it is liable to hinder the progress and on the other hand an association must be conducted along business lines to some degree or it will cease to exist." Mr. O'Mara spoke for nearly 30 minutes and those that did not hear him certainly missed a rare treat.

THE DINNER.

At 8:30 p. m. the dinner was served. Every one was in good spirits; in fact, the writer remembers no dinner where a more friendly feeling existed. Among the visitors, those present were: Prof. Geo. T. Powell, P. O'Mara, G. W. C. Tuthill, Geo. Tunnigon, W. L. Rementer, Fred Atkins, Harry Bunyard and others. Although many of the gardeners were obliged to leave before the dinner all seats at the table were filled but three.

At the close of the dinner Prof. Powell made the principal address of the evening, his subject being the planting and handling of the orchard. There was so much that is new and instinctive that to attempt to touch on it even lightly in this report would not convey anywhere near the true worth of the lecture. His way of producing healthy and strong growing trees from those which when grown upon common roots are weak and unsatisfactory should have been heard by every propagator in the land; in fact, his lecture along fruit growing lines was a revelation to many if not all of those who were fortunate enough to be there.

Mr. O'Mara spoke in his happiest vein, in which he said a good word for the association and its officers in language all his own and to the point. His address of less than 15 minutes was full of wit and at the same time full of food for thought and many of his hints will no doubt be embodied in the by-laws of the association. The next speaker was Harry Bunyard, and we will quote the expression of one of the listeners, a man of broad business experience whose opinion was probably the opinion of every one present. He said "I never saw that man before, but every word he says has the right ring." His talk was from the standpoint of a gardener who comes from a family of gardeners and understands them. His short talk certainly must have impressed every one with the love he had for his calling.

AWARDS.

The prize for greenhouse plants was awarded to Prof. Osborn, of Garrison, James Bell, gardener. This was a gold and silver loving cup offered by the Pierson U. Bar Co. Mr. Bell exhibited a dendrobium about one foot in diameter which had 78 flowers thereon. W. H. Macy, of Harrison, N. Y., John Shore gardener, was awarded second prize.

The competition in carnations was very close, Prof. Osborn showing 11 kinds and W. W. Heroy, B. Wynne, gardener, showing the same. After four hours' consideration in the afternoon and after the opinions of a great many experts they were finally awarded equal first prize, which is a silver loving cup, offered by

AMERICAN ROSE SOCIETY.

Elliott's Vase of Richmond at the Chicago Show.

Peter Henderson & Co. The second prize went to Oscar Carlson, of Fairfield, Conn.

In the class for carnation seedlings there were two entries from Oscar Carlson, of Fairfield, Conn., and P. Sorenson, gardener, to Chas. Stewart Smith, of Stamford, Conn. After due consideration first prize was given to Mr. Carlson, the great deciding point being the color of his seedling, a beautiful deep crimson. The principal one exhibited by Mr. Sorenson was a beautifully variegated seedling for which he was awarded second prize. The first prize in this class is a gold and silver cup, offered by John Shore, president of the association.

The first prize on roses was awarded to Chas. Stewart Smith, J. P. Sorenson, gardener, a silver cup offered by Bobbink & Atkins, Rutherford, N. J.

The first prize on violets was awarded to W. H. Macy, John Shore, gardener, and was a gold and silver cup offered by J. P. Sorenson, a member of the executive committee of the association.

The first prize on hardy bulbs was awarded to Wm. Brandenburg, of North Arlington, N. J., and was a gold and silver cup offered by the Gardeners' Chronicle of America.

A special prize was awarded to C. Shaeffer, superintendent to R. Mortimer, of Tuxedo, and W. W. Heroy, B. Wynne, gardener, for display of stocks, Mr. Heroy having two varieties and Mr. Mortimer one.

In addition to the above, special first prize was awarded James Bell for the following carnations: Rose Pink Enchantress, Victory and White Perfection.

On Friday the business meeting was held, in which a general discussion took place under the head of "The Good of the Order," and the by-laws were unanimously amended regarding asociate members, which class of members consist of those in the trades, reducing the annual dues from $10 per year to $2 per year, this being the same dues paid by active members.

AT THE ST. LOUIS SHOW, MARCH 11.

Cement Benches.

I notice in the last issue of the AMERICAN FLORIST Louis Wittbold's article regarding concrete bench construction. While it is possible that he is correct as to the matter of expense, there are other items which must be taken fully into consideration before adopting permanent or one piece construction.

For large growers who are located in the country, with ample room and with others where there is no probability of them moving their plant, his version of this important feature may be correct, but, as such growers are decidely in the minority, and many are located under the eaves of a growing city, which sooner or later will be forced outside to such, the portable bench system would certainly be the most practicable.

It is not necessary for the bottoms to be very thick. Ours are one and one-quarter inch, except at the edges, where the re-inforcing one-fourth-inch rod is installed. The side pieces, which extend above the bottom, are also one and one-fourth inches thick. As to the matter of expense, I am not able, at present, to give definite figures, but as near as can be estimated, it will cost in the neighborhood of eight to ten cents per square foot of bench, which includes material and labor completed. The matter of expense in such construction always depends upon the cost of the material and labor and there are times when it would considerably exceed the estimated figures given.

The concrete benches have surely come to stay, and when once installed no one would go back to the old board system. Always clean, in perfect alignment, and ready for use without repairs. One of the most important features in making such constructions is that the cement and other materials are thoroughly mixed.

We have had such benches in use for four years and grown roses, carnations, chrysanthemums and various other stock. In every case the plants thrive as well as they do upon boards. To my knowledge there is nothing in the cement that would be injurious to plants, as the important constituents are clay and marl, both of which are forms of soil.

ELMER D. SMITH.

Concrete Bench Construction.

Theoretically the gentlemen who so ardently advocate concrete bench construction may be right, but how about this construction in its practical application and in the modern commercial establishment?

The average grower is in a muddled whirl of indecision after reading the different articles regarding sectional benches, continuous benches, etc., and even after deciding which of the two methods of construction is to be preferred he then does not know whether this construction will not be injurious to the stock that he grows. He does not know whether cement will not be too cool, whether perfect drainage can be obtained or whether the construction will not, after two or three years' use, crumble or give way and cause him all manner of inconvenience and expense in reconstruction.

I, for one, should like to hear from some one who has installed cement benches for more than one season, and I should like to view a few of these benches after they have been in use for two or three years. I should also like to know whether it is more practical to build benches that can be taken apart and moved from one place to another or whether it is better to build a continuous bench similar to the wooden benches we now use. If you will submit these questions to the enthusiastic writers on these subjects and have them answered, I think the mind of the average grower will be relieved and this method of construction will receive greater attention in the minds of the growers.

J. C. AHRENSFELD.

The gentleman who has taken the trouble to attack concrete bench construction should have first looked into the merits of modern cement construction as adopted in other lines of trade, and he would not have asked some of the questions he did. However, it is with pleasure I attempt to clear up his muddled brain. He attacks the practicability of cement benches, but does not say why they are impractical. I cannot answer this, but I can give him a few practical reasons why the modern grower will build nothing but concrete benches in the future:

First—Concrete benches are cheaper to build than wood. At the present price of lumber and labor wooden benches cost nearly eight cents per square foot, whereas a concrete bench built just like the wood bench, that is in one solid piece will not cost over six cents per square foot. This price includes posts and all materials.

Second—A cement bench will last a life time, whereas a wooden bench must be renewed every three years.

Third—Concrete is and has been used for a good many years in places that have been subject to greater corroding influences than is found in a greenhouse, and it has withstood the test, hence there is absolutely no argument that the benches will crumble or give way.

Fourth—Concrete benches are not only practical but they have every advantage that the wooden bench has and have none of its disadvantages. This claim is not a theory but is a fact.

Now, regarding the question of portable benches and stationary or continuous benches. The only advantage claimed for portable benches is that if you decided to change your houses or move them or sell out you could with very little trouble take down the benches and rebuild them somewhere else. Now we all know that this future is not important for if it was why should we not construct wood benches in sections as they cost more than cement; then again suppose you wanted to change your benches, make them wider or narrower, could you use all parts of the old bench? No, you could not, but would have to make new bottom boards the right width or practically reconstruct your bench. Then, again, think how many times have you had occasion to move your benches and I will venture to say it has been so seldom that you have forgotten when, and then if you can think of the time you rearranged your bench space you can remember that you either made the new benches wider or narrower, and, hence, could not utilize the parts of your old bench, provided you had it in concrete construction.

This possible advantage is more than offset by the fact that the cost of construction of the portable bench is at least one-half again as great as in the one piece, continuous bench construction as more materials must be used both in cement and reinforcing material, and also the time in making the separate pieces will be greater. I have carefully considered the cost in both methods of construction and will venture to state that the portable bench cannot be built for less than ten cents per square foot, while the continuous bench can be put up, including all costs, for six cents per square foot.

The claims I make for benches in one piece are that they can be built much cheaper and are much stronger, as the cement does not need to be handled over and over again and can be spread on a large mould much quicker than in small moulds saving labor, and it takes less material, as no beams or carriers are necessary or expense of reinforcing material. Study this carefully and you will find that if you make the sections light, you cannot make them strong without expensive reinforcing material, and if you make them heavy they look clumsy and take too much material.

Regarding the concrete construction being too cool, would state that as cement is more of a conductor of heat than wood there is no basis for this question at all. We have had concrete benches in our place for the past three seasons, and I fully believe that they are better today, as far as strength is concerned, than they were when first built. The benches in our place are light, being only 1-inch bottom and 1-inch sides and 4-inch posts; they are clean cut, and one seeing them would mistake them for new wooden benches unless he tried to whittle them. The fact that we have practically our entire range in these benches should be evidence enough that they are giving satisfaction.

I have tried to answer in a conservative manner the rather misty questions of gentlemen who attack concrete construction, and am ready and willing to defend with facts and figures the one piece continuous concrete bench as adopted at our establishment. Let others who are interested in this important subject write and ask any question, and I will try and answer them.

LOUIS WITTBOLD.

To Be Done Now.

IN THE GREENHOUSES.

Lilies may be held back by placing in a cool shed where there is no dust.

Lower the temperature gradually for newly struck stock. Sudden changes are very undesirable.

Keep young fuchsias, heliotropes and similar stock moving and never allow them to get hard in the pots.

Prick out seedling asters in quite a cool house, on firm soil, and see that green fly or thrips does not attack them.

Avoid heavy shading on any stock, but watch tender young growth when there are bright bursts of sun.

When potting pelargoniums the last time use a few roughly broken bones over the drainage hole.

Look out for the stock plants of poinsettias. A few placed in a warm, moist house now will soon produce plenty of cuttings.

Watch stock coleuses now—they are often infested with mealy bug—and clean them if necessary.

Pot up the earlier started caladiums and cannas and give them a slight bottom heat to start with.

IN THE STORE.

Enchantress carnations and Marie Louise violets formed a beautiful combination in a wreath recently noted.

The yellow antirrhinums now coming in freely are lasting and beautiful flowers, fine for almost every purpose.

Rose Cardinal is an excellent variety that is bound to prove very popular in good class stores.

Orchids require perhaps more careful arranging than any other flowers, but they are very beautiful when properly handled.

Always keep a good stock of picks and wires ready in case of hurry up orders.

English ivy leaves and snowdrops make very attractive little bouquets or are good for wreaths.

OUTDOORS.

When stopping wounds in trees, either by painting or with cement, see that both air and moisture are entirely excluded.

For planting in exposed positions, there are few shrubs to beat the tamarisk, its feathery shoots being always attractive. It likes a sandy soil.

Get all dead wood taken out of newly planted and other shrubs without further delay.

The junipers are among the best conifers for planting in bleak situations, for wind-breaks and to hide anything unsightly.

The early cauliflower must have rich soil, so prepare the border with special care.

If any asparagus beds are to be made from plants get them ready and planted as early as the weather will permit.

Much damage is frequently done to healthy trees by dipping the roots in oily emulsions and insecticides.

It pays to take a little time preparing tree roots before planting. Cut away all jagged and torn roots, using a sharp knife and cutting in an upward direction.

Twenty Years Ago.

MARCH, 1888.

Steam pipes overhead were becoming popular.

Phlox Drummondi, Star of Quedlinburg was among the novelties.

Too much ribbon in flower baskets and designs was decried by correspondents of the AMERICAN FLORIST.

Waterproofed hotbed cloth was used to some extent in lieu of sash.

The New Bedford, Mass., Gardeners' and Florists' Club was organized.

The disease of Lilium candidum was becoming prevalent.

That fine fuchsia, Frau Emma Topfer, was among the novelties.

Much damage was done to the roofs of greenhouses owing to heavy snow falls.

The annual statices were getting a good deal of attention.

Rose Souvenir of Wootton, raised by John Cook, of Baltimore, was being tried out.

Florists' patrons were warned against "Cologned" violets.

AT THE ST. LOUIS SHOW MARCH 11.

Lilies for Cutting.

We have been cutting Lilium Harrisii since January 24, strong, healthy stems from 42 to 48 inches in length bearing from six to eight flowers each, the individual flowers large and of fine substance. Out of a batch of 200 bulbs there was not a single failure or diseased bulb. These were potted the second week in August. Our method is to use 4-inch pots, place them under the benches and cover with four inches of leaf mould. Here they were kept until the growth was three inches above the leaf mould when they were placed on the benches. As soon as the pots were filled with roots they were repotted into 6-inch pots in a rich compost of decayed sod, leaf mould and a little bone meal. Great care is necessary in watering. A man that knows how can water as well with a hose as a watering can, but good waterers are scarce.

LILIUM LANCIFOLIUM.

Lilium lancifolium and its varieties, album, rubrum and roseum, are among the best subjects for winter flowering and cold storage bulbs should be used. These should be in their pots by July 1 as the longer they are kept in cold storage after this the less root they make. Four or five-inch pots are most suitable according to the size of the bulbs and repotting will not be necessary for these. After potting place under a bench or in a cold frame and cover with some light material, treating them similarly to L. Harrisii. By careful handling and judicious watering they will be good plants by November in a temperature of 55° at night. Select the strongest plants and place them in a temperature of 65° to 70° at night and these will produce fine stems three to four feet long with from six to ten blooms for cutting at Christmas.

A. J. S.

Quest of the Yellow Sweet Pea.

Of all the phases of the sweet pea cult the quest of the yellow sweet pea is perhaps the most fascinating, and certainly the most elusive. There is no doubt that the pure yellow sweet pea (when it comes) will bring a golden harvest for the raiser, but at present the game is anybody's, and there are many enthusiasts who are working assiduously to obtain it.

But as the sweet pea is so sportive in character, and so many notable varieties are certainly sports, the yellow sweet pea may perhaps turn up in an unexpected and unconventional manner, to gladden the heart of some plodding florist who may have never considered the likelihood of such a prize falling to his share.

It was not really long ago that we were praising the Hon. Mrs. E. Kenyon as being the variety which seemed to point the way toward the yellow sweet pea; last season Mrs. Collier was the prime favorite in this shade, and now Eckford's primrose-hued James Grieve provides us with the nearest approach to yellow. It is real progress, certainly, for there is a great difference between the first-named and the last varieties, but for all this we are still a good way off the pure yellow variety.

It may, however, be quite possible for the new cream-colored and primrose forms of Countess Spencer to break again into sports of a decided yellow hue, for the possibilities of the Spencer group are so well known that no one would be surprised if further advances came from such a source. On the other hand, a series of crosses between these creamy Spencer forms and James Grieve would provide an interesting task for an enthusiast, and perhaps furnish a further improved race of seedlings, some of which might be reasonably expected to surpass their parents.

Selection of existing varieties also affords a means of advance for in the majority of the sweet peas, however perfectly fixed, forms may be met with, that are larger in size and richer in coloring than the majority of their fellows, and if these are isolated and the resulting seed saved, a moderate amount of success may be reasonably expected, especially if these finer forms have been carefully hand fertilized.

Although one would advise the intercrossing of primrose with primrose, or primrose with cream, yet there is a possibility of the yellow sweet pea coming from another source, namely, from those buff, salmon, and apricot shadings which are to be met with in some varieties. These shadings are often the offspring of yellow flowers, and there is just the possibility that the yellow is lying dormant under one or other of these hues. A series of crosses with white and cream-colored varieties would probably settle the question, using these same salmon, apricot, and buff shades both as pollen parents and as seed bearers.

In conclusion, we can but rejoice that the cult of the sweet pea has become so popular, for besides providing a feast of interest, and a wealth of new colorings which are appreciated by all, it gives a big lift to the horticultural trades in general, and provides attractive exhibits for the summer shows.—Gardeners' Magazine.

The Late J. M. Gasser.

See obituary in last week's issue.

Hail.

The worst hail storm for many years broke over Richmond, Ind., March 18. Globules of ice, the size of walnuts, shattering glass, are reported, Fulle Bros. having suffered great loss. Outside, fruit trees and vines are riddled of their buds, but fortunately, as frost followed the storm, no great damage to fruit crops are anticipated.

Glass.

Prices of glass hold about as published last week, but there are indications of a sharp advance in the very near future. Glass jobbers say their product is now sold on too close a margin for profit and that intending buyers should close their orders at once to benefit from the present low prices.

OBITUARY.

The Late J. M. Gasser.

The death of J. M. Gasser, of Cleveland, O., which we announced last week, was due to valvular heart disease, from which deceased had suffered for several months. He was buried at Lake View cemetery and the floral offerings at the funeral were very numerous and beautiful coming from a large circle of friends and business associates of Cleveland and other cities.

Wm. Heath Spooner.

Wm. Heath Spooner, one of the oldest and most respected residents of Jamaica Plain, Mass., died March 21 in the Emerson hospital, Forest Hills, in his seventy-fifth year. A week previous he had been taken ill with an intestinal trouble which necessitated a surgical operation. He was conveyed to the hospital and the operation was performed, but Mr. Spooner failed to come out of the ether. He leaves a wife and one daughter, Mrs. Benj. Bettee, Jr., Concord, Mass.

Mr. Spooner was born in Jamaica Plains, April 2, 1823, and with the exception of three years in New York, had lived there all his life. He was the son of Heath Spooner and Harriett Curtis Spooner. His mother belonged to an old revolutionary family. All his life he was an ardent horticulturalist, his specialty being roses, and he had imported many rare kinds from Italy and France. He was a constant exhibitor at the shows of the Massachusetts Horticultural Society, was one of its oldest members and for two years was its president. Mr. Spooner represented the West Roxbury district in the state legislature in 1884 and 1885.

Professor Austin C. Apgar.

Austin Craig Apgar, of the New Jersey State normal and model schools, vice principal and professor of botany and zoology, died, March 4, at Trenton, N. J. He was born August 4, 1838, at Peapack, Somerset County, N. J. He attended the district school of his neighborhood and then the New Jersey State normal school, from which he was graduated in 1862. After his graduation, he taught four years in district schools and in the Farnum Preparatory school at Beverly. He was then appointed to teach in the New Jersey State normal and model schools, where he has been steadily engaged until the present time.

His most marked characteristics were his selective power, enabling him to choose those forms for study which were not only of greatest interest to his pupils, but served best to open up to them natural history, and his ability to win the love of the pupils for this work. Born at a period when the study of books was the common practice, he turned at once to the fields and to the laboratory method. Nearly all of the specimens used in his work were collected by himself, either alone or assisted by his pupils.

As an author, he had written a number of books that proved of great value. "Plant Analysis," "Mollusks of the Atlantic Coast," "Birds of the United States," and "Trees of the United States," were among his most important publications. When, some years since, the growth of the State normal school had reached a point enabling him to narrow his work to one subject for each season he chose botany. He saw in this subject not only science but the Author of science.

"The meanest floweret of the vale,
The simplest note that swells the gale,
The common sun, the air, the skies,
To him are opening paradise."

He leaves a wife and three children,—a son, Walter, and two daughters, Mrs. Alfred D. Cook and Miss Ada.

I saw a robin yesterday,
Has spring been sprung?
I saw the boys at marbles play.
Has spring been sprung?
I saw an Easter hat displayed;
I saw a tramp hunt for the shade;
I saw some flower beds newly made.
Has spring been sprung?

I saw a kite go sailing high.
Has spring been sprung?
I saw smoke in the alley nigh.
Has spring been sprung?
I saw some buds upon the trees;
I felt a balm upon the breeze;
Kerchew! Kerchew! O, hear me sneeze!
Yes, spring's been sprung.
—The Commoner.

As showing its confidence in the new rose Tausendschon, Robt. Craig Co., Philadelphia, Pa., is forcing 1,000 plants for Easter sales.

THE establishment referred to in our issue of March 21, page 394, as that of Moore, Hentz & Nash, is the property of Henry Hentz, Jr., Madison, N. J., and has no connection with the former firm, which does a wholesale commission business exclusively and owns no greenhouses anywhere.

THE collector of customs at Buffalo, N. Y., has been authorized to take the usual steps to refund the excess duties exacted from the American Express Co. in the recent case referring to the importation of rose cuttings, the attorney-general having decided to take no further steps in the matter.

ALFRED DIMMOCK, now London agent of the Yokohama Nursery Co., and well known to the American trade, in a recent letter states that the English growers are making great progress in indoor carnation culture and that the market growers around the English metropolis grow them remarkably well in pots.

THE question of the style of house most suitable for rose growing, and the class of bench or bed best adapted to this important crop, is a live one and one that will bear ventilating freely. We hope that all who have formed their ideas on this point from observation of the behavior of roses under varying conditions will favor us with their views, as such cannot fail to be of service, both to growers of roses and greenhouse builders.

THE AMERICAN CIVIC ASSOCIATION is continuing its good work. It is vigorously attacking the bill board nuisance by sending out press clipping sheets illustrating the situation, and combating the vandalism going on at Niagara Falls. "How to Lay out a City," is a reprint of a lettter by Miss Annette McCrea sent in reply to an inquiry from Alabama sent in the course of the association's business. It is interesting and well worth perusal.

CONSUL W. P. ATWELL advises that the centennial exposition of the "Societe Royale d'Agriculture et de Botanique," of Ghent, Belgium, will be held in the gardens of the Casino from April 23 to May 3, 1908. This exposition is international and devoted exclusively to plants, flowers, seeds, and in general to everything pertaining to the horticultural trade. It is held regularly every four years, and the coming one being the centennial, the display promises to be very interesting.

Florists' Hail Association.

Hail losses recently reported are R. S. Murray, Bellefontaine, O.; H. D. Schilling, Indianapolis, Ind., and Jos. R. Goldman, Middletown, O.

JOHN G. ESLER, Sec'y.

The Fickle Midge.

ED. AMERICAN FLORIST:—

I am troubled with the sciara or fickle midge, both the large and the small varieties. I have made innumerable tests with tobacco extracts, dust, smoke, etc., emulsions, insect powder, lemon and fir-tree oils and cyanide gas, but no result. They work in ferns, begonias and salvias especially, but in almost anything. Can you give me a remedy to destroy them?

Ohio. H. H.

This sounds a formidable array. We should certainly recommend nicotine extract. The Department of Agriculture Circular No. 80 advises the use of extract at the rate of five or six teaspoonfuls to one and one-half pints of water being vaporized in a house containing 5,000 cubic feet. Many methods of fumigation are given in this circular and the use of hydrocyanic acid gas is given in circular No. 37. These circulars would doubtless prove of value. "H. H." does not state whether he used kerosene emulsion or not. Kerosene-soap emulsion, applied according to the directions given in the same circular, should also be found beneficial. Pyrethrum or buhach insect powder is efficient for such purposes but is somewhat too expensive. Lemon and fir-tree oils are proprietary articles and we do not advise these as a general rule, since they are inferior to the standard preparations of known value, of which we know the component parts and which can be obtained at a much more reasonable price. Hydrocyanic-acid gas, applied at the proper time, would be effective in killing the flies, but would practically have no effect on the larvæ or maggots, which feed at the roots of the plants. The fickle midge has been a pest for quite a number of years over a considerable extent of territory and many complaints have been received, but, thus far, few persons who have experimented with remedies have reported success with them. This, however, is not surprising, as we are much more apt to receive reports of failure than of success, even when we know that the remedies advised are satisfactory if the proper methods are carefully pursued.

There can be little doubt that the insects are frequently brought into greenhouses with barnyard manure. It is, therefore, advisable to substitute mineral fertilizers and, where desirable, to thoroughly sterilize the soil, either with heat or steam. A correspondent of the Bureau of Entomology states that, after an experience of two years of trouble with this pest, he had not been bothered with it afterward, and attributed immunity to greenhouse plants to his practice of not putting manure in the houses that were made during the time when the midges were flying actively. He has also furnished testimony to the value of nicotine preparations in the destruction of larvæ or maggots. Some other correspondents have reported similar success with the use of these preparations. Undoubtedly several fumigations with nicotine extracts will be found necessary to entirely eradicate the pest from the houses which it infests. C.

Meetings Next Week.

Chicago, April 2, 8 p. m.—Chicago Florists' Club, Union restaurant, 111 Randolph street.

Dayton, O., April 2.—Dayton Florists' Club, 37 E. Fifth street.

Minneapolis, Minn., April 3, 8 p. m.—Minneapolis Florists' Club, Latham's conservatory, 83 South Tenth street.

New Orleans, La., April 1, 8 p. m.—German Gardeners' Club, 624 Common street.

Newport, R. I., April 1, 8 p. m.—Newport Horticultural Society.

Pasadena, Calif., April 2-4, 8 p. m.—Pasadena Gardeners' Association, spring exhibition.

San Francisco, Calif., April 4.—Pacific Coast Horticultural Society.

Utica, N. Y., April 2, 8 p. m.—Utica Florists' Club, Hotel Martin.

You see fair maid we marry
A gentler scion to the wildest stock;
And make conceive a bark of baser kind
By bud of nobler race; this is an art
Which does mend nature,—change it rather; but
The art itself is nature.

Wants, For Sale, Etc

One Cent Per Word, Cash with Adv.

For Plant Advs., See Ready Reference Section.

Every paid subscriber to the AMERICAN FLORIST for the year 1908 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

Where answers are to be mailed from this office, enclose 10 cents extra to cover postage, etc.

Situation Wanted—Competent rose and carnation grower; first-class references; married. Key 493, care American Florist.

Situation Wanted—By a competent man in every detail taking charge of place; capable of handling men, etc. Key 496, care American Florist.

Situation Wanted—By a first-class grower of roses; married, 10 years' experience; state wages and particulars in first letter. Key 489, care American Florist.

Situation Wanted—German, single, two years' experience in general greenhouse work in America, wants position. Address Key 487, care American Florist.

Situation Wanted—Where I can work for my board and learn the florist business; had one year's experience in general greenhouse work. Key 482 care American Florist.

Situation Wanted—As gardener on private place with glass; age 31, single, German; 17 years experience in general greenhouse work and landscape. Key 483, care American Florist.

Situation Wanted—As working foreman, 16 years' exprience in fruit, roses carnations, mums and all bedding plants, etc. Private or commercial; one in family. Box 45, Oceanic, N. J.

Situation Wanted—By practical florist; single strictly sober; 12 years' experience as grower, decorater and designer; Chicago; retail place preferred; state wages. Key 468, care American Florist.

Situation Wanted—As foreman grower on wholesale or retail place; best experience and references; strictly temperate; married; eastern states preferred. Address Key 478, care American Florist.

Situation Wanted—As working foreman, first-class grower of roses, carnations, palms and ferns, bedding plants and bulbs; A1 landscape gardener, 35 years' experience; please state wages. Key 486, care American Florist.

Situation Wanted—As gardener on private place or public institution; thoroughly competent in all branches under glass and outside; am 32 years of age and single, and am desirous of a permanent position. Address Key 495, care American Florist.

Situation Wanted—By a young married man as foreman and grower of carnations, 'mums, violets and general stock; 8 years' experience, best of references; will be at liberty June 1st. New York, Penna., or Md. preferred. Address Key 466, care American Florist.

Situation Wanted—By a young man of 23 years of age on a private place or commercial greenhouses; 3 years' experience in greenhouse, lifetime in vegetables; have some knowledge of planting trees, shrubs, perennials and flower beds Key 492, care American Florist.

Situation Wanted—As superintendent, working foreman or gardener; private place, commercial, cemetery or hotel grounds; A1 grower in all lines, landscape and floral; California place wanted; address, stating wages, etc., H. BREEN, Burlingame, San Mateo Co., Calif.

Situation Wanted—By two Hollanders; good, all-around reliable florists; sober and competent; life experience; on commercial or private place; single; each 25 years old; European and American references. Please state full particulars in first letter. Key 494, care American Florist.

Help Wanted—Two good plantsmen; situation open now; good wages; wire us if open to engagement, MEMPHIS FLORAL CO, 145 So. Main St., Memphis, Tenn.

Help Wanted—Good man to run small place himself. Steady position; German preferred. With full particulars address Key 491, care American Florist.

Help Wanted—Good grower of roses and carnations, 'mums and general stock; must be sober industrious and know how to use the hose. W. E. SMITH, 525 N. 5th St., Arkansas City, Kas.

Help Wanted—At once, an industrious, competent married man to take charge of a private place; fruit vegetables and small greenhouse; house and $40 per month. Address DR. EVANS, Hamilton, Va.

Help Wanted—At once, a man capable of potting and bedding out also assisting in retail store when necessary; salary $12 per week; full particulars and copies of references in first letter. JOHN RECK & SON, Bridgeport, Conn.

Help Wanted—Good growers of first-class stock, roses, carnations, 'mums, etc., for retail store; coldest weather this winter 14 above; modern greenhouses; good wages to right party. Address Key 490, care American Florist.

Help Wanted—First man to grow bedding plants bulb stock and chrysanthemums; good potter and planter; steady place good wages for sober, industrious man. CASSIDY & SONS, Calvary Cemetery, Greenpoint Ave., Long Island City, N. Y.

Help Wanted—One or two young men, 16 to 20, who are anxious to learn the florist business in establishment where a general line of pot plants and cut flowers are raised. Employer has had fifteen years' experience in leading Belgian, English, German and American concerns, and will give a young man anxious to learn the full benefit of his experience. Board and room, with small salary. C. E DE WEVER, Clayton, Mo.

Catalogues Wanted—I desire late catalogues from firms handling seeds, bulbs and florists' supplies. W. W. WESTON, Manila, P. I.

For Sale—Greenhouse and cottage with 2 to 5 acres of land in Glen Ellyn, Ill. Good for business and investment. Write the owner, Box 296, Jamestown, Pa.

For Sale—27,000 feet of glass, filled with first-class stock; located in one of Chicago's suburbs; low price. Address MRS. HUBERT HANSEN, 4016 N. Clark St., Chicago.

For Sale—Do you want to go west and coin money in the greenhouse and florist business? Capital required, $3,000; can be cleared every year. IRA B. STURGES, Baker City, Ore.

For Sale—20,000 square feet of glass, well stocked; three acres of ground; six-room house; all modern, in good condition, and a money-making place in best city of Indiana; $4,500 required. Details to parties meaning business. Key 427, care American Florist.

For Sale—Greenhouses and stock; about 20,000 feet of glass, well stocked with all kinds of bedding plants, ferns, palms and cut flowers; for terms inquire of Mrs. Hugo Book, College street, Worcester, Mass., or L. Midgley, Worcester Conservatories, Worcester, Mass.

For Sale—A retail florist business consisting of 4500 feet of glass, well stocked, store building with living rooms above; on 2 lots 44x136 feet located in the heart of a residence city; county seat of 10,000 inhabitants less than 50 miles from Chicago with good surrounding towns. Address Key 434, care American Florist.

For Sale—A retail florist business, 5 greenhouses, about 5000 feet of glass, store, barn, 8 room house, lot 100 feet front, over 200 feet deep, located in fine neighborhood; a good opportunity for two young men who understand the business, with small capital to start; good reason for selling; party must have $5,000, balance to suit purchaser. G. F. THRUN, 8707 Cedar Ave., Cleveland, O.

Massachusetts Horticultural Society.

SPRING EXHIBITION.

The annual spring exhibition of the Massachusetts Horticultural Society was held in Horticultural Hall, March 20-23, and viewed from every standpoint was a notable success. Opening on the first day of spring and welcomed with perfect days the show was unusually well attended by a thoroughly enthusiastic and appreciative concourse of people, professional and amateur cultivators as well as thousands of flower lovers. The hall was a sort of mystic garden, in which flowers and plants were finely displayed and such a collection is rarely seen. An extraordinary array of products of the highest art of cultivation greeted the visitor as he entered the hall. From the ordinary commercial products, the sight of which is common to all, to the most rare and expensive plants seldom seen outside private gardens, were displayed to the delighted throngs.

Among the rare exhibits witnessed was the collection of amaryllises from the private conservatories of Walter Hunnewell, this array being one seldom equalled and a great credit to T. D. Hatfield, the gardener whose superior skill was plainly shown in the marvelous productions exhibited. From the conservatories of Frederick Ayer superb specimens of acacias were displayed, creating no end of admiration and easily among the leading features of the show. The different species, heterophylla, pulchella, Drummondi and longifolia were all in the pink of condition and comprised a wonderful collection. Cyclamens, the equal of which have never been seen in one exhibit, were displayed from several estates. The collection of Dr. C. G. Weld proved an admirable attraction, all colors from the deepest to the most delicate making the best display of this plant ever witnessed locally.

Rare collections of orchids were exhibited by three contestants for honors. Lager & Hurell, the New Jersey specialists, staged an enviable assortment of selected plants and from the private estates of Seth Borden, J. E. Rothwell and Mrs. J. L. Gardner, the most rare and valued of all plants were seen in all their elegance. Continually surrounded by an enthusiastic gathering was the exhibition of rambler roses grown by M. H. Walsh, of Woods Hole. Here were seen to splendid advantage Lady Gay, Arcadia, Delight and Hiawatha, each variety having a host of admirers. From the conservatories of Mrs. J. L. Gardner a most interesting exhibit was Chorezema splendens, which, although not well known, proved a most enviable attraction. Cinerarias, perhaps among the best known of spring flowering plants, were excellently displayed by Wm. Whitman. A specimen fern, Nephrolepis Barrowsi, grown by Mrs. A. W. Blake, was one of the principal features of the exhibition, and proved a marvel to producers of such plants, who looked upon it with envy.

In the display of cut flowers, roses, carnations, sweet peas and antirrhinums were excellent attractions. Sweet peas were shown to great advantage by Wm. Sim, Cliftondale, whose assortment included many varieties of many shades. This exhibit was very interesting, especially to the trade with whom this flower is a staple article. Samuel Goddard overwhelmed his competitors with carnations. A. Roper's new seedling variegated, Bay State, showed in excellent form and its future has easily been proven. Richmond, Killarney, Bride, Bridesmaid, and Safrano roses were staged by able growers whose efforts were loudly commended. With the flowers and plants were added a general display of fruit and vegetables the prizes

for which were all eagerly contested. Two gold medals were awarded for the first time at an exhibition of this kind. R. & J. Farquhar captured one with a vast collection of spring plants which were tastily arranged and a leading feature of the show. To Seth Borden was awarded the other for a magnificent display of orchids which has never been equalled at a like exhibition. The attendance this year was 50 per cent better than the record, the exhibition continuing until Monday night. B.

Boston.

BUSINESS IMPROVING.

A slight improvement in local trade conditions has materially brightened the outlook and encouraged a hope of prosperity for Easter. Market appearances have become more business-like and while marked by light purchasing yet the opening hours are well patronized. No doubt business has tremendously increased in the last few years; it is not confined to a few important houses, for now it is extensively distributed and covers territories that were not to be considered a decade ago. While the usual Lenten abandonment of social pleasures is plainly noticeable there is a fairly good demand for cut flowers and a light call for funeral work. The latter line has weakened perceptibly during the last week, seriously affecting the establishments that rely chiefly upon this line of business. The over-burdened market is being relieved by the gradual falling off of the different crops, the exit of which is this season followed by a feeling of satisfaction for those growers who are in readiness with a new line. Any sort of a standard for bulb stock has been abandoned and boxes of assorted collections are offered for sale at the buyers' prices. Roses have further declined and the growers are carrying large surpluses. Killarney is maintaining its position as the market leader and its sales alone surpass those of all other roses combined. Carnations are the property of street hawkers and interest shopkeepers but little. Single violets have been seriously affected by the periodical warm stretches of the past few weeks and the demand has transferred itself to the more attractive Campbell, of which there is a limited supply of first class stock available. A novel collection of accessories is displayed from the most expensive line of orchids to the cheaper spring productions, including sweet peas, anemones, primroses, marguerites, etc.

NOTES.

Wm. Sim, the foremost cultivator of sweet peas in New England and also well known throughout the country, has had remarkable success this season with his favorite flower. Many new varieties have been experimented with and results therefrom have been most gratifying. With but part of this extensive and model establishment devoted to this line the rest is likewise well known by its famous violets which were the original products. The latest is the already famous Boston violet which has been exhibited this season at all the leading floral shows.

Among the most interesting exhibits at the horticultural exhibition was that of Thomas Roland of Nahant. A worthy display of genistas in superb condition in graceful figures comprised one of the unique and tasty exhibits in the hall, evoking a multitude of remarks commendatory to the ability of this premier cultivator.

At Sydney Hoffman's conservatories in Cambridge a novel collection of Easter plants may be seen in the prime of condition. Chiefly attractive are the collection of rhododendrons in which are included the latest varieties of an exclusive line well supported by a varied assortment of the usual season's favorites.

Edward McMulkin displayed an extensive collection of fancy and staple spring plants at the exhibition in Horticultural Hall. A varied collection of green and flowering plants of unusual interest bore the name of this grower who has continually a window in his store of most pleasing combinations.

H. N. Eaton, who has formerly disposed of his stock through the Park Street Market, is now numbered among the consignors of Welch Bros., who have added to their list one of the largest growers of this vicinity.

R. E. Lassman, the veteran of all market men, who daily attends to his own selling, is now distributing his usual spring novelties, of ixias and anemones, of which he annually carries an exclusive line.

Visitors: Arthur Zirkman, Philadelphia, Pa.; Wm. Dykes, of Ed. Jansen's, New York, Lager, of Lager & Hurrell, Summit, N. J.

B.

NEW YORK.—Daniel J. Mackintosh has leased a store in the building at the southwest corner of Broadway and Forty-fifth street.

BROOKLINE, MASS.—The estate on Dedham street, Newton Center, known as the Wade Farm, consisting of 27 acres of fertile upland, together with dwelling and out-houses, has been purchased by F. E. Palmer, the florist. It is intended to develop this property as a nursery for popular and choice hardy plants, shrubs and trees as rapidly as possible. One large greenhouse, 35x150 feet, with packing room and cellar, is already finished and planted, and another house will be erected as soon as the weather permits. The cultivation of roses and carnations will be transferred to this establishment, thus affording larger facilities for the growing of miscellaneous pot plants and flowers at the home place on Newton street. Mr. Palmer will continue to reside in the city.

Chicago.

TRADE FAIRLY ACTIVE.

The shortening of the carnation crop, in connection with a stiffer demand on account of the spring openings in the stores, has had the effect of toning up the market and making prices firmer. Carnations began to move last Friday and cleaned up that night for the first time in weeks with some dealers. American Beauty roses are plentiful enough and of excellent quality. Some very extra fancy Bride and Bridesmaid roses are seen, with good, long, stiff stems. Richmond is perhaps not so plentiful, but sufficient for all calls. Killarney has gone off crop with some growers; some extra demand for Perle is noticed. Bulbous flowers are still over-numerous, with small outlet. Harrisii lilies are plentiful and prospects are excellent for a good Easter cut. Violets remain in large supply, but about clean up at very low prices. Green stock is in good supply, ferns selling about the same as last week.

NOTES.

Frank Oechslin, who occupies a truly enviable position as an expert plantsman, has his stock in the very pink of condition for Easter. Naturally the first interest was in his 9,000 Easter lilies in pots. These are coming along just right and show an unusual number of buds to every plant, the average being fully one more than for several seasons previous. Three thousand roses, in 4, 5, 6 and 7-inch pots, are a no less interesting sight. They include Baby Rambler, Dorothy Perkins, Clothilde Soupert and Lady Gay, and show great masses of perfectly formed buds. Azaleas, rhododendrons and spireas were also coming along fine. Mr. Oechslin is trying out a number of the new pink spirea. Decorative stock is quite a specialty here and is looking fine, especially the Boston ferns. Seedling ferns and pterises are a healthy lot. The small Asparagus plumosus plants are in the same fine shape. In one of the cool houses were seen a pair of unusually fine Chionanthus Virginica, both in full bloom.

Geo. Reinberg has decided to do still more rebuilding, this time erecting 12 houses, 26x265 feet each. They will all be of Washington cedar and will be higher than the old houses, the gutters being 7½ feet from the ground. This will necessitate the installation of two new steam boilers of 80 h. p. each. The houses when completed will be planted to American Beauty and Killarney roses.

Several retail stores for the sale of "union farm products" will soon be opened in this city, if the plan of the National Equity Exchange, the "farmer's union," is carried out. Stock will be sold at $1 per share, on which a dividend of 10 per cent will be paid. In addition, every customer will receive rebates based on the profits and the amount of the purchases.

The J. C. Moninger Co. reports a good business, having several very fair sized contracts on hand at the present time, including a range of five houses for Holton & Hunkel, of Milwaukee, Wis.; a range of five houses for Joseph Heini & Sons, of Jacksonville; a range of three houses for Geo. H. Servis, of Batavia, and various other ranges and single houses.

G. L. Blanchard, of Lake Forest, formerly gardener to Cyrus McCormick, is now in the coal and wood business in that suburb. Mr. Blanchard was formerly secretary of the Lake Forest Horticultural Society and was succeeded by J. W. Scharfenberg.

Jens Jensen, superintendent of the West parks, visited Hinsdale Sunday on invitation of the local improvement committee of that suburb and took a general survey of the situation in company with C. L. Washburn, a member of the committee.

The Foley Mfg. Co. has increased its capital from $100,000 to $125,000. J. P. Foley's son, James L. Foley, was one of the young men of this state who succeeded in passing the Rhodes scholarship examination.

The local Woman's Outdoor Art League has again arranged for the sale of penny packets of seeds to children through various neighborhood concerns. Mrs. Jos. P. Cobb, 254 E. Forty-seventh street, is in charge of the work.

The E. F. Winterson Co. has just received a carload of fancy ferns from the state of Washington. W. K. Wood is now with the Winterson Seed store, and J. W. Starrett is with the Benthey-Coatsworth Co.

J. T. Withers and Theo. Wirth were in the city last Friday, Mr. Withers returning east from Minneapolis and Mr. Wirth enroute to the S. A. F. executive committee meeting at Niagara Falls, N. Y.

Mrs. Chas. Reissig, and sons Paul and Charles, will take over the greenhouses at Riverside in the fall, the lease of R. Meyer, formerly Schmidt & Meyer, running out in September.

The next meeting of the Florists' Club will be held at the Union restaurant April 2 at 8 p. m., when a report of the rose show will be presented.

Superintendent Jensen of the West parks has used 30 carloads of Sandusky, O., special stone for rockery work in the new conservatory.

The Benthey-Coatsworth Co. have a few plants of that new favorite, White Killarney rose, having sported here as it has elsewhere.

A. Fitzgerald of the Morehead Mfg. Co., Detroit, Mich., was in the city this week in the interest of his firm.

The Eaton Flower Shop is being cleaned up and generally overhauled for the Easter and spring trade.

The Kennicott Bros. Co. reports a very good March business in spite of the month's poor opening.

Basett & Washburn are cutting some extra fancy long-stemmed Bride and Bridesmaid roses.

Peter Reinberg is now cutting fine crops of Bride, Bridesmaid and Richmond roses.

Vaughan's Greenhouses has just received a carload of fine box trees.

Wieter Bros. report being in full crop with both carnations and roses.

O. P. Bassett will celebrate his seventy-third birthday April 2.

Detroit.

Owing to continued ill health Geo. A. Rackham has sold out his greenhouse business and stock to Michael Bloy, foreman for Weiland & Olinger, New Castle, Ind. Mr. Bloy has the reputation of being a first-class grower, and Mr. Rackham hopes he may have the kind treatment that he himself has received from his many friends in the trade and takes the opportunity to say that as long as he lives he will consider his acquaintances among the florists as his best friends. Mr. Bloy will find the florists of this city ready to give him a hearty welcome. He will take charge April 1.

EVANSVILLE, IND.—Miss L. Mae Wainman, Ben Kramer's assistant, is in Chicago attending the rose show and visiting friends there. If she finds a desirable situation in the line of her profession she will probably remain in the latter city, as Mr. Kramer expects to dispose of his business about May 1.

Our Pastimes.

Announcement of coming contests or other events of interest to our bowling, shooting and sporting readers are solicited and will be given place in this column.

Address all correspondence for this department to A. F. Faulkner, 1133 Broadway, New York; Robt. Kift, 1725 Chestnut St., Philadelphia; or to the American Florist Co., Chicago.

At Philadelphia.

Considerable interest is being taken in the club tournament now about closing on the home alleys. There are five teams of five men each which played two matches of three games with each other. The winning team at the seventh match is Moore's with a total of 17102 pins, an average of 162 pins to a man. This is a very good average when it is known that the teams included all the bowlers who cared to take part, quite a number of whom only play when urged and whose averages are usually very low. Some very high scores have been made. The high game is held by Moore's team with 2580, an average of 172. Robertson made three games in the match of 223, 236 and 230, a total of 689, a record for three match games, which was followed by Dodds a week later with 258, 233, 205, a total of 696, and the latter in another match game made a total of 694, which is certainly great rolling. We are glad to see that New York is making up; they have a wealth of good material and if they get together will put a team in the field this summer that will be very close to the top at the finish.

K.

At New York.

The bowling club has already a membership of 20. The dues are 50 cents a night, in advance. Bowling for President Traendly's offer of free transportation to Niagara Falls for the convention of the S. A. F. begins April 3. Bowling every Friday. The first meeting's scores follow:

Shreiner	131	181	186
Manda	156	171	181
Fenrich	173	165	192
Marshall	128	163	138
A. Rickards	124	216	148
W. Rickards	130	167	129

Messrs Young, Schultz and others "also ran." Lentz rolled 180. A big crowd is expected this week.

W. E. MARSHALL, President.

At Buffalo.

The rejuvenated Florists' Club had a bowling match last Monday evening between the married and single members and in the crowd, official scores were not kept, but the single men won two out of three games. W. B. Scott captained the single and Geo. McClure the married men. Should any one build a regulation alley, one foot wide, with sides one foot high, a match game might be rolled between "Eye These" Savage of the Hengerer store and London Sewell of the Albright greenhouses. We were very sorry not to have seen Edward Slattery at the game. Rumor says he is practicing on another alley and expects to challenge Andy Adams. Will Grever is either a comer or a goner. We cannot tell until he bowls a few more games.

BISON.

OMAHA, NEB.—The Florist's Club held its annual bowling night March 19 at the Metropolitan bowling alley. No prizes were offered: the idea was to have a good social evening and they certainly had a good time, plenty of refreshments and a good lunch kept them in good humor. H. Meyers of Council Bluffs, Ia., made high score, 165.—GRIPPE.

At Columbus, O.

The Florists' Club held a bowling meet March 17. No exceptional scores were made. McKellar and Reichert had quite a contest in which Reichert finished second.

CARL.

Highways and Byways.

Sheboygan, Wis.—J. E. Matthewson has purchased glass and contemplates building. He reports business good, with good collections. His stock of spring bedding plants is larger than ever.

Manitowoc, Wis.—H. F. Altman has turned his business over to his sons. H. F., Jr., has lately become a benedict. The specialty of this place is freesias, of which nearly 50,000 cut blooms were marketed.

Appleton, Wis.—The culture here is radically different from most places. Bulb stock has been untouched for several years, not being replanted, but treated to a generous top-dressing.

Hugo Rudolph, who now owns the Levenhagen place, has the stock in excellent shape.

Fond du Lac, Wis.—E. Haentze is one of the old school of exact methodical craftsmen now seldom found. In his establishment are to be found the best of the old methods and a conservative acceptance of all modern ones. Mr. Haentze for many years has made a specialty of seed growing of herbaceous stock and of late leaving the management of his cut-flower range to his sons. His collections of annuals and commercial varieties of gladiolus are well worth a trip in summer to view. He is a type of the successful commercial florist, not an idealist, but a practical craftsman with a monetary result in view.

Florists' Supplies and Wire Designs.

St. Louis.

PRICES ADVANCE.

The market since last Sunday has stiffened considerably. The demand came with St. Patrick's Day and the wearing of greened carnations is becoming a fad more and more every year. West End retailers as well as downtown ones spoke of the increased demand. There were during the week also many store openings and cut flowers and floral arrangements used thereat helped to swell the demand. Carnations sold well at $1.50 and $2. Violets are daily becoming less plentiful, and it is thought another week will finish them, although perhaps the cooler weather will prolong them some. Stock in general arrived less freely. The plantsmen are beginning to get around and the flower stands at the market are daily beginning to wear the appearance of spring. Easter is only four weeks off and retailers are looking around for their supply of lilies and other blooming plants. Sweet peas are more plentiful and soon these will take the place of violets for street wear.

NOTES.

John Bentzen, son of Adolph Bentzen, of the Bentzen Floral Co., together with his partner, Joe Koer, aside from his floral business, is dealing in squabs. John is quite a pigeon connoisseur and he claims it is a very profitable business.

The Horticultural Society will hold a fall show in November and the preliminary premium list will be out in a few days. Copies may be had on application to Secretary Otto G. Koenig, 6473 Florissant avenue.

The sudden disappearance of Nath. M. Kingsley, of the Mullanphy Floral Co., cannot be accounted for. His partner, Wm. A. Seeger, Jr., fears some misfortune has happened to him.

The St. Louis Seed Co. is very busy; its counter trade is immense and constantly on the increase.

C. Young & Sons Co.'s plant trade is now moving. This firm is very busy in all lines.

The Michel Plant & Bulb Co. is busy with tree planting and other work.

A. L. RANDALL CO.,
19-21 Randolph St., CHICAGO.

New York.

A BRIGHTER OUTLOOK.

Though the past week brought no increase in prices worthy of note, there was quite a lively movement of stock on Saturday with a better feeling, both in the wholesale district and the retail stores. There is some prospect that there may be a decrease in the supply for the remainder of March, a consummation devoutly to be hoped for. There has been times when it was dismal news for the district that roses and carnations were off crop, but such tidings can strike no terror at present. The slings and arrows of adverse fortune have landed heavily on a few dealers, in different branches of the trade, but the majority are still smiling and hopeful.

NOTES.

Anton Zvolanek of Bound Brook, N. J., is frequently seen in the wholesale district looking after his sweet pea interests. A prominent New Yorker, who greatly admires the splendid white sweet pea, Mrs. Geo. Lewis, introduced by Mr. Zvolanek, says, that his practice of naming his productions after honored patrons of horticulture might well be copied by other originators, some of whom, he says, seem to delight in nomenclature that is nerve racking if not jaw breaking.

The Holly Steam Engineering Co., of 135 East Fifteenth street, is receiving very flattering letters of commendation of its "standard electric circulator." One prominent grower writes: "I believe that in the average hot water plant, double the results could be obtained from the same boiler capacity by the use of your circulator; by using the circulator the water on the return was practically as hot as it was when it left the boiler."

President Traendly of the S. A. F., accompanied by Mrs. Traendly, left here March 21 and will be present at the rose conference and exhibition at Chicago. Others from this city and vicinity who will attend are John Young, E. V. Hallock, Harry O. May and wife and L. B. Coddington and wife. It is unnecessary to add that President Simpson and Secretary Hammond of the American Rose Society will be early on the ground.

Young & Nugent have recently had a number of very striking and attractive window decorations. In all kinds of decorative and design work, this firm is always strictly up-to-date.

It will be pleasing news to the many friends of H. D. Darlington of Flushing, that his estimable wife who has passed through a serious illness, is now rapidly recovering.

H. E. Froment is handling a large quantity of fine rose stock, much of which comes from the range of L. B. Coddington, Murray Hill, N. J.

Cincinnati.

TRADE IMPROVING.

We are glad to report a steady increase in business for the past 10 days and only hope the same will continue. The flowers received at the present time are exceptionally fine, the weather ideal for growing purposes and our only anxiety at this writing being what we will have to offer at Easter as there are a great many inquiries for stock coming along at this early date. Roses were never better in quality and all wants are easily satisfied. The carnation glut seems to have spent its force as all flowers received are sold out at what might be considered fair prices. Violets are slacking up considerably and of course the demand is on the increase, although the price remains the same. Sweet peas are coming along in fine shape but the demand is not equal to the supply. Bulbous stock is being moved at better prices and we hope conditions will improve as the growers who force bulbs ought to at least be reimbursed for the cost of the bulbs. Green goods seems to be growing scarcer and there is a good demand; very little of this has to be carried over.

NOTES.

Will Murphy and Tom Windram took a trip to Richmond, Ind., last Thursday and are very enthusiastic in what they saw in the line of seedling carnations at The E. G. Hill Co.'s establishment.

Peter Olinger of the firm of Weiland & Olinger, states that the first carload of glass for the new addition has arrived at New Castle, Ind., and they will proceed to get busy immediately.

Miss Edith Kyrk of Avondale had the family order for the Stix funeral. The blanket was a most artistic piece of work in which she used orchids, white roses, lily of the valley and violets.

S. S. Skidelsky, Philadelphia, Pa., who was a recent caller is under the impression that the hard times have spent their force and is very optimistic about the future.

A. Sunderbruch's Sons had the decorations for the spring opening of The John Shillito Co. This was a very large job and took some extra effort to handle it.

Mrs. Kresken has been exceptionally busy of late with funeral work and Tromey's Flower Shop employes worked overtime getting out orders.

Tom Windram is consigning some exceptionally good carnations to The J. M. McCullough's Sons Co. Tom grows his carnations very cool.

Frank Benson, of Newport, left Tuesday evening for Oklahoma, where he intends to locate if conditions prove satisfactory. S.

Buffalo.

BULBOUS STOCK TOO PLENTIFUL.

Flowers, more especially the bulb stock, are in over supply. Bargain and snap signs are everywhere to be seen and prices away down. The near approach of Easter will have a tendency to stop the sales for a time and the flower-buying public will again realize that flowers grow and are not manufactured in case lots and sold at a receiver's sale. Carnations are not quite as plentiful as they were two weeks ago, but roses are a glut and Bride, Bridesmaid, Killarney and Liberty have sold for three cents each. Violets, a bunch of 50, have been selling for 25, 35 and 50 cents.

NOTES.

The outlook for stock in this city for Easter is very bright with the Wm. Scott Co., S. A. Anderson and W. D. Newlands & Son. Lilies are fine, also Baby Ramblers, hybrid roses, azaleas and all Easter plants. C. F. Christensen, of Eggertsville; Schwerdt & Berner, Forks; Ruehling & Son, Forks, and Wm. C. Stroh, of Attica, are all in good shape, and should have a good lot of stock.

S. A. Anderson and wife were in Cleveland and Lorain, O., last week for the launching of a very large boat, owned by some local concern. Mr. Anderson had a very beautiful harp of the Brian Boru shape in his window for March 17. It was made entirely of golden leaves, which were leucothoe covered with gilt, and surrounded by electric lights; the effect was grand.

The first contingent of the S. A. F. executive committee arrived in this city Sunday, bound for Niagara Falls, headed by President Traendly, John Young, Theo. Wirth, Geo. Asmus and others. There is every indication that the executive committee will be very busy getting things in shape for the convention.

You cannot keep a good man down. Every effort is being made by the democratic party to induce Wm. F. Kasting to take the appointment of councilman to succeed the late John McManus. We hope he will accept, as one like him is needed in our council.

Visitor: Edward Fancourt, Philadelphia, Pa.

The regular monthly meeting of the Commercial Florists' Association was held March 14. There was a good attendance of members and six new members joined the association. Quite an interest was taken in a fine showing of carnations sent for the inspection of the members. The exhibitors were Baur & Smith, Indianapolis, Ind.; White Bros., Gasport, N. Y.; E. H. Ruestow & Co., Barnard, N. Y.; Hugo Teute, Brighton, N. Y., and the Pennock-Meehan Co., which had a vase of Mrs. Jardine roses.

George Bennett is busy building a new greenhouse and dwelling house on his new farm on the Charlotte boulevard.

Edward Latz of Clinton avenue reports a good trade in cut flowers and plants. F. W.

Nyack, N. Y.

Growers here seem undismayed by the hard-times talk that has been floating around; they are all busy, which, by the way, is the best panacea for the blues.

Dutcher & Son have a flourishing crop of sweet peas coming on which will be marketed in time to make room for the planting of chrysanthemums. In addition to their greenhouses, they also do a wholesale commission business in New York.

Robert Y. Pye is showing fine stock in roses and carnations, noteworthy being many young plants in fine condition.

At their large, well equipped and centrally located range, De Pew Bros. have good stocks and seem prosperous.

SUPPLY SHORTENS SOMEWHAT.

Crops have shortened up a bit, the shipments for this market being noticeably lighter the past week. This particularly applies to carnations, there being a falling off of at least one-third over the quantities received the week before. The quality still continues fine and prices are from 50 cents to $1 per 100 higher. The first shipments of southern daffodils of any moment arrived last Friday and Saturday. They were, in the main, of very good quality and sold for from $2 to $3 per 1,000. If this fine weather continues the market will soon be flooded; as it is, the streets on Saturday last were yellow with the great quantities offered by the fakirs, who sold them as low as 10 cents per bunch of 25 blooms. This will affect all other small flowers for the time being, as when sold at such low prices the daffodils are great favorites with the masses. American Beauty roses are very plentiful and the specials are hard to move at anything like prices that the growers ordinarily hope for at this time; $2.50 per dozen is high and in quantity lots much lower figures prevail. Sweet peas are very plentiful but sell well, as they are very popular. Giant daisies are fine, 75 cents to $1 being the price. Lily of the valley is a trifle scarcer; some of the growers appear to be holding off, as the low prices prevailing do not net them the price of the pips. Violets are very plentiful, the warm weather bringing them along faster than they can be sold, although the demand is good. The street men handle an immense quantity. The advance guard of the Easter plant stock is making its appearance, genistas, Easter lilies, bougainvilleas, spireas, rhododendrons, cinerarias, daisies, azaleas and other favorites are seen in the stores and enter largely into the window decorations. It is thought, by some of the growers, that the bulbous stock will hardly last for Easter, as it being so late there will be difficulty in holding it, particularly if a hot spell sets in the week before, as is often the case about the middle of April. The commission men are bearing up well under the large loads they are obliged to carry and now the flood of southern daffodils is on, it is still harder. These latter are in many cases not potted up, being sold for the most part in case lots. It is astonishing where all the stock goes to, but it gets sold somehow, at some price, and the yearly average must be satisfactory, as each season sees 10 to 15 per cent more glass added to many of the plants which, together with the new establishments which spring up each season, shows that the trade as a whole is satisfied with present results.

NOTES.

Wm. McKissick is much pleased with his cold storage for carnations, which is situated in the basement. Cold air from the outside is admitted to the bottom of the room through a shaft at one end, while an opening at the top at the other end, provides for the necessary ventilation. While his stock is kept constantly moving, he finds that flowers received the night before, when potted up and left in this room over night are in fine condition for selling the next day.

The Leo Niessen Co. is handling the new pink rose, Wyndmoor, in quantity. It certainly has a beautiful color and looks like an acquisition. American Beauty galore, of the very highest grade, is seen here, and at the low prices is selling well. Something very choice in cattleyas was received last week. Such stock should sell at sight.

John McIntyre's first shipment of southern daffodils, reached him Saturday last and were all disposed of within the hour. He expects to handle large quantities and says that none of them will get on the street. K.

Baltimore.

BUSINESS ONLY FAIR.

The most delightful weather continues, and the spring promises to be an early one. Vegetation is progressing rapidly and unless there are some set-backs in the way of cold waves or snowstorms, the normal average will be anticipated by several days. The ground is clear of frost and farming and gardening operations are all being pushed ahead under very favorable conditions. Outdoor gardens show signs of life and all nature will soon be astir. There cannot be said to be any marked improvement in trade. Some large funerals last week called for liberal supplies, notably that of United States Senator William Pinkney Whyte, where a great display of rather handsome floral designs, mainly wreaths and bunches, was in evidence. There seemed to have been no very choice selections of materials, however. The southern narcissus crop is on, and the city is a yellow one, indeed. The street vendors found a good trade in these flowers, but as the overwhelming quantities come in later they usually soon satisfy the popular taste. Roses and carnations are well maintained as to quality, and it is hard work to keep the supplies cleaned up. Prices are unsatisfactorily low. Growers are beginning to turn their eyes towards Easter as promising more satisfactory conditions.

NOTES.

James Hamilton, of Mt. Washington, who has been steadily at work all winter in enlarging and perfecting his plant, has now one of the largest florist's establishments in this vicinity. His houses are large structures, very substantially built, with large glass and all conveniences for economical work. The entire range is heated by a 65-h. p. steam boiler of the Scotch marine type, the fire being all inclosed, and no bricking up necessary. The products of combustion go through two series of tubes, so that all the gases are consumed. The boiler is from the Gem City Works of Dayton, O., and was built on plans prepared by Mr. Hamilton. The main crops here are carnations, roses and chrysanthemums, and of the last named great quantities of rooted cuttings or young plants are produced and marketed all through the country. Besides these staples a miscellaneous stock of bedding plants, etc., is grown. Chas. M. Wagner is foreman on the place.

The Johns Hopkins University authorities have decided to erect a greenhouse on their new site at Homewood. The structure will be located in the botanic garden, and its construction will be designed so that an arrangement of plants may be made illustrating the variations of plant life in systematic order. Of course this precludes any very showy effects, the object being not to present collections of flowering or foliage plants, but to be serviceable in instruction and investigation in botanical science.

TRADE LOOKING UP.

Trade the past week has taken on a new lease of life and it now looks as it the usual standard has again returned. The past week with the decorators has been a busy one as the many spring openings for the larger stores and the opening of the automobile and motor show used flowers and plants to a considerable extent. Excepting American Beauty there is a plentiful supply of roses in all varieties; the quality is exceptionally good and prices are more steady. With carnations there is an over supply in all varieties and some excellent stock is going at very low figures and at considerably less than they have ever reached in this city. Lilies, sweet peas and violets are still plentiful and flowering plants give the stores a very spring-like effect. St. Patrick's Day was very cold but this could not interfere with the loyal sons of Erin and "The wearing of the green." Shamrocks in pots and fancy arrangement met with a good sale and greened carnations were quite in evidence. Funeral work has been plentiful but society functions needing decorations are few. Palms and ferns are scarce.

NOTES.

The Florists' and Gardeners' Club gave its annual at home, March 17, and the affair was a brilliant success. It was pleasing to see so many ladies in attendance and an enjoyable evening was the result. The musical programme was a good one, the elocution brilliant and the refreshments enjoyed by all.

Robert Abbs' stock was never in better shape, but as he has one firm who contracts for his entire output he is wearing the never ending smile. Carnations and sweet peas comprise the bulk of his establishment though a little bulbous stock is also grown.

R. Jennings, of Brampton, is cutting carnations in quantity, but his stock is of such excellent quality that he has no difficulty in getting his regular customers to take all his stock; sweet peas are also fine with him.

Very little glass will be put up in this section the coming season as most of the growers will content themselves with remodeling their present establishments.

Quite a number of store helpers have inquired here for work; most of these come from the United States and look capable.

E. J. Fancourt, of the S. S. Pennock-Meehan Co., Philadelphia, Pa., has been here looking up orders.

JOHN W. McINTYRE,

1601 Ranstead St., PHILADELPHIA.

Southern Daffodils, Trailing Arbutus, Single Violets and Yellow Daisies in any quantity.

Brampton, Ont.

Trade has picked up again in this locality until the demand and the supply are about equal. During the fore part of Lent, business dropped until there was considerably more stock around than could be handled, but it has gradually worked back until almost everything is being cleared up again, and with prices about the same as last year. Roses are coming along in good shape now, hardly as many as there were a couple of weeks ago, but of good quality. American Beauty has been rather scarce but is doing better now and will be plentiful again in a week or two. Carnations have been plentiful right along and will continue to be so by the look of the beds at the present time. The bright sun of the last few days has taken the color out of some of the pinks, but a little shade over the varieties most affected will overcome this. Sweet peas and violets are coming in in great quantities now and also all kinds of bulbous stock.

NOTES.

There will be considerable building in town again this year. The Dale Estate is putting up four new houses 22x350 feet. It will be a big proposition to get the site ready for them as they are to go on the side of a hill and there will be considerable leveling to do before they can commence any building operations.

We hear from Lambton Mills, that Carlton & Marks have dissolved partnership, and that Carl Marks has bought a piece of land and is going to make a start for himself. We wish them both every success in their separate ventures.

W. E. Calvert has a nice house of lettuce coming on. He is making a small addition to his house this year. Jas. Wilson is getting busy. He usually handles quite a lot of tomatoes in boxes besides cauliflower, celery, etc.

Market gardeners are beginning to show signs of activity. Lewis & Bird have dissolved partnership and the business will be kept on by F. Lewis; he expects to do a big trade this spring in pot plants.

Wm. Fendley is building one house to be used for propagating; it will be about 250 feet long.

L.

CUT FLOWERS OR DESIGNS will be Delivered for the Trade on Wire or Mail Orders in Best Qualities and Prices.

Philadelphia, Pa.
Robert Kift,
1725 Chestnut Street.
Prompt and Careful Attention given to all Mail and Telegraph orders.

New Orleans.

PREPARING FOR EASTER.

The carnival festivities are now over, and all are well pleased with the business done. Chicago furnished the bulk of the flowers except lily of the valley, Paper White narcissi and Roman hyacinths, which were grown here in abundance. Chas. Eble, U. J. Virgin and Mrs. C. Rehm had a large share of the demand, while the Metairie Ridge Nursery Co. did a large business in the cut flower and plant line. Decorative plants were in great demand. The trade now has resumed its normal state, being mostly wedding and funeral work. Preparations are being made for a large Easter trade.

SOCIETY MEETING.

The Horticultural Society held its regular monthly meeting on March 19, when, after the conclusion of the routine business President Eble stated the question of holding a grand flower and plant show this fall was in order. The committee in charge made its report and a liberal prize list was adopted for the members of the society. After a spirited discussion it was also agreed that growers outside the state would be invited to make displays, and a suitable prize would be offered for the best display of 12 varieties of chrysanthemum flowers; not less than three of a kind. A committee was appointed to secure a suitable hall at once and make a deposit on same, so as not to be disappointed as they were last year, and November 12 to 15 were the dates selected to hold the show. The prospects at present are very bright. The growers here are making great preparations to send some of the finest specimens of chrysanthemums ever grown in the south. Richard Eichling, grower for U. J. Virgin, displayed some nice specimens of lily of the valley and Easter lilies.

NOTES.

J. F. Dubois is now building three greenhouses, one 11x100, and one 18x100, to be connected, and one 12x35 for the cultivation of general stock for the local market.

Jas. A. Newsham left for Central America on March 17 to be gone about three or four months to gather a large collection of orchids for his fast increasing trade.

Frank Broker, gardener at the city park, is busy stocking the new greenhouse with a rare collection of choice plants.

C. W. Eichling has a fine stock of large hanging baskets of neprolepis and Asparagus Sprengeri, also adiantums.

A. Alost has made an addition of two greenhouses, each 20x200 feet, for the raising of cut flowers.

U. J. Virgin has a large stock of lilies in fine condition for the Easter trade.

Chas. Eble is progressing nicely with his new nephrolepis. D.

BENTONVILLE, ARK.—At the recent meeting of the Benton County Horticultural Society the following officers were elected: S. H. Shelton, president; S. W. Goode, vice president; I. B. Lawton, secretary; L. H. McGill, treasurer; H. W. Gipple, Julius Giger and Judge Jenkins, executive committee.

CARNATIONS IN DEMAND.

For the first time in a couple of months the market has been cleaned of carnations by the end of the week. From Monday until Thursday stock continued to come in large quantities and was sold at any price obtainable. Friday saw a decided shortening and by Saturday the demand for carnations exceeded the supply. The prices also took a decided jump; $2 and $3 was the price quoted Saturday, whereas $1 and $1.50 was quoted the fore part of the week, excepting select stock, which brought $2. American Beauty roses sell exceptionally well, especially long stemmed ones; the quality and quantity are improving. Bride and Bridesmaid are coming in such large quantities that some of the best stock is sure to go to waste regardless of the great efforts taken by the commission men to dispose of the stock. The last Roman hyacinths and Paper White narcissi were seen last week. Violets are decreasing in size and length of stem, owing to the warm weather we are having; it is doubtful whether single ones will be available for Easter. Spring has evidently come to stay, for we are having very fine weather for this time of the year, consequently the bulbous stock is advancing in spite of the great efforts taken to hold it in check.

NOTES.

Wm. A. Smith, West Madison avenue, is sending in exceptionally fine stocks and forgetmenots. Mr. Smith grows some of the best single violets that are sent into this market.

The Cleveland Florists' Exchange is handling large quantities of sweet peas and lily of the valley. Some very nice long stemmed American Beauty roses can be seen here.

Bramley & Son, Becker avenue, are turning out an unusual lot of funeral work. This firm's stock of Easter plants looks as though a large trade is expected about April 19.

L. F. Darnell, of the J. M. Gasser Co., has returned from Raleigh, N. C., where he was called by the death of his father.

The James Eadie Co. is having very pretty window displays of spring plants.

FORESTER.

Grand Rapids, Mich.

F. M. Strong, S. J. Perry, E. E. Taylor, Frank J. Cook and the Stover Floral Co., of Grandville, have joined themselves together in one large corporation, calling themselves the Grand Rapids Greenhouse Co., and will conduct a general greenhouse business, growing cut flowers, plants and all kinds of vegetables. This organization has been hanging fire for the past year, but on account of the money market it has been postponed from time to time. They have just issued $50,000 of first mortgage bonds which have been taken by the city banks and will take possession of the five establishments on April 1. They have just bought 3,000 boxes of glass and will build at once 125,000 feet of glass to be ready May 1, and will be planted as soon as ready to cucumbers. This will give them about a quarter million feet of glass, and the company will start out with a capital of about $175,000, with $150,000 all paid in. N. B. Stover, who has been doing business at Grandville and this city for the past 21 years, under the name of The Stover Floral Co., will superintend the florist branch of the company; the plant business will be retained and enlarged and a large area will be devoted exclusively to cut flowers. The officers of the company are: F. M. Strong, president; E. E. Taylor, vice president; Frank J. Cook, secretary and treasurer; S. J. Perry, general manager. The headquarters of the company will be at the Madison Square bank.

The Seed Trade.

American Seed Trade Association.
Geo. S. Green, Chicago, Pres.; M. H. Duryea, New York, First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-sixth annual convention, June 23 to 25, at Hotel Ponchartrain, Detroit, Mich.

CATALOGUES may now be sent through Australian ports by mail, free of duty.

"THE Germination of Vegetable Seeds" is the title of a bulletin just issued by the Department of Agriculture.

THE Country Gentleman of March 5 contains an excellent portrait of W. Atlee Burpee with an appreciative notice.

NEWSPAPERS have it that quite a new industry has sprung up in the neighborhood of Peru, Neb., in collecting catalpa seeds for Iowa nursery firms.

PHILLIPE DE VILMORIN, of the firm of Vilmorin-Andrieux & Co., Paris, France, was recently elected a fellow of the Linnean Society, of London, Eng.

ROCKY FORD, COLO.—The Rocky Ford Seed and Melon Co. has been incorporated here. The incorporators are F. H. Hillfiker, L. B. Deemer and W. B. Gobin. The capital stock is $25,000.

FLOWER SEED shortages to date are reported as follows: Delphinum formosum, Adlumia cirrhosa. Viola odorata, Salvia farinacea, Asparagus Comorensis, Gourd Dipper, Ipomea Leari, annual larkspurs, Lobelia erinus, Lathyrus latifolius and L. albus, four o'clock, Convolvulus major, Luffa acutangula and many asters.

THE Bureau of Plant Industry, Department of Agriculture, Washington, D. C., advise that they know nothing of the report that congress has cut down the number of packets of seeds allowed for the coming congressional distribution adding, that the committee on agriculture in congress in the house has not yet reported the agricultural bill to the house.

HARRISBURG, PA.—The seed business today is remarkably strong. There is an enormous demand for seed corn throughout this section of the country. Fortunately for us we have secured some excellent corn which will test 90 to 95 per cent, and will be in a position to supply the wants of the farmer. Corn throughout this section of the country is of no value whatever—plenty of it has been thrown out on the field as the stock will not eat it as it has become moulded, hence this is a considerable loss to the farmers as they will all have to buy their seed corn. There is a great demand for seed oats and clover, although at enormously high prices. We note, however, this year there is more alsike being sold than usual, and the farmers are paying any price to get good seed. The mail business has opened up, but so far it has not come up to last year. Seed potatoes are also greatly in demand.—HOLMES SEED CO.

Braslan Seed Growers' Co.
Growers for the Wholesale Trade Only.
SAN JOSE, CAL.

CLEVELAND, O.—Huigbert Keur, a wealthy tulip grower of Hillegom, Holland, is suing Henry Eickhoff, Frank E. Baurs and Emil Heidenblut for sums totaling $800 for unpaid bulb bills. The florists say the bulbs were useless when they arrived.

FLORAL PARK, N. Y.—John Lewis Childs reports January business slack but February very good. The orders March 11 exceeded those of any day of 1907. The firm looks for the height of the spring trade on March 16 or 23 and does not think the general business depression is reflected very largely in the seed trade.

ROCKFORD, ILL.—During four days, March 2 to 5 inclusive, a business of $36,000 was done by the money order department of the postoffice. Orders to the Buckbee and Shumway concerns for four days aggregated $15,000, the sums running from 25 cents to $6. with a probable average of $1.50. Probably the smallest money-order ever sent to the local office was for five cents in favor of H. W. Buckbee.

Seedsmen on Mann's Bill.

Seedsmen consulted regarding the proposed seed bill (H. R. 13835) where all are without exception agreed that because of the nature of seed crops, this act as now reported, would place practically every dealer in imported seeds in the position of a violator of the law, since even one or two per cent of dead or unfertile seeds in any imported stocks would class them as adulterated under lines 17 to 19, page 3, of the proposed act as printed in this issue.

Further, those of the trade consulted, believe that it should be made a part of the law that no person should be prosecuted under the act, unless the seeds offered or sold are below the certain standards of quality for each variety, which standard they hold should be used by the United States Department of Agriculture before any such act is made a law.

Vice-President Bolgiano, of Washington, D. C., reports that, while the Department of Agriculture and its assistants were given a hearing before the interstate and foreign commerce committee of the house of representatives, no hearing whatever was granted to commercial seedsmen whose interests are vitally affected.

The Perennial Font.

We see that the house committee on agriculture is enamoured of James Wilson's department. That was to have been expected. A careful examination of Circular No. 591, lately issued, reveals to us the causes of the affection which now manifests itself in a disposition to increase the estimates and to give Mr. Wilson more, much more, than he had originally asked.

Consider for a moment the bulletin on "Deciduous Fruit Insects and Insecticides," or that on wax moths. Bathe your soul in "Forage for Hogs in Kansas and Oklahoma," and then dwell upon "The Tuna as Food for Man." There are others, of course, such, for instance, as "The Production of Easter Lily Bulbs in the United States," "The Supposed Relationship of White Snakeroot to Milksickness." and a whole lot more. You catch the point, however. You see the relation. That is enough.

The chairman of the committee on appropriations and one of Uncle Joe Cannon's right hand men, may get his knife out and brandish it, but what of that? The Department of Agriculture goes on forever. Year by year its personnel increases, its buildings multiply, its salaries swell and swell again. And who that reads about "The Available Energy of Red Clover Hay" or "The Results of Loco Weed Investigations in the Field" will hesitate one moment? Of course the Committee on Agriculture is favorably disposed. It is the most natural thing in the world that it should be.—New York Sun.

Imports.

During the week ending March 14, imports were received at New York as follows:

McHutchison & Co., 158 pkgs. six cases plants, 10 cases trees.

P. Ouwerkerk—71 cases trees.

Wm. Elliott & Sons—41 cases plants, 13 cases trees and shrubs.

Vaughan's Seed Store—31 cases trees, seven cases plants, one case flower roots.

The Proposed Pure Seed Act.

A Bill to Regulate Commerce in Adulterated and Misbranded Seed and to Prevent the Sale or Transportation Thereof and for other Purposes, by Representative Mann of Illinois, Introduced January 15, 1908, Referred to the Committee on Interstate and Foreign Commerce and Ordered to be Printed.

This bill (H. R. 15835 of the first session of the 60th congress) introduced by Representative Mann of Illinois, January 15, 1908, was referred to the committee on interstate and foreign commerce and ordered to be printed.

On March 20 the bill was reported with amendments, referred to the house calendar, and ordered to be printed. The text of the bill as amended is as follows:

PAGE 1.

A Bill to Regulate Commerce in Adulterated and Misbranded Seed and to prevent the sale or transportation thereof, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled. That the introduction into any State or Territory or the District of Columbia from any other State or Territory or the District of Columbia or from any foreign country or the shipment to any foreign country of any seed or bulbs adulterated or misbranded, within the meaning of this Act, is hereby prohibited; and any person who shall ship or deliver for shipment from any State or Territory or the District of Columbia to any other State or Territory or the District of Columbia or to a foreign country, or who shall receive in any

PAGE 2.

State or Territory or the District of Columbia from any other State or Territory or the District of Columbia or foreign country, and having so received shall deliver or offer to deliver, in original unbroken packages, for pay or otherwise, to any other person any seed or bulbs adulterated or misbranded within the meaning of this Act, or any person who shall sell or offer for sale in the District of Columbia or any Territory of the United States any such adulterated or misbranded seed or bulbs, or export or offer to export the same to any foreign country, shall be guilty of a misdemeanor, and for such offense be fined not exceeding two hundred dollars for the first offense, and for each subsequent offense not exceeding three hundred dollars, or be imprisoned not exceeding one year, or both, in the discretion of the court. The Secretary of Agriculture shall make uniform rules and regulations for carrying out the provisions of this Act.

SEC. 2. That the term "seed" as used in this Act shall include all vegetable, flower, cereal, grass, clover, forage plant, and other agricultural and horticultural seeds intended for seeding purposes.

SEC. 3. That for the purposes of this Act seeds and bulbs shall be deemed to be adulterated:

First. If seed purporting to be orchard-grass seed contain more than two per centum of seed of rye grass or meadow

PAGE 3.

fescue; if seed purporting to be Kentucky bluegrass seed contain more than two per centum of seed of Canada bluegrass; if seed purporting to be red-clover seed contain more than two per centum of seed of yellow trefoil; if seed purporting to be alfalfa seed contain more than two per centum of seed of yellow trefoil, burr clover, and sweet clover singly or combined; or if any seed or bulbs purporting to be of one kind or variety contain more than two per centum of another kind or variety, such other seed or bulbs being similar in appearance or of lower market value: Provided, That no seed or bulbs shall be deemed adulterated within the meaning of this paragraph when it is accompanied by a statement or label in the form and manner prescribed by the rules and regulations in this Act provided for, giving the name and amount or proportion of each of the kinds or varieties of seeds or bulbs contained therein.

Second. If seed of red clover, alsike clover, alfalfa, or Egyptian clover contain seed of dodder; or if any seed contain weed seed, rendering it unfit for seeding purposes: Provided, That the provisions of this paragraph shall extend only to seed intended or offered for export to or imported from a foreign country.

Third. If any seed or bulbs contain, respectively, dead seed or dead bulbs or any other matter materially reducing the value for seeding or planting purposes: Provided, That

PAGE 4

this paragraph shall extend only to seed and bulbs intended or offered for export to or imported from a foreign country.

Fourth. If there shall be added to seed any weed seed or dead seed or any other matter materially reducing its value for seeding purposes.

SEC. 4. That for the purposes of this Act seed and bulbs shall be deemed to be misbranded:

First. When one kind or distinguishable named variety of seed or bulbs shall be offered for sale under the name of another kind or distinguishable named variety of seed or bulbs.

Second. If in package form, and the contents are stated in terms of weight or measure, they are not plainly and correctly stated.

Third. If the article be falsely labeled or branded as to the State, Territory, locality, or country in which it is raised or produced.

SEC. 5. That no dealer shall be prosecuted under the provisions of this Act when he can establish a guaranty signed by the wholesaler, jobber, or other party residing in the United States from whom he purchases such articles, to the effect that the same is not adulterated or misbranded within the meaning of this Act, designating it. Said guaranty to afford protection shall contain the name and address of the party or parties making the sale of such articles to

PAGE 5

such dealer, and in such case said party or parties shall be amenable to the prosecutions, fines, and other penalties which would otherwise attach in due course to the dealer under the provisions of this Act.

SEC. 6. That the Secretary of the Treasury shall deliver to the Secretary of Agriculture, upon his request, from time to time samples of seed and bulbs being imported into the United States or offered for import, giving notice thereof to the owner or consignee, who may appear before the Secretary of Agriculture and have the right to introduce testimony, and if it appear from the examination of such samples that any seed or bulbs offered to be imported into the United States is or are adulterated or misbranded within the meaning of this Act, or is or are otherwise falsely labeled in any respect, or is or are of a quality forbidden entry into or forbidden to be sold or restricted in sale in the country from which exported, or is or are intended for adulteration purposes, the said seed or bulbs shall be refused admission under such regulations as the Secretary of the Treasury may prescribe: Provided, That the Secretary of the Treasury may deliver to the consignee such seed or bulbs, pending examination and decision in the matter, on execution of a penal bond for double the amount of the full invoice value of such seed or bulbs, together with the duty thereon, and on refusal to return such seed or bulbs for any cause to the custody of the

PAGE 6.

Secretary of the Treasury when demanded, for the purpose of exclusion from the country, or for any other purpose, said consignee shall forfeit the full amount of the bond.

SEC. 7. That the term "Territory" as used in this Act shall include the insular possessions of the United States. The word "person" as used in this Act shall be construed to import both the plural and the singular, as the case demands, and shall include corporations, companies, societies, and associations. When construing and enforcing the provisions of this Act, the act, omission, or failure of any officer, agent, or other person acting for or employed by any corporation, company, society, or association within the scope of his employment or office, shall in every case be also deemed to be the act, omission, or failure of such corporation, company, society, or association as well as that of the person.

SEC. 8. That this Act shall be known, described, and designated as the Pure Seed Act of 1908.

SEC. 9. That this Act shall take effect and be in force upon the expiration of six months after its passage.

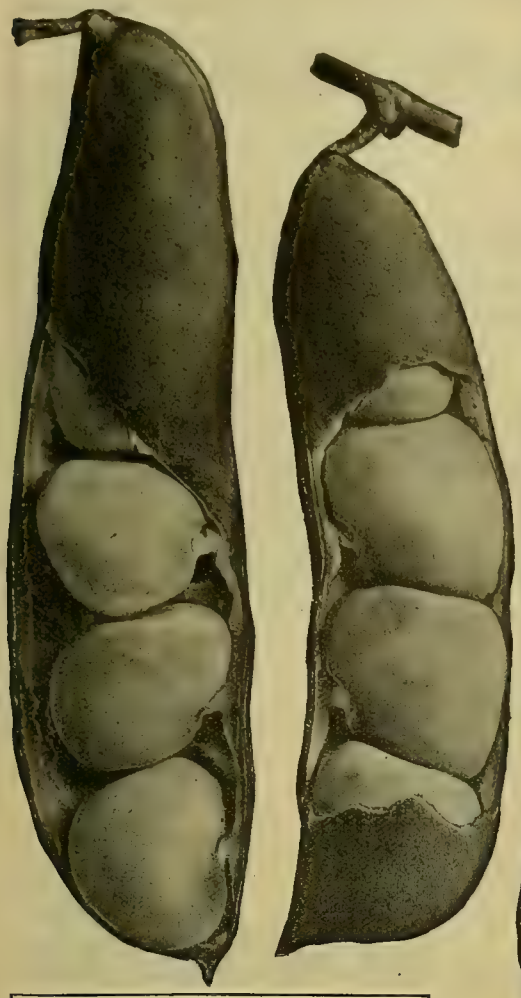
IN the homeward cross continent race of the California seed growers this week C. R. Kimberlin is reported in the lead at Cheyenne, A. J. Pieters a fairly close second, just leaving Rocky Ford, Farmer C. P. Braslan refilling his gasoline tank at Chicago, a distinct third, but still in the money.



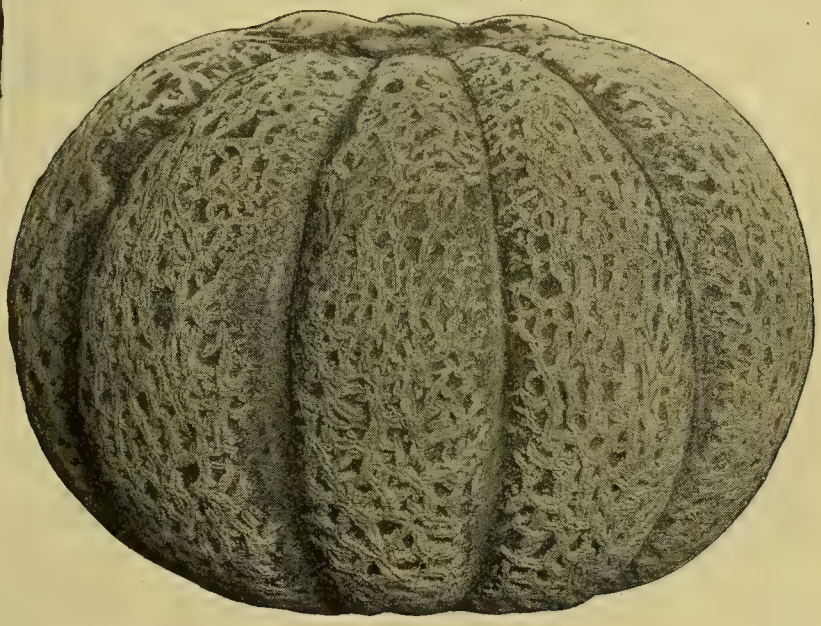
Fordhook Bush Lima Bean.

The only stiffly erect Bush form of the popular "Potato" Lima. Both pods and beans are twice the size of Dreer's Bush Lima and more than half again as large as the Challenger Pole Lima.

Fordhook Bush Lima is altogether unique. Nothing like it has ever been seen before! Of strong erect true bush-like growth (never prostrate or running), the bushes average twenty to thirty inches in height by twenty to twenty-four inches across the top. The foliage is of heavy texture and very dark green in color.

Like **Burpee's Bush Lima,** the stalks that produce the blossoms are thrown out from the lateral and main stalks; the pods are borne in "clusters" of from four to eight. The pods resemble those of the **Dreer's Bush Lima,** but average **more than double the size,** measuring from four to five and one-half inches long, about one and a quarter inches wide, by as much as three-quarters of an inch thick. The pods contain three to five large beans with an average of four.

Fordhook Bush Lima is fully thirty-three and one-third per cent. a heavier cropper and, therefore, bound to entirely displace the **Kumerle** (Dreer's or Thorburn's) **Bush Lima.** In season it is from four to six days earlier. **Per pkt. 10c. net; ¼-pint 30c.; ½-pint 55c.; per pint $1.00.**



Burpee's Fordhook Musk Melon.

Fully equals our Emerald Gem in delicious flavor. So firm is the rough-netted skin, and so solid the thick salmon flesh, that the melons carry to market even better than do Burpee's Netted Gem,—the famous "Rocky Ford" Melon.

Fordhook Melon resembles the **"Improved Jenny"** in form; it is equally as roughly netted, while the skin showing between the netting, is emerald-green. The flesh is very thick, of an attractive deep salmon color and surpassingly sweet to the very rind. It is fully equal in flavor to the **Emerald Gem.** The beautiful salmon flesh, while so surpassingly luscious, is not only very thick, but also extremely solid. The rind, although thin, is unusually firm, so that the fruits carry well to market.

Fordhook Melon is most vigorous in growth, very early and extremely prolific. The fruits are ready for market fully as early as the green-fleshed **Early Jenny Lind.** The vines grow vigorously and each vine sets from five to nine melons immediately around the stem; frequently the fruits touch one another. The melons are remarkably even in size, weighing from 1 lb. 8 oz. to two pounds each. They are always of the handsome form and attractive appearance illustrated above. "FORDHOOK" is so **"thoroughbred"** that there are practically no fruits unfit for market. On page 43 of our **"Blue List"** we print letters from the originator and several others, all uniting to prove that this unequaled new melon is well worthy of the name FORDHOOK to emphasize that it is **"Burpee's Best" Cantalope.**

Per pkt. 10c. net; ¼ oz. 25c., ½-oz. 40c.; per oz. 75c. Postpaid.

BURPEE'S "BLUE LIST" for 1908

Most Complete of all Wholesale Seed Catalogs.

Burpee's Seeds Grow!

And the **Burpee Business Grows!**

Last year (our 31st) we sold more seeds than ever before in any one year and in 1908 we shall sell even more. You will understand "the reason why" when you read

Burpee's New Farm Annual For 1908

REGISTERED WAB TRADE MARK "THE SEAL OF QUALITY"

This complete book bound in lithographed covers and containing also six superb colored plates painted from nature, is YOURS for the asking—provided you have a garden and will mention where you saw this advertisement. It is an elegant book—the best seed catalog we have yet issued—and offers some most remarkable "NEW CREATIONS" in Vegetables and Flowers, which can be obtained only *direct from us.* Many a winter's evening can be spent profitably in planning your garden, by a careful study of this book. Shall we send you a copy? If you appreciate *Quality in Seeds* you will say *Yes!* If so, **write to-day**—do not put off and possibly forget until it is too late!

The Largest Mail-Order Seed House,
Burpee Building, Philadelphia

Catalogue Advertising.

The problem of how to get the seedsman's catalogue into the buyer's hands is apparently becoming more difficult each year. The mail order seedsman or plantsman must make his advertisement so attractive that every dollar spent in the newspapers or magazines shall bring him enough inquiries from real buyers to pay the cost of the advertisement. There are two plans in general use: The first, to get the reader simply to order the catalogue; the second, to make some bargain offers with the catalogue, the sales of which will help pay expenses. Those houses which include in their advertisements a bargain offer of some kind do so, of course, in the hope that by this method they make a slight profit towards paying for the advertisement and the catalogue out of the direct sales from the advertisement. Below are some samples of offers that are being made this year on the first plan, namely, the placing of the seed catalogue in the buyer's hands free of all cost to him:

Montgomery Ward & Co. offer 200 seeds of a new tomato and catalogue all free on postal request.

Emma V. White, a coupon for five packets of flower seeds and catalogue all free.

The Storrs & Harrison Co. free catalogue but no premium.

German Nurseries, packet of tomato seed with catalogue, free.

Wm. Elliott & Sons, send five packets seeds free with the catalogue free of postage.

Geo. W. Park gives floral guide, "gift package" and five packets flower seed free on letter request.

The Iowa Seed Co. offers 50 seeds Victoria aster and catalogue for postal request.

Of those who aim to make direct sales from advertisements the following are indicative of the kind of a bid the present day mail order seedsman must make to get direct business:

The Livingston Seed Co. offers five packets Giant pansies, all different, with catalogue for 10 cents, three sets for 25 cents.

The Holmes Seed Co. offers 10 packets with catalogue for 10 cents.

James Vicks' Sons give with catalogue four packets flower seeds or five packets vegetable seeds for 10 cents.

The Geo. H. Mellen Co. prepays six roses with catalogue for 25 cents.

The Great Northern Seed Co., Rockford, Ill., offers 81 varieties of vegetables and flowers with catalogue for 10 cents.

The Good & Reese Co., the Springfield, O., rose growers, offer a number of collections of plants, seeds and bulbs, but none less than 50 cents. This firm's catalogue is free.

For a 2-cent stamp a Pennsylvania woman offers to send one packet of aster seed and her course "Success with Flowers," by which $5 to $25 per week can be earned by anyone near a large town.

The Dingee & Conard Co. advertises a "dollar bill" rose offer, while the Conard & Jones Co., like the Good & Reese Co., is satisfied if it sells 50-cent collections.

Free Seeds.

We, together with many other citizens of the county, are under great obligations to Hon. Carter Glass, M. C., for five packages of government seed of the following very valuable garden truck: One tomato, one radish, one lettuce, one carrot and one parsnip, neither of which are worth planting, even if they would produce a crop without work. No sane man can understand why our great government continues to make a —— fool of itself in continuing this free seed nonsense.—Houston Record-Advertiser.

HARLINGTON, Middlesex, ENG

MARKET GARDENS.

HAVE the ground thoroughly warmed up before sowing small seeds or the weeds get started early and the crop comes in a poor second.

BOSTON, MASS.—About 120 members of the Market Gardeners' Association were entertained, March 14, by President W. W. Rawson, at his home in Arlington. In the forenoon the visitors inspected the buildings and greenhouses. After dinner Secretary J. B. Shurtleff spoke on "Farming in California"; Prof. H. F. Thompson of Amherst College, read a paper on "Manure as a Fertilizer, and Its Effect on Market Gardening." W. F. Rane, state forester, and H. M. Howard of the state board of agriculture, also spoke.

Notes in Season.

With the approach of spring the regular routine of a commercial place is easily upset. So many things crowd up for attention and action is so urgent, that good management is required to make the best of things. It is generally conceded that overtime does not pay. If short handed it is better to pay another man than wear out the regular help, while if overtime is not paid for the force will quickly get dissatisfied and make it felt sooner or later. There are two ways of overcoming this spring rush—preparation and extra help. It is too late for preparation now but make notes what to do another season and get the extra help at once if needed. To do this to best advantage, let the new comer do the rough work, such as digging, shoveling, wheeling of material, etc., and give the regular help a move to better work which they appreciate. Extra help at this time often pays big dividends.

A mistake easily made is to let temperatures run up in the morning, which is disastrous. Early ventilation gives best results. Another cause of trouble is trying to run with closed houses and no heat. Let the rule be either some air on or some heat. If the outdoor temperature runs high for a week, and the change comes, do not drop houses back from a night temperature of 65° to 40°, as this means standstill of crops; rather reduce a few degrees each day until to normal again. Last spring, during the warm spell in March, crops were thus softened and the following long cold wave caused a universal scarcity, from lettuce to roses and carnations. In many places a judicious use of extra heat would have overcome this. MARKETMAN.

Prices of Indoor Vegetables.

The prices of indoor vegetables at leading points March 21 were as follows: New York, cucumbers, No. 1, $1 to $1.50 per dozen; No. 2, $3 to $4 per box; lettuce, 25 cents to 75 cents per dozen; mushrooms, 25 cents to 50 cents per pound; mint, 20 cents to 30 cents per dozen bunches; radishes, $2 to $4 per 100 bunches; tomatoes, 15 cents to 25 cents per pound. Chicago, cucumbers, $1.35 to $2 per dozen; radishes, 15 cents to 30 cents per dozen bunches; mushrooms, 25 cents to 50 cents per pound. Cincinnati, cucumbers, $1.50 to $1.75 per dozen; mushrooms, 40 cents to 50 cents per pound. Pittsburg, cucumbers $13 to $15 per box. St. Louis, cucumbers, $1 to $1.50 per dozen. Boston, tomatoes, 30 cents to 40 cents per pound; cucumbers, $8 to $10 per box.

The Nursery Trade

American Association of Nurserymen.
J. W. Hill, Des Moines, Ia., President; C. M Hobbs, Bridgeport, Ind., Vice-President; George C Seager, Rochester, N. Y., Sec'y.
Thirty-third annual convention to be held at Milwaukee, Wis., June, 1908.

VISITED CHICAGO: H. C. Phillip, of Chase Bros., Rochester, N. Y.

SYRACUSE, N. Y.—Geo. E. Kessler's salary as landscape architect to the park commission has been fixed at $2,000 per year.

THE oriental plane is a splendid street and park tree. During the recent ice storm in Illinois and vicinity this tree appears to have suffered less than almost any other, while it is beautiful summer or winter.

NEWARK, N. J.—The board of works is adding 50,000 trees and 4,000,000 seedlings to the forestry reservation in the Pequannock watershed. Hardwoods were first proposed but pines and other conifers will be most largely planted.

SEATTLE, WASH.—The Puget Sound Nursery & Seed Co. states that its business is fairly good at the present time. Two carloads of nursery stock were received from Europe a short time ago and another is expected in a few days.

SALT LAKE CITY, UTAH.—J. Edward Taylor, secretary of the State Board of Agriculture, reported at the annual session of the board that an increasing interest has been noted during the past year in fruit growing all over the state.

AN English magistrate recently imposed sentence on a school boy who had damaged a tree belonging to the Ealing corporation. He ordered the boy to provide another tree, and plant it himself. This seems a thoroughly practical way to make the punishment fit the crime.

THE twenty-fifth annual report of the Minneapolis Board of Park Commissioners is a neatly got up book of 84 pages well illustrated with fine reproductions of pretty scenes in the various parks, the front cover picture being a charming view on Minnehaha parkway. There are also well executed plans of the various parks and much interesting reading matter.

AN American correspondent to one of the trade papers in England points out the weaknesses of the American Gooseberry Mildew act, noting the fact that any other tree or bush may be sent from this side even if grown alongside diseased gooseberry bushes or packed in material that may have wrapped diseased bushes. The writer instances this as "an interesting bit of red tape."

DALLAS, TEX.—Howard Evarts Weed of Chicago gave an interesting address here recently, advising the use of shade trees and saying that it was not enough to go to the woods and get a native tree and plant it in a hole in poor hard soil, but to obtain a properly grown tree from a nurseryman and dig a good hole for its reception. He spoke highly of the cleaning up campaign and urged its continuance here as well as in other cities.

Hydrangea Bretschneideri.

The late Dr. Bretschneider was for many years a member of the Russian legation at Pekin, China. He was a man of profound learning, and a most industrious botanist, and was held in high estimation by Dr. C. S. Sargent of the Arnold Arboretum, Harvard University. About 30 to 35 years since he sent a number of seeds collected from plants in the mountains and valleys around Pekin, to Dr. Sargent. A number of the plants raised from these seeds turned out to be important new shrubs and trees, for park and garden decoration. Perhaps the most valuable amongst them was the subject of this note—Hydrangea Bretschneideri.

It forms a spreading bush from four to six feet in height. The cymose clusters are produced from the ends of the branches and branchlets of the previous year's growth. The sterile, four petaled flowers around the outer edge of the clusters are very showy, and, when in bloom, a well developed bush presents a very ornamental appearance. It comes into bloom about the middle of June, and continues to make a good display until July. The faded flower clusters assume a pinkish tinge and are quite attractive throughout the season. It is perfectly hardy here and, considering that it is found native in northern China, Manchuria and Mongolia, it should prove hardy pretty well north. As most of the hydrangeas flower late in the season, H. Bretschneideri, flowering as it does in June, is a most important acquisition to the genus. It has been sent out from European nurseries under the name of H. Pekinensis, and it was known under the name of H. vestita var. pubescens, Maxim, for a number of years.

Hardy Roses for the Garden

STRONG FIELD-GROWN PLANTS

The roses here offered are extra strong two-year-old field-grown blooming plants, which if planted early, will give a large number of flowers the first year. They can be planted as early in the spring as the frost is out of the ground, and from that time until about the first week in May. We offer a grand collection of the best and choicest varieties, as follows:

HYBRID PERPETUAL OR JUNE ROSES

Frau Karl Druschki, Marchioness of Londonderry, Capt. Hayward, Mrs. R. G. Sharman-Crawford, Ulrich Brunner, Margaret Dickson, Baron de Bonstetten, Paul Neyron, Gen. Jacqueminot, Magna Charta, Mrs. John Laing, Mme. Gabrielle Luizet, Marshall P. Wilder, Gloire de Paris, Baroness de Rothschild, Prince Camille de Rohan, Fisher Holmes, Alfred Colomb, Soleil d'Or, Persian Yellow, Moss Roses, Rugosa alba and rubra, etc.

MONTHLY AND HYBRID TEA ROSES

Etoile de France, Killarney, Mme. Abel Chatenay, Countess of Gosford, Koenigen Carola Perle von Godesberg, Gruss an Teplitz, Maman Cochet, White Maman Cochet, Belle Siebrecht, Hermosa, Mme. Caroline Testout, Souv. de Pres. Carnot, Kaiserin Augusta Victoria, American Beauty, La France, Clothilde Soupert, Prince de Bulgarie, Mme. Norbert Levavassuer (Baby Rambler), Anny Muller (Pink Baby Rambler), Catharine Ziemet (White Baby Rambler), etc.

In Climbing Roses we have a nice stock of Crimson Rambler, Lady Gay, Dorothy Perkins, Dawson, Gardenia, Tausendschon, etc.

Let us know the quantity you want and varieties, and we will be glad to quote lowest prices on same by return mail.

"MOST NORTHERN NURSERIES IN AMERICA"

L. L. MAY & CO., ST. PAUL, MINN.

Denver.

Unless the heirs of Walter S. Cheesman materially increase their $100,000 donation for the beautifying of Congress park as outlined in the plans of George E. Kessler, the landscape artist, Italian gardens and ornamental buildings, practically demanded by the Cheesmans in consideration of the donation, will have to be to such an extent that the beauty scheme will be scarcely more than an apology for Italian art.

Months ago the park board ordered the Kessler plans revised so as to come within the $100,000. This revision was intrusted to Architects Marean and Norton, when the mayor announced that the Cheesmans would not add a penny to the fund already given. The estimated cost of carrying out the Kessler plan was given as $175,000. The Marean and Norton revision, Mr. Kessler has informed the park board, will cost more than $100,000.

Kessler had intended to present the estimated cost of improvements according to the revised plans, to the park board March 17. But the price of marble demanded as the basis of construction by the Cheesmans is high. Mayor Speer and Kessler, assisted by experts, will now attempt to figure the cost down to $100,000.—Denver News.

We have an exceptionally large stock of the Lawsons, Victory, and Winsor.

Asparagus Plumosus, 6-in. stock for benching. $15.00 per 100; $125.00 per 1000.

Chrysanthemums in season. Price list mailed on application.

POEHLMANN BROS. CO., Morton Grove, Ill.

INDIANAPOLIS, IND. — The Indiana Horticultural Society, instead of holding its summer meeting at the state house as heretofore, will hold a camp meeting August 19 and 20, at Mitchell, where the society's experimental orchard of 20 acres is located. Tents will be erected and the sessions will be held in the orchard where the members may get the practical benefit of the work that has been done. Lectures will be delivered with the means of practical illustration at hand. The Department of Agriculture will send at least three experts to the meeting. Joe A. Burton is superintendent of the orchard. Twelve hundred seedling trees are growing at the orchard, besides 300 trees for testing growth. Two hundred trees of new varieties have been planted also for experimental work.

NEW NEW

RAMBLER ROSE

"NEWPORT FAIRY"

To be disseminated Spring 1908. Ask for illustrated pamphlet and prices.

JULIUS ROEHRS CO., Rutherford, N. J.

ENID, OKLA.—Spring is on to the full down here, writes Percy C. Cowan, with business very good and splendid prospects for the coming year. We do not know what hard times are in fair Oklahoma, while we are discovering that we can grow many unthought of crops and in some ways outrival even California.

THE LEEDLE FLORAL COMPANY, SPRINGFIELD, OHIO.

Washington.

BUSINESS DULL.

Business does not improve much. There is plenty of stock on the market but little demand for it. Carnations and bulbous stock are the most plentiful and lowest in price. Roses are in good supply.

NOTES.

The election of officers took place at the meeting of the Florists' Club, March 2, and in choosing F. H. Kramer as president by a large majority the club secured an energetic and progressive man for the post. The other officers elected are: John Robertson, vice president; Chas. R. McCauley, secretary, and Wm. F. Gude, treasurer.

J. J. Harty & Co., the commission men, are receiving fine shipments of Killarney rose, also good lavender sweet peas.

Chas. Davis of Ridge road is cutting some fine callas and double violets.

C. E. Brooks reports business a little slow but has some funeral work.

J. D. R.

Toledo, O.

TRADE GOOD.

Business with our retailers has been good of late, flowers selling well and also pot plants. The lilies will be all right for Easter. A large percentage of longiflorum and multiflorum had to be thrown away and the lilies in general are short in growth. Spireas will be good, and plentiful; roses, especially Baby Rambler, will be sufficient and a nice lot of hydrangeas will be in good shape. Bulbous stock has been plentiful, but the prices realized have not always been satisfactory and much less will be grown the coming season. Carnations are now plentiful and prices are low; large lots must be disposed of to outsiders at ridiculously low figures. Cyclamens in full bloom have not moved for a long time but begin now to go better with the prospect of being cleared up around Easter.

NOTES.

A good deal of building will be done this year. S. N. Peck will build two houses 20x112 for carnations and miscellaneous stock; this will bring his new range up to four houses of the same size. The Kruger Bros. Co. are going to start their new out-of-town range with two houses, one 30x250 and one 36x250 and a shed of 38x50; these houses will be devoted to carnations exclusively. John Gratopp will rebuild a few old houses and make one 36x92 out of same and add to another house 24x50, all to be for roses. C. Kaminski will build one house 20x100 for carnations. Harry Heinl will rebuild one 18x120 and one 10x100, the latter to be used for propagating. Paul Timm will start business with two houses 20x100, using the King construction.

J. L. Schiller will build one house 18x50, to be used for propagating exclusively. Schiller's specialties are rooted cuttings and seedlings of Primula obconica and Sinensis and cyclamens. He has had a big run on the everblooming Salvia Zurich; the 2-inch stock now being sent out is one mass of scarlet, a novel sight at this time of the year. SCH.

LITTLE ROCK, ARK.—An interesting meeting of the State Floral Society was held at the Hotel Marion March 11 and many speeches were given in favor of beautifying the city wherever possible by lawns and gardens. J. W. Vestal & Sons appropriately decorated the room with American Beauty roses.

LA FAYETTE, IND.—Rhea Reid rose is to be given a good trial by H. Roth in the new house he is building. There will be 24,000 square feet of bench space and this will be planted, partly with own-root and partly with grafted stock. John C. Moninger Co., Chicago, had the contract for some of the material used in the house.

GRAFTED ROSES.

NOVELTIES.

MRS. JARDINE, RHEA REID, QUEEN BEATRICE.
The above, $6.00 per doz., 50 plants for $18.00, $35.00 per 100.

Tacoma, Wash.

BUSINESS AND PROSPECTS GOOD.

We are having good business at the present time and the outlook is splendid. Stock taken as a whole is a great deal better than was sent in last winter and spring and there is a lot more of it. Prices hold the same. Carnations are not expected to be plentiful enough very long now; the plants are already being thrown out and tomatoes and cucumbers put in their place. Every year they are dumped for the sake of the vegetables and then there is a shortage through the balance of the season. At one place today the writer only looked and wondered to see several thousand splendid carnation plants heeled-in outside and replaced in the benches with yellow, dwarfed cucumbers, about five to seven inches high, and no carnations to be had at wholesale for less than 3 cents each. The carnations were in splendid crop and first-class as one bench left in could testify.

The battle in the greenhouses located in Point Defiance park is over and was in favor of the rats. Two of the three alligators confined there escaped from the pen and were found dead, killed by a number of rats. A most desperate battle had been fought as was evidenced by the way pots, plants, etc., were upset and ruined. Numbers seems to have prevailed as several dead rats were in the place. The alligators were about two feet long.

Five cases containing 125 varieties of palm seed have been received from Philadelphia by Superintendent Roberts of our city park system and will be grown to supply our new conservatory at present under construction in Wright's park. The many varieties of palms of the world are represented in the 125 kinds of seed and we look forward to the great pleasure and interest in botany and science that will be provided for study.

C. H. Halkier is at work on two new houses but we do not learn of any other glass going up here. H.

LOGAN, O.—H. Gomp & Son have their large new greenhouse now in working order and a fine crop of lettuce is being taken.

First Prize by the St. Louis Horticultural Society at St Louis, Mo., Nov., 1907.
Exhibited by The E. G. Hill Co.)

First Prize by the State Florists' Association of Indiana at Indianapolis, Nov., 1907.
(Exhibited by the Originator.)

Scored the highest number of points of any seedling exhibited at the Toronto Exhibition of the A. C. S. Jan., 1907, after arriving 24 hours late from Framingham, Mass.

Aside from these honors, the fact that it has been grown successfully wherever it has been tried is the best proof of its commercial value. Orders now booked by the undersigned, to be filled in rotation for well grown, well rooted cuttings at

$2.00 per doz.; $12 00 per 100; $100.00 per 1000.

C. B. KNUTH
11801 St. Clair Avenue,
CLEVELAND, OHIO.

SAN FRANCISCO, CALIF.—At the monthly meeting of the State Floral Society March 13 at the home of Mrs. H. P. Tricou, fine exhibits of spring flowers, wild and garden varieties, were arranged. The annual flower show will be held May 14-16.

PASADENA, CALIF. — The Pasadena Gardeners' Association announces its spring show for April 2-4 and will mail schedule on application. The schedule is very complete, comprising flowers, plants, vegetables and fruits. Richard Thomas, 308 Stevenson avenue, Pasadena, is secretary.

OKLAHOMA CITY, OKLA.—The park commissioners have announced through the local press that they will distribute free, to other cities in the state, cannas, in quantities ranging from 300 to 1,000 each, to assist in beautifying the public parks in these cities, the donors packing and delivering the cannas to the railroads free.

IOLA, KANS.—At the meeting of the Allen County Horticultural Society, March 14, the proposition of obtaining a library of horticultural books for the use of members was discussed and a committee formed to find out what books would be suitable. Several good papers were read and E. Klauman reported that Electric park had been offered to the society for its summer meetings.

DEFIANCE

PHILIP SCHUPP,

37 Randolph St., CHICAGO.

San Francisco.

TRADE DULL.

After quite a brightening up for a few weeks before the Lenten season, business has dropped to its usual dullness, the only hope being an occasional funeral order. Flowers of all kinds, even roses, are becoming quite plentiful; bulbous stock especially is quite a glut on the market. Violets are getting poor and their season will soon be over. The weather has been so mild this spring that even sweet peas are in bloom outdoors.

NOTES.

The Pacific Coast Horticultural Society held its monthly meeting March 7. There was quite a large attendance. Three candidates brought in applications for membership. Resolutions were adopted by the society to be sent to the California senators and congressmen calling for and recommending the creation of forest reserves in this state. Being unable to procure the nave of the Ferry building for the spring flower show, the joint committee of the Pacific Coast Horticultural Society and the California State Floral Society have engaged the Lyric hall for May 15-16. An attractive premium list will be sent out in a few days. The committee will spare no efforts to make this one of the best shows held in this city, especially on account of the many visitors, who will be here at that time for the reception of the Atlantic fleet.

The flower and plant business has grown wonderfully in the suburban towns on both sides of the bay; places where formerly no demand for flowers and plants existed are supporting florists and landscape gardeners. This has been occasioned by the late disaster driving thousands of people out of the city, who were forced to buy lots where they could procure them at reasonable prices, to build up small homes for themselves. They are now beginning to beautify these homes by laying out the surrounding grounds and planting them with ornamental and flowering plants. To many of them, who, before the fire, would have hardly paid any attention to flowers and plants, this calamity has proved a blessing in disguise, as they are now becoming acquainted with nature and are thereby improving in health and happiness.

On a recent visit to the growers I found the lilies in a not very promising condition, in most establishments and over half had been thrown out on account of diseased bulbs; this will have a tendency to raise the price of lilies for Easter. P.

HOOD RIVER, ORE.—Designs have been accepted and contract signed for a mammoth floral float to represent this city in the All-Oregon parade of the June rose festival. Final arrangements were consummated between local business men and the executive committee of the festival, and the float-builders will begin at once upon the design selected. The float will cost in the neighborhood of $1,000 and will be symbolical of the principal industries of the fertile valley.

Smith's Chrysanthemum Bulletin

The following varieties are among the **Most Popular of the Commercial Sorts,** have been given thorough tests and not found wanting. **READY NOW.**

Early.

In this section are included those perfecting their flowers prior to Nov 1st.

BYER BROS., Chambersburg, Pa.

NEW CANNAS 1908

Rosea Gigantea. This beautiful variety has extra large flowers which are borne in such abundance that the mass of color on each plant is amazing. Single petals are 2½ inches across; color, a deep rich rose, almost a coral carmine. Plants make a vigorous growth, producing unusually fine clumps of green foliage. Height, 4 feet. (A great favorite with visitors to our trial grounds.) Strong plants, **$2.00** each, prepaid; **$18.00** per doz., by express, not prepaid.

Gladio-Flora. Remarkable for the unusual shape of the flowers which look like large Gladiolus. Petals are not long, but short and rounded and so wide they overlap each other, thus giving a very attractive appearance to the flowers. Color is crimson changing to carmine rose with an uneven edge of gold to each petal. Height, 3½ feet. Price, strong plants, **$2.00** each, prepaid; **$18.00** per doz., by express, not prepaid.

Meteor. Meteor is a vigorous grower with healthy green foliage. It is highly valued because of its magnificent flowers, fully four inches across, and abundance of bloom. Color is a deep crimson, very rich; each plant usually throws up five to six trusses of buds which continue blooming luxuriantly all summer through. Price, plants of dormant roots, **75c** each, postpaid; **$6.00** per doz., by express, not prepaid.

NEW CANNAS OF SPECIAL MERIT.

William Saunders. (1907) The flowers are large, of splendid form and are borne very freely in immense clusters. The color is a deep rich shining scarlet lightly dappled with crimson. Foliage is a rich bronze. Height, 3½ to 4 feet. We believe that Wm. Saunders is decidedly the most perfect Canna of this type that has been introduced. Those who tried Wm. Saunders in 1907 say it cannot be excelled. We offer plants only: **60c** each, postpaid; **$5.00** per doz., **$35.00** per 100, by express, not prepaid.

60 other varieties. Send for our list and prices.

SATISFACTION QUARRANTEED.

Sparkill, N. Y.

One of the rapidly growing industries of this city is the business of the Palisades Nursery Co. This concern, though not as old as some others in the same line of business, is showing commendable enterprise and seems destined to become one of the great horticultural enterprises of this part of the state. Having a fine natural situation with good soil, there seems no reason why it should not, under its present able management, continue in the path of success which it is now pursuing. Its stock of hardy perennials is a very fine one and at this time when the tastes of the owners of private estates seem to be turning to the old-fashioned flowers, this firm is right in line for good business.

BEVERLY, MASS.—Former representative Albert Vittum was presented, on St. Patrick's Day, by Thomas H. Kelley with a pot of shamrock. The shamrock was grown by John Mack, of Rantoul street, from seed sent from Ireland and the gift was a very happy souvenir of the day.

ST. LOUIS, MO.—Edward L. Loyett recently turned over to the police a letter he had received threatening death unless he surrendered $300. This is the second letter of the kind received by Loyett.

BALTIMORE, MD.—The cutting down of trees in Harlem park has excited much feeling among residents of the adjacent blocks and not a little solicitude among other lovers of trees who sometimes visit the park.

Orchids

The largest importation of Orchids ever received in this country will arrive next spring from Brazil, Venezuela and Colombia. If you intend putting in a stock wait for these to arrive and we will quote you the lowest prices in America.

Minneapolis.

DEMAND MUCH BETTER.

The demand was exceedingly good the past week, and stock was scarce. Carnations and roses still keep up in price; white carnations have been scarce all week, mostly due to the number used on March 17. Tulips were notably sought after, and only one house had them in stock. The weather was sharp the first part of the week, but warmed up towards the end. Easter lilies are looking well but there seems to be a scarcity of plants this year; on the other hand there is a number of azaleas and hydrangeas.

NOTES.

Miss Whitted put up a magnificent life-sized elk composed of carnations and roses, standing on a bed of daisies; this was the largest of a number of pieces for a prominent Elk funeral. Miss Whitted also had the decoration for a banquet at the west, using spring flowers.

J. T. Withers has just completed four interesting lectures on "Tree Planting and the Beautifying of Home and Public Grounds." under the auspices of the Twin City Florists' and Gardeners' Club.

The Minneapolis Floral Co. has the best Easter stock it has had for years, lilies, hydrangeas, and azaleas being particularly worthy of mention.

R. A. Latham has returned from Indiana, having enjoyed his trip, and finding business first class at his store on his return.

Carlson & Sandberg have a fine stock of bulbs, and 2,000 lilies that will be in fine shape for Easter.

T. Wirth left for Chicago this week.

Visitors: D. U. Augspurger, Peoria, Ill.; A. E. Herrick, Little Falls; N. Neilsen, Mankato; Frank M. Johnson, representing A. L. Randall Co., Chicago.

M.

GERANIUMS.

A splendid stock of fine plants from 2-in. pots, good standard sorts and new varieties at $2.00 per 100 and up to $1.00 each. We will send 1000 in 20 good varieties our selection for $18 50. Our Special descriptive Geranium catalogue describing over 250 varieties of Geraniums and Pelargoniums mailed free to the trade.

PELARGONIUMS, In good variety, strong plants from 3-in. pots, $1,50 per doz., $6.00 per 100

The GEO. WITTBOLD CO., 1657 Buckingham Place, Chicago

Elizabeth, N. J.

The Elizabeth Nursery Co., in addition to a splendid stock of fruit and ornamental trees, shrubs and climbers, has also in fine condition a great stock of herbaceous plants. Very noteworthy are its hardy phloxes, of which there are many varieties. The August aster, ptarmicoides major, is a white that is fine for cutting and highly thought of by those who have handled it. This firm has about 50,000 square feet of glass and it is largely devoted to the propagation and growing of healthy young plants of roses and herbaceous stock, for shipment. The houses are admirably suited to the purpose, and a cleaner and healthier stock cannot be found. This department is in charge of an experienced grower who thoroughly understands plants and their nomenclature.

IRONWOOD, MICH.—R. Lutey is the father of a bouncing baby boy.

MIAMI FLORAL CO., Dayton, Ohio.

Denver.

Trade is fair and stock has been coming in very plentifully. Carnations are a glut. The winter has been far too warm for a good flower business. St. Patrick's day business was very good this year in greened carnations, twice as many being sold as in any previous year.

A new flower store has been opened at 504 Sixteenth street under the name of the Denver Floral Co. It is run by Geo. Brinkert, who has his greenhouses at University Park.

Sweet peas are in good demand this season, one of our leading newspapers offering a prize for the best blooms produced during the year.

The Park Floral Co. has acquired the establishment of the Colfax Avenue Greenhouses and will remodel the houses.

PLATTE.

GEO. A. KUHL, Wholesale Grower, **Pekin, Ill.**

Davenport, Ia.

Business has been very good the past week; funerals of some consequence taking nearly all the cut. Carnations are somewhat off crop and not enough are being cut to meet demand. If the warm weather keeps on tulips will be in bloom outdoors by Easter.

The second annual banquet of the Tri-City Florists' Club was held at the Rock Island Turner hall on the evening of March 19, nearly every member of the society being present. The hall was beautifully decorated for the occasion with palms, pot plants and smilax. The table was decorated with American Beauty and Richmond roses and fancy carnations. A seven-course supper was served. Wm. Knees, president-elect, was toastmaster and with the assistance of Harry Bills, Emil Boehm and Theo. L. Ewoldt, kept the crowd in the best of humor. During the course of the evening the boys were surprised by the Turner singing society, which marched into the hall and sang several fine selections, which were greatly enjoyed by the members. Everything went off in fine shape thanks to the committee on arrangements.

Garrett, one of the veteran gardeners, celebrated his eighty-first birthday the other day, and is still actively engaged in raising lettuce and bedding plants.

We have a colored florist, who has built a house 20x125 ft., and is trying his hand at carnations and bedding stock.

The next meeting of the Tri-City Florists' Club will be held April 2, at Henry Pauli's place.

Harry Bills has received his material from Chicago for his new 27x50 greenhouse.

Julius Staack, of Moline, Ill., is very ill at present writing. T. E.

BROOKLYN, N. Y.—The floral offerings at the opening of the supreme court by Justice Stapleton, March 16, were very choice and numerous, consisting of many grand pieces from various societies as well as friends. Judge Stapleton, after viewing the flowers, arranged for their distribution to the various hospitals.

IOWA CITY, IA.—The new plant house which has been in the course of construction for some months at the state university has been completed. It consists of a laboratory building and a greenhouse. The north room of the former contains the main laboratory. This room is provided with tables for work in general plant physiology, and for advanced work in physiology and plant ecology. It will accommodate 24 students in general plant physiology and 16 taking advanced work. Advanced students are provided with microscopes and apparatus necessary for experimental work. The introductory course in plant physiology is carried on in this laboratory, while the histological work in connection with it is done in the old Science hall.

JANESVILLE FLORAL CO., JANESVILLE, WIS.

Syracuse, N. Y.

P. R. Quinlan & Co. are considering adding to their range this spring, although they have not definitely decided. They have been enjoying a good run of cut flower and plant trade. There has been an especially good sale of single violets at $1.50. They report that their Easter stock in all departments is looking well and will undoubtedly pan out for the Easter trade.

Henry Morris reports a large plant trade and says that the cool weather has helped to hold back the Easter stock. Funeral trade has been dull for the week past. Roses, carnations and azaleas are coming in well with a tendency towards low prices.

The landscape gardeners of this vicinity say that there will be considerable activity in this line this season. Wealthy people are improving their lawns and country places.

The new state fair commission will probably be appointed within a week by Governor Chas. E. Hughes. After this appointment there will be a field for landscape supply men.

A. J. B.

PREPARE FOR EASTER

Have Lilies to burn, the best in the land, the best in the land, the best in the land.
Azaleas, in finest colors, to beat the band, to beat the band, to beat the band.

Our immense stock of choice Easter plants, blooming Easter week or earlier if desired, are now ready for immediate shipment.

No dull times at Aschmann's. Come and see our BIG RUSH in shipping **Azalea Indica, etc.** Why? No wonder! Our **Azaleas** are of first-class No. 1 stock.

We make a specialty of importing every year an immense choice stock of this so well favored Easter plant.

Azalea Indica. We make a specialty of importing every year an immense stock of the choicest varieties popular in America, grown under contract for us by an Azalea specialist in Ghent, Belgium. If you need Azaleas, don't look around in vain all over the country for bargains, but come or write direct to us. We will be able to supply you with the best obtainable in the American market; full of buds; in good, healthy condition, right for Easter; all planted in October or November in 6 to 7 in. pots.

☞ **Take Notice.** We do not sell Azaleas in the fall, having the best picked out (and having the rubbish left for Easter), but we keep them all full of buds for our customers for Easter. Mme. Van der Cruyssen (2,500 of them), this is the best double pink variety known to the market, round as an apple, covered with buds; Bernard Andreas Alba (dbl. white), 6-7 in. pots, $1.00 each; Simon Mardner (dbl. pink), Vervæneana (variegated dbl. rose), Niobe (dbl. white), Deutsche Perle (dbl. white), Empress of India (dbl. variegated), Apollo (beautiful red), Professor Wolters, and about six more varieties. Price: 6-7-in. pots, $1.00 up, $1.25, $1.50 to $2.00 each.

Come on! Mail your orders direct to headquarters. Our reputation over the entire country, from the Atlantic to the Pacific, in growing Easter plants for the wholesale market, for the last fifteen years, ought to be sufficient guarantee as to the truth of what we say and advertise. Be wise. Never mind about that nonsense—hard times talk! ☞ Look for a big Easter trade, which is sure to come. ☞ Secure your orders in time while we have plenty of stock. All our houses are full to their utmost capacity with the choicest plants in bud and bloom, just right for Easter or earlier if wanted.

Araucarias Robusta Compacta and **Glauca,** a perfect marvel and wonder of nature. We are one of the heaviest importers and cultivators of this beautiful decorative plant. Our plants are about the same in height as in width.

Robusta Compacta, 7-in. pots, specimen plants, 6-year-old, 5 tiers, 27 to 30 in. high, $2.00 to $2.50 each.

Excelsa Glauca, specimen 7-in. pots, 6-year-old (the fine bluish-green color makes or gives this variety a fine, striking appearance—sells at sight), 30 to 40-in. high, 4, 5 and 6 tiers, $1.50, $1.75, $2.00, $2.50 to $3.00 each.

Araucaria Excelsa, 6-in. pots, 4 to 5 years old, 20 to 25 in. high, 4,5 and 6 tiers. 75c to $1.00 each; 5¼-in. pots, 3 years old, 3 to 4 tiers, 7, 8, 10 to 14 in. high, 50c each.

Choice Nephrolepis, all pot-grown.

Boston Ferns, 8-in., as big as a washtub. $1.25 to $1,50 each; 7-in., $1.00; 6-in., 50c; 5 to 5½-in., 35c to 40c.

Scottii Ferns, 7-in., $1.00 to $1.25; 6-in., 50c; 5½-in., 40c.

Whitmani Ferns, 4-in., 25c.

Piersoni Ferns, 5, 5½ to 6-in., 30c, 40c to 50c.

Neph. Amerpohlii, the new lace fern, 5¼-in. pots, 50c to 60c.

Ferns for Dishes, 3-in., large, 7c,

Primula Obconica, 5¼-in., in bloom, $2.00 to $2.50 per doz,

Hyacinths, raised from first-class bulbs of our own importation. These hyacinths cannot be compared with the ordinary stock raised from cheap bulbs flooding the market. King of the Blues (dark), Grand Maitre (lavender blue), Gertrude (pink), La Grandesse (white), 4-in. pots, $12.00 per 100.

Tournesol Tulips, red and yellow variegated. This is the best selling double tulip on the market; it will stay in bloom and in good condition for ten days. Price: 3 bulbs planted in 4-in. pot, $1.50 per doz. pots, or $12.00 per 100.

Double Von Sion Daffodils, the best selling double yellow narcissus on the market; sells at sight; 3 double nosed bulbs planted in one pot. 5, 5½ to 6-in. pots, $2.00 to $2.50 per doz. pots.

Ipomea Noctiflora, or pure white Moonflower, very fragrant, and big as a saucer. On this variety we have a world-wide reputation as a grower and shipper for the last twenty years. Price; 2½-in. pots, $5.00 per 100.

If you would know the fairest sight your eyes can ever see,
Where the most perfect plants are grown, to Aschmann's come with me.
Why, ne'er since flowers began to bloom was such a glorious show
Of all the best that florists need found in one place to grow.
The Lilies are the very best yet seen on Easter day;
Azaleas are whole sheets of flowers, perfect in every way;
The Araucarias matchless are, so are the Ferns all green,
With Bulbs and Plumed Spirea, the best you've ever seen.
And Aschmann gives a challenge, let every florist hear;
For flowers, or prices either, no rival does he fear.
If you wish to gather dollars like violets in the spring,
Then send your largest order, his plants the cash will bring.

Ficus Elastica or **Rubber Plant,** home grown and Belgium stock, 5, 5½, 6 and 7 in. pots, 30c, 35c, 50c, 60c and 75c each.

Begonia Improved Erfordii, 4-in. pots, very large, $2.00 per doz.; 5¼-in., in bloom and bud, 25c each, or $3.00 per doz. **Begonia Flambeau,** 5½-in. pots, sells on sight, 25c.

Cyclamen Grandiflora, 4-in., in bud and bloom, 20c.

Hydrangea Otaksa, 6 to 7 in. pots, in bud, 35c, 50c, 75c and $1.00 each; right for Easter.

Spirea Gladstone. 6 to 7-in. pots, large stock, right for Easter, in bud now, 50c to 75c.

Dracena Bruanti, from Belgium, full of green foliage from bottom to top, 6-in. pots, 22 to 25 in. high, 40c each

Cineraria Hyb., finest strain in the market, 5-in., 20c each; 6-in., $3.00, $4 00 to $5.00 per doz.

Kentia Belmoreana and **Forsteriana,** Belgium and home-grown stock, 4-in. pots, 18 to 20 in. high, 35c; 5¼, 5½ and 6 in. pots, bushy plants, 50c, 60c and 75c each.

Latania Borbonica, 5-in., 30c.

EASTER LILIES. Japan Multiflorum, of our own importation, raised from special 10-in. bulbs, 6-in. pots, right for Easter. This year I can say we have the finest lot we ever had. Have about 5,000 to offer. Please send your order in time this year, as we have such a big demand every year for Lilies that some cannot be supplied. They are 13 to 40 inches in height, and we can meet all wants if ordered before supply runs out. Prices as usual. Plants above 5 buds, 10c; plants under 5 buds, 12c per bud. (Medium height).

On account of the cultivation of lilies being no more profitable, kindly order some other plants also in connection with lilies.

Have **Azaleas** White Deutsche Perle and Vervæneana now in bloom if wanted, 60c, 75c to $1.00 each.

We Print No Catalogue. These are our lowest prices to all. Strictly no preferences will be investigated in busy season.

Cash with order, please. To save express charges, please mention if in or out of pots.

Omaha.

Business has been very good, regardless of Lent, and very little surplus can be seen in any of the stores. We have had very nice warm weather the last 10 days, which is quite a help to bring on the Japanese lilies, much grown in this vicinity. The warm weather played havoc with the violets and a few more days will finish them; this little flower is very much in demand and will be badly missed. Sweet peas are plentiful, but they will never take the place of violets. There will be plenty of lilies for Easter, short and long, but mostly short stock. Bulbous stock and azaleas will not be so plentiful on account of the warm weather. Roses and carnations are good and plentiful. American Beauty roses are coming in good.

NOTES.

Ten days ago Hess & Swoboda used 10,000 violets in one day, using 6,000 in a casket cover; in former years the growers would sell their surplus violets to the department stores; this was not the case this year. there was no surplus.

On March 18 Frank Sahan late with the City parks was buried. A good number of the local florists attended his funeral and sent some very nice floral tributes.

Morehead Steam Trap.

The Morehead Manufacturing Co., Detroit, Mich., makers of the Morehead steam trap, have opened a branch establishment for the manufacture of the traps at Chatham, Ont., with a view to taking care of the increasing demand for them in Canada. This is of more than ordinary interest to the Canadian florist who uses steam for heating as the Morehead has long been known as the best and most economical, reliable and satisfactory machine for returning condensation from the radiators to the boiler. This arrangement will not only facilitate delivery but will save the consumer the duty which the company has had to pay on all traps sent to Canada heretofore.

Heating a New Greenhouse.

ED. AMERICAN FLORIST:—

Will you kindly give me some information about heating a proposed greenhouse? I wish to maintain 50°, 60° and 70°, when it is 20° below zero. The house is divided into three sections of 27x100 feet, 17-foot ridge, six feet to plate, 32 inches of glass on north and south wall, glass on both ends. We intend to use hot water, 2½-inch flow, 2-inch returns. Also state size of a suitable boiler and probable consumption of hard coal. BRUCEMORE.

As the question is understood each of the three houses is 27 by 100 feet, with both ends exposed. For such a house it will require four 2½-inch flows and twelve 2-inch returns for 50°; six flows and 18 returns for 60° and eight flows and 24 returns for 70°. To maintain these temperatures under the severe conditions mentioned it will be well to have a boiler rated for 6,000 square feet of radiating surface.

So much will depend upon the efficiency of the boiler and the radiation, as well as the skill of the fireman, that it is not possible to do much more than guess at the number of tons of coal required, but it will probably range from 10 to 15 tons per month and may run as high as 20 tons in months when the weather is very severe. L. R. T.

SYRACUSE, N. Y.—Henry Burt, of 211 Genesee street, has now got his store in good shape and his stock made good after the recent fire.

Montreal.

STOCK OVER PLENTIFUL.

Trade has been of late very satisfactory and the Lenten season has not made itself felt so far. St. Patrick's Day was a busy one; shamrocks were sold by the thousand, nearly all in 5-inch pots at prices from 25 cents to $1; quite a number of decorations had to be attended to for numerous society as well as private dinners. We are still in the grip of winter weather which seriously delays all outdoor work, although many had started during a previous mild spell to lay down hotbeds, which have been a source of trouble since, protecting them from the zero temperature and digging them out of the snow. Cut flowers are plentiful. Roses are coming along first class. Richmond and Killarney are the favorites of the flower buying public and will be more grown next year. Carnations are over plentiful but very good, The prices are that low that there seems to be little or no profit to the grower. Lily of the valley, tulips and daffodils are very good this year, but there are sometimes too many to sell them at a profit. Lilacs and Easter lilies are coming in very nice, also spireas.

NOTES.

Chas. Eddy has resigned the first vice presidency of the Gardeners' and Florists' Club; he has taken a position as head gardener at Drummondville and is in consequence leaving town.

S. S. Bain has just recovered from a three weeks' siege of rheumatism. Mr. Bain intends to sell his entire business, greenhouses and all, and retire into private life as soon as he can find a buyer. Mr. Bain's foreman, H. Warner, has accepted a government position in India and will leave in the near future.

Miss Carmichael has been on the sick list; the store is in charge of her sister.

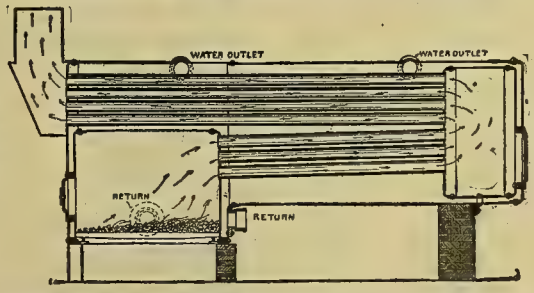
J. Petty has recovered from his recent illness.

LUCK.

THE SUPERIOR

Return Flue Fire Box Boiler.

Ask the man that knows. The names are yours for the asking of them.



12 of these were bought and used by one grower. 6 by another grower.

This boiler has given better satisfaction than any other boiler on the market

EVERYBODY BUSY.

With the coming of warm weather the annual spring rush is starting in. This promises to be one of the best years on record for outside work. Orders for bedding and general outside planting are pouring in now from every side. The tree pruning, yard rolling and seeding keep the men busy. Funeral work has been slack this week but stock has been kept moving in spite of this fact. No society events of any consequence are going on now.

NOTES.

The Fifth Avenue Floral Co. has been growing some fine Richmond and Golden Gate roses this season. The stock of Enchantress carnation has also been of a splendid quality.

John Hellenthal is showing Enchantress in fine shape, flowers large and color perfect. Mr. Hellenthal is getting to be a specialist in the carnation line.

C. A. Roth has a nice block of daffodils on hand. There has been a very ready sale for them this season.

Business continues exceptionally good with a good supply of flowers of all kinds.

SOCIETY BANQUET.

About 250 people attended the annual banquet and reunion of the Worcester County Horticultural Society in Horticultural Hall March 11. It was served in the banquet hall at 6:30. For half an hour before there was an informal reception in the library down stairs. During the evening it was used as a retiring room, and it was prettily decorated with pot plants by A. H. Lange. The tables were decorated with plants and cut flowers, large vases of pink and white carnations were on the guests' tables and there was a carnation at every plate. The flowers were furnished by E. W. Breed, A. H. Lange, L. C. Midgley and A. A. Hixon.

President Rice said in part: "The committee on winter meetings, lectures and discussions closes its duty with to-night's entertainment, and I wish to thank it for the conduct of these meetings," and introduced J. Bowker as toastmaster and Mr. Bowker paid a fitting tribute to the late O. B. Hadwen. Mr. Bowker said because of limited time each guest would be limited to five minutes. Among those that spoke of their work and told entertaining stories were: C. S. Gould, president of the Connecticut Pomological Society; J. W. Clark, the new president of the Massachusetts Fruit Growers' Association; I. L. Harvey, vice president of the New Hampshire Horticultural Society; Prof. F. C. Sears, of the Massachusetts Agricultural College; Edwin H. Burlingame, secretary of the Rhode Island Horticultural Society; Dr. George M. Twitchell, of Augusta, Me.; A. Warren Patch, of Boston; and Joseph K. Greene. The Midgley quartet composed of L. C. Midgley, Mrs. Harry Hildreth, and Percy G. Forbes and wife sang selections, while Messrs. Forbes and Midgley sang two duets; the exercise closed with a selection by the quartet.

G. Brown, formerly foreman for H. E. Littlefield, has accepted a similar position with S. Quinn, Brookline, and intends to move his family to Brookline about April 1.

All the retailers had their windows prettily decorated in honor of St. Patrick and did a brisk business in shamrocks and green.

H. F. A. Lange intends to rebuild several of his oldest houses the coming summer. R.

Louisiana Red Cypress

SAYS BOBBINK & ATKINS, of Rutherford, N. J., "Lasts with us from two to three years longer than any other wood for table purposes, and its life seems to be endless when used in ordinary greenhouse construction. We use cypress solely in our Plant Tub Department and manufacture tubs of all sizes from the smallest to the largest, of cypress."

It Is Best for Greenhouse Building.

It is the only wood that successfully withstands the almost intolerable alternate wet and dry conditions incident to this work.

IT IS THE MOST DURABLE WOOD KNOWN. Ask about it at your local lumber yard or write

LOUISIANA RED CYPRESS CO. HIBERNIA BUILDING, **New Orleans, La.**

The Allied Trades

Descriptive particulars—with drawings or photographs, if possible—of any new apparatus or device which may prove helpful to the trade are solicited for this department.

THE fact that Louisiana red cypress is recommended for the better class of cooperage, shows that it will keep still when used in any class of greenhouse building. Probably its suitability for tanks has not been sufficiently recognized, its great resisting power to atmospheric influences, such as decay and weathering, its comparatively high strength and the ease with which it can be worked all being strong points in its favor. It is also especially suitable for plant tubs.

Glass for Palm House.

ED. AMERICAN FLORIST:

Will ribbed glass burn palms and other tropical plants? If so, what is the best glass for a palm house? No shading is needed. P. G. P.

While there would be no danger of burning the foliage if ribbed glass is used, it would, perhaps, be cheaper to use ordinary plain glass if no shading is needed. L. R. T.

Steam Trap Needed.

ED. AMERICAN FLORIST:—

Can you tell me how I can keep the water of condensation out of my return steam pipes which are under the benches. They are only four inches above the water level in the boiler and the water seems to collect in them giving me part steam and hot water heat. Do you think a steam trap would remedy this or what would you suggest? W. J.

For a small range a steam trap would give good results, but for a number of large houses it would be more satisfactory to use a feed tank and pump. L. R. T.

Return Pipe to Hot Water Boiler.

ED. AMERICAN FLORIST:

We have two large hot water boilers, 16 feet long, each containing 40 2-inch tubes. They are supposed to carry 22,000 feet of 2-inch pipe but have only about 15,000 feet attached and even with this we cannot get the water to boiling point. There is plenty of rise to the flows and a good gradual fall to the returns, but these fall 18 inches below the level of the inlet to the boiler and then rise. This appears to be where the trouble occurs. Is this right? G. A. C.

The fact that the water cannot be boiled does not necessarily imply that the boiler is not efficient. Provided there is a good circulation in the coils the water should not boil in a hot water heater. If the lowest part of the coils is above the top of the boiler the fact that the return drops below the bottom of the boiler would make little difference, although, of course, it would be a forced circulation. My choice would be to carry the flow pipes to the height of the plates, or a little higher if there are any in the center of the house, and give them a slight fall. The returns should be kept above the level of the boiler if possible, and, of course, they also should have a slight fall, but enough to let out the air will be sufficient. L. R. T.

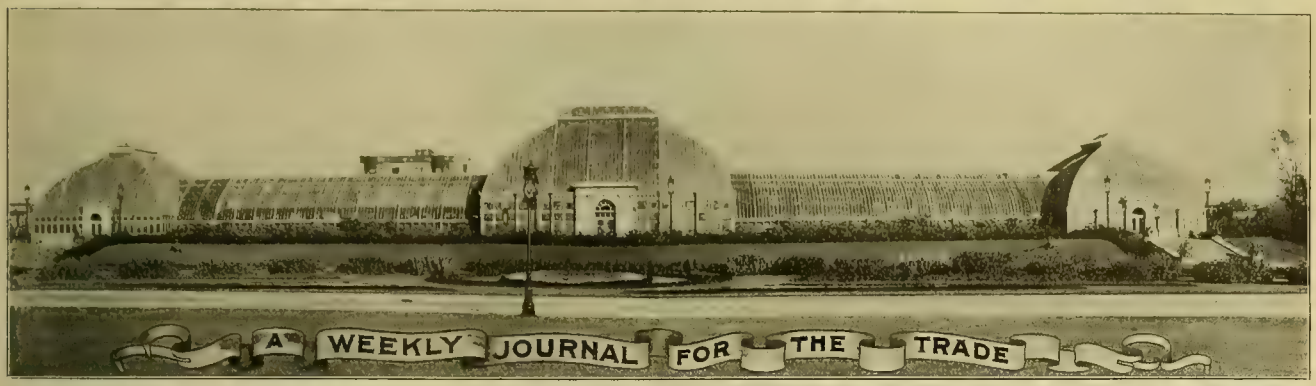
THE AMERICAN FLORIST



America is "the Prow of the Vessel; there may be more comfort Amidships, but we are the first to touch Unknown Seas."

Vol. XXX. CHICAGO AND NEW YORK, APRIL 4, 1908. No. 1035

THE AMERICAN FLORIST

TWENTY-THIRD YEAR.

Copyright 1908, by American Florist Company. Entered as Second-Class Matter Nov. 11, 1891, at the Post Office at Chicago, Illinois, under Act of March 3rd, 1879.

PUBLISHED EVERY SATURDAY BY

AMERICAN FLORIST COMPANY,

324 Dearborn St., Chicago.

Eastern Office: 1133 Broadway, New York, Philadelphia Pa., Robt. Kift, 1725 Chestnut St.
Registered Cable Address: Ameflo, Chicago.

Subscription, United States and Mexico, $1.00 a year; Canada, $2.00; Europe and Countries in Postal Union, $2.50. Subscriptions accepted only from the trade. Volumes half yearly from August 1901

Address all correspondence, subscriptions, etc., American Florist Co., 324 Dearborn St., Chicago.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

OFFICERS—FRANK H. TRAENDLY, New York, Pres.; W. N. RUDD, Morgan Park, Ill., Secy.; H. B. BEATTY, Pittsburg, Pa., Treas. Next meeting at Niagara Falls, N. Y., August, 1908.

THE NATIONAL FLOWER SHOW.

CHICAGO, November 6-15, 1908.

Wm. F. Kasting, Buffalo, N. Y., is chairman of the general committee in charge. Chairmen of sub-committees follow:

EXECUTIVE AND FINANCE—Wm. F. Kasting, Buffalo, N. Y.
AMERICAN EXHIBITS—Ph. Breitmeyer, Detroit.
FOREIGN EXHIBITS—E. G. Hill, Richmond, Ind.
PREMIUM LIST—W. N. Rudd, Morgan Park, Ill.
ADVERTISING AND PUBLICITY—J. H. Burdett, 1411 First Nat'l Bank Bldg., Chicago.
LOCAL MANAGEMENT, PRIVILEGES AND CONCESSIONS—J. C. Vaughan, Chicago.
SPECIAL FEATURES—Otto G. Koenig, 6471 Florisant Ave., St. Louis, Mo.
RECEPTION—Aug. Poehlmann, Morton Grove, Ill.
AUDITING—J. A. Valentine, Denver, Colo.
TREASURER—I. C. Bertermann, Indianapolis, Ind.

The above chairmen have power to select their various committees from the general committee of 50 or the members of the S. A. F. at large.

The Rose and the Gardener.

The rose in the garden slipped her bud,
And she laughed in the pride of her youthful blood,
As she thought of the gardener standing by—
"He is old—so old! And he soon must die!"

The full rose waxed in the warm June air,
And she spread and spread until her heart lay bare;
And she laughed once more as she heard his tread—
"He is older now! He will soon be dead!"

But the breeze of the morning blew, and found
That the leaves of the blown rose strewed the ground;
And he came at noon, that gardener old,
And he raked them gently under the mold.

And I wove the thing to a random rhyme:
For the rose is Beauty; the gardener, Time.
AUSTIN DOBSON.

SUGGESTIONS FOR PLANT GROWERS.

Propagating Poinsettias.

Any stock plants not already cut back may have attention, as they ought to be thoroughly ripened by now. Cut back to firm wood and if the shoots bleed much put a little dry fine sand on them. When the wound is dry place the plants in a warm moist house and spray them lightly several times a day, still keeping the roots on the dry side. In a short time they will break into growth and propagation may go on regularly until the required number is obtained. Poinsettia cuttings strike freely and easily if never allowed to wilt. They may be taken when quite small, with a heel of the bark, or left until about two inches in length and cut in the usual way. The smaller the cuttings are taken the better the resulting plants hold their foliage afterwards and roots always start very readily from the short jointed wood of the small cuttings taken with a heel. The cuttings may be inserted either around the edges of pots or on the propagating bench, but in either case a brisk bottom heat is needed and the cuttings must be immediately watered and closely shaded at first to keep them fresh. After they are rooted admit more air gradually to consolidate the growth a little before potting.

Bedding Stock.

Although space is in most cases very scarce now it is important that the bedding stock of all kinds gets plenty of room and attention, for if good plants well hardened, are expected by bedding out time, there is not much time to lose. It is too late now to get good geraniums by striking top cuttings and not much more pinching must be done if the plants are wanted in flower by June 1, but any leggy misshapen plants may yet be cut back and the cuttings inserted in the sand as they will make useful plants to put out for stock. Get all the growth possible into seedling lobelias and plants from cuttings, pinch them regularly and see that they do not want for root room. There is practically no limit to the number of lobelias that may be propagated, especially if the instructions given in these columns with regard to stock plants were followed. Keep coleuses and perilla in a good light to bring out the color of the foliage. Alternantheras and iresines (achyranthes) may be freely propagated if the flowers are kept constantly picked from the plants, to induce the free production of growth shoots. Take the cuttings when quite young and soft and strike them over a fair heat, pinching as soon as roots are produced; they will make nice little stock in time for bedding out. Heliotropes should not be allowed to flower, but kept growing in a good light for a few weeks if they are to flower freely when they are planted out. There is still time to sow such things as French marigolds, asters, Phlox Drummondi, ten week stocks and zinnias, all of which are useful for pricking off and hardening in boxes.

Finishing Primulas.

Much of the beauty of primulas lays in the foliage, and unless this is well taken care of the plants are failures, no matter how well flowered. The leaves grow rapidly in the later stages and plants, both of P. Sinensis and P. obconica, must have ample room to develop properly. When moving them around for a new stand look out for the foliage and never allow careless help to carry out this work. When the plants are needed for any especial date and it is seen that they will be too early, pinch out the first trusses of flower; the next will be larger and better for it. Although this applies to the Chinese as well as the obconica and Forbesii varieties, we never care to pinch the former if large plants are needed, as if the center spike is left intact it aids the pyramidal form that is so much admired in these varieties. Just now, at the finishing stage as it may be termed, the grower will find the advantage of having used good substantial loam in the compost. Light loam and leaf soil helps the growth at first but it does not build up the thick substantial foliage that stands and the thick stems that produce fine, showy, well colored flowers. The roots in such compost are hard and vigorous and the grower can feed them liberally with no fear of injury. We do not advocate heavy feeding but when the roots have used up the fertilizing properties in the soil something must take its place. Should the foliage appear a little pale

in color, use a weak solution of nitrate of soda but alternate this with good manure water or guano, as the nitrate is not a perfect plant food.

Chrysanthemums for Pots.

Good pot chrysanthemums are seldom too plentiful if dwarf and well flowered. The ordinary varieties as grown for cut flowers are in very few cases suitable for growing as pot plants. They are too tall in growth and, when a number of flowers are wanted, loose and often of poor color. As an early white the old Lady Selborne, a sport from the still older pink James Salter, is good. We thought this had dropped out of cultivation but saw it last season grown for the purpose indicated. There are several good pompons; so many in fact that there is no need to name them and these small flowered kinds come of excellent color and perfect shape; they are the best, in short, for dwarf pot plants. Then many of the singles and single anemones are excellent, Garza (rosy white) Mary Anderson (white), and Miss Rose (rosy red), being among the most useful. The grand old yellow, W. H. Lincoln, is still unapproached in the Japanese section. The color is grand and the stiff stems and deep green foliage are of the best. It is an ideal variety for pot culture and if our raisers could give us a white of the same excellent character and flowering as late as it does they would earn the blessings of the trade. If there are good healthy stock plants, cuttings for this purpose may go in now but if the cuttings are not good leave them for a time. It is important to get a good start, keep the plants cool and airy right along and pinch them low down at the first potting. Then hard substantial foliage will be produced that will not suffer later when the plants are placed outdoors, as they must be if they are to keep dwarf. When the cuttings are struck and ready for potting do not delay or they soon get out of hand. Pot very firmly in sound loam not over rich at first.

SOUTH BEND, IND.—The South Bend Floral Co.'s boiler burst March 23, doing damage to the extent of $1,500.

American Rose Society.

OFFICIAL REPORT OF ANNUAL MEETING.

The society held its annual meeting in Fullerton hall, a section of the Art Institute, on the Michigan avenue lake front. The meeting was called to order at 8:30 p. m., March 25, by President Robert Simpson, who delivered his address.

Secretary Benjamin Hammond gave a synopsis of the proceedings at Washington, particularly the recommendations to the executive committee to issue certificates of merit for exhibits possessing real value, life member certificates and the desirability of issuing at stated periods a Rose Journal. A motion was made and carried, directing the executive committee to consider the advisability of withdrawing money prizes from the regular list of awards and substituting certificates and medals.

J. A. Valentine, Denver, Colo., read his paper upon "Roses in Colorado," which is a thoughtful production. W. W. Coles, Kokomo, Ind., moved a vote of thanks which was cordially given. Following this W. A. Manda gave a most interesting talk upon outdoor roses mentioning, among other facts, that there was on record in Paris the names of 11,016 varieties and species of rose, and, in a private collection in that city, some 8,000 varieties. Very close attention was given to Mr. Manda, and a vote of thanks followed.

President Simpson spoke of the beautifying of fences and unsightly places by the use of the climbing roses. It was announced that Alexander Dickson, of Newtownards, County Down, Ireland, had kindly sent by special request a paper upon the "Hybridization of Roses" which would be read at the next session.

THURSDAY'S SESSION.

On Thursday, at 10:45 a. m., the second session opened by John T. Sullivan, of Detroit, reading his paper on "The Rose for Decorative Purposes." This paper was followed very closely, Philip Breitmeyer commending it warmly. W. J. Stewart moved a vote of thanks. Mr. Breitmeyer expressed his regret that the prizes offered by Mr. Boddington and himself were not competed for in the outdoor class, but offered to renew the same for next year.

Mr. Simpson said the exhibition in quantity and quality of forcing roses was exceedingly fine, and, when it was remembered that many of these had come hundreds of miles, and been from two to three days in transit, it was remarkable. One fine exhibit from the Florex Gardens, Philadelphia, was delayed, but at the last minute was staged.

W. H. Elliott's paper on the "Proper Size of Commercial Greenhouses" was well read and elicited much discussion. George B. Maynadier, of the bureau of soils, Department of Agriculture, read a paper on the subject of soil, the constituent parts, the effect of water, etc. This paper was closely followed.

John Thorpe related some experience where La France grew at Nyack, N. Y., with much vigor, and other varieties at Madison, N. J., illustrating by his experience the force of the suggestions of Mr. Maynadier. This paper coincidently was allied to Mr. Valentine's facts about alkali in soil. Mr. Traendly moved a vote of thanks to Mr. Maynadier.

Following this, Wm. F. Kasting, Buffalo, N. Y., obtaining the floor stated that he had come on purpose to ask the society to fix the place of its next meeting in that city. A motion was put, and the meeting accepted Buffalo as the city in which to meet in March, 1909.

ELECTION OF OFFICERS.

Seldom is any gathering of men recorded where a more complimentary vote was given for a nominee than that which elected August F. Poehlmann, Morton Grove, Ill., as president of The American Rose Society, to succeed Robert Simpson, of Clifton, N. J., who, for the past two years, has most assiduously served as its president.

Wm. F. Kasting was chosen vice-president, Harry O. May, Summit, N. J., treasurer; Benjamin Hammond, Fishkill-on-Hudson, N. Y., secretary. The members of the executive committee for three years next ensuing are: Phillip Breitmeyer, Detroit, Mich., and Adolph Farenwald, Hillside, Pa.

The meeting adjourned until Friday morning, at 11 a. m., and was called to order by President Simpson, who read an invitation from The Horticultural Society of New York, to hold a June rose show, in connection with that body, in Bronx Park, New York. This matter had been brought up before the executive committee by Ex-President Frederick R. Newbold last November. Upon motion of Mr. Valentine it was moved that The American Rose Society accept the invitation and join with The New York Horticultural Society in its June show, and that the secretary be and is hereby directed to extend the thanks of the society for the invitation which is without expense to the American Rose Society for accommodation or service. The same was seconded by F. R. Pierson.

COMMENCEMENT OF OFFICIAL TERM.

President Simpson brought up the time of beginning of the official term of service. Article 11 of the by-laws provides that the time shall be January 1 following election, but the first of January in practice is not a suitable time, and, at a prior meeting, record of which

AT THE CHICAGO ROSE SHOW.

Bassett & Washburn's Winning Vase of American Beauty.

FIRST PRIZE GROUP OF POT ROSES IN VARIETY BY VAUGHAN'S GREENHOUSES, WESTERN SPRINGS, ILL.

was lost, the beginning of the official term was fixed at July 1, instead of January. Mr. Simpson stating in detail his reasons recommended that a resolution be passed, putting this matter in better shape. Thereupon, J. A. Valentine offered the following:

Whereas, At a meeting of this society, held in the city of New York in 1902, the by-laws were amended so as to provide that the term of its officers should begin on July 1, instead of on the first day of January succeeding the election.

Therefore, Be it resolved, That this society instructs and authorizes its secretary to clearly set forth that change in the by-laws, and further

Resolved, That this society shall hereafter conduct its elections and business in conformity with such change. This resolution being duly read twice was adopted by unanimous vote.

The vital question of the growth of the society was taken up by Mr. Hammond and laid before the meeting in detail, the step taken to produce a publication as a means of extending the influence of the society interesting the membership at large. the prospectus sent out and the responses in return shown. All present took much interest and some part in the discussion. Frank R. Pierson, of Tarrytown, N. Y., said he was heartily in favor of the project, but suggested that, in lieu of any advertising support, the needed backing be done by direct subscription to the fund, and, to that end he would start the project with a subscription of $25. This was followed by Poehlmann Bros. Co., $25; Park Floral Company, of Denver, Colo., $25; Myers & Samtman, Wyndmoor, Pa., $10; Adolph Farenwald, Roslyn, Pa., $10; Wm. F. Kasting, Buffalo, N. Y., $10. Seventeen persons already had taken a space in the paper at a cost of $10. The recommendation was to eliminate all advertising, to back the journal for a time and then depend upon the subscription to sustain it. The movement is tentative and is in line with similar publications. The meeting endorsed the project, leaving it in the hands of the executive committee and secretary.

The paper received from Alexander Dickson, of Newtownards, Ireland, was read. Upon motion of Mr. Farenwald it was ordered that the secretary be directed to convey to Mr. Dickson the thanks of the society.

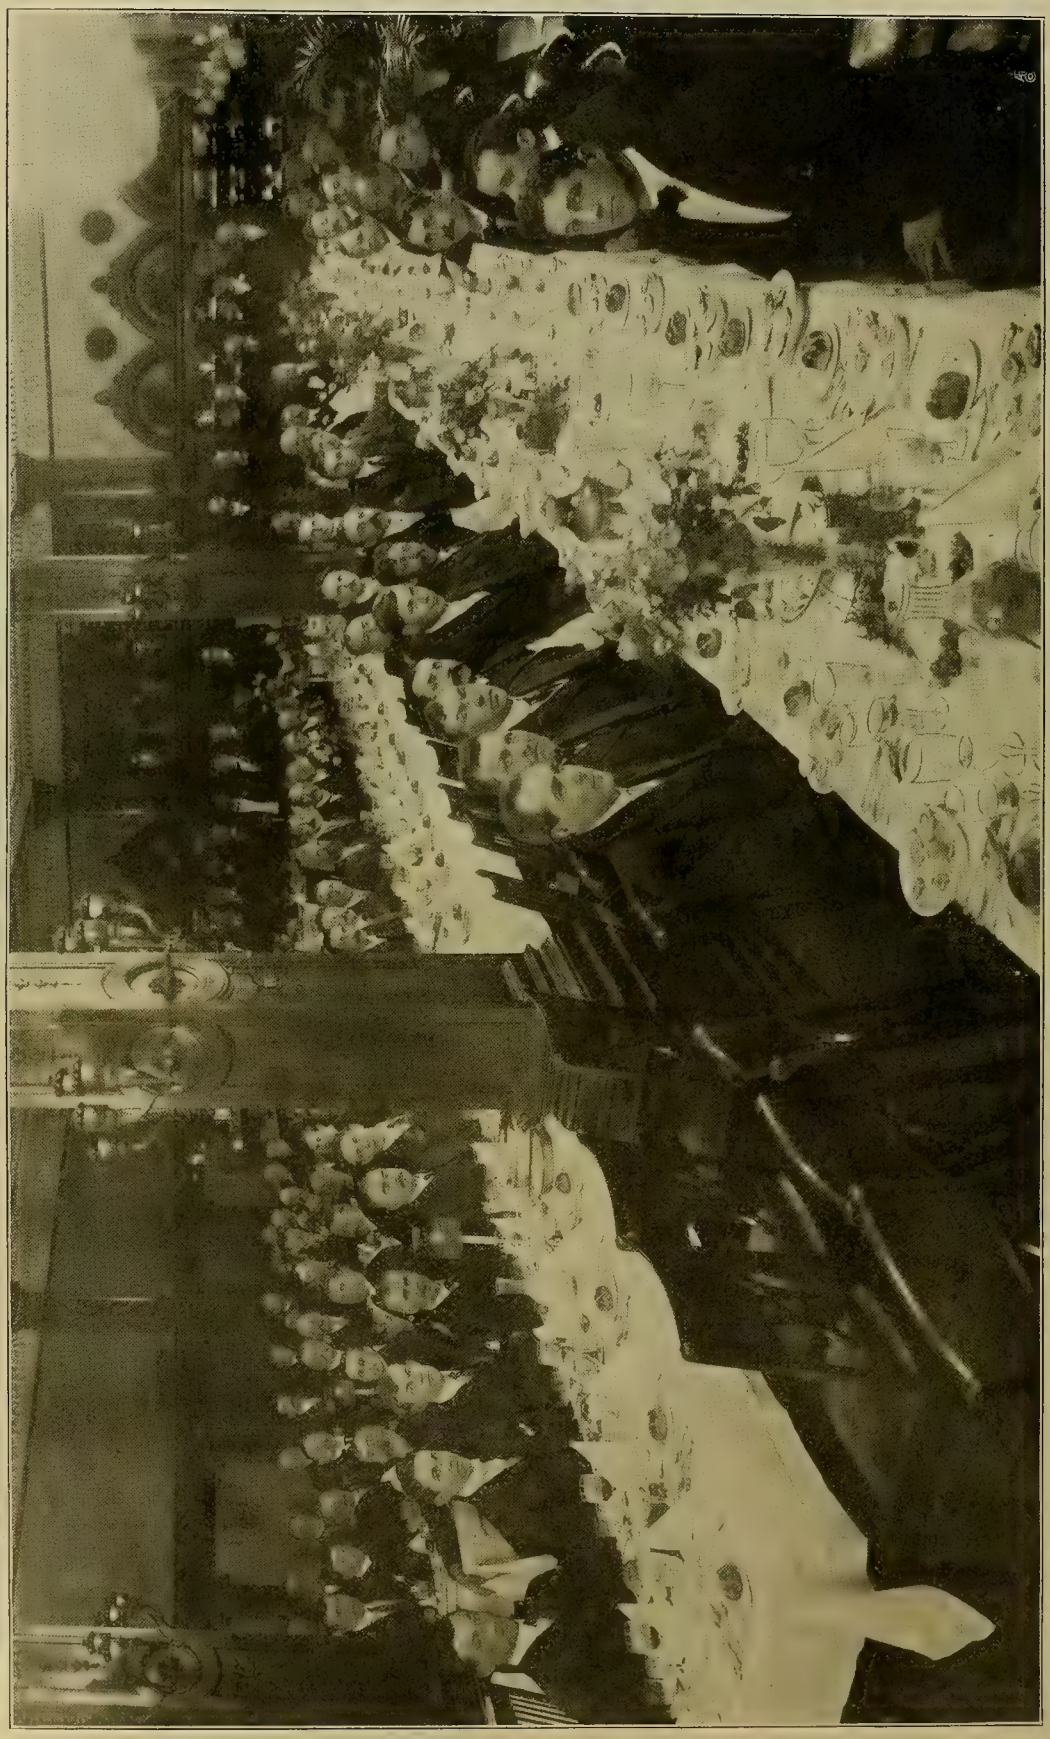
Robert Craig's paper was presented by W. P. Craig and a vote of thanks given as it was a pertinent subject of much interest. The question of the desirability of incorporating the American Rose Society under a state law was raised and referred to the executive committee.

BENJAMIN HAMMOND, Sec'y.

As the Rose Show Appealed to Me.

The Art Institute proved an ideal place for the rose show. A few large palms and six or eight cases of wild smilax would have added greatly as a background for the fine vases of roses. In point of keeping qualities Killarney stood out pre-eminent. It was not excelled by any variety. The best vase of Richmond, on Friday afternoon, was W. H. Elliott's. This is truly remarkable, as they were packed on Sunday, and speaks well for the excellently grown stock.

Bassett & Washburn well deserved the first for 100 American Beauty, and Andrew Benson was the happiest man in the show. There was a lack of pot roses; this class should be shown much larger in future years. It is unfortunate and a great disappointment to many that M. H. Walsh, of Woods Hole, Mass., did not make the magnificent exhibit of pot roses that was seen at last year's meeting at Washington. Such an exhibit would have been a great feature of the show.



BANQUET OF THE AMERICAN ROSE SOCIETY, CHICAGO, MARCH 26.

Robt. Simpson's Mme. Chatenay was magnificent. Many of the stems were over five feet in length. Wyndmoor, the new pink rose, made a good showing and proved to be a first-class keeper. I like its looks and shall watch it. Ivory and Perle were conspicuous by their absence; only one or two small vases of each were shown. The E. G. Hill Co. showed a collection of roses that interested the ladies.

Newport Fairy, shown by Julius Roehrs Co., was much admired. The quality of roses shown this year was much superior to former years. Nine vases of Richmond, of 100 each, was one of the great features of the show.

Vaughan's Seed Store made the most attractive exhibit in the hall with pot roses, both standard and bush form, artistically arranged. American Beauty, as usual, was the predominating variety in the show; over 20 vases of 50 to 100 in a vase were shown.

W. H. Elliott's Killarney was a revelation and his vase of 50 was the most attractive in the hall. Afterglow and O. P. Bassett carnations were shown in good form and had many admirers.

The eastern rose growers deserve a lot of credit for their fine exhibits. In nearly every case their stock was among the best to the last. Has the possibilities of the great Killarney been reached? It gets larger every year. The eastern men can give the westerners some good points on staging for effect.

Kokomo, Ind. W. W. COLES.

Later Awards.

The following are the awards not mentioned in our last issue:

The prize of a silver cup for 100 American Beauty offered by Crane & Co., Chicago, was won by Bassett & Washburn and not by Poehlmann Bros. Co. as announced.

In the class for 25 any other tea or hybrid tea we omitted to state that A. Farenwald, Hillside, Pa., won second prize.

Twelve Chatenay.—J. F. Ammann, Edwardsville, Ill., first.

Twelve any other variety.—J. F. Ammann first with Alice Roosevelt.

Fifty blooms of American origin now in commerce.—A. Farenwald, first.

For general display of roses in pots to occupy not less than 150 feet.—Vaughan's Greenhouses, Western Spring, Ill., first. This exhibit was also awarded Miss M. I. Hammond's prize for the prettiest exhibit in the show to be decided by ladies visiting the show.

Fifty Bridesmaid.—Bassett & Washburn.

For the best new rose not in commerce and never exhibited before the American Rose Society.—Robt. Scott & Son, Sharon Hill, Pa., for Mrs. Jardine.

Fifty American Beauty.—Florex Gardens, North Wales, Pa.

One hundred Richmond.—Geo. Reinberg, Chicago.

One hundred Chatenay (silver cup offered by Vaughan's Seed Store).—Poehlmann Bros. Co.

One hundred Bride.—Bassett & Washburn.

One hundred Sunrise.—Peter Reinberg, Chicago.

Twenty-five Bridesmaid from growers with less than 50,000 feet of glass.—Albert Lies, Niles Center.

Twenty-five Bride.—Albert Lies.

Twenty-five Bridesmaid.—Bassett & Washburn.

Twenty-five Richmond.—Peter Reinberg.

Twenty-five Sunrise.—Peter Reinberg.

Twenty-five Uncle John.—Peter Reinberg.

Twenty-five Bride.—Bassett & Washburn.

Fifty blooms of a new forcing rose never before exhibited for competition (Heller Bros. prize of a silver loving cup).—Myers & Samtman, Wyndmoor, Pa., with Wyndmoor.

Six plants in not larger than 8-inch pots.—Vaughan's Greenhouses, first.

Six climbers in not larger than 7-inch pots.—Vaughan's Greenhouses, first.

The sweepstakes prize and gold medal of the Horticultural Society of Chicago was awarded to W. H. Elliott for his vase of Killarney.

Special growers' prize to the men who did the actual growing, offered by Peter Reinberg.—W. H. Elliott's grower, first ($25); Poehlmann Bros. Co.'s grower, second ($15); Adolph Farenwald's grower, third ($10).

John Davis Co.'s prize awarded to Peter Reinberg for 100 flowers of Mrs. Marshall Field.

Twenty-five blooms of pink roses, not disseminated before 1908 (silver cup offered by J. B. Deamud).—Myers & Samtman, for Wyndmoor.

The Florex Gardens, North Wales, Pa., were awarded a prize of $25, offered by the Globe Coal Co., Chicago, for American Beauty.

SPECIAL MENTIONS.

Special mention was made of Geo. Reinberg for five vases of roses showing high culture, the color being exceptionally good.

Also to W. A. Manda for his exhibit of Cherokee rose (R. lævigata) and others.

Also to J. A. Budlong, Chicago, for a fine exhibit of carnations.

Also to Bassett & Washburn for seedling carnation, O. P. Bassett.

Also to E. G. Hill Co., for vase of Afterglow carnation.

The judges pointed the new roses as follows: Wyndmoor, 84; Mrs. Jardine, 73.

Certificate of merit to Myers & Samtman for novelty.

The judges in memoranda commended the exhibit of Julius Roehrs Co., the new rambler rose, Newport Fairy.

NEW YORK.—After a wild run of two miles a horse attached to a delivery wagon owned by T. W. Mangan was caught by a policeman, at the cost of a broken bicycle and a ruined uniform. He had chased the horse from One Hundred and Twenty-fourth street and Eighth avenue, and at One Hundred and Thirty-fifth street leaped from the wheel and grabbed the animal. The driver had jumped out.

AT THE CHICAGO ROSE SHOW.
Myers & Samtman's Vase of Wyndmoor.

Essay on Hybridization.

BY ALEX. DICKSON, NEWTOWNARDS, IRELAND.

It was with considerable hesitation that I consented, at the request of your society, to write a paper upon hybridization and cross-pollination in relation to the rose. I may say at once, it is a request I have refused many times from similar organizations here and elsewhere, because I have always felt, and indeed still feel, it is a subject upon which it is extremely difficult to write a satisfactory paper. The subject is one which cannot possibly be dealt with satisfactorily in a paper such as the present, and the chief difficulty one has is selecting the lines upon which to write, or the point of view from which to discuss it. I will do my best to make the paper as interesting and instructive as I can within the limited scope at my disposal. I have given the subject my most careful consideration, and I am convinced that the best method of dealing with the subject in this paper is to give you in a condensed form some of the results which have accrued from the labors of my brother and myself, extending over a period of almost 30 years.

I would ask those who hear this paper read, and those who may read it for themselves, to remember, that it is written by a professional rose grower, and, therefore, by one to whom the practical results, from a commercial standpoint, were of the most vital importance, and of necessity this point of view had always to be borne in mind by my brother and myself in our line of experimental inquiry; and it is from this point of view that I deal with it. Hybridization is a subject of intense interest, and the practical application of the science opens up an indefinite and even inexhaustible field of inquiry, but those of us who are professionally engaged upon this branch of horticulture must abandon, to some extent at least, the scientific aspect, in favor of the practical. With the stern realities of life facing me, I have many times—contrary to my desire—been compelled to abandon scientific lines of inquiry, as against the production of new varieties of commercial value—a situation I regretted, but could not help. After 30 years' steady and continuous work, I am inclined to the opinion that the further one pursues the subject of hybridization, the greater the field for exploration.

THE WIDE SCOPE.

I have often thought, whilst pursuing my work and watching the results, that the effect was much like that produced when climbing up a steep mountain. The further one rises, the more the plains below are opened up. I will try to explain more fully as I go on exactly what I mean, and the foregoing observations are made with a view to render less keen the disappointment, which I feel will inevitably follow the reading of this paper. I am conscious that my observations will be read before, and by, men of practical experience in horticulture, and particularly in the culture or advancement of the rose, and by men keen upon the development and improvement of the rose; and I am sorry for this reason that I can give little practical assistance to any who are desirous of entering the field of hybridization on their own account. I may, however, render their disappointment less acute. The main reason why I can render little practical help is, that, when all is said and done, hybridization is a science of pure experiment, or rather chance, as I can easily show. To do this it is necessary for me to assume that everyone—at least everyone interested in horticulture—knows that, so far as seed bearing plants are concerned, they will re-produce their species in some shape or form—maybe with some variation or maybe exactly similar. And it follows that, by the fertilization of different varieties of the same species, new varieties, or at least varieties with some distinctive feature, may be produced. It is a different matter, however, to reduce the chaos, which results from indiscriminate cross-fertilization, to something like definite order—a result far beyond my ambition, or the scope of this paper, if indeed it is at all possible. All I can do in this direction, and indeed it is very little, is to give some results of our labors in hybridization.

EARLY EFFORTS.

We began work in 1879, and naturally our first operations were upon what were considered the finest show varieties of that day. Naturally we chose parents of the choicest colors, having beauty of form, and, as far as possible, vigor of habit. The hope of course was, that the fertilization would re-produce varieties of a different kind, with at least some of the qualities for which the parents had been selected. The results for many years were disastrous. Keen and bitter disappointment followed our experiments. We, however, persevered, always upon fixed lines, carefully recording our crosses and results, making a careful and close observation of the most important features of the offspring of the cross; and I regret to say that, in the majority of instances, there was nothing but dismal failure to record. I think I can safely say that the most certain result of our crosses in the early stages of our experiments was to convince us of the absolute uncertainty of what our results would be. This prevails even now, though in a lesser degree. Possibly this is one reason why rose hybridization is so intensely interesting. There is always and ever the element of uncertainty in it so dear to human nature. One never knows what the fertilization of any two varieties will produce, or, more correctly, how many different varieties. One seed pod containing four seeds may—and has to my knowledge—produced four seedlings absolutely distinct in every conceivable respect. Many and many a time I have seen produced from the seeds sown from one hip, half a dozen seedlings absolutely distinct in color and form, some as single as the ordinary dog rose, and some so full in substance that it was impossible to get them to open even under glass.

Vaughan's Seed Store Silver Cup.

Won by Poehlmann Bros. Co., with 100 Mme. Chatenay.

In the early eighties, when we began to see the results of our labors, we abandoned the original basis of our experiments, namely, the fertilization of the better varieties of hybrid remontant or perpetual, and began a series of cross-pollination between the hybrid perpetual and teas and Austrian briars, and then, using the results of this first cross in a systematic course of in-breeding. The main object which we had in view, was to produce varieties of roses at once vigorous in their habit, continuous in their bloom, at the same time retaining the absolute essentials of all good roses, namely, beauty of color, perfection of form, and delicacy of perfume. It was, of course, a great ambition, and how we have succeeded we must leave the world to judge. Broadly, I would say that such success as has attended our labors, is due far more to the careful selection than to any defined plan of fertilization. As a broad basis of our experiments, we took as parents such varieties as appeared to us to embody the chief elements of our ideal, and worked steadily from these. We had, of course, to experiment upon a very extensive scale, and my point will be readily appreciated when I say, that we were only able to retain for use, either for further fertilization or for commerce, about five per cent of the seedlings raised. To appreciate the labor this entails upon the hybridizer one must follow the rose from the hip until it reaches maturity. In hybridization, carried out upon a systematic plan such as ours, it means that the plants with which we are working, have to be specially selected, planted and grown, and the blooms fertilized. There is then the period required to ripen the hip (and in Ireland this takes considerable time, owing to the cold and dampness of our climate). Then comes the sowing of the seed, and the attention and care during the period of germination. In this respect, it is interesting to note the wide difference in the period of germination in the different cases.

GERMINATION PERIOD.

In some instances, the seed will germinate in two or three months, and in others I have known it to lie dormant for 12 to 15 months. I have never been able to give any reason why this should be so, and particularly why there should be marked differences in the periods of germination in seeds taken from the same hip, yet there is very frequently a marked difference. To continue on the point I am making, it takes anywhere from three to six months according to the vigor of the plant, to bring it to such amount of growth, as will enable us to bud it for the purpose of testing outside. Then, when it is budded, of course it takes a full year to bring the plant to maturity. Here again, one has to face uncertainties, and to be very careful about forming a judgment, as experience has proved time and again, that in the early stages of culture some varieties have displayed the greatest shyness in flowering, and yet, after a few years' cultivation, have taken their places in the front rank, as perfect garden roses, blooming with the greatest freedom. Each year we are compelled to make a very close selection, and to discard every seedling which does not suggest some improvement in, at least, one or two of the essential elements of the perfect rose, otherwise we would, of course, have been flooded out with varieties, which would have been of no practical value to us, or indeed to the rose world at large.

DOUBLE CROSSES.

The system we ultimately adopted was hybridization in the first instance between hybrid perpetuals and teas, and then in-breeding from their offspring, upon the following lines. We made four distinct crosses. We took a seedling of our own, which gave some evidence of possessing at least some of the qualities aimed at, and, in the first instance, this seedling was crossed with the male parent, secondly, the seedling crossed with the female parent, thirdly, the male parent crossed with the seedling, fourthly, the

AT THE CHICAGO ROSE SHOW.
George Reinberg's Vase of Richmond.

female parent crossed with the seedling. As soon as we were able to form an opinion of the results of this inter-breeding, we again made a selection of those most closely approaching our ideal, again in-breeding, but with this difference, that we only made use of a limited number of parents, but in almost every instance making a double cross. For example, if we made a seedling with, say, Marie Van Houtte as the male parent, then during that season, we reversed the cross making Marie Van Houtte the seed bearing parent, and the seedling the male parent. We always had relays of plants prepared in duplicate for this purpose, and we carefully and methodically registered each experiment, thus carrying on our work in a systematic manner, the system of selection of course always playing the most prominent part in the results.

From practical experience, we were able to ascertain which varieties, or rather types, gave us the best results, and we were, therefore, able to a considerable extent to lessen the waste, and to reduce our methods to a system containing at least some elements of certainty. We, of course, have made use of varieties of other raisers, where we have been struck by any special feature which they contained, which was in our opinion an advance upon anything in commerce. The result of our labors has been to produce, what is admittedly an absolutely distinct class, if not family, of roses known as the "Alex. Dickson type." We of course claim that the types of roses we have introduced have made a great advance on those previously in commerce. We aimed at producing a type having vigor of growth, freedom and continuity of bloom, the flowers full and perfectly formed, with unusually long petals, at the same time, growing on bushes, the foliage of which is luxurious and handsome. How far the varieties we have sent out have done what we claim for them, you must judge.

LA FRANCE AS A PARENT.

In our experiments and in struggling with the qualities we have indicated, we felt convinced that La France would prove one of the most useful parents we could possibly have, if we could succeed in making it produce seed. It was, of course, the opinion of most hybridizers that La France was sterile, and with this opinion we were for a long time inclined to agree, and indeed the best that could be said for it is, that there is just the possibility that it may be fertilized. Out of many hundreds of crosses with this rose, only in one single instance did we succeed in making it produce seed, but we feel that the labor we spent was amply repaid, as the ultimate result of it, was the introduction of Mrs. W. J. Grant, known to you as Belle Siebrecht, in our opinion one of the finest roses in cultivation, at least from the Britishers' standpoint. In addition to this, we have always found from practical experience, the roses descended from this particular cross have always impressed their offspring with some at least of the more prominent qualities of the parents, and it was pursuing this particular line of breeding that enabled us to produce varieties, which, from a British standpoint, are ideal exhibition flowers, and at the same time the plants are floriferous and of excellent constitution.

In this group we might mention Killarney, Mrs. Edward Mawley, Bessie Brown, Liberty, Lady Moyra Beauclerc, Lady Ashtown, Mrs. David McKee, Dean Hole, Countess of Derby, Betty, Mrs. G. W. Kershaw, and, last but not least, Mildred Grant and William Shean, two of the finest exhibition roses at present in cultivation in Great Britain. Mildred Grant resulted from a seedling between Niphetos and Madame Willermoz in the first instance, crossed with a seedling of our own, which is not in commerce, and the system of which this is an instance applies pretty generally to all the better classes of roses introduced by us.

After many years of continuous experiment on various lines, we have at last been able to produce what has long been sought for, namely, a yellow tea of good size and color, with a vigor and hardiness of the hybrid perpetual. I refer to the rose Harry Kirk, which is now being grown by most of you, and you will shortly be able to judge whether it fulfills the promises we have made on its behalf. I think you will not be disappointed.

It is interesting to note, in relation to the La France cross, that the same inclination to sterility is apparent in the rose Augustine Guinnoisseau, sport from La France. Out of hundreds of experiments we have not succeeded in getting a single seed pod from this variety.

AT THE CHICAGO ROSE SHOW.
Poehlmann Bros. Co.'s Vase of Richmond.

ROSA INDICA CROSSES.

The only other point of practical importance, which occurs to me, is the fact that in our early experiments, when we had in view the object of producing varieties which would give a greater continuity of bloom, we used in our efforts Rosa Indica, and, after a considerable amount of labor, we succeeded in impressing this much valued quality on some of its offspring which are now in commerce.

In a general way we found it very difficult, and indeed impossible to place the smallest dependence upon the presumption that hybrid perpetuals would impart to their offspring anything of their own color, and, in a general way, we may say that after much experience the chief varieties which we use and use with the best results for the purpose of getting blends are the hybrid perpetuals. Horace Vernet, Charles Lefebvre, General Jacqueminot, and also Austrian briars, Persian Yellow and Harrisoni.

From what I have said, you will readily appreciate the fact that it would be wholly impossible, and, indeed, I think a waste of your time and mine, to give in detail the results of 30 years' hybridizing, and I have done my best to make clear the general lines upon which our work has been conducted, from which it will be readily inferred that the element of chance must always play a prominent part, and I might aptly use the well known quotation from Pope:

"All nature is but art, unknown to thee,
All chance, direction which thou canst not see."

And I ask such of you as may desire to enter for yourselves upon this interesting field of experiment, to go forward with confidence,

"Knowing that nature never did betray
The heart that loved her."

WITH THE GROWERS

The Easter Stock in Philadelphia.

Trips of inspection among the growers of Easter plants in and about this city find them all hard at work getting their stock in condition so that it shall be good and ready and at its best on the days of delivery. With very few exceptions the standard is quite the equal of previous seasons. The plant that is essentially the Easter flower, the lily, is seen in large quantities, although some of the growers have cut down their quantities considerably. The low price of the flowers and the large loss in bulbs that develop disease after considerable expense has been put on them, amounting in many cases to half the crop, has discouraged many and it would seem, unless they can be assured of a greater measure of success by the bulb dealers, they will have more difficulty in securing orders for the coming season than ever. The multiflora type has been the most conspicuous failure, the loss being general with all the growers, ranging in quantity from 20 per cent to, in some cases, a total loss.

Quite a number, in order to get the best stock, paid as high as one-third more for especially selected bulbs, but the results were no better, as there seems to be no effort made at selection, or, if so, they are futile, as in nearly every case the plants, when developed, proved to be very badly mixed, and so many of them were thrown out after considerable labor had been spent on them, to say nothing of the valuable greenhouse room and the pots. With L. giganteum the results have been much better and most of the stocks of this variety look very promising. The Azores also look well, very little disease having developed, the plants presenting a very healthy appearance. They do not, however, carry many flowers to the bulb, many showing but two and three buds, with quite a sprinkling with only one flower. This is attributed to small bulbs, the variety being scarce as yet. Some seven to nine bulbs carry five to seven flowers, which pays very well. The Formosum lily from the island of Formosa is a new kind. This is having its first trial this season and is in the main satisfactory. It is especially valuable for cutting, having a long stem with three to four flowers, which are a trifle longer in shape than multiflora or giganteum. The outside of the petals have a distinct greenish cast, which gives the flower a rather unique look and makes it quite distinctive.

WM. K. HARRIS.

The veteran grower, Wm. K. Harris, who makes a specialty of choice plants for Easter, has his large houses filled to overflowing with a magnificent assortment of the most popular flowering plants, all in the various stages of growth that will bring them just right for the great festival. It takes great manoeuvering to get everything in such a large stock right as to time, but Mills, the foreman, seems to be equal to the occasion and promises to get there safely as usual. A large crop of daffodils had just been cut, the last for the season, just in time to escape the competition of the southern shipments. Daffodils are grown largely for cutting during February and early March. After they are once in, orders by the thousand, up to five or more, can be filled at any time. Each season a little more is added to the import order, as the trade is growing.

Mr. Harris believes in doing things in a large way in this, as in azaleas, and there is to be seen here a grand stock of the latter in all sizes. House after house is filled with the most popular varieties. Made up pots and pans are a specialty here, and where a color effect is desired these plants fill the bill in every way. Deutzias are done so well here that all the other growers have dropped out and Mr. Harris has the market to himself. His stock is very well budded.

The bougainvillea is also a specialty and fine plants are to be seen. The new variegated one which originated with Mr. Harris is now grown in such quantity that flowering plants are offered at moderate prices, and no Easter stock will be complete without some specimens of this beautiful plant. Rambler and other roses are also found in good shape and full of buds, very showy stock. A house of the Azores lily is seen in fine shape. Mr. Mills said, "Just a few for our customers. We could sell many more, but they don't pay." Then he showed a bed of probably 100 plants, bulbs secured by Mr. Harris from a private place, the owner of which had purchased the stock from him many years ago and had never grown any other. No disease had ever appeared in this lot of plants and Mr. Harris hopes to be able to grow his nucleus into a stock from which he may draw on for his own forcing. Variegated maples, rhododendrons, Ghent azaleas, Japanese azaleas, spireas

AT THE CHICAGO ROSE SHOW.
Peter Reinberg's Vase of American Beauty.

and genistas make up the balance of the assortment. Some 12-inch pans of spirea are showing great heads of bloom and should make very effective plants for decorating. Several large houses are given up to Boston and Scott ferns, dracænas and Pandanus Veitchi, which latter is a specialty with Mr. Harris, who

ESTABLISHMENT OF EMIL BUETTNER, PARK RIDGE, ILL.
View of Portion of One House Devoted to White Lilac.

was the first to grow it in quantity commercially. Very well budded plants of gardenias should make great sellers at Easter, as they will be exclusive. A house of hydrangeas, well grown plants, about completes the list of one of the best stocks in the city. Much of the stock is shipped out of town and Mr. Mills takes great pride in the system of packing and delivery, an arrangement with the express companies, a sort of follow-up system, insuring great promptness in forwarding.

THE ROBERT CRAIG CO.

The Robt. Craig Co. has its extensive greenhouses filled with a great variety of Easter flowers. They do not do things in a small way here; all that is best in plants suitable for this great event are grown by the thousand. Lilies are always handled in quantities and this season's crop is as well done as any they have had for years. The multifloras, of which they tried a few, acted in much the same way as with others in this section and were far from satisfactory, but the Azores and the giganteums have done splendidly and should find a ready sale. Mr. Craig thinks the giganteum the best lily for a late Easter and the best all around variety, with the possible exception of the new Formosum, which he thinks will prove to be a good one. Tobacco stems between the pots is the best remedy for green fly, they being very effective if kept fresh. A large house of hydrangeas in which the plants are very vigorous and strong is a feature. Mr. Craig said that this late Easter gave the hydrangeas a chance to develop slowly and would make them good and hard, a condition that should please the retailer and his customer afterwards.

Azaleas are seen here by the thousand in sizes to suit all buyers, from the small plants, suitable for basket work, up to the specimens fit for the most exclusive trade. All colors in both double and single, with a fine lot of Bernard Andreas Alba, the popular white, in bush form, and a quantity of pyramids, nicely shaped plants, all go to make this stock well worth inspection. Rambler roses, Crimson, Lady Gay and Dorothy Perkins are largely in evidence, very fine plants, well set with clusters of buds. Tausendschon, the German rambler, is highly recommended by Mr. Craig, who says it will be a great seller when better known. Like old Greville, it carries flowers of various shades of color, from white to deep pink, in one cluster at the same time. A fine lot of hybrid roses are coming in and will add variety to the others. A house of genistas, well shaped plants, will add their beautiful golden glow. Mr. Craig says they are great sellers. There are two large houses of rhododendrons, which will make a great show. A specimen of the variety Pink Pearl in flower was most beautiful. Mr. Craig says this is without doubt the handsomest variety yet introduced, and when it becomes more plentiful should be a great seller. A great quantity of spirea, amongst which is a block of the new pink, will make a great show when in flower. A house is given up to lilies, small bulbs, planted out on the tables for cutting. Between the rows of lilies is planted Asparagus plumosus for cutting. This Mr. Craig calls an example of intensive culture, or two crops at a time, as after the lilies are cut away the asparagus will have a good start and will soon be ready for cutting.

Other features are large quantities of crotons, thousands of them in small plants of the best varieties. Mr. Craig says they have a great trade in these with florists, who grow them on for fall sales and also for planting out in fancy bedding. A splendid stock of Ficus pandurata in all sizes is coming on. This should have a great sale as a porch plant or for the lawn, as it does splendidly outdoors and its unique tropical appearance is sure to command instant attention. A house is filled with dracænas, well colored plants, which Mr. Craig says find ready sale as centers for vases, porch boxes, etc. The Craig Co. has a large out-of-town clientage and packing to greenhouse men is already going on, with orders increasing daily.

GODFREY ASCHMANN.

Talking of intensive culture, one can see this idea working to perfection at almost any season of the year at the establishment of Godfrey Aschmann, Ontario street. His business has greatly expanded in the past five or six years, and as he cannot add any more houses in his present location, he has been obliged by force of circumstances to make the most of the room he has, and it is astonishing to see how every inch of room, both on the tables as well as above and below them, is utilized. Every inch of available space is pulling and filled with stock in all stages of growth up to that ready for shipping. Azaleas, hydrangeas, lilies, cinerarias, genistas and bulbous stock are seen here in quantity, and without exception all of good quality. Mr. Aschmann aims to grow his stock cool, so that it will be hard, as almost all his trade is with out-of-town florists who depend on him year after year for their Easter and Christmas stock. The shipping facilities are of the best in the land, as the two principal express companies send their wagons three times a day for the goods as fast as they are got ready.

Araucarias are a specialty here, as are

ESTABLISHMENT OF EMIL BUETTNER, PARK RIDGE, ILL.
View Across Section of Enchantress Carnations.

also Boston and Scott ferns. Immediately the Easter stock is out of the way, the entire space will be filled with salvias (Bonfire) begonias, geraniums and other bedding plants. A feature here is the moonvine, all grown from seed. They are grown by the thousand and are sent to even remote parts of the country and to such extremes as Mexico and Canada. Mr. Aschmann attributes much of his success to his advertising in the trade journals, which keeps the trade informed as to the stock on hand and the prices. He says he often has to return money received with orders which have been received in answer to his advertisements, but which were not received until the stock was exhausted.

H. FAUST, MERION.

H. Faust, of Merion, who makes a specialty of lilies and who has been very successful in the past, has devoted almost his entire place to their culture, and his stock of 10,000 pots is as pretty and uniform a lot as one would want to see. They are certainly an ideal lot, and Mr. Faust is justly proud of them. The varieties are two-thirds giganteum, carrying five to eight flowers, with a number of double crowns having from 10 to 12 to a pot. The balance of the stock are Azores mostly for cutting. These carry from two to three blooms to a stalk. The percentage of loss in this entire lot was very small and scarcely worth mentioning. K.

Emil Buettner, Park Ridge, Ill.

A grower who has made a distinct impression on the Chicago cut flower market is Emil Buettner, of Park Ridge, a suburb located about 13 miles from the center of the city on the Chicago & Northwestern railway. Mr Buettner is known not only as a grower of select stock, but as well for the sound principles upon which he has built his business. A theory to which he closely adheres in practice is to build only as fast as the glass he has can be brought to the limit of its production. His keen and impartial judgment has frequently brought him to the front as one of the judges at the flower shows.

He put up his first greenhouses in July, 1888. This range consisted of three violet houses, 10x125 feet each, and three 18x125-foot houses for carnations and miscellaneous stock. Each of the first six years saw new glass added until at length approximately 100,000 square feet was brought into commission. After that new building went on more slowly, although from time to time old houses were torn down and rebuilt as occasion required. Thus the range as it stands now is a new one of modern construction, all built within the last three years and consisting of 29 houses, varying in width from 18 to 29 feet, and in length from 125 to 265 feet.

White lilac is one of the famous products of this establishment and it is surprising what a small ground area it takes to practically supply the Chicago market as it is known that a good share of it is grown here occupying scarcely a third of a short house.

Carnations are showing up in prime condition. The varieties grown include: Thos. Lawson, White Lawson, Lady Bountiful, Enchantress, White Enchantress, Rose Pink Enchantress, Winsor, Aristocrat, White Cloud and White Perfection. The same varieties will be grown this coming season. The 1,000 plants each of Winsor and White Lawson will be about quadrupled. The excellent care of the stock is clearly in evidence to visitors, but may also be judged from the fact that 55,000 carnations were for a time this season weekly consigned to the A. L. Randall Co., of Chicago.

The roses, which were just coming into crop, at the time of our visit, include 1,500 plants of Bride, 12,000 Bridesmaid, 9,000 Richmond and 500 Killarney. Of this last named variety there will be 4,000 plants for next season. Of neither roses nor carnations does Mr. Buettner make a practice of selling cuttings, but does plan to grow healthy stock as well as conditions of any season will permit. When a thing does not produce or fails to be profitable out it goes and in its place something that promises better results is put.

Cotton Shower Bouquet.

The lilies are coming along famously. There are about 9,000 plants, all for cutting at Easter time. Giganteum is the variety grown and it now promises to come up to the best of other year's crops.

Formerly Mr. Buettner was associated in business with Ernst Wienhoeber. The partnership agreement expired in 1894 and was not renewed, although he still supplies the Ernst Wienhoeber Floral Co. with stock. All the rest of his flowers go to the A. L. Randall Co.

Cotton Shower Bouquet.

The accompanying illustration shows a bouquet of cotton with showers of ribbon and Asparagus plumosus, made by Geo. F. Lambert designer for George & Allan, Cincinnati, O. This bouquet was presented to two of the leading members of the Forepaugh Stock Co., playing at the Olympic theater, March 5, on the occasion of the anniversary of their wedding.

H. Bayersdorfer & Co., Philadelphia, Pa.

Just now the current of Easter trade is setting heavily toward the well known florist supply house of H. Bayersdorfer & Co. Orders have been coming in so heavily that they but recently put on more help and still all hands are being rushed. In the line of Easter offerings, there does not seem to be anything that the trade will demand, which they do not have in stock. A very noteworthy feature is the great supply of flower baskets, many of which are in novel and beautiful designs.

As an instance of the business they are doing, within a short time they have sold out 100,000 bunches of sea moss. Their great stock of crepe paper pot covers is another feature that should be attractive to florists. Their stock of Pompeiian ware from large vases to small dishes, comprises a most unique and attractive display and must be seen to be thoroughly appreciated. Their stock of immortelles, designs and other requisites of the business, is so complete that prospective buyers cannot fail to have their wants satisfied. With an immense building and all the accessories for handling unlimited business, this concern has justly earned the title of the "leading supply house of America."

London.

There is great depression in the cut-flower trade at Covent Garden, especially in roses, fine long stemmed Liberty being sold at 50 cents per dozen. The outlook for trade is certainly bad. In pot plants trade is also quiet. The prominent features are: White lilac; Begonia Turnford Hall; Nephrolepis todeaoides and the Bermuda juniper. Hardy plant roots are now selling freely, also pansies and sweet peas in small pots.

At Wisbech in Cambridgeshire, the center of the English bulb growing district, the bulbs look promising, though the season is late. R. H. Bath, Ltd., is one of the largest growers and the bulbs are planted between gooseberry and apple trees. The trees form a good shelter to the bulbs, which is necessary, as the position is flat and open, with a strong breeze from The Wash. Over an acre of Tulip Golden Crown was one of the most prominent features.

At the Royal Horticultural Society's meeting orchids were magnificent, as were the forced shrubs from Wm. Paul & Son, Cheshunt, consisting of Pyrus Persica, the carnation flowered and P. Scheideckeri. The same firm showed Rosa hugonis, a small leaved variety, with single, yellow flowers, likely to be used for hybridizing. Jarman of Chard staged his new cactus Cineraria stellata, which he has perfected after five years' work on it. It was much admired. S.

To be Done Now.

IN THE GREENHOUSES.

Get the cannas all into the flowering pots as soon as possible.

Shift on young coleuses and grow the plants in a very light house to bring out the color in the foliage.

Pot marguerites firmly in a fairly heavy soil that will produce flowers rather than rank growth of foliage.

Leave a little air on at night for a short time after mulching rose or carnation benches with fresh manure.

As soon as the early poinsettia cuttings are ready insert them over a strong bottom heat in clean sand.

Watch the firing very carefully. Overheating the pipes in the morning not only wastes fuel but is productive of weak growth and insects.

Fumigate at the first sign of green fly on the pelargoniums or the plants will soon be overrun.

Top the strongest shoots on the tea roses when a few inches high unless extra large flowers are wanted.

Pinch out the earliest flower trusses on the calceolarias to throw vigor into the side shoots, which will form a much finer head.

IN THE STORE.

Magnolia foliage, when fresh and of good color is a great help in making up large, striking wreaths.

Never be afraid of giving too good value in wreaths or designs at a time when stock is plentiful.

Asparagus Sprengeri and bright red carnations have an affinity which should often be made use of.

There is scope for originality even in such a small matter as decorating an Easter azalea.

Where possible, always use the foliage of lily of the valley with the flowers as no other green is so suitable.

Charming effects in sprays may be obtained by associating flesh colored carnations and violets.

OUTDOORS.

In grading operations see that tree trunks are not deeply buried. Many fine trees have been injured, and in some cases lost, by inattention to this.

Prepare a quantity of dry soil for sprinkling around and covering small seeds when the beds or borders do not work well.

Clean up edging plants such as the dwarf phloxes and others that flower early.

Shake a little loose litter around the rhubarb roots that are not to be forced to protect the stems, earlier produce being thereby insured.

Uncover the tea roses in order that the stems may harden a little before pruning.

Sow cornflowers, annual chrysanthemums, mignonette and other hardy annuals in clumps and lines.

Quarters that were well prepared in fall for asters, sweet peas, etc., may be lightly forked over as soon as the surface is dry enough.

When pricking up the shrub borders for the sake of tidiness avoid disturbing the surface roots.

Where slugs are plentiful sprinkle a little soot and lime around the primroses or many of the earliest and best flowers will be lost.

OBITUARY.

E. Dillwyn Darlington.

E. Dillwyn Darlington, for many years connected with the well known seed firm of W. Atlee Burpee & Co., Philadelphia, died from pneumonia March 26, at his home on Maple avenue, Doylestown, Pa., his native town. His connection with the above firm commenced 25 years ago and at one time he produced all the plants required for the plant department of the Burpee business. In 1887, when the firm bought Fordhook farms near Doylestown, Mr. Darlington, being a resident of that town, was made superintendent of trials, a position which he occupied up to the time of his death and in addition during the winter months looked after a very large portion of the correspondence in the Philadelphia office.

Mr. Darlington had a very wide knowledge of plant life and was a recognized authority on many varieties of vegetables and flowers and, besides writing numerous leaflets and books, contributed quite frequently to the different horticultural magazines. He was in his fiftieth year and leaves a widow and three children, two boys and one girl. When Mr. Darlington died, Mr. Burpee was in the south with Mrs. Burpee, but returned immediately upon receipt of telegram announcing the sad event.

General stock, especially specimen plants, not up to the standard of the past several seasons.
Lilies rather short. Most growers having discarded a greater percentage of their bulbs than usual.
Tree wistarias, in large sizes, and Dorothy Perkins in basket form, exceedingly fine.
Growers report all stocks, particularly medium price sizes, selling well.
A busy Easter expected and predicted.

WM. WALLACE BURNHAM.

The Late W. A. Kellerman.

The body of Prof. W. A. Kellerman, who died of fever in the wilds of southeastern Guatemala, will not be disinterred, respecting the wishes of the scientist expressed to the family prior to his death. This fact, coupled with the news brought by James Zimmer, one of the students in the ill-fated expedition, who has just returned from Guatemala, that governmental customs preclude removal of bodies before the elapse of several years, make it assured that Prof. Kellerman's burial mound among nature's children he loved so well, will not be disturbed.

Mr. Zimmer and H. E. Barber, another student member of the party, visited Mrs. Kellerman recently and told the story of the scientist's death. Mr. Zimmer said the party was about 17 miles from any city when Prof. Kellerman became very ill, but that his malady was not considered serious. The next day, March 7, Dr. Kellerman with two companions traveled to Los Amates on mules, and from that place the botanist and Mr. Barber took a train for Zacapa, 75 miles distant, on the new railroad. Dr. Kellerman died the following night. He was found dead, with his hands folded across his breast when his companion got up about midnight to see if anything was wanted. The body was buried the day after death, according to law.

Plant Affinities.

Mrs. Emma Burbank Beeson, sister of Luther Burbank, has a short article under this title in the Overland Monthly. The principles of this plant affinity, the writer says, are imperfectly understood, and though simple in themselves admit of an almost infinite variety of combination. Characters which appear incongruous may invite and produce harmonious results, apparently new qualities being only new combinations of latent or obvious characteristics of the parent plants. Many vegetables and flowers are the products of repeated combinations as the result of plant affinities. These have been termed chance results, yet wind and tide, animals, birds, insects and other natural forces have been active in furthering their development.

Mother April.

Make me over, mother April,
When the sap begins to stir!
Fashion me from swamp or meadow,
Garden plot or ferny shadow,
Hyacinth or humble burr!

Make me man or make me woman,
Make me oaf or ape or human,
Cup of flower or cone of fir;
Make me anything but neuter,
When the sap begins to stir!

THE New England Dahlia Society will hold an exhibition of dahlias at Tremont temple, Boston, Mass., September 17-19.

OWING to lack of space we are compelled to hold over several important papers this week.

IT is understood the official report of the meeting of the executive committee of the Society of American Florists, held in Niagara Falls, N. Y., March 24, will be made public by Secretary Rudd next week.

A HIGH tribute is paid to the geranium catalogue of R. Vincent, Jr., & Sons Co., of White Marsh, Md., in the Horticultural Advertiser, Eng. This publication deplores the fact that no such catalogue is issued in England and the editors are in a peculiarly good position to know.

THE committee of fifty on the National Flower Show met in Chicago in the club rooms of the Art Institute March 26, and the following day a meeting of the executive committee was held. Important business was transacted on both occasions. At the request of the chairman, W. F. Kasting, we await the official report of proceedings, which it is understood will be forthcoming soon.

THERE is a disposition on the part of growers who open their greenhouses to the public on Sundays to withdraw this privilege. It is a pity that the pleasure of the many should be curtailed by the misdoings of the few who do not, apparently, appreciate the kindness of growers sufficiently to keep their hands off choice flowers or conduct themselves properly when in the greenhouses.

AN international forestry exhibition is to be held in Stockholm, the beautiful Swedish capital, in 1910. American products are expected from the Adirondacks and other points. British exhibitors will send exhibits and others are expected from Egypt, South Africa, Canada and Australasia. Comparisons will be made of rare woods from remote parts of the world and practically unknown trees now without names will be subjected to comparative examination and recorded in accordance with a definite scheme of terminology.

Remedies for Primula Poisoning.

ED. AMERICAN FLORIST:—

In THE AMERICAN FLORIST I see inquiries respecting a remedy for poisoning owing to handling Primula obconica and inclose one I have used with success; it is also equally good for ivy poisoning: Carbolic acid, two drams; soda sulphate, three drams; water, six ounces. Mix and apply. H. N. S.

In reply to inquiries for a remedy for poisoning by Primula obconica use: Witch hazel or Pond's extract, or better still, marjoram cream, put up by Dr. E. Cook of Brooklyn, N. Y.

W. ROELKER.

Forced Draught for Hot Water Boiler.

ED. AMERICAN FLORIST:

We wish to have information in regard to the use of a blower for forced draft to enable us to use the fine grade buckwheat, pea, or soft coal, in a hot water boiler. I recently read article in the AMERICAN FLORIST on Pierson's plant at Tarrytown, in which it was stated that buckwheat coal No. 3 was used with steam engine to force hot water through the greenhouse pipes. We have too small a plant for a steam boiler. How can we get our draft with hot water boiler? We have a strong pressure of water. Can we use a water motor?

A. T. B.

Regarding the burning of fine grades of coal in hot water boilers, would say that proper results can be obtained in two ways: first, with a chimney of proper height to give sufficient draft to draw the air through the coal, or by a mechanical forced draft; if there is no steam available, a small apparatus can be operated with a water motor, but we would advise installing a small electric motor. If you give us more detailed information regarding the size of the boiler or the size of the grate, we will be glad to give you more definite information on the matter. J. H. C.

Trouble with Geraniums.

ED. AMERICAN FLORIST:—

We send you a sample of diseased geraniums. May we ask through your columns the cause and remedy for this trouble? It attacks the plants in all sizes, from the cutting bench up to old plants, but more generally when they are growing strong. All at once the young leaves look as if they had been stung and gradually curl up; they do not recover. It does not take a bench generally but a plant here and there, all through the house. They have plenty of room and are kept on the dry side, with all the fresh air that can be given at this season of the year. Is our soil too light? SUBSCRIBER.

The trouble arises partly from poverty of soil, as shown by the thin texture of the foliage and comparatively poor color. A more loamy soil would help matters here and firmer potting. But this disease is often troublesome even with the best grown plants and if possible it would be well to get new stock for another season. If not, plant some healthy stock for propagating outside and take cuttings of this in summer, thus obtaining your stock clean, for very often plants will outgrow this trouble in the open air. Your treatment as to giving plenty of air is right but has this been followed right along? Usually, when by keeping plants hard from the first solid growth is made, these hardy specimens will either not take any disease that is about, or, if it attacks them, they are vigorous enough to throw it off. When it comes to treating such plants as geraniums with nostrums it is a poor lookout and it is far better to grow the plants healthy and hard so as to resist disease. G.

Meetings Next Week.

Butte, Mont., April 10.—Montana Florists' Club, Columbia Gardens.

Chicago, April 8.—Gardeners' and Florists' Union No. 10615, 10-12 Clark street.

Wants, For Sale, Etc

One Cent Per Word, Cash with Adv.

For Plant Advs., See Ready Reference Section.

Every paid subscriber to the AMERICAN FLORIST for the year 1908 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

Where answers are to be mailed from this office, enclose 10 cents extra to cover postage, etc.

Situation Wanted—by young man, 22 years in greenhouses or store: have had some experience; in Chicago preferred. Address C. WAHLERS, 928 Walnut St., Chicago.

Situation Wanted—By a first-class grower of roses: married 10 years' experience; state wages and particulars in first letter. Key 489, care American Florist.

Situation Wanted—German, single, two years' experience in general greenhouse work in America, wants position. Address Key 487, care American Florist.

Situation Wanted—Young American would like a position in first-class store long experience no objection to Pacific coast. Address Key 502, care American Florist.

Situation Wanted—By practical grower of roses carnations and general stock; lifetime experience, middle aged, married good references. Key 499, care American Florist

Situation Wanted—By a good greenhouse man 13 years' experience in roses, carnations, 'mums and pot plants, state wages and particulars in first letter. Key 500 care American Florist.

Situation Wanted—By young man, strong and capaple of doing all kinds of greenhouse work; five years' experience in Germany and 4 months in America. Key 498 care American Florist.

Situation Wanted—As working foreman, 16 years' exprience in fruit, roses carnations, mums and all bedding plants, etc. Private or commercial; one in family. Box 45, Oceanic, N. J.

Situation Wanted—As superintendent, working foreman or gardener; private place, commercial, cemetery or hotel grounds; A1 grower in all lines, landscape and floral; California place wanted; address, stating wages, etc., H. BREEN, Burlingame, San Mateo Co., Calif.

Situation Wanted—As working foreman first-class grower of roses, carnations, palms, ferns and bedding plants; good decorator and designer; German, 29 years of age 12 years in this country. Sober and good worker best of references. Box 2018. Frank H. W., Fort Wayne, Ind.

Situation Wanted—By a young man of 23 years of age on a private place or commercial greenhouses; 3 years' experience in greenhouse, lifetime in vegetables; have some knowledge of planting trees, shrubs, perennials and flower beds Key 492 care American Florist.

Situation Wanted—Gardener, first-class greenhouse man good experience in all kinds of gardening also vegetables and seedstore work; German, 29 years old 15 years in the gardening and florist business, desires position. Please state wages address. FRANZ BADEWITZ. General Delivery, New Orleans, La.

Situation Wanted—As head gardener on private or public place; German, 31 years of age, 12 years in this country; strictly sober; practical experience in all kinds of indoor cut flowers, palms, ferns, fancy pot plants also decorating landscaping, carpet bedding fruit and vegetable growing; best of references. F. H. W., Florist, care F. Koenig, 1119 Columbia Ave, Ft. Wayne, Ind.

Situation Wanted—Working foreman and manager; 35 years of age. German, single, hustler strictly sober, intelligent good education, 22 years' practical and theoretical experience in roses, carnations ferns 'mums, violets, bulbs, beddding plants fancy Xmas and Easter plants, design, deco ating landscape; good references as working foreman; disengaged April 1; good wages expected. Key 501, case American Florist.

Help Wanted—Good man to run small place himself. Steady position; German preferred. With full particulars address Key 491, care American Florist.

Help Wanted—Single man to grow roses and carnations and bedding plants under foreman; steady job and advancement to right man; state wages expected in first letter, address JOHN HORSMAN, Dorchester, Va,

Help Wanted—At once, a man capable of potting and bedding out also assisting in retail store when necessary; salary $12 per week; full particulars and copies of references in first letter. JOHN RECK & SON, Bridgeport, Conn.

Help Wanted—Good growers of first-class stock, roses, carnations, 'mums, etc., for retail store; coldest weather this winter 14 above; modern greenhouses; good wages to right party. Address Key 490, care American Florist.

Help Wanted—First man to grow bedding plants bulb stock and chrysanthemums; good potter and planter; steady place good wages for sober, industrious man. CASSIDY & SONS, Calvary Cemetery, Greenpoint Ave., Long Island City, N. Y.

Help Wanted—A good steady man understanding growing cukes and lettuce under glass; married man preferred, steady employment and nice cottage furnished; give references and state wages. W. J. WHINNEY, Hazel Park, St. Paul, Minn.

Help Wanted—At once A1 rose and carnation grower, one who can take full charge of 40 000 ft. glass and produce good stock must be sober and honest, and fully capable of handling help to good advantage; wages $60 00 per month, and if single, good room on the place. Address Key 497, care American Florist.

Catalogues Wanted—I desire late catalogues from firms handling seeds, bulbs and florists' supplies. W. W. WESTON, Manila, P. I.

For Sale—Greenhouse and cottage with 2 to 5 acres of land in Glen Ellyn, Ill. Good for business and investment. Write the owner, Box 295, Jamestown, Pa.

For Sale—27,000 feet of glass, filled with first-class stock; located in one of Chicago's suburbs; low price. Address MRS. HUBERT HANSEN, 4016 N. Clark St., Chicago.

For Sale—Greenhouses and stock; about 20,000 feet of glass, well stocked with all kinds of bedding plants, ferns, palms and cut flowers; for terms inquire of Mrs Hugo Book, College street, Worcester, Mass., or L Midgley, Worcester Conservatories, Worcester, Mass.

For Sale—20,000 square feet of glass, well stocked; three acres of ground; six-room house; all modern, in good condition, and a money-making place in best city of Indiana; $4,500 required. Details to parties meaning business. Key 427, care American Florist.

For Sale—A retail florist business, 5 greenhouses about 5000 feet of glass, store barn, 8 room house, lot 100 feet front, over 200 feet deep, located in fine neighborhood; a good opportunity for two young men who understand the business with small capital to start; good reason for selling; party must have $5 000, balance to suit purchaser. G. F. THRUN, 8707 Cedar Ave., Cleveland, O.

For Sale—Five greenhouses under 20,000 feet of glass, with growing crop of carnations, four acres of ground, best kind of soil, five-room and attic frame dwelling 24x36 feet, good well and windmill, barn, horse and wagon. Property built six years ago and is in A1 condition. Will be sold at a bargain. WISCONSIN NATIONAL LOAN AND BUILDING ASSOCIATION Room 22, Mitchell bldg., East Water and Michigan Sts., Milwaukee, Wis.

WANTED.

A competent man for designing and packing room to take full charge. Must be a first-class workman on funeral work and be thoroughly experienced in the retail cut flower line. Also one experienced on pot plants and design work; good situation for the right men: apply with references

S. J. REUTER & SON, INC.,
WESTERLY, R. I.

MANAGER—FOREMAN

To take entire charge of our plant. Must be strictly sober, reliable and capable of conducting a large place successfully and be indorsed by former business associates; and must be able to take up about $5 00 worth of stock to **have a working interest** in the firm.

L. F. DARNELL, Treas., The J. M. Gasser Co.
1035 Prospect Ave., Cleveland, O.

To Lease or Run on Shares

The owner of a small nursery and well stocked greenhouse and flower shop now doing business in Northampton; will make a liberal business offer (based on lease or shares) with an enterprising nurseryman and florist of training and experience. Apply to the

POEHLMANN'S ROSES

Awarded DORRANCE CHALLENGE PRIZE At the American Rose Society's Show last week.

ALSO ELEVEN OTHER FIRST PRIZES.

The high quality of every one of our exhibits was remarked by all the trade visitors. It proved that the Poehlmann Bros. Co. not only has held the pre-eminent position won at the previous exhibitions, but has this season surpassed itself in quality of its stock and beaten its own best record. No other exhibitor ever made such a showing. We can supply the exhibition grade of stock to all who order it and shall cut heavily for Easter.

Big Cuts of Long Beauties and Carnations Now On

We grow our own **Easter Lilies, Lily of the Valley, Mignonette, Tulips, Daffodils,** and all other seasonable flowers. Special low prices on all kinds of stock.

EASTER LILIES IN POTS. Order now while in bud. They ship better.

$12 to $15 per 100 blooms. $120 to $150 per 1,000 blooms.

See Superior Quality of Stock for yourselves. Visit our greenhouses when you come to town. Send us your Easter order Now.

POEHLMANN BROS. CO. Office and Salesroom, 33-35-37 Randolph St. Long Distance Telephone, Randolph 35. **CHICAGO**

Galt, Ont.

There was a pleasant meeting of 25 guests at the home of John Wells, on Concession street, March 7, nearly everyone present being a gardener or a florist. A good dinner was served and a most pleasant time had, Adam Dunn, the Rose street florist, paying tribute to his host in a humorous and excellent speech. We reproduce herewith an excellent portrait of Mr. Wells, who, although not at present in the best of health, is able to superintend the management of his business, in which he is ably assisted by his son Vincent. John Wells is an old and much respected citizen, having been in the florist business here for 45 years. He is a native of Banbury, the old Oxfordshire town in England, famous for its cakes and cross.

Breeding Cyclamens and Primulas in Eng.

Calling at the St. Georges Nursery Co., Harlington, Middlesex, about the middle of March, we found the staff busy fertilizing and hybridizing for the new crop of seed, and the sight was a very interesting one. The thoroughness with which all the work is carried out, nothing being left to chance, and all crosses carefully recorded, is characteristic of this firm. Its experience of over 40 years in the culture of plants for market and plants for seed raising, two quite distinct branches, stands it in good stead when fertilizing for selfs, for reproduction of the same forms, or for hybrids. About 20,000 plants are grown annually, the seedlings, now in a house, 12x200 feet, looking as regular as if they had been pricked out.

Batches of each variety in two-year-old plants are very carefully selected, this careful weeding out of all poor forms, doubtless having much to do with the excellent strains of seed produced. All that do not come up to the high standard set are weeded out from the seed bearing plants and sold in the open market for decorative purposes. Size, distinctive clear coloring, freedom of flower, stiff stems and handsomely marked foliage are among the qualities that must be possessed by any plant that is used for seed sowing. In fertilizing for keeping a strain true no pollen is

All Orders Receive Prompt and Personal Attention.....

taken from the plant fertilized, always from another of the same variety, self-fertilization being known as a weakening process. Quite as much care in selection is taken with the plants for mixed seed, but here the best forms are simply placed as close together as possible to be handy for crossing and the various colors used discriminately. From this class of seed fine breaks of a totally distinct character are often obtained. Doubtless very cheap seed meets with the approval of some trade growers, notably the inexperienced, but those who are older at the game know the value of these carefully selected strains, even if the price is a little higher.

Among the cyclamens noted were an immense giant type of Salmon Queen, called Ourown, the result of several years' careful reselection. This is well known in Covent Garden. Seed so far is very limited and will, no doubt, be dear for a season or two. Picturatum is light rose with a claret colored base. Grandiflora Alba is the largest of the pure white varieties and very free flowering. Mont Blanc is also an immense flower, pure white with large eye. Excelsior is rightly named, white with purple base, a grand grower. Sunray is pink with claret base. Prince of Wales is bright red, extra large. Duke of Connaught is the best of the purple class. Princess of Wales is the best of the dark pinks. Rosy Morn is a delicate rose with a scarlet base. Brilliant and Crimson King are very rich, extra dark crimson. Most of these fine giganteum varieties have received certificates of the Royal Horticultural or Royal Botanic Societies. All are in the best of health and thrive under the simplest conditions of culture.

Of the varieties of Primula Sinensis, Crimson King, Giant White, Salmon Pink and Royal Purple are the best and the names are amply descriptive. A very rigid selection has been carried out here, and only the very finest retained. There is a marvelous wealth of color and the plants are models of perfection. It should be noted that only the lower whorls of flowers are fertilized, each plant and flower being separately treated and restored, so that there is no possible chance of mixing. The eight houses of cyclamens, each 12x200 feet, and the primula houses are most interesting and beautiful and one felt well repaid for the journey to visit them.

S.

Chicago.

TRADE CONTINUES JUST FAIR.

Trade opened up fairly active Monday morning, with a good number of shipping orders. City trade continues very slow. Prices are so low that in the country where flowers cannot be had at an hour's notice, there is a strong inducement for florists to carry stock in good quantities. The approach of Easter is also an inducement for the small growers to hold their stock for the higher prices sure to prevail a little later. The volume of stock on the market is larger than a year ago at this time, but the prices realized are so much lower that the total money received is much less. This causes the wholesalers to complain of hard times, a condition probably more due to the great quantity of stock than to any materially smaller demand than usual. The supply of American Beauty roses is large, but the demand seems to be about equal to it. Prices continue at rock bottom in spite of the excellent grade of the stock. Bride, Bridesmaid and Killarney roses are still off crop, but the new wood is rapidly forming buds and there are indications of a good crop at Easter. The cool weather has held the carnation crop on, with the result that there will probably be a larger supply for Easter than was anticipated a while back. There has developed a little more active call for Lawson carnations. In regard to lilies, the indications now are that the supply will be fully up to all requirements. Easter being so late this year that all growers have been able to bring along their plants without trouble. Tulips, daffodils and lily of the valley continue in very heavy supply. Narcissus poeticus has come into the market this past week. Green stock is in good supply and moving well.

CORRECTION.

In our list of awards last week we were incorrectly informed concerning the prize winner of Crane & Co.'s silver cup, offered for the best 100 American Beauty roses. Reference to the official list of awards, published elsewhere in this issue, will show Bassett & Washburn won the cup instead of Poehlmann Bros. Co., as we reported last week.

NOTES.

Frank Oechslin's flowering Easter stock in pots and tubs includes lilac, double flowering thorn (so-called crab apple), Chionanthus Virginicus and acacias, all in the finest possible shape. A house of spireas is already a fine sight, though not the mass of white bloom expected in another week. Hydrangeas, azaleas and rhododendrons are in the same thriving condition. Of the azaleas there are about 2,000 plants in various stages of progress, about 4,000 in all having been forced this season. Three large houses of Easter lilies promise a mass of blooms, averaging fully half a dozen to the plant. Of bulbous flowers there is a very large stock, all excellently grown. In the one of the houses now may be seen fully half a million seedling ferns for fern dishes in flats, once transplanted, and about 200,000 more in 2-inch and 3-inch pots.

Trade visitors to the rose show divided their attention pretty evenly among the growers who have built up the largest greenhouse establishments in the world. Representatives of both Peter and George Reinberg, the Poehlmann Bros. Co., Bassett & Washburn, Wietor Bros. and J. A. Budlong were busy showing growers, especially from the east, through these plants, and admiration was expressed that such a high grade of stock should be grown on such a large scale.

The A. Dietsch Co. is rather busy, having several large rush orders on hand, among which are 10 patent short roof houses, 500 feet long, for the Grand Rapids Greenhouse Co., using cedar exclusively, and the Dietsch patent "U" gutter, which latter meets with much approval with greenhouse men. This firm is also at work on the additional block of houses for Kidwell & Ellsworth, near Downers Grove, as well as a number of other establishments.

The annual sale of flowers for the benefit of the Home for Crippled Children will be held in the Japanese tea room, Auditorium Annex, April 18, from 11 o'clock a. m., to 9:30 p. m. Plants, cut flowers, fruits and vegetables are being solicited by the committee in charge. Children who have raised plants or cared for them a month will be permitted to compete for ribbon prizes.

Chas. W. McKellar's store has a different appearance since the installation last week of a new cooler, 6x18 feet. The orchid section has a double plate glass front for showing his large assortment of cattleyas, dendrobiums, etc.

The new red seedling carnation, Orland P. Bassett, was much admired by rose show delegates who visited Hinsdale. The vase on exhibition at the Art Institute lasted through the three days of the show in first class shape, looking well as late as Saturday morning.

The Poehlmann Bros. Co. is installing electric power to be used to run the soil mixers at that firm's Morton Grove establishment. Gasoline has heretofore been used, but August Poehlmann says there will be no more of it allowed around the place.

We regret to report the death of R. F. Gloede's father, Wm. H. Gloede, on March 29. The funeral was held Wednesday at 1 o'clock at R. F. Gloede's residence, 2012 Grey avenue, Evanston. He was a member of Chicago German Veterans.

E. E. Pieser, of the Kennicott Bros. Co., says he is the only "bull" in the fern market, having recently bought a large number of ferns to hold in storage against the shortage he believes will develop within a few weeks.

Frank Beu cut his first Kaiserin roses last Thursday. As there were no entries in this class at the rose show he would have secured a prize without competition if he had exhibited them.

C. N. Thomas, of the A. L. Randall Co., last Saturday returned to his big farm near West Springfield, Pa. This firm reports a good business in the line of Easter supplies.

Jensen & Dekema exhibited at the rose show a vase of W. N. Rudd's new carnation, Defiance, the excellent qualities of which were commented on by various growers.

Wietor Bros. have as fine a lot of Bride and Bridesmaid roses coming on as they have ever had. They will be in good time for all Easter calls.

The daily papers on Monday chronicled the first signs of spring in the appearance of hepatica blooms in the woods near Downers Grove.

A good demand for birch bark and rustic ware is reported at E. H. Hunt's. A novelty shown here is a basket made of pussy willow.

J. P. Foley, of the Foley Mfg. Co., has the sympathy of the trade in the loss of his three-year-old daughter, who died Thursday night.

The Florists' Club meeting Thursday night, April 2, at 8 o'clock, at the Union restaurant.

The J. B. Deamud Co. is now receiving some fine outdoor grown Narcissus poeticus.

C. M. Dickenson, of E. H. Hunt's, has been on the sick list for several days.

Chicago Notes.

Onions and roses, the humble cabbage and the tulip, figured with equal prominence in stereopticon views shown before the sociology department of the Englewood Woman's Club March 23, in the Englewood Masonic Temple at a lecture by Miss Bertha Chapman of the Chicago Bureau of Charities on "The Educational Value of School Gardens."

Chas. Herr, well known on the local market years ago as "Chippy" Herr, a "picker up" for one of the express companies, was a visitor Tuesday. He is on his way eastward from California.

The committee of the club in charge of the rose show reported a deficit of about $350.

Visitors: Carl Hirsch, Hillsdale, Mich.; Geo. S. Holmes, Cedar Rapids, Ia.; Axel Aggerholm, Onarga; H. A. Alspach, Sacramento, Calif.

Milwaukee.

BUSINESS IMPROVING.

There was quite an improvement in trade during the past week and at present writing it looks as if stock will come in less quantity. The dark weather of the past week will no doubt check everything so that we can expect prices to hold up, for the time being at least. Violets are selling somewhat better as is also all the bulbous stock. All the stores are making good showings of plants and are preparing for a big plant trade at Easter.

NOTES.

C. B. Whitnall, for a number of years in the flower business and now treasurer of the Citizens Trust Co., has been nominated for city treasurer on the social democratic ticket.

John H. Heitman has been obliged to go to the hospital and undergo an operation, but is reported to be much improved now.

Holton & Hunkel Co.'s stock of Baby Rambler roses is large and of fine quality this year.

Nic Zweifel is cutting some fine carnations, especially good Beacons being noted.

John Howard is sending large shipments of sweet peas every day.

H.

Buffalo.

STOCK OVER-PLENTIFUL.

The supply of all kinds of stock shows no indication of dropping off. Weather such as we have had the past week, inclining to the warm side and a fair amount of sun, will have a tendency to hurry stock along that should be kept back for at least another week, and from the amount of trade in the different stores it will not be needed. The retailer without a greenhouse can have his innings now, as the market here and farther east is over-stocked, or such flattering inducements would not be made to the retailer to run a special sale on some different flower each day.

NOTES.

Again a Buffalo boy is to the front. This time it is Michael Bloy, who has purchased the greenhouses and stock of Geo. Rackham, Detroit, Mich. Mr. Bloy's first knowledge of the business was gained at the greenhouses of Wm. Scott, where he was for several years, and every move he has made has been to a larger field, and now that he has started for himself his friends in this city wish him all success.

The executive committee of the Florists' Club had a business meeting on Thursday evening, when several things of importance were taken up and after revision will be submitted to the club for their approval. When President Sandiford appoints his committees for the year, which will be at the next meeting, there is every indication all will strive to make his administration a success.

The executive committee of the S. A. F. have come and gone and were seen but once in the city, but from the report of Vice-President McClure and ex-President Kasting a great amount of business was transacted and then away to Chicago.

There has been quite a good many store openings the past two weeks and nearly all of the florists had palms and flowering plants, mostly palms, rented for a week at a time, which is lots of labor and not very much profit.

There are no indications so far of any amount of building in this vicinity this year. What has been built will have to earn a little more before some can rebuild and nearly all of the houses around here are in good shape.

There are no street fakirs in the flower line; had there been during the past three weeks when flowers have been so plentiful there is no telling what the prices would have been; as it was they were low enough.

Wm. F. Kasting went to Chicago.

Visitors: P. Welch, Boston, Mass.; Peter Crowe, Utica.

BISON.

INDIANAPOLIS, IND.—Six greenhouses belonging to Christ Schlensker & Sons were damaged by hail March 18. It is estimated that the damage will amount to $3,000. Hotbeds owned by the city in Garfield park were also damaged to the extent of $2,500. The glass covering ten beds was shattered and the plants were practically ruined. Other losses were: Henry Rieman, $500; Fred, William and John Meyer, $3,000; Herman Stiecker, $3,000; Henry Brehob, $2,000, and H. D. Schilling, $400.

FUNERAL WORK PLENTIFUL.

The floral displays in the windows of the up-town florists in this city have been things of beauty for several weeks past, filled with azaleas, carnations and all kinds of bulbous spring stock. The azaleas are done now, as are also the violets. The latter have been unprecedented in production, the season having been very favorable to their growth. Outdoor violets are now in flower, and lovers of this dainty blossom can still be supplied, though not quite as fine blooms. Carnations have been had, and still are coming in the greatest abundance. The beautiful Enchantress, Lady Bountiful, White Perfection and Beacon are some of the best varieties grown. Roses have done well. Nice cuts of American Beauty, Bride and Bridesmaid, Killarney—which is doing better than ever—Golden Gate and others are coming in to supply all demands. The social demand for flowers has not been very great, but the funeral work has more than counter-balanced the deficit and created a trade for the larger part of the flowers grown here. Florists seem well satisfied with the season's trade and are well prepared to furnish an abundance of flowers for Easter.

NOTES.

Geny Bros. have an enormous stock of lilies which will be ready for Easter. They have extensive ranges of greenhouses and are preparing to erect additional houses in the coming summer. They have a fine range of houses out of the city which they have utilized this season for growing lettuce, for which there is a fine demand. They have now on hand 15,000 plants for which there is a daily demand. These houses and the new ones to be erected will be equipped for flowers for next season.

The Joy Floral Co. expect to build two fine new houses similar to, and adjacent to a range they already have in which roses are grown. These two new houses will each be 30x400 feet and will be used for roses.

STOCK OVER PLENTIFUL.

During the past week, the "gentle spring" of the poets, developed sunshine that was anything but gentle in its touch on men and plants, under glass. As a consequence we have a great volume of stock of all kinds pouring into the market and the end is not yet. There can be no doubt that from now until Easter it will continue to come freely. In addition to the great stock of roses and carnations, there is a bountiful supply of all spring flowers. The southern narcissi are now coming in large quantities though there does not seem to be any great call for them. Callas are on the market in large quantities. By present conditions the best stocks are being popularized with the great middle class, which is the mainstay of all business. Previously, orchids, American Beauty roses and gardenias were not within the reach of their pocketbooks and they, as a rule, then knew of them only by name. Even if we never return to the high prices of the past we will, at no distant date, have many more buyers. It would be a relief to see cool weather from now on to Easter, especially on account of the violets, which are already beginning to show the effects of the heat.

March 30.—A great volume of roses and carnations is pouring into the wholesale district and the market is merely a scramble to unload.

FLORISTS' CLUB.

Arrangements have been made for the following exhibits at the next meeting at the old club rooms in the Grand Opera House building, Eighth avenue and Twenty-third street, April 13: Roses: Newport Fairy, from Julius Roehrs Co., Rutherford, N. J.; Rhea Reid, from the E. G. Hill Co., Richmond, Ind.; Wyndmoor, from Myers & Samtman, Philadelphia, Pa.; My Maryland, from John Cook, Baltimore, Md.; Mrs. Potter Palmer, from Poehlmann Bros. Co., Chicago; Mrs. Jardine, from W. P. Craig, Philadelphia, Pa. Carnation Lloyd, from A. Jahn, New Bedford, Mass. The credit for this prospectively fine exhibit belongs to Secretary Young, and he should be encouraged by a rousing attendance.

NOTES.

The best of the retail flower trade of this city, following in the wake of patrons of the great hotels and theaters, keeps moving up town. Nearly all of the best stores are now above Madison square and many are above Forty-second street. To illustrate how this is happening, it is but necessary to state that the historic Fifth Avenue hotel, facing Madison square, will close April 4. By May 1 the work of tearing it down will be well under way.

While it is tacitly agreed that Twenty-eighth street is what "Little Tim" Sullivan calls "the big noise" of the wholesale district, the Coogan building, Twenty-sixth and Sixth avenue, is entitled to a share of credit for the business done there. Both the New York Cut Flower Exchange and the New York Cut Flower Co. do a heavy business and it is not unusual to find buyers in these marts from towns and cities extending over a radius of 100 miles from the metropolis.

On the morning of March 28 C. C. Trepel, the well known Brooklyn retailer, was observed leaving Twenty-eighth street with a two-horse wagon of the moving van pattern, loaded with cut flowers. These, coupled with all that John Weis, A. Hanig and other Brooklyn retailers clean up, should help some.

The Johnston Heating Co. has secured the contract for an extensive remodeling of the heating plant at the range of John N. May, Summit, N. J. Two new tubular return boilers will be installed. This firm is also making extensive alterations in the heating plant at A. J. Guttman's range at Summit.

It is stated that the committee charged with the organization of an Orchid Society, has received overtures for a union with the Horticultural Society of New York. This is a matter which is likely to be settled, more by fanciers than by commercial growers.

Pres. Traendly and John Young have returned from their Chicago trip and were well pleased with the rose show and the western metropolis. During the big chief's absence. Chas. Schenck was so busy that he almost forgot that he had a partner.

Samuel A. Woodrow, the Thirtieth street plantsman, has just returned from an extensive trip. While absent he arranged for a great supply of Easter lilies and other plants, consignments of which now arrive daily at his store.

Alfred H. Langjahr, of 55 W. 28th street, is now handling a heavy cut of Ulrich Brunner roses. The stock well sustains the fine reputation which this rose has already established.

Over at John Young's, under the watchful eyes of George Hildebrand and Miss Behan, the big stocks of American Beauty roses and Cottage Gardens carnations were kept moving.

Peter Brown, of 50 West Twenty-eighth street, is generally recognized as the king of the curb brokers in flowers. He now handles American Beauty roses.

A. M. Henshaw, who always handles the best roses and carnations, continues to excel in these as well as many other stocks.

Hartford, Conn.

This is a busy time of the year at the greenhouses and nursery at Elizabeth park, where thousands of plants for transplanting are being grown, and there is also much going on at the office of Park Superintendent Parker, for while little actual work will be done in the parks before April 1, designs for all the plantings are being made and some interesting additions are being planned. The nursery at Elizabeth park has been enlarged by 100 frames. Most of the 20,000 plants which the additional space makes it possible to grow will be used about the park entrances, especially in Bushnell and Riverside, these being the two parks visited by the greatest number of people.

Along Asylum street, in Bushnell park, there will be a series of beds, taking the space once occupied by shrubbery. It is believed that brilliant planting will here be very effective and give a particularly good impression of the city, not only to the travelers going and coming by Union station, but also to those who simply look from the car windows. The additional pleasure to passersby on the street will be obvious.

Superintendent Parker said recently that the new planting would be so arranged as not to impair the lawns which are a feature of the city parks, but the flowers will be used in border planting to lend a little additional color. Last year about 95,000 plants were set out in the various parks and the total number this year will be between 115,000 and 120,000. The grading about the Rocky Ridge park will not be far enough advanced for any flowers to be planted there this season. The tulips about the Corning fountain have been uncovered and the shoots are about an inch above the ground. Every fall Dutch bulbs are placed in this bed and the following years they are placed in less conspicuous places, until they finally revert so completely that they can no longer be used.

EAU CLAIRE, WIS.—A. T. T. Lauritzen reports an increase in the population. A son, now three months old. His place is in good shape. O. L. Demmler says trade is good. His stock of bedding plants is complete.

BUSINESS QUIET.

With the exception of a busy 10 days, about the middle of the month, the present season has been to the quiet side, although there is very little reason to complain, considering the condition of the industrials. Carnations and roses have been over abundant for six weeks past with prices of $2 per 100 on the best carnations, and $2 to $10 for best roses. The bulbous stock is excellent and fortunately no glut has yet appeared, with good prospects for Easter. Lilies are in a very promising condition, except that the plants will be hardly as tall as desired. Some pretty window displays are now seen, massing of azaleas being the most popular. One or two retailers have been making a specialty of violets at 15 cents per bunch for Saturdays, but the balance of the trade manage to do very well at the regular rate of 25 cents per bunch for the very best quality, and are content to pass up the cheaper kind. This flower has been a great producer the present season and there have been efforts to unload at any price, although some have been able to maintain regular figures by making up finer and larger bunches than the usual run, thereby adding to their prestige as dealers in good stock. One of our large banks will resume business in another month, which will have a beneficent effect upon collections. M. M.

PHILADELPHIA, PA.—Robt. Pyle, president of the Conard & Jones Co., will read a paper before the Florists' Club of Philadelphia, April 7.

STOCK PLENTIFUL.

Business the past week was moderate until Saturday which wound up with a rush, nearly all the stores having a good trade on that day. The funeral of Thos. B. Wanamaker, at which there were many elaborate pieces, took place on Saturday and cleaned up the stock of orchids and other choice flowers. Roses are still very plentiful, as in fact are all other flowers. Carnations which shortened up a bit last week are now in full supply again with very fine stock offered at $1.50 to $2. Sweet peas are very plentiful and being popular with the public sell as well as any of the smaller flowers; $4 to $5 per 1,000 is about the price for good stock. A few specials sell at a dollar or two higher. Lily of the valley is seen in large quantities at $1.50 to $3 per 100. The southern daffodils are now in full swing, great quantities reaching the market every day. The price in 5,000 lots is $2 per 1,000 for some varieties and less for others. The best Emperor bring $5 to $7.50 per 1,000. While the stores take a good many, about four-fifths are sold on the street which are lined with curbstone merchants handing them out at 10 cents a bunch. Easter lilies are getting plentiful, the advance guard of the Easter crop, and seem to be of good quality. Callas are almost a drug and sell at the buyer's price. The growers report many advance Easter orders and think from the interest shown by the buyers and the various reports they make that a good business is assured. The stock is coming along nicely but all hope for a little cooler weather, as with the thermometer in the eighties, it is hard to keep stock in good condition. Much of the bulbous stock it is feared will get ahead too far in spite of all that can be done if the present weather continues.

NOTES.

The rosarians have returned from their western trip and are highly pleased with their success in winning so many prizes against all comers. It shows that eastern growers have a little on their western friends as yet, although they had to put their very best stock forward to do it.

Adolph Farenwald says he feels much benefited by the trip and what he saw there. The exhibition was a grand one. All the new roses were exhibited, many of them showing up better than ever before. Wyndmoor, the new pink of Myers & Samtman, made a hit with everybody and is destined to be grown largely and prove a great acquisition to the list of forcing varieties. White Killarney is a revelation to many and he feels sure will be as popular as the pink when it becomes plentiful and will replace Bride as the leading white. Of the beautiful Killarney staged he could not say too much and the general stock offered by the Chicago growers in a commercial way, showed that they had mastered the culture of this rose much better than the growers about here. He said it is mostly stock that has been pinched once. He thinks this the solution of the way to get rid of the surplus, as, by pinching, a rose is produced that will bring double the price of the first bud if it had been allowed to mature. Mr. Farenwald says to pinch twice destroys six flowers, as if the first rose was cut there would be two breaks with two fair flowers, and if these were cut each stem would break and produce two flowers, making six in all. The perfected single stem flower would have the strength of all these six flowers in it, but it is a question whether it would bring as much as all the rest. He thinks one can carry the growth of large flowers too far, but that the first sacrifice is all right and would pay. It takes from 12 to 14 weeks to perfect a crop of roses and this much time is lost when the pinching is done. He spoke of the fine American Beauty of the Florex Gardens which arrived late, being 40 hours on the way, but which were given a special prize, their appearance even after this test being so fine.

Robert Craig in speaking of the lily business thought the Formosum type from the Formosa islands which is being tried in any quantity for the first time this season promises very well. The percentage of loss of any kind is very small; in some cases every bulb has grown and is a healthy plant with flowers showing. Some carry but few flowers but this is accounted for by the size of the bulbs which were mostly small. It is certain that the orders for this variety will be very large for next year and the stock, which is limited, will likely be oversold. K.

Spring Show Pennsylvania Hort. Society

The feature of the exhibition which was held on Tuesday, Wednesday and Thursday of this week was the large number of entries in the flowering bulb section, there being a fine display of this class of plant. There was sharp competition for the H. Waterer prizes offered for the best hyacinths, tulips, narcissi and lily of the valley. The hyacinth classes were not quite up to the standard of last season as the warm weather the past two weeks has been too much for some of the stocks which were too far advanced to enter. In the hyacinths, La Grandesse, Kohinoor, British Queen, and Grand Maitre were among the favorites and there were some grand pans of these varieties. Tulips were also very fine, the following varieties leading: Queen of Netherlands, Pink Beauty, Lord Beaconsfield, Murillo, Grace Darling, White Joost Van Vondel, Toreador and Rose Luisante. Some very choice and well grown narcissi were staged, the popular varieties being Double von Sion, Golden Spur, Victoria, Emperor, Empress and Glory of Leiden. There was a number of entries of lilies of the longiflorum type, many of them showing very good culture. The varieties were chiefly multiflorum and giganteum.

There were a few entries of azaleas, some of which were very large and handsome, noticeably three specimens about six feet in diameter, entered by C. B. Newbold, and which were one of the features of the show. John W. Pepper, also staged three very fine plants. The entries of zonal geraniums were the best ever seen here. Some of the plants carried over 50 heads of bloom and caught the fancy of the visitors. First prizes for these were won by J. W. Paul, Jr., and second by C. B. Newbold. Primula obconica was well represented in two entries of 12 plants each and exceptionally fine they were. J. W. Pepper

won first, and second went to C. B. Newbold. J. W. Pepper won first on callas, the plants carrying eight to ten flowers each; C. B. Newbold second. Standard flowering shrubs were a novelty, being well covered with bloom. C. B. Newbold won first and second. Lilacs in pots were also showy, C. B. Newbold won first and J. W. Paul, Jr., second. There were two entries of well flowered wallflowers, the best seen here. J. W. Paul, Jr., was first with these and J. W. Pepper second. Burbank's California hybrid amaryllis were very showy, several entries being staged of the cut blooms, J. W. Paul, Jr., was first with C. B. Newbold second. There were some choice specimen plants of Nephrolepis todeaoides, G. W. Drexel won first, C. B. Newbold, second.

Orchids were exhibited by the Julius Roehrs Co., Rutherford, N. J., and Lager & Hurrell, Summit, N. J. The collections were not large but very interesting, containing some choice and rare varieties. The Julius Roehrs Co., staged also some well flowered plants of their new rose Newport Fairy. In the foyer at the foot of the stairs the H. F. Michell Co., and the H. A. Dreer Co. made exhibits of seeds and other specialties. In the center of the hall was erected a pagoda or canopy studded with electric lights and decorated with smilax and daffodils. This very pretty feature was exhibited as a decorative effect by the Wm. Graham Co. The list of awards will be given next week.

K.

Tarrytown, N. Y.

A well attended meeting of the Horticultural Society was held at Good Templars hall, March 27, 1908. President Angus filled the chair and in the absence of Secretary Neubrand, Wm. Scott was appointed secretary pro tem. Two applications to active membership were received and the executive committee presented the name of Henry Siegel for honorary member. Letters were read from donors to our prize fund for the next fall exhibition and most of the prizes given last year will be duplicated; so the outlook is bright for our next November show; the committee in charge is busy preparing the schedules, and they will be sent to all concerned in due time.

The prize for cyclamens, presented by Wm. Scott, was awarded to James Stuart, gardener to Mrs. T. A. Constable, Mamaroneck, also a cultural certificate. Mr. Stuart brought eight plants in 6-7-inch pots, which were perfect in every way; a finer lot of cyclamens could not have been seen anywhere else, and they were greatly admired and commented on. The same exhibitor was also awarded a cultural certificate for a large plant of Denobrobium nobile in full bloom, and W. H. Waite, gardener at Greystone, Yonkers, was given honorable mention for a vase of schizanthus. M. Tibbits, White Plains, will be on hand at our next meeting and give us an illustrated lecture on "Aquatic Gardens." Mr. Tibbits is a very successful amateur with those plants and we anticipate a very pleasant evening. A prize is also offered by Wm. J. Smith, White Plains, for best two flowering plants.

TRADE IMPROVING.

The market has been fluctuating considerably lately, but on the whole is somewhat more satisfactory than the previous two weeks. Roses are the slow articles, red piling up in big quantities in the commission houses; bulb stock is not nearly so plentiful. In fact, good daffodils have been scarce. Lilies are again in over-supply and there will probably be plenty of these for Easter. An oversupply of roses and carnations is not looked for at Easter, as several growers say they will be off crop about that time. There is quite a little speculation as to what kind of an Easter we will have, owing to the hard times, but the majority look for a record-breaker.

NOTES.

Gass, one of the south side growers and who ran a stand in the market, died March 26.

Mrs. Elicker, Homestead, has removed to 406 McClure avenue.

W. A. Clarke attended the rose show in Chicago last week.

Visitors: M. Shattles, New York, and Green, from Bayersdorfer & Co., Philadelphia.

Prompt and Careful Attention given to all Mail and Telegraph orders.

St. Louis.

MARKET DULL.

The market this week is dull, though not so crowded. Carnations have held up fairly well, prices ranging from $1 for splits to $3 for good and fancy. Roses are quoted from $1.50 to $5. Quite a few short American Beauties are in and are quoted at $2 and $3. The prospects are good for Easter supply of all varieties of plants. Violets are still coming in reduced quantities, small blooms, and in many instances short stems. Sweet peas will now take the place of violets for street wear. They are quoted from 20 cents to 60 cents per 100. Soon the early outdoor flowers will come in and this will influence the market on indoor stock to a great extent.

NOTES.

Harry Young is on the committee for the flower show to be given by the Horticultural Society this fall. Harry expects a big show to be given the first week in November at the armory lately built—a good location. This will be the week preceeding the National Flower Show at Chicago. Many of the visitors will be invited to visit St. Louis on their way there.

Herman Riessen, brother of Mrs. Ed. Buechel of the Riessen Floral Co., died March 23, at the age of 24 years. The funeral took place Thursday afternoon from the residence, 3434 South Jefferson avenue, to the New St. Marcus cemetery. The floral offerings were numerous, many from local florists. The sympathy of the trade is extended.

Harry Rieman, formerly of the firm of Rieman & Chandler, was bound over in $500 bail to answer charge of passing worthless cheques. Among the victims was George Waldbart, who, however, is willing to forgive and help Harry start again.

The disappearance of Nath. M. Kingsley, of the Mullanphy Floral Co., has been accounted for. He is again back at his post. He went away for a few days to rest up, not letting his partner, Wm. A Seeger, Jr., know of his whereabouts.

At C. A. Kuehn's stock is looking fine. He is receiving quite a lot of southern bulbous stock. His stock of roses is very fine, especially Chatenay, Alice Roosevelt and Richmond from Fred Ammann, Edwardsville, Ill.

Park Commissioner Scanlan is to pass on the advisability of a sunken garden being provided on the site of the old exposition building which was torn down for the Carnegie library.

R. Wolfsberger, of Kirkwood, is now gathering some extra fine California violets. He is lucky, as most of those coming into the market are of very poor quality.

It is expected there will be a big demand March 29-30 on account of the funeral of Superintendent F. Louis Soldan of the public schools.

The Florists' Club will hold its next meeting at its new hall on Locust street.

Alex. Johnson is confined to his room, suffering with severe cold and chills.

TRADE ERRATIC.

Too good to last long, can be applied to excellent advantage to the spurt of business we experienced the fore part of the past week. All lines of stock, except roses, cleaned up nicely, but alas; this condition was not to last long, for by Wednesday trade began to slump again, Consignments increased and consequently the commission houses were once more filled with flowers. As usual when stock is over plentiful, some of the retailers get busy and have special sales in cut flowers; in this way a great deal of the surplus stock was worked off on Friday and Saturday. The retailers are busy booking orders for Easter. All are looking forward to a good business; there is no doubt there will be enough flowers on the market, with the exception of lilies.

NOTES.

The J. M. Gasser Co. had the decorations for the Linder Co. The opening took place last week; thousands of pussy willow branches and yards and yards of gray ribbon and chiffon were used to carry out the color scheme of gray and brown. Chas. Russel deserves to be complimented on his ability as a decorator. Many and beautiful were the floral offerings which were sent by the various dry goods companies. Some of the most notable were: A magnificent basket of Killarney roses tied with a gauze bow; a large vase of splendid American Beauty roses, and an immense horseshoe, artistically designed.

The Storrs & Harrison Co., Painesville, and Merkle & Son, Mentor, are very busy these days booking late orders for Easter stock. Some exceptionally fine plants, including azaleas, hydrangeas, rambler roses, etc., are being handled by these firms.

The Cleveland Cut Flower Co. is handling large quantities of double violets; these meet with ready sales. The firm is cutting a splendid lot of Rose Pink Enchantress carnations, which are always in good demand.

The heartfelt sympathy of the craft is extended to F. W. Zeichman and wife, 6520 Quincy avenue, owing to the death of their daughter Lena, who was slain on Euclid Heights, March 29.

An elegant lot of spireas can be seen at the establishment of Casper Aull, Lee avenue. Mr. Aull says he is having a hard time trying to keep back the bulbous stock for Easter.

Fred Doeble, one of our busiest nurserymen, is wearing the stationary smile. Why? Because now he is the father of a daughter.

C. M. Wagner has been a heavy buyer in the market during the past week. He reports business as being very good.

Milford Parks is in Chicago, where he will remain for several weeks.

Adam Graham is spending a few days at Altamont, N. C.

Visitors: Ben Eschner, of Rice & Co., Philadelphia, Pa. FORESTER.

FAR ROCKAWAY, N. Y.—Israel H. Isenberg is having a greenhouse built on his premises on Grove street, at a cost of $500.

The Seed Trade.

American Seed Trade Association.
Geo. S. Green, Chicago, Pres.; M. H. Duryea, New York, First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-sixth annual convention, June 23 to 25, at Hotel Ponchartrain, Detroit, Mich.

C. W. BRASLAN has returned to California.

LOS ANGELES, CALIF.—Chas. Winsel reports business very good this season.

MARCH 16 was probably the big day this year in the mail order seed business.

NEW YORK.—H. Suzuki of the Yokohama Nursery Co. sailed for Europe last week. He expects to return in about six weeks.

PRESIDENT GREEN, of the American Seed Trade Association has been advised by Representative Mann that a hearing on H. R. 13835 will be given to seedsmen at Washington April 21.

HENRY NUNGESSER, of H. Nungesser & Co., sailed recently for Europe on the Kronprinzessin Cecilia and a cable announcing his safe arrival was received in New York March 24.

IN Representative Mann's report the statements of various leading seed houses throughout the country as to warranting or non-warranting, are printed, John Lewis Childs, of Floral Park, N. Y., being the only one mentioned as guaranteeing good seed.

THE Albert Dickinson Co. is now carrying a full line of the following stocks in New York: Sunflower, millet, canary, rape and hemp seed; Kaffir corn, barley, field wheat, field peas, buckwheat, rye, fodder corn and poultry feed. The office of the company is at Chambers and Judson streets.

SAN FRANCISCO, CALIF.—C. C. Morse & Co. are authority for the statement that the California Seed Growers Co., recently organized at Gilroy, has been dissolved. Ah Him, their Chinese foreman, who organized the company, has withdrawn from it and he returned to China March 24 for an indefinite visit.

CINCINNATI, O.—The trade here while welcoming a reasonable law prohibiting the importation of adulterants in any shape, feels that the proposed pure seed law puts every seedsman in the position of a lawbreaker. J. Charles McCullough feels tarpon pulling his bed clothes at night and will soon start for the Texas coast.

THE Bill H. R. 13835, if it becomes a law, will, undoubtedly, cause serious friction and many difficulties with all seed and bulb importation, as, under the law, no American seedsman can afford to import any stock not guaranteed by the foreign shipper to comply with the proposed U. S. pure seed laws and undoubtedly some foreign houses will hesitate to make this guarantee.

Braslan Seed Growers' Co.
Growers for the Wholesale Trade Only.
SAN JOSE, CAL.

TOULON, FRANCE.—"We have had rains here for 50 days in succession, which has damaged all kinds of work, delaying the planting of quite a good many stock bulbs. Those who have planted before the rains have far better prospects of crops, and the season will apparently be a good average."

Chicago.

Onion sets for immediate delivery are easy at about as follows: Yellow, $2.25; red, about $2.75; white, $3 for 32 pounds.

Grass seed contract prices on the board of trade March 31 were noted as follows: Prime timothy, $4.65 (no bids); medium red clover, $24; choice white clover, $15.

The Late E. Dillwyn Darlington.
See Obituary, Page 497.

Seed trade visitors during the week of the rose show were: D. I. Bushnell and Benjamin I. Corneli, from St. Louis, Mo.; Joseph E. Northrup, Minneapolis, Minn.; Charles E. Page, of Des Moines, Ia.; T. M. Landrum, with C. C. Morse & Co., San Francisco, Calif.

All Imported Seeds 100 Per Cent Alive.

In the report made by Mr. Mann to the House of Representatives, accompanying Bill H. R. 13835 and printed as Report No. 1278, it is stated as follows:

> "Section 3 also provides that, if weed seed or dead seed, or other matter materially reducing the value of seed, shall be added to seed, it shall be deemed an adulteration. This provision does not apply to seed as it is gathered or garnered, but only forbids the deliberate adulteration of seed by intentionally adding foreign matter to seed for the purpose of defrauding the purchaser or user."

Now while this provision does not apply to seed as it is gathered, the following paragraph in Section III regarding which Representative Mann makes no comment in his report, seems to be virtually prohibitive of nearly all business in the importing of seeds (see proposed Act page 453 of the last issue of the AMERICAN FLORIST) Section III, third with line 23, says seeds and bulbs shall paragraph, page 3, as printed, beginning be deemed to be adulterated:

> "If any seed or bulbs contain respectively dead seed or dead bulbs or any other matter reducing the value for seeding or planting purposes, provided that this paragraph shall extend only to seed and bulbs intended or offered for export or imported from a foreign country."

From this it will be seen that the seedsman who has in his possession through importation, any seeds which will germinate materially less than 100 per cent, whether such seeds be dead or unfertile, is a violator of the law, even if such seed existed in the crop as gathered, and even though it was impossible to clean them out. It would become possible for the government authorities to fine and imprison such seedsman.

[In reference to this subject in last week's issue under the heading "Seedsmen on Mann's Bill," lines 17 to 19 of page 3 of the bill as printed were cited in error instead of lines 23 to 25.—ED.]

Johnson's Improved

MUSHROOM SPAWN

Which Is Scientifically Inoculated with Virgin Spawn.

JOHNSON'S, LTD., are thechief makers of Mushroom Spawn and growers of Mushrooms in England, and they recommend this season's improved spawn as being in better condition than ever.

Correspondence invited for OVER-SEA ORDERS. Prices and particulars on application.

NOTE THE ADDRESS:

JOHNSON'S, LTD.,

44 Bedford Row, London W. C., Eng.

FLORISTS have a splendid opportunity of raising **Mushrooms** by utilizing the **waste space** under the benches, and then utilizing the **waste material** of expended mushroom beds in growing flowers. **Lambert's Pure Culture MUSHROOM SPAWN,** the best spawn in the market, is sold by all leading seedsmen. A fresh sample brick, enough for a trial bed, together with illustrated book on "Mushroom Culture," will be mailed postpaid upon receipt of **40c** in postage stamps. Address **American Spawn Company, St. Paul, Minn.**

Greeley, Colo.

This district ships about 300 carloads of cabbage, 250 of these being the Cross or so-called Greeley Market, which has been locally grown for about a dozen years. I am trying to find out from what source it has originated and wherein its superior qualities lie and will advise the AMERICAN FLORIST. This local-grown seed is selling here at $12.50 per pound, and not to be had.

The Agnew Seed Co., which planted 100 acres of onion bulbs last year for seed, will increase its acreage this year and is already planting. Onion bulbs have wintered very well.

Less than one-half crop of onion bulbs will be shipped from here this season. In 1906 the output was about 700 carloads; this year only about 250 cars.

MARKET GARDENS.

CUBES of sod are preferable to pots or flats for sowing melons in to transplant to the field.

MURIATE of potash as a manure for potatoes is thought by some growers to spoil their flavor. These growers prefer the sulphate of potash.

AT a cost of about eight cents each, a grower of cantaloupes at Brawley, Calif., has used small muslin and wire protectors that have proven very useful in forwarding his plants.

Prices of Indoor Vegetables.

The prices of indoor vegetables at leading points March 28 were as follows: New York, cucumbers, No. 1, $1 to $1.25 per dozen; No. 2, $3 to $4 per box; lettuce, 25 cents to 75 cents per dozen; mushrooms, 25 cents to 55 cents per pound; mint, 20 cents to 30 cents per dozen bunches; radishes, $2 to $3 per 100 bunches; tomatoes, 15 cents to 25 cents per pound. Chicago, cucumbers, $1.35 to $2 per dozen; radishes, 15 cents to 30 cents per dozen bunches; mushrooms, 25 cents to 50 cents per pound. Boston, tomatoes, 30 cents to 40 cents per pound; cucumbers, $7 per box; mush-

The Nursery Trade

American Association of Nurserymen.
J. W. Hill, Des Moines, Ia., President; C. M. Hobbs, Bridgeport, Ind., Vice-President; George C Seager, Rochester, N. Y., Sec'y.
Thirty-third annual convention to be held at Milwaukee, Wis., June, 1908.

TIME to improve those old and worthless apple and pear trees by grafting the foundation of a new head upon them.

BROWNSTON, IND.—Fred Steinkamp has purchased an interest in the Brownstown Nursery Co., and the firm name will be Merrill & Steinkamp.

THE Devils Lake Nursery has been incorporated at Devils Lake, N. D., with capital stock $5,000. John W. Maher, Henry Hale and J. E. Maher, all of Devils Lake, are the incorporators.

KEARNEY, NEB.—W. L. E. Green, one of the proprietors of the Estella Nurseries, Wood River, has located here with his family and started a nursery. A retail office and yard will also be maintained.

GODFREY, ILL.—Wm. Jackson celebrated his eighty-eighth birthday March 15. Mr. Jackson is a very active man for his years. He is in the young man class as he loves to mingle with people who are much his junior in years and is able to hold his own in many respects with them. Mentally he is very alert and physically he is much stronger than most men of 70 years.

New Texas Nursery.

John J. Duncan, of Minneapolis, is about to start a large nursery and greenhouse plant between Houston and Galveston, Tex., on the Southern Pacific R. R. He is arranging for a 2,200-acre tract of what he considers the best land in eastern Texas for the purpose.

Wm. H. Moon Co., Morrisville, Pa.

Of the 300 acres under cultivation by the Wm. H. Moon Co., as a nursery, every one of them shows something interesting in the line of ornamental trees, flowering shrubs, climbing vines, etc. This place is so well stocked with everything necessary for landscape adornment, that it is hard to state what is most noteworthy; but brief mention of a few features, very interesting to the writer, may find favor with that large and ever increasing class that is interested in the satisfactory execution of outdoor art.

Landscape gardening would be but an empty name without the tree, the shrub and the vine. I may at another time give a sketch of the Moon family, back through generations of nurserymen; but at this season it is more appropriate to deal with the activities of the men of the present, of the men who are carrying on a great business reaching into every state of the union as well as foreign countries. When it is stated that this concern gives employment to from 100 to 200 men, it will be readily understood that the business is in a flourishing condition.

To the writer, a very interesting feature is the propagating houses from which immense numbers of young plants are annually transferred to the beds or rows for growing on, thus keeping up the supply. The grafting of conifers may not be familiar to all who have to do with ornamental gardening, but at this place it is practiced with great success. Though a great area of the nursery is devoted to maple, oak, beech, catalpa and other shade and ornamental trees in variety, there is a proportionately large stock of flowering shrubs, hybrid roses, climbers and herbaceous plants.

Dreer's Specials in Hardy Perennials

RUDBECKIA RAYS OF GOLD.

Anemone Japonica. 40,000 plants in stock. These are not dried up dormant, or winter killed stock, but established, growing, 3-inch pot plants, which will flower early and continuously.

	Per doz.	Per 100	Per 1000
Japonica. Rosy red	$0.85	$6.00	$50.00
" Alba. Large pure white	.85	6.00	50.00
Elegantissima. Semi-double satiny rose	1.25	8.00	70.00
Lord Ardilaun. Large single white	1.25	8.00	70.00
Prince Henry. Double deep rich pink	1.25	8.00	70.00
Queen Charlotte. Large silvery pink	.85	6.00	50.00
Rosea Superba. Delicate silvery rose	.85	6.00	50.00
Whirlwind. Large semi-double white	.85	6.00	50.00

Hardy Aster Grandiflorus. This is not only the largest flowered but one of the latest flowering of the Michaelmas Daisies; its deep violet blue flowers are the last thing to bloom in our perennial grounds. $2.00 per dozen; $15.00 per 100.

Campanula Persicifolia Gigantea Moerheimi. The most beautiful of the Peach-leaved Campanulas, producing 3 feet high stems of pure white, double, Camellia-like flowers 2 to 2½ inches in diameter; a fine cut flower. $1.25 per dozen; $8.00 per 100.

Burbank's Shasta Daisy Alaska. Undoubtedly the best not only of the Burbank varieties, but also superior to any of the foreign varieties, flowers 4 to 5 inches in diameter and of a pure glistening white. $1.50 per dozen; $10.00 per 100.

Helenium Riverton Gem. A new variety that originated on our trial grounds two years ago. Of strong growth, 2½ to 3 feet high. Covered from the middle of August to the end of October with brilliant flowers, which on opening are old gold suffused with bright terra cotta, changing as they mature to a wallflower-red. $1.50 per dozen; $10.00 per 100.

Helenium Riverton Beauty. Another new variety which originated with us, quite distinct in color, which is lemon-yellow with a large disc of purplish-black, the two colors forming a striking combination. Of strong growth, 3 to 4 feet high and blooming from early in August until October. 30 cts. each; $3.00 per dozen.

Japanese Iris. An unsurpassed collection of twenty distinct varieties, $1.50 per dozen; $10.00 per 100. Set of 20 varieties for $2.00.

Lupinus Polyphyllus Moerheimi. No new perennial in our trial grounds pleased us as much as did this new Lupine during the past season. It forms symmetrical bushes three feet high, with spikes of flowers a foot long, a beautiful combination of light and dark pink. 60 cts. each; $6.00 per dozen.

Hardy Perennial Phlox. We are headquarters for these. We have over 200,000 one-year-old field grown plants now in stock in all the leading varieties. All the standard sorts, 75 cts. per dozen; $5.00 per 100; $40.00 per 1000.

Rudbeckia Rays of Gold. An improved, or rather, a refined form of the popular Golden Glow, having narrower petals and forming a full double flower. $1.50 per dozen; $10.00 per 100.

Stokesia Cyanea Alba. Identical in every way with the popular blue Stokesia except in color, which is white; very desirable. $1.50 per dozen; $10.00 per 100.

Tritoma Pfitzeri. We have a large stock this season of this most popular of the Tritomas. $1.00 per dozen; $7.00 per 100; $60.00 per 1000.

For the most complete list of Hardy Perennials, see our current Wholesale List.

HENRY A. DREER, 714 Chestnut Street, Philadelphia, Pa.

THESE PRICES ARE FOR THE TRADE ONLY.

Hardy Roses for the Garden

STRONG FIELD-GROWN PLANTS

The roses here offered are extra strong two-year-old field-grown blooming plants, which if planted early, will give a large number of flowers the first year. They can be planted as early in the spring as the frost is out of the ground, and from that time until about the first week in May. We offer a grand collection of the best and choicest varieties, as follows:

HYBRID PERPETUAL OR JUNE ROSES

Frau Karl Druschki, Marchioness of Londonderry, Capt. Hayward, Mrs. R. G. Sharman-Crawford, Ulrich Brunner, Margaret Dickson, Baron de Bonstetten, Paul Neyron, Gen. Jacqueminot, Magna Charta, Mrs. John Laing, Mme. Gabrielle Luizet, Marshall P. Wilder, Gloire de Paris, Baroness de Rothschild, Prince Camille de Rohan, Fisher Holmes, Alfred Colomb, Soleil d'Or, Persian Yellow, Moss Roses, Rugosa alba and rubra, etc.

MONTHLY AND HYBRID TEA ROSES

Btoile de France, Killarney, Mme. Abel Chatenay, Countess of Gosford, Koenigen Carola Perle von Godesberg, Gruss an Teplitz, Maman Cochet, White Maman Cochet, Belle Siebrecht, Hermosa, Mme. Caroline Testout, Souv. de Pres. Carnot, Kaiserin Augusta Victoria, American Beauty, La France, Clothilde Soupert, Prince de Bulgarie, Mme. Norbert Levavassuer (Baby Rambler), Anny Muller (Pink Baby Rambler), Catharine Ziemet (White Baby Rambler), etc.

In Climbing Roses we have a nice stock of Crimson Rambler, Lady Gay, Dorothy Perkins, Dawson, Gardenia, Tausendschon, etc.

Let us know the quantity you want and varieties, and we will be glad to quote lowest prices on same by return mail.

Tomatoes for Market.

ED. AMERICAN FLORIST:—

At what season do tomatoes bring the best price and when should they be sowed? What distance apart should they be planted and how many should I pick per plant? SUBSCRIBER.

I suppose these tomatoes to be grown outdoors. As regards price, that depends entirely upon the supply. A good many factors join to make this hard to answer. As a rule, there are two profitable periods in outdoor tomato culture, namely: the early and the late crop. The midseason crop very often comes in a glut accompanied by low prices. The reason for this is that as soon as the ordinary field crops come in, the supply is in excess of table consumption, and the weather being warm, home canning has not begun. Thus for a number of years, the late crop has paid well, except last fall, when tomatoes all came to ripen in September to such an extent that canneries could not work them up as fast as hauled in, thereby forcing canning contractors upon the open market, demoralizing that in places.

SALVIA ZURICH. The Ever-blooming Salvia. Rooted cuttings, $1.75 per 100; 2-in. $3.00 per 100.

The Salvia Zurich was first introduced by us.

PERENNIAL GARDENS CO., Toledo, Ohio.

The proper way to get early tomatoes is to stake them, and sucker them, that is, grow single stems. Then after the fruit setting has reached three good clusters, the plants are topped, preventing the midseason crop. A staked plant will produce from six to nine pounds of fruit. For staking, plant two feet apart in the rows, and the rows four feet apart. Stakes need not be high, two and one-half to three feet above ground is plenty. Some use plaster lath, others, rose wire stakes, all fastened to a top wire. We use top and bottom wire and a manilla string for each plant, and four plants between posts, and twist plants around strings. Figure six weeks to produce nice plants. We prefer sturdy 2½-inch pot plants to any other. You cannot overfeed staked tomatoes.

MARKETMAN.

THE LEEDLE FLORAL COMPANY SPRINGFIELD-OHIO

Brampton, Ont.

On the night of March 26 this town was visited by the worst flood that has been experienced here since September, 1878. During the whole day there was a high wind blowing, with the thermometer standing as high as 62°. The result was that the great quantity of snow we have had this winter melted faster than the river Etobicoke could take it away, and at 10 p. m. there was over four feet of water running on the main street. R. Jennings' place suffered probably worse than anyone else's in town; nearly his whole place was flooded. The violets were covered nearly two feet deep in some places and in the carnation houses there was nothing to be seen except the flowers and buds above the water. A bench of mignonette was just about covered and also a lot of young chrysanthemums that had just been planted. When the water went down in the morning everything was in a terrible mess. There was a thin coat of mud left on all the stock, which had to be washed off, and it looks as though they will never need watering any more. It was a good thing that the weather did not turn very cold after the wind went down, for the water soon covered the grates in the boilers and was up to the tops of the doors before it stopped rising. L.

HOLLAND, MICH. — The Prospect Heights Improvement Association is the name of a new organization just launched by Fifth warders here. The aim of the organization is to convert that territory into a beauty spot by the planting of shade trees, shrubbery, flowers; the opening and grading of new streets and the securing of many modern facilities. During the past five years Prospect park has made an extensive growth and many new residences have been erected.

The Scent of Flowers.

Blanchon, the naturalist, says that most floral perfumes are in reality excitants, which stimulate and then provoke a reaction—that is, a weakness equal to the quantity of power employed at the moment of excitation. Perfumes, in fact, act as alcohol acts. Their chief virtue is their antiseptic quality. The bacilli of typhoid has been killed in from 12 to 80 minutes by different essences. Scent-giving flowers are not, as is often stated, bad in sick rooms. But they should be chosen in view of their effects on the nervous system or of their antiseptic qualities. Growing flowers are the best. Flowers with delicate perfumes act favorably on the nervous system.

ELGIN, MINN.—Miss Florence, daughter of B. O'Neil, underwent an operation for appendicitis. At this writing she is doing nicely.

SOUTH BEND, IND.—J. M. Studebaker, P. G. Pearson, gardener, is building one palm house 26x50, and one plant house 22x100 feet.

OMAHA, NEB.—Theodore Williams, a pioneer horticulturist of this city, died in the hospital at Lincoln March 16 at the age of 66.

Smith's Chrysanthemum Bulletin

The following varieties are among the Most Popular of the Commercial Sorts, having been given thorough tests and not found wanting. READY NOW.

A LARGE STOCK READY IMMEDIATELY AFTER EASTER.

If your stock is run down try some of mine and see the difference next fall. Lots of the new singles now ready.

You got my 'mum list, of course?

CHARLES H. TOTTY, Madison, N. J.

AM. BEAUTIES

2 and 3-inch pots. Fine plants ready for a shift.

$6.00 per 100; $50.00 per 1000.

JOSEPH HEACOCK CO.,

WYNCOTE, PA.

MALDEN, MASS.—E. D. Kaulback & Son had the decorations at the Hallett-Stiles wedding March 18 and these were very fine. There were three rooms decorated with separate flowers; one with Bride roses, another with jonquils and a third with red carnations. The bride's bouquet was of Bride roses and the bridesmaid carried pink sweet peas.

MONTREAL, QUE.—The greenhouses which E. L. Pease is going to build for his son will be of King construction, 200 feet long, three houses connected, each 25 feet wide. There will be a glass division in the middle, so half will be planted in roses and the other half in carnations. A propagating house will be erected, connecting boiler house with center of greenhouses.—LUCK.

JENSEN & DEKEMA,

674 W. Foster Ave., CHICAGO

SUNNYVALE, CALIF.—March 21 has been set apart as Arbor day by the chamber of commerce and endorsed by the local grange and woman's club. The center of the Arbor day activities is in the town park, located north of the railroad tracks.

ST. LOUIS, MO.—M. B. O'Reilly Co. reports the sale of the property Nos. 4550 to 4560 St. Louis avenue, 160x153 feet, improved with greenhouses, which was bought by Vincent J. Gorley, president of the Grimm & Gorley Co., from Jesse Von Compenhoudt. The consideration was $10,000.

BOONE, IA.—The officers and directors of the driving park and fair association are working on plans for the erection of a floral hall at the driving park just north of the city. The plans, although not yet adopted, call for a handsome and substantial structure which will be a decided ornament to the grounds.

TRADE VARIABLE.

Following a brightening glimpse, the local trade was again doomed to disappointment with the opening of business Monday morning. The week just closed has been dull beyond comprehension. Not for many years has the flower trade been so affected, and while still hoping that Easter may be the opening wedge for a revival of normal conditions, there appears now but little foundation for hope. The market is swamped with every conceivable flower of the season and it is only by continual efforts on the part of salesagents that tremendous surpluses are not allowed to accumulate. As it is, quantities of stock are sent to the waste heap and other quantities are disposed of at very low figures. The new regulations affecting street hawkers have considerably discouraged this class of trade, who in former years have been instrumental in disposing of tremendous quantities of second class goods. The number of house to house venders has been considerably increased, but are as yet but slight relief to the wholesalers. The smaller shopkeepers on different days offer for sale all sorts of flowers at low prices, this feature helping somewhat. American Beauty roses move with difficulty and the best in the market, while not extraordinary specimens, are bringing $3 per dozen. Killarney and Richmond of the best quality sell fairly well at $2.50 per dozen, and quantities of both roses are obtainable at prices of a most tempting nature. Carnations of all varieties are thrown on the market by the thousand, for whatever they may bring, and often for less than enough to pay for their picking.

NOTES.

"Del" Cartwright, the genial salesman for the Waban Rose Conservatories has been compelled to absent himself from his duties on account of his health. He has been troubled for some time with a slight sickness which has become serious, and to arrest the disease in its early stages he has unwillingly consented to undergo a special treatment. By sheer pluck alone he has daily attended to his work much against the advice of his physicians, who expect to return him home completely recovered in two or three weeks.

W. H. Elliott's success in staging his products of local culture so well at the rose show in Chicago is being loudly commended by his home craft. For those who are familiar with the admirable products daily distributed through the city this latest achievement will occasion but little surprise, as the reputation of this able grower has long since been well established and his name has been linked with those of the most famous rose culturists of the age.

Pierce Bros., whose establishment is located at Waltham, are handling their goods in the most up-to-date fashion and recently have added to their facilities a handsome and practical motor van, the best example of a practical car in use for this purpose, covering the 15 miles to the city in less time than it takes to come by train. The capacity of the car is three tons and of such proportions as to allow of a great loading capacity.

At the W. W. Edgar Co.'s establishment at Waverley an enviable collection of Easter plants may be seen. Particularly attractive are the superb assortments of azaleas, genistas, lilacs and geraniums, added to which is a superb crop of lilies, which bids fair to rank with the best of competition.

E. A. Rogean has accepted the position as sales agent for Paul Richwagen of Needham with headquarters at the Park St. Market, and handling at different seasons the products of one of the largest and best known growers.

DAVID HERBERT & SON,

Successors to L. K. Peacock, Inc., ATCO, N. J

Gladioli....

Write for 1908 trade list of Named Varieties, Color Sections and Choice Mixtures. First-class stock at reasonable prices:

E. E. STEWART, RIVES JUNCTION, MICH.

Highways and Byways.

Green Bay, Wis.—Chas. De Clerc is now building two houses 30x200 feet. His newly opened retail store has proven a success. Mr. De Clerc's present place in Fort Howard cemetery is filled with bedding stock for cemetery use.

Carl Meier contemplates erecting additional glass this season.

H. M. Reineke, for many years a florist here, intends to go to Portland in May.

Marquette, Mich.—Miss Stafford, of Stafford's Greenhouses, has a good show of tea roses, and is very optimistic about the outlook. E. R. Tauch, although established but one year, is doing a good business. He christened his greened carnations The Emmett, and they made a big hit.

Owatonna, Minn.—The Clinton Falls Nursery Co. reports an excellent trade. Fred Chapman, for many years with some of the big places around Chicago, is foreman of the greenhouse department. He has an excellent stand of carnations.

Austin, Minn.—A. N. Kinsman has a range of 40,000 feet of glass. His specialty is roses. His crop goes to Holm & Olson, St. Paul. The quality of stock is strictly good. Mr. Kinsman intends to build two houses, 30x200, this season.

Madison, Wis.—Fred Rentschler will build a new house for plants. The specialty of this place is ferns, and the amount which he disposes of at retail is surprising.

Negaunee, Mich.—Frank Ashelman, greenhouse superintendent for the Cleveland Iron Cliff Co., was operated on for appendicitis.

Ishpeming, Mich.—Trebilcock Bros. report an excellent trade. Howard Baldwin, their grower, has the place in fine shape.

NEW CANNAS 1908

Rosea Gigantea. This beautiful variety has extra large flowers which are borne in such abundance that the mass of color on each plant is amazing. Single petals are 2½ inches across; color, a deep rich rose, almost a coral carmine. Plants make a vigorous growth, producing unusually fine clumps of green foliage. Height, 4 feet. (A great favorite with visitors to our trial grounds.) Strong plants, **$2.00** each, prepaid; **$18.00** per doz., by express, not prepaid.

Gladio-Flora. Remarkable for the unusual shape of the flowers which look like large Gladiolus. Petals are not long, but short and rounded and so wide they overlap each other, thus giving a very attractive appearance to the flowers. Color is crimson changing to carmine rose with an uneven edge of gold to each petal. Height, 3½ feet. Price, strong plants, **$2.00** each, prepaid; **$18.00** per doz., by express, not prepaid.

Meteor. Meteor is a vigorous grower with healthy green foliage. It is highly valued because of its magnificent flowers, fully four inches across, and abundance of bloom. Color is a deep crimson, very rich; each plant usually throws up five to six trusses of buds which continue blooming luxuriantly all summer through. Price, plants of dormant roots, **75c** each, postpaid; **$6.00** per doz., by express, not prepaid.

NEW CANNAS OF SPECIAL MERIT.

William Saunders. (1907) The flowers are large, of splendid form and are borne very freely in immense clusters. The color is a deep rich shining scarlet lightly dappled with crimson. Foliage is a rich bronze. Height, 3½ to 4 feet. We believe that Wm. Saunders is decidedly the most perfect Canna of this type that has been introduced. Those who tried Wm. Saunders in 1907 say it cannot be excelled. We offer plants only: **60c** each, postpaid; **$5.00** per doz., **$35.00** per 100, by express, not prepaid.

60 other varieties. Send for our list and prices.

Buffalo Cut Flower Co.

468 Washington St. BUFFALO, N. Y.

Birmingham, Ala.

Spring has again opened and our beautiful trees, shrubbery, etc., have budded out in their summer clothes. Spring business is extra good; retail business fair, principally funeral work.

Hugh Seales' place is back into nice condition since his boiler burst; everything is running smoothly again. He now spends most of his time at the greenhouses and is cutting extra choice stock. The roses are a little off crop as we had so much bad weather while the boiler was being repaired. His store business has been extra good with plenty of stock for all occasions. This firm filled several orders the past week in thousand lots for openings and social functions. It is bringing in lots of Easter lilies and other blooming plants.

John L. Parker's greenhouses at Fairview are in first-class shape, he is cutting quite a quantity of flowers; he has handled quite a quantity of bulbous stock this season. W. S. Shirley, manager of his store, says business has been very good. This deserving young man has built up a nice business for this firm and turns out nice work.

Raegner Bros.' new place at Seventy-first East Lake is under good way already; two houses complete, the boiler in place and several other houses started. They intend to have a fine place soon. They own a large piece of ground and no doubt will do well.

George Luffman's place is very neat and attractive. He grows a mixed stock for his store, also shrubs and hardy stock for his landscape work. He says he is rushed very much now with outdoor work on account of a very rainy winter.

Wm. D. Summerfield has a fine lot of bedding stock which he goes into quite heavily; his palms and ferns are in splendid condition and it does one good to visit his place as the glad hand of welcome always greets you.

The club transacted a lot of business at its last meeting, in fact more than it has done at any previous meeting. It is getting things organized and expects to have papers read before its members from out-of-town florists.

A. J. Koenig's place at Woodlawn is in first-class condition. He is cutting some fine roses, but his carnations are not quite so good. Young stock looks splendid and he is well satisfied with the past season.

Theo. Smith reports business extra good. Miss Clifton Holcombe, who has charge of his store, claims she is worked to a shadow; everyone knows our friend Smith is a hustler.

Lindsay The Florist reports he is busy all the time. He has been handling a nice line of lilies and pot plants lately as well as choice cut flowers. H. S.

DON'T FORGET

That **Decoration Day** comes

a very short time after Easter this season. Besides **Lilies, Spireas, Hydrangeas, Azaleas, Hyacinths, Tulips, Narcissus** for Easter, we offer

Geraniums, Red, White, Pink, and Salmon in 2½-, 3- and 4-in.

Salvias, Ageratum, Sweet Alyssum, Santolina, Feverfew, Petunias, 4 varieties in 2½, 3- and 4-in.; and all other **Bedding Stock.**

Write for our complete list of **Soft Wooded Plants.** We can save you time and money, for cash is a great lever to move things quickly. We grow 50,000 Ferns annually. Write us

GEO. A. KUHL,

PEKIN, ILL.

PREPARE FOR EASTER

Have Lilies to burn, the best in the land, the best in the land, the best in the land.
Azaleas, in finest colors, to beat the band, to beat the band, to beat the band.

Our immense stock of choice Easter plants, blooming Easter week or earlier if desired, are now ready for immediate shipment.

No dull times at Aschmann's. Come and see our BIG RUSH in shipping **Azalea Indica, etc.** Why? No wonder! Our **Azaleas** are of first-class No. 1 stock.

We make a specialty of importing every year an immense choice stock of this so well favored Easter plant.

Azalea Indica. We make a specialty of importing every year an immense stock of the choicest varieties popular in America, grown under contract for us by an Azalea specialist in Ghent, Belgium. If you need Azaleas, don't look around in vain all over the country for bargains, but come or write direct to us. We will be able to supply you with the best obtainable in the American market; full of buds; in good, healthy condition, right for Easter; all planted in October or November in 6 to 7 in. pots.

☞ **Take Notice.** We do not sell Azaleas in the fall, having the best picked out (and having the rubbish left for Easter), but we keep them all full of buds for our customers for Easter. Mme. Van der Cruyssen (2,500 of them), this is the best double pink variety known to the market, round as an apple, covered with buds; Bernard Andreas Alba (dbl. white), $1.00, $1.25, $1.50 to $2.00; Simon Mardner (dbl. pink), Vervæneana (variegated dbl. rose), Niobe (dbl. white), Deutsche Perle (dbl. white), Empress of India (dbl. variegated), Apollo (beautiful red), Professor Wolters, and about six more varieties. Price: 6-7-in. pots, 60c, 75c, $1.00, $1.25, $1.50, $1.75 to $2.00 each.

Come on! Mail yonr orders direct to headquarters. Our reputation over the entire country, from the Atlantic to the Pacific, in growing Easter plants for the wholesale market, for the last fifteen years, ought to be sufficient guarantee as to the truth of what we say and advertise. Be wise. Never mind about that nonsense—hard times talk! ☞ Look for a big Easter trade, which is sure to come. ☞ Secure your orders in time while we have plenty of stock. All our houses are full to their utmost capacity with the choicest plants in bud and bloom, just right for Easter or earlier if wanted.

Araucarias Robusta Compacta and **Glauca,** a perfect marvel and wonder of nature. We are one of the heaviest importers and cultivators of this beautiful decorative plant. Our plants are about the same in height as in width.

Robusta Compacta, 7-in. pots, specimen plants, 6-year-old, 5 tiers, 27 to 30 in. high, $2.00 to $2.50 each.

Excelsa Glauca, specimen 7-in. pots, 6-year-old (the fine bluish-green color makes or gives this variety a fine, striking appearance—sells at sight), 30 to 40-in. high, 4, 5 and 6 tiers, $1.50, $1.75, $2.00, $2.50 to $3.00 each.

Araucaria Excelsa, 6-in. pots, 4 to 5 years old, 20 to 25 in. high, 4,5 and 6 tiers. 75c to $1.00 each; 5¼-in. pots, 3 years old, 3 to 4 tiers, 7, 8, 10 to 14 in. high, 50c each.

Choice Nephrolepis, all pot-grown.

Boston Ferns, 8-in., as big as a washtub. $1.25 to $1,50 each; 7-in., $1.00; 6-in., 50c; 5 to 5½-in., 35c to 40c.

Scottii Ferns, 7-in., $1.00 to $1.25; 6-in., 50c; 5½-in., 40c.

Whitmani Ferns, 4-in., 25c.

Piersoni Ferns, 5, 5½ to 6-in., 30c, 40c to 50c.

Neph. Amerpohlii, the new lace fern, 5¼-in. pots, 50c to 60c.

Ferns for Dishes, 3-in., large, 7c,

Primula Obconica, 5¼-in., in bloom, $2.00 to $2.50 per doz,

Hyacinths, raised from first-class bulbs of our own importation. These hyacinths cannot be compared with the ordinary stock raised from cheap bulbs flooding the market. King of the Blues (dark), Grand Maitre (lavender blue), Gertrude (pink), La Grandesse (white), 4-in. pots, $12.00 per 100.

Tournesol Tulips, red and yellow variegated. This is the best selling double tulip on the market; it will stay in bloom and in good condition for ten days. Price: 3 bulbs planted in 4-in. pot, $1.50 per doz. pots, or $12.00 per 100.

Double Von Sion Daffodils, the best selling double yellow narcissus on the market; sells at sight; 3 double nosed bulbs planted in one pot. 5, 5½ to 6-in. pots, $2.00 to $2.50 per doz. pots. 10,000 now reany.

Ipomea Noctiflora, or pure white Moonflower, very fragrant, and big as a sancer. On this variety we have a world-wide reputation as a grower and shipper for the last twenty years. Price; 2½-in. pots, $5.00 per 100.

Begonia Improved Erfordii, 4-in. pots, very large, $2.00 per doz.; 5¼-in., in bloom and bud, 25c each, or $3.00 per doz. **Begonia Flambeau,** 5½-in. pots, sells on sight, 25c.

If you would know the fairest sight your eyes can ever see,
Where the most perfect plants are grown, to Aschmann's come with me.
Why, ne'er since flowers began to bloom was such a glorious show
Of all the best that florists need found in one place to grow.
The Lilies are the very best yet seen on Easter day;
Azaleas are whole sheets of flowers, perfect in every way;
The Araucarias matchless are, so are the Ferns all green,
With Bulbs and Plumed Spirea, the best you've ever seen.
And Aschmann gives a challenge, let every florist hear;
For flowers, or prices either, no rival does he fear.
If you wish to gather dollars like violets in the spring,
Then send your largest order, his plants the cash will bring.

Ficus Elastica or **Rubber Plant,** home grown and Belgium stock, 5, 5½, 6 and 7 in. pots, 30c, 35c, 50c, 60c and 75c each.

Cyclamen Grandiflora, 4-in., in bud and bloom, 20c.

Hydrangea Otaksa, 6 to 7 in. pots, in bud, 35c, 50c, 75c and $1.00 each; right for Easter.

Spirea Gladstone. 6 to 7-in. pots, large stock, right for Easter, in bud now, 50c to 75c; specimen, $1.00.

Dracena Bruanti, from Belgium, full of green foliage from bottom to top, 6-in. pots, 22 to 25 in. high, 40c each

Cineraria Hyb., finest strain in the market, 5-in., 20c each; 6-in., $3.00, $4 00 to $5.00 per doz.

Kentia Belmoreana and **Forsteriana,** Belgium and home-grown stock, 4-in. pots, 18 to 20 in. high, 35c; 5¼, 5½ and 6 in. pots, bushy plants, 50c, 60c and 75c each.

Latania Borbonica, 5-in., 30c.

Hybrid Roses and **Hermosa,** best budded stock, 5½ to 6-in. pots, 2 to 3½ feet high, 50c.

White Daisies (or Marguerites), 5½-in. pots, 25c.

EASTER LILIES, Japan Multiflorum, of our own importation, raised from special 10-in. bulbs, 6-in. pots, right for Easter. This year I can say we have the finest lot we ever had. Have about 5,000 to offer. Please send your order in time this year, as we have such a big demand every year for Lilies that some cannot be supplied. They are 15 to 40 inches in height, and we can meet all wants if ordered before supply runs out. Prices as usual. Plants above 5 buds, 10c; plants under 5 buds, 12c per bud. (Medium height).

On account of the cultivation of lilies being no more profitable, kindly order some other plants also in connection with lilies.

Have **Azaleas** White Deutsche Perle and Vervæneana now in bloom if wanted, 60c, 75c to $1.00 each.

We Print No Catalogue. These are our lowest prices to all. Strictly no references will be investigated in busy season.

All goods must travel at purchaser's risk only.

Cash with order, please. To save express charges, please mention if in or out of pots.

GODFREY ASCHMANN, 1012 West Ontario Street, **Philadelphia**

Importer, Wholesale Grower and Shipper of Pot Plants.

Orchids

The largest importation of Orchids ever received in this country will arrive next spring from Brazil, Venezuela and Colombia. If you intend putting in a stock wait for these to arrive and we will quote you the lowest prices in America.

MARKET GLUTTED.

The weather here continues very warm and the market is glutted with stock of every description. Bulbous stock and lilies are coming in very fast and some apprehension is felt in regard to holding them back for Easter. Plant trade is picking up in fine shape, both inexpensive and high grade stock selling readily.

NOTES.

Mrs. Gus Ackerman, wife of a north side grower, was buried Friday, March 27. Mrs. Ackerman had been ill since last June. The Florists' Club sent a beautiful wreath as an expression of sympathy.

J. R. Hellenthal has a very large stock of very fine lilies, hydrangeas, Baby and Crimson Rambler roses and a splendid lot of hybrids, which would be hard to duplicate. H.

Albany, N. Y.

The senate and assembly on the occasion of the funeral of State Senator Stanislaus P. Franchot at Niagara Falls, March 27, contributed two handsome floral designs. The senate sent a six-foot cross of Richmond roses and White Lawson carnations. The assembly sent a five-foot wreath of Killarney roses. Both pieces were the work of Eyres, who sent one of his decorators to the home of the deceased, 280 Buffalo avenue, Niagara Falls, to look after the pieces. The funeral was attended by delegations from the senate and assembly and by Governor Hughes.

Judge Walter Lloyd Smith of the third appellate division, on the evening of March 21 gave an elaborate dinner at the Ten Eyck to a number of his associates. The floral decorations were carried out by Daniel Whittle and included a fountain with aquatic plants around which the tables seating 26 guests were arranged. On the tables were four large oval baskets of Bridesmaid roses. Buttonhole bouquets of lily of the valley and violets were distributed to each guest. R. D.

GERANIUMS.

A splendid stock of fine plants from 2-in. pots, good standard sorts and new varieties at $2.00 per 100 and up to $1.00 each. We will send 1000 in 20 good varieties our selection for $18.50. Our Special descriptive Geranium catalogue describing over 250 varieties of Geraniums and Pelargoniums mailed free to the trade.

PELARGONIUMS, In good variety, strong plants from 3-in. pots, $1.50 per doz., $6.00 per 100

S. D. BRANT, The Clay Center Florist, CLAY CENTER, KAS.

Iron Rust and Roots.

ED. AMERICAN FLORIST:—

Will plants whose roots come in contact with iron rust be in any way injured? C. A. M.

In the ordinary way, where plants send their roots to an iron support on a bench or otherwise, no harm will accrue to them. The roots, in fact, would not go where there was a dangerous amount of iron rust while, to some extent, the iron may be of a slight value to them. But a superabundance of iron rust, such as would occur were iron filings mixed with soil or thrown in quantity on a bench, would undoubtedly be injurious.

We contemplate moving to Chamber of Commerce building, 134 Washington St., corner La Salle St., this city, when it is settled what rooms we are to occupy.

EVANS' IMPROVED CHALLENGE VENTILATING APPARATUS

WRITE FOR ILLUSTRATED CATALOGUE

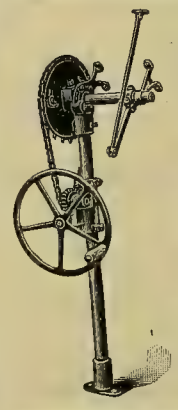
QUAKER CITY MACHINE WORKS. RICHMOND, IND.

THE BEST WAY TO COLLECT AN ACCOUNT

is to place it with the

NATIONAL FLORISTS' BOARD OF TRADE
56 Pine St., New York.

Why? Because many debtors will pay the Board, fearing otherwise a bad rating in our Credit List. Full information as to methods and rates given on application.



The Advance Ventilating Apparatus

It is what our machine does, the ease in which it does work, the ease of erection, together with prompt shipments and ONE PRICE TO ALL, that makes us friends and brings us the orders. Give us a tr a

Our Pastimes.

Announcement of coming contests or other events of interest to our bowling, shooting and sporting readers are solicited and will be given place in this column.

Address all correspondence for this department to A. F. Faulkner, 1133 Broadway, New York; Robt. Kift, 1725 Chestnut St., Philadelphia; or to the American Florist Co., Chicago.

At Chicago.

The sports of the Chicago Florists' Club are slow getting into action this year, the formation of a bowling team still being a mere matter of talk. Chas. Balluff thinks there might be more doing if the club should offer to pay the expenses of the team that will be formed to go to the S. A. F. convention at Niagara Falls, N. Y., next August.

The greenhouse boys of J. A. Budlong's beat the store boys by one pin in their bowling match last Thursday night. There is still some sporting blood in the trade!

At New York.

The bowling scores at the games on Friday were as follows:

Young	105	91	104	96	
Fenrich	150	103	166		234
Manda	123	148	157	125	213
Schreiner	157	136	181	193	199
Totty	130	125	114		
Marshall	116	159	180	157	106
Shaw	95	155	170	95	145

At Buffalo.

The usual number of bowlers were on hand last Monday evening, but no match games were rolled. When the new sports committee is appointed things will hum and the visitors to the convention in August at Niagara Falls can have a ball game, bowling or anything else, and the B. F. C. will help them out.

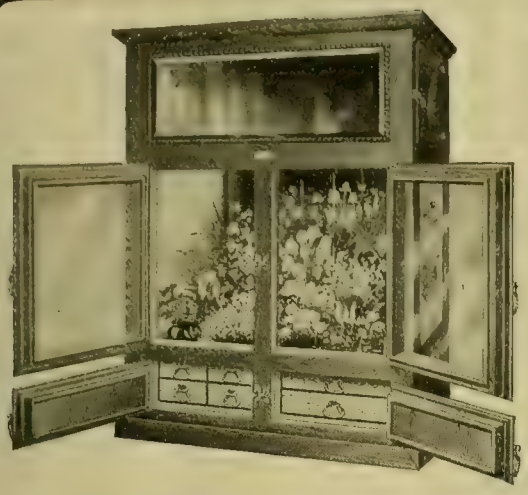
Always mention The American Florist when you order stock.



A beautiful showy McCray built-to-order of quartered oak with beveled mirror and galvanized iron drawers beneath for mosses, etc.

A Particular Refrigerator For Florists

is the McCray—built of carefully tested materials, and with the best system of circulation of fresh, cold air, cooling all parts of the interior thoroughly and evenly. A small amount of ice does a great amount of cooling. It saves ice which eventually pays for the McCray itself. The constant circulation of dry, cold, pure air in the inside keeps the flowers and stock in a fresh, perfect and fragrant condition.

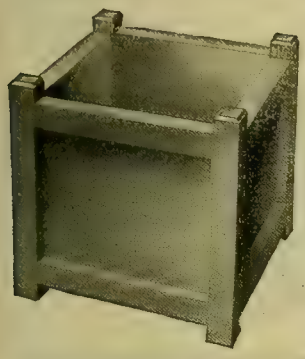
McCray Refrigerators

are beautiful in finish, and substantial and durable in construction. They give an air of elegance to your store. They are lined with white enamel, or can be had with mirrors, tile, opal glass or marble interiors, to suit your taste.

McCray Florists' Refrigerators are made in a wide range of regular sizes for immediate shipment, or can be built to order for any requirement. There are no other refrigerators on the market which do better work for the florists, or are better made than the McCray.

Send for Catalog No. 71, which gives you all the details of this magnificent line of refrigerators, and will help you make the proper selection.

McCray Refrigerator Company, 760 Mill St., Kendallville Indiana.



Large plants, Bay and Box trees, Palms, Hydrangeas, Agaves, etc. will soon need repotting. Use the

TRADE INACTIVE.

The past week has been one of warm, clear weather, entirely abnormal as to temperature, the mercury going up to 80° and vegetation pushing so rapidly that the chances seem a certain 100 to 1 that frost will catch the tender growth and fruit buds. Everything is pushing out with such a rush that the whole physical world has experienced a change in a single night. Within a day there have been copious and warm rains. Trade keeps inactive, while the supplies are growing in quantity. Outdoor bulbous stock from the south increases in volume and great quantities go to waste. The street venders complain of the dullness and push off their goods only by most arduous efforts and most depressing lowering of prices. The death tables show greatly diminished mortality, so that funeral demands are lessening and not many social affairs are being engaged in where flowers are used to any great extent.

NOTES.

An interesting discussion took place at the club meeting Monday evening on the subject of seedling lilies, which branched off into a general consideration of the commercial growing of bulbous stock, with its risks and disappointments. Great hope was expressed that the growing of lilies from seed will lead to escape from the disease which has made their forcing so unfortunate an undertaking in many instances. Lehr Bros. reported that they have several thousand seedlings growing, and all without signs of the disease which is the dread of growers.

Wm. H. Witte has been appointed gardener at the new grounds at Wyman park of the Johns Hopkins University. Mr. Witte is well known here, having been recently in the employ of Jesse P. King, of Mt. Airy, and formerly in charge of the greenhouse at the Industrial School at Hampton, Va.

The good-will, fixtures, etc., of The Fernery was sold by the receiver to Norris and Joshua Horner, Jr., who will continue the business, Miss O'Neill being in charge of the establishment.

S. B.

WINONA, O.—L. Whinery has started a greenhouse here.

KANSAS CITY, MO.—Geo. M. Kellogg is on the sick list.

LOS ANGELES, CALIF.—Conscience-stricken and crazed by the knowledge that his financial entanglements had driven his wife into a suicide's grave, Henry Hyde Dwight, member of an old Boston family, committed suicide March 28, after a Pasadena constable had placed him under arrest on the charge of forging a check for $40. Dwight was a talented architect and landscape artist. He was a Harvard graduate, and with his wife moved in exclusive society circles here and in Pasadena.

UNITED PUMP & POWER CO
Old Colony Building, CHICAGO

BALTIMORE, MD.—During the fall and winter much work has been done at Homewood. The ground for the botanical garden has been graded and laid out. The clubhouse, which was built last summer, has been provided with baths, lockers and other conveniences, and the trees along Charles street avenue have been thinned out in order to promote the most healthy and attractive tree growth. Now that the alumni are taking an active interest in Homewood, it is probable that much more work will be done in the near future toward fixing up the university's future home.

STOCK OVER PLENTIFUL.

The warm weather of the past week is causing a great deal of anxiety among growers of bulbous stock and unless we have some cool weather it is very doubtful whether or not there will be any bulbous flowers for Easter. Seasonable flowers of all kinds are plentiful and all wants are easily satisfied. We have a big glut of lilies, in fact, bulbous stock of all kinds is in over supply. While there is some improvement noted in the market the demand is intermittent. About every other day the wholesaler has to sacrifice his stock to move it. The supply of single violets has dwindled and from now on we have to fall back on the Poughkeepsie doubles if anything is needed in this line. Sweet peas are coming along in larger quantities, the supply being very much in excess of the demand. Sweet peas do not sell well until violets are out of the market. Snapdragon is proving a good seller and deservedly so for the blooms are certainly fine. Green goods of all kinds are good property while there is a marked improvement in the call for florists' supplies.

NOTES.

Bob Ruttle, the prominent florist of Covington, Ky., was among the callers last Saturday. This is the first time we have seen him for a month, but he will have to be excused as owing to sickness in the family and a whole lot of funeral work he has been kept busy at home. Joe Grimme, his faithful buyer, is a daily caller in the wholesale district and Mr. Ruttle places a whole lot of confidence in Joe, which is not at all misplaced.

Harry L. Sunderbruch, Jr., who served his apprenticeship in the florist business under his father, was a caller last Saturday. Although in the grain business and doing very well at Williamsburg, he still has a weakness for plant growing and will be building a few greenhouses in the very near future.

Ben Eschner, of M. Rice & Co., Philadelphia, Pa., was a caller this week and is very optimistic about the future. He says business with him has been far better than he expected.

Albert McCullough, who was in Chicago last week at the show of the American Rose Society, states that he doubts if the show could be excelled anywhere.

Mrs. H. A. Kresken, who spent the past summer with her daughter Ada in Europe, is thinking very seriously of going abroad again this year. She says the trip did her a world of good. S.

Louisiana Red Cypress

SAYS BOBBINK & ATKINS, of Rutherford, N. J., "Lasts with us from two to three years longer than any other wood for table purposes, and its life seems to be endless when used in ordinary greenhouse construction. We use cypress solely in our Plant Tub Department and manufacture tubs of all sizes from the smallest to the largest, of cypress."

It Is Best for Greenhouse Building.

It is the only wood that successfully withstands the almost intolerable alternate wet and dry conditions incident to this work.

IT IS THE MOST DURABLE WOOD KNOWN. Ask about it at your local lumber yard or write

LOUISIANA RED CYPRESS CO. HIBERNIA BUILDING, New Orleans, La.

The Allied Trades

Descriptive particulars—with drawings or photographs, if possible—of any new apparatus or device which may prove helpful to the trade are solicited for this department.

AN American consular officer in one of the Latin-American countries reports that information has been received at his office to the effect that a business man in the city in which he is located contemplates the erection of a cement plant. Manufacturers of the necessary machinery should address the man in question, whose name is on file at the Bureau of Manufactures.

Concrete in Greenhouse Construction.

Regarding utility and advantages of concrete in greenhouse construction, I am of the positive opinion that they are the cheapest benches in the long run. If we consider the short life of a wooden bench, and the high price of lumber, and the nuisance of reconstruction, we can readily understand the great gain made by concrete benches. They are really indestructible, and will last for centuries.

Another very important item is their cleanliness. No insect life can obtain a foothold anywhere. The possibility of thoroughly cleaning them whenever a cleansing is necessary, the advantage of putting them under water, or in other words, filling them up with water when necessity requires for the health of plants occupying the houses is an important advantage.

We have for instance at present a house of catalpas where saw-bucks have got into the pots. In order to destroy the saw-bucks the bench is filled with water, and the plants put on turned pots. With the customary traps used for catching them we will be able to kill all the saw-bucks, the possibility of any getting away being very improbable. Where the house is used temporarily for tropical plants that require a great deal of humidity the same method can be adhered to.

It is surprising how thin concrete benches can be built when reinforced. In this construction we used channel iron on which to lay the reinforced benching, but we have done away with this as it was possible for the bar iron to rust out after a certain period when not entirely protected from drip. In the newer construction we have done away with the bar iron, and the bar carrying the benches is a reinforced concrete bar which makes the whole bench one solid concrete construction.

Louisiana Red Cypress.

In the opinion of many noted growers there is nothing in the way of lumber to beat Louisiana red cypress. One firm notes that cypress put down 12 years ago in plant benches is yet good, though hemlock and pine, formerly used, lasted from two to four years only. The same firm recommends it for ventilators and roof work. The well known firm of John C. Moninger Co., Chicago, uses it to the practical exclusion of all others, and have done so since 1885. This firm alone uses over 1,000,000 feet annually, shipping the finished product to Maine, to California, to Mexico and to Canada, and notwithstanding the various climatic conditions it gives satisfaction at all points. It is highly recommended in short by all the leading florists of the country. The Louisiana Red Cypress Co., of New Orleans, handle an immense amount of this lumber, the daily capacity of the company's mills being 3,000,000 feet of lumber, 2,500,000 shingles, and 1,000,000 laths.

THE AMERICAN FLORIST

America is "the Prow of the Vessel; there may be more comfort Amidships, but we are the first to touch Unknown Seas."

Vol. XXX. **CHICAGO AND NEW YORK, APRIL 11, 1908.** **No. 1036**

THE AMERICAN FLORIST

TWENTY-THIRD YEAR.

Copyright 1908, by American Florist Company.

Entered as Second-Class Matter Nov. 11, 1891, at the Post Office at Chicago, Illinois. under Act of March 3rd. 1879.

PUBLISHED EVERY SATURDAY BY

AMERICAN FLORIST COMPANY,

324 Dearborn St., Chicago.

Eastern Office: 1133 Broadway, New York. Philadelphia Pa., Robt. Kift, 1725 Chestnut St. Registered Cable Address: Amerflo, Chicago.

Subscription, United States and Mexico, $1.00 a year; Canada, $2.00; Europe and Countries in Postal Union, $2.50. Subscriptions accepted only from the trade. Volumes half yearly from August 1901

Address all correspondence, subscriptions, etc., American Florist Co., 324 Dearborn St., Chicago.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

OFFICERS—FRANK H. TRAENDLY, New York, Pres.; W. N. RUDD, Morgan Park, Ill., Secy.; H. B. BEATTY, Pittsburg, Pa., Treas. Next meeting at Niagara Falls, N. Y., August, 1908.

THE NATIONAL FLOWER SHOW.

CHICAGO, November 6-15, 1908.

Wm. F. Kasting, Buffalo, N. Y., is chairman of the general committee in charge. Chairmen of sub-committees follow:

EXECUTIVE AND FINANCE—Wm. F. Kasting, Buffalo, N. Y.

AMERICAN EXHIBITS—Ph. Breitmeyer, Detroit.

FOREIGN EXHIBITS—E. G. Hill, Richmond, Ind.

PREMIUM LIST—W. N. Rudd, Morgan Park, Ill.

ADVERTISING AND PUBLICITY—J. H. Burdett, 1411 First Nat'l Bank Bldg., Chicago.

LOCAL MANAGEMENT, PRIVILEGES AND CONCESSIONS—J. C. Vaughan, Chicago.

SPECIAL FEATURES—Otto G. Koenig, 6471 Florisant Ave., St. Louis, Mo.

RECEPTION—Aug. Poehlmann, Morton Grove, Ill.

AUDITING—J. A. Valentine, Denver, Colo.

TREASURER—I. C. Bertermann, Indianapolis, Ind.

The above chairmen have power to select their various committees from the general committee of 50 or the members of the S. A. F. at large.

"The Rose had been wash'd, just washed with
a shower,
And it seemed to a fanciful view
To weep for the buds it had left with regret
On the flourishing bush where it grew."

That Spring Fever.

I will go out to grass with that old King,
For I am weary of clothes and cooks.
I long to lie along the banks of brooks,
And watch the boughs above me sway and swing.
Come, I will pluck off custom's livery,
Nor longer be a lackey to old Time,
Time shall serve me, and at my feet shall fling,
The spoil of listless minutes. I shall climb
The wild trees for my food, and run
Through dale and upland as a fox runs free.

SUGGESTIONS FOR CUT FLOWER GROWERS.

Euphorbia Fulgens.

Euphorbia fulgens (Jacquiniæflora) is unrivalled as a bright red winter flowering plant for cutting from. Closely allied to the poinsettia it is totally distinct as a flower and the long shoots wreathed with bright scarlet flowers, well shown up by the deep green leaves, are among the brightest in existence. Cuttings inserted during this month will make fine stock. The old plants may now go into heat and plenty of cuttings will soon be forthcoming. Root these as advised for poinsettias and grow the plants on in the same way at first. But the euphorbia may be pinched once and three shoots taken up. Let them go straight away in a light position in a warm moist house. Some growers who have small span-roofed houses train them up under the glass and this is an excellent plan as it consolidates the growth as it is made, insuring that flowers in plenty and of good color will be produced. The plants may be grown in pots or planted out in a narrow trough-like box next to the glass. They take up little room this way and are so easy to do that there should be more of them grown.

Violet Propagating.

Nothing is gained by further delay in breaking up the old violet roots and propagating the young stock. Shake off the most of the soil from the clumps as they are dug from the benches and lay them on the surface, covering with mats or in some other way if the sun is bright. Get after them at once and cut the old clumps up. Reject the older portions with thick root stocks in the center of the plants and endeavor to get healthy young runners with a few fresh young roots. If the foliage is heavy on the single varieties cut a little of this away; on the doubles this will usually be unnecessary. Cold frames are the best places for starting young violets, but they also start well on a thoroughly well prepared border outside, not in the full sun if this can be avoided. Where stock of the double varieties is scarce the small points of the runners make useful stock in plenty of time for planting inside, and in fact will often produce finer flowers than the divisions. Root them at once in a cool propagating bench and when well rooted treat as advised for plants from division.

Perennials for Cutting.

A good herbaceous border, or beds of the best perennials for cutting, is a most useful asset in summer. One of the best plants is the single, brightly colored pyrethrum now grown in considerable quantity. Plants raised from seed last fall and wintered in frames or in protected beds may now go to their permanent position, one moderately sheltered if possible. The single and double forms like a good and moderately rich soil and the flowers must be lightly shaded to allow them to open slowly and come of the best color. Seedling delphiniums may flower a little, but are better for a season in nursery beds when they will be grand clumps for next season's planting. The deep blue forms are the most popular and these can be selected in the nursery beds this year and marked for permanent planting. Gaillardias, Shasta daisies, columbines, Coreopsis grandiflora, rudbeckias, Lychnis Chalcedonica and doronicums in variety are only a few of the most popular and best and a good stock of these help out nicely with annuals, such as asters, sweet peas and others at a time when indoor cut flowers are scarce. There is no better time for forming new plantations of the majority of these than the present, just as the growth is on the move and their culture, if gone into properly, is bound to prove remunerative.

Cattleyas.

Water cattleyas in accordance with the state of growth. As long as they remain in a dormant or partially dormant condition there is no need to water heavily; just keep the atmosphere moist and the roots on the dry side. When the new growths on C. Trianæ, C. Mossiæ, C. Percivaliana, C. labiata and C. Gaskelliana are a few inches in length and the roots from the base of these are pushing out into the peat, the water supply may be increased as it is evident that the plants are looking for moisture. The night temperature may be kept around 55° rising by day five degrees

when the weather is dull and more when sunny. Although somewhat erratic in growth the long bulbed section, comprising the popular C. Loddigesi (Harrisoniæ) usually keeps dormant later in spring than others. Let the plants have their own way and do not attempt to start them growing by increasing either the heat or moisture. Look out for signs of the cattleya fly: its presence is easily detected by the bottle shaped growths big below and pointed on top. When such are seen pull them off at once and give the plants a chance to make good from back breaks. The infested buds are useless. Newly imported plants, and plants in their second season, are the most likely to be attacked.

Bouvardias.

Where a light, suitable soil exists, bouvardias may be planted outdoors for the summer, where they will make a strong growth and fine plants for lifting in fall. Where the soil is not suitable it may be improved by adding plenty of peat, leaf mould and a little dried cow manure and made to work well by the addition of coarse sand. This is the best method of summer culture if flowers are not needed until November, but if they are needed earlier the plants must either be kept in pots or planted out on a bench inside. In the first case get the soil well prepared now, ready to plant out the young stock as soon as danger from severe frost is over. The plants in this case will not need potting but will keep going all right if well looked after for water. If they get a little hard they will soon grow out of it when planted out but they must not be allowed to form flowers as this is weakening. If bench culture inside is decided on make up a good holding compost and plant the young stock out at about 18 inches apart. Make the soil very firm in the benches and use the potting stick or rammer; when all are planted use a small rake and loosen the surface. After planting spray the plants regularly three or four times a day while fine but keep the roots a little on the dry side until well established. A good method of growing bouvardias, intermediate between the two, is to have beds made with a solid concrete bottom outdoors. Fill these with soil and plant in the usual way. The plants lift with magnificent balls of roots under these conditions and do not suffer as do those planted outside. In all cases the principal points in summer culture are to keep the plants growing freely by frequent spraying, pinching regularly to prevent their flowering and keeping them free of insects. Cool airy conditions are needed, if the plants are under glass, to produce a solid growth.

The Easter Lily in Decorations.

One of the most chaste and beautiful of all flowers, there is practically no kind of decoration or indeed any work of the retail florist for which the Easter lily is not suitable. It always sells well as a pot plant, its handsome deep green leaves making a fine background for the flowers while as a cut flower it is among the most popular of all. Although there is a certain amount of sentiment connected with an Easter lily, yet the flower is so beautiful that it would always be popular in any case, even without any sentiment to back it and probably no flower, not even excepting the rose or carnation, would be more missed by the florist who has much make up work to do. Imagine a retailer with large decorations to turn out, and minus the Easter lilies; he would be in worse case than the Israelites of old when straw was at a premium.

The flowers are excellent for large wreaths, a sheaf of lilies with their foliage giving a most chaste and artistic finish and there never seems to be too many of them. In pedestal shaped bases to large set pieces when the flowers have to be spread the lily is the only flower for the purpose. In crosses for funeral work customers often demand them; will not take anything else in fact, and there could be no more suitable flower to use as a tribute to loved ones gone before than the lovely Easter lily. Nor could there be anything more simple or more beautiful than these lovely flowers artistically disposed on a bed of green such as Asparagus Sprengeri. The Easter lily is never overlooked in a wreath or other floral device. It is the first flower one notices when looking at such work, though it is by no means showy. Deep down in everyone there is a sense of the fitness of things which is another name for an artistic sixth sense and the flowers of this lovely lily gratifies it, so that no matter what other flowers are present, the picture of the lily is carried away in the mind. It is this fitness for each and every case and the soothing effect upon the nerves that such beautiful flowers have, together with its unrivalled purity, that has put the lily in the prominent position it holds.

In plant devices such as those shown herewith the Easter lily is at once the most beautiful and most suitable kind, the one thing inseparable from success. And no matter what other plant is associated with it a harmonious effect is produced. At Christmas the showy poinsettia may be placed next to the lily and neither suffers by the contrast. The graceful heaths, primulas, cyclamens or any other flowering plants take on an added beauty by being associated with the lily, while there is no class of foliage plant or fern that will clash with it if proper care is taken. We present herewith illustrations of some pretty Easter baskets by Myer, Fifty-eighth street, New York, and these will show how well the Easter lily looks in association with other plants of a varying character, and, incidentally, are good specimens of the excellent work turned out by this clever florist. The short descriptions given are probably sufficiently indicative of the plants used.

EASTER PLANT BASKETS BY MYER OF NEW YORK.—No. 3.

No. 1.—Bronze handle basket comprised principally of Erica Cavendishi, Crimson Rambler roses trained on handle. Tied with white ribbon.

No. 2.—Composition box of lilies, spireas, Van der Cruyssen azaleas and funkias, tied with pale green ribbon.

No. 3—White enameled handle basket, composed of lilies, Baby Rambler roses and genista; tied with pale green ribbon.

No. 4.—Gilt handle basket composed of lilies, Van der Cruyssen azaleas and spirea, tied with white ribbon.

No. 5.—Box of lilies, spireas and Vervæneana azaleas, tied with pale pink ribbon.

ROCHESTER, N. Y.—The Commercial Florists' Association holds its meetings at 24 Stone street the second Monday in each month at 7:30 p. m. The officers are Fred M. Vick, 102 Flower City park, president; F. J. Keller, 25 Clinton avenue, vice-president; Geo. B. Hart, 24 Stone street, secretary and treasurer.

EASTER PLANT BASKETS BY MYER, OF NEW YORK.—Nos. 1 and 2.

THE ROSE.

Notes on Varieties.

MRS. JARDINE.

In reply to a recent inquiry for the cultural directions for Mrs. Jardine rose, now being introduced by Robt. Scott & Son, Sharon Hill, Pa., they replied that the culture is exactly the same as other winter forcing roses, such as Bridesmaid and Killarney, but that they run it mostly at the Bridesmaid temperature, which increases the size of the flowers. It is also a very strong grower and feeder. In the opinion of the writer, this rose should make a hit throughout the country, the color being a very clear delicate shade of pink, very large flower and an excellent keeper, with grand foliage.

RHEA REID.

The reply from the E. G. Hill Co., Richmond, Ind., as to the cultural methods employed by them, with their new rose Rhea Reid is as follows: "We have grown some two year old plants, bench of grafted and another of own-root plants this year and the rose has acted admirably in every case. Just at present the own-root bench looks a little the best and is in a very vigorous condition and full of bloom and new growth. We used sod taken from high, well-drained ground and, being of a heavy clay nature, we mixed with this about one-fourth of half decomposed cow manure, at the time of planting. In September we put on a 1½-inch mulching, composed of one-third screened sheep manure, and two-thirds soil. We have used liquid manure two or three times and we intend to put on a cow manure mulching before long, as the plants are ready for more feed. You will see by this that the rose is a gross feeder. We find a temperature of 56° at night is about right for Rhea Reid.

The rose is of so vigorous a habit and breaks away into new growth so readily that it is possible and even advisable to begin cutting flowers for market in August, and this can be done with perfect assurance that the rose will continue to produce flowers throughout the winter. The very full, double nature of the flower makes it an excellent rose for August and September cutting. The above includes all the special points relating to Rhea Reid, that we are able to give. Naturally the common sense methods of cultivation which apply to other varieties, will apply with equal force to this one. The better care the rose receives the better will be the result."

QUEEN BEATRICE.

After seeing Kramer's rose, Queen Beatrice, growing, we think it very similar in growth and habit to Mme. Chatenay. The growth is vigorous and was breaking freely from the soil when we saw it in February. Many canes had attained the height of five feet with perfect flowers. Naturally this rose is also a strong feeder and being such a deep pink in color and very original in this respect it will fill a long felt want among the pink varieties.

MY MARYLAND.

Another new rose, My Maryland, which originated with John Cook, of Baltimore, Md., is a decided winner. In color it is a beautiful shade of salmon pink very full and free, carrying grand foliage. This is one of the most vigorous growing roses we have ever seen, a strong feeder and good stem, very prolific. Easily propagated, either by grafting or by cuttings, and grows equally as well on own roots as it does grafted. This is a rose that we predict has come to stay. Mr. Cook has given us such roses as Kaiserin, Mrs. Robt. Garrett, White Cochet and many others of equal merit, and in giving us My Maryland we can be justly proud of it as it was produced on native soil, an American product. If John Cook and E. G. Hill can keep the ball rolling we will not have to cross the water for a new rose when we want it.

NOTES ON CULTURE.

Such letters as we received from the E. G. Hill Co., should be highly commended, as it gives both experienced and inexperienced growers a very concise idea of the cultural methods employed and will undoubtedly be a great help to those who are growing this rose for the first time. But, to come back to our standard varieties. Bride, Bridesmaid, American Beauty, etc.: It is now about time to apply a mulch all around as the stock on the raised benches will require root protection from the strong sunshine as well as the extra feeding at this season. An inch layer of half decomposed cow manure will be about the thing now on vigorous growing stock and if the manure is thoroughly rotted there will be no necessity to cover this mulch. But where the manure is fresh it should be covered with a light layer of soil, as when fermentation takes place in the manure, the flowers, as well as the foliage, are very often covered with minute specks which a layer of top soil will prevent. After one or two waterings through the mulch the liquid manure can be applied again and for the first three weeks the mulch should be worked over once per week, with the bands loosened up or the air will not have a chance to get through to the roots. Before starting to mulch, see to it that the buds are all tied back out of the way and that the surface of the beds is cleaned.

Allow the plants to have all the air possible at this season, both the stock and pot plants. Raise the ventilators as early as possible and cut off all artificial heat not required, early in the day. Harden up the growth to prevent mildew after firing ceases and gradually accustom the plants to the change that takes place after firing is stopped. This will require some care but by gradually running the fire for a shorter period daily,

as the weather grows milder, good results can be accomplished. The young pot stock should only be allowed one growth without shifting. Shift when the foliage of this growth is well ripened. Shift from 2-inch to 3-inch pots, 3-inch to 4-inch. This allows a layer of soil to surround the roots on all sides. A smaller shift does not work half so well, leaving no room hardly for soil. Special attention should be paid to the watering after mulching as it is a very easy matter to let the plants get too dry or to overwater them. Only by examining the soil carefully with the fingers, going over the ground slowly can one be absolutely sure about applying the water. Easter is gradually drawing near so look out for a good cut and have it in marketable shape. E.

Wyndmoor.

I had the pleasure recently of seeing flowers of the novelty among roses heading these notes and was more favorably impressed with it than ever. It was exhibited at the American Rose Society's exhibition recently held in Chicago, and awarded a silver cup. Its origin is interesting because the blood of two famous roses courses through its veins. The pollen parent is the great American Beauty, the rose that has made more money for the rose growers, dealers and the wholesalers of America than all the other roses combined, probably, and if the figures could be computed with anything like accuracy the profits on diamonds would pale into comparative insignificance. The seed parent was Safrano a good old favorite in its day, and still grown as one of the debutante favorites and as reminiscences for the belles of 30 years or so ago. So that we must all confess that it is well bred.

A celebrated rose grower of Massachusetts said when the rose William Francis Bennett was a novelty and its pedigree was being discussed "never mind the pedigree, can he trot?" Judging from the number of Wyndmoor that were cut by Myers and Samtman for Christmas there is no doubt on the score of productiveness, and the quick way it breaks after being cut, may be seen when examining it growing. It is a darker pink than Killarney and retains the color until fully open. It has more petals than the last-named favorite, and looks as though it ought to be equally as valuable for growing outdoors as for forcing. Indeed it was the bright color of the flowers as produced by the original seedling plant, growing outdoors, that first attracted the attention of the senior partner as to its possible value, and it is to be hoped that he will be well rewarded for his quickness of perception and that it will prove a valuable rose for the public. EDWIN LONSDALE.

Notes in Season.

The present is about the most interesting time of year to the rose grower and as busy a one as any. The stock, owing to the increasing light, is taking a brace and the color of the flowers is improving. Growth is, or should be, very free and there is an air of general activity that spurs the grower to do his best. The benches that have been flowering all winter will be improved now by a top dressing of good yard manure if this is to be had, if not, chemical manure must be substituted. There is, however, nothing so good at this time as a liberal dressing of cow manure. In the autumn or winter when more care is needed in watering and there is less light, bone meal and similar materials are all right, better than the solid manure, but now the light is increasing daily,

Easter Plant Baskets by Myer, of New York.—No. 4.

root and top growth are both active and the plants can take strong feed. In this we are presuming that the plants are strong and healthy. No practical grower would advise adding inches of solid manure to weak or badly rooted plants or any that are not thoroughly established.

Many strong shoots will be pushing up from the base of Bride, Bridesmaid, Mme. Chatenay, Richmond and other kinds. It is well to pinch the very strongest of these when about a foot

Easter Plant Baskets by Myer, of New York.—No. 5.

high. Just take the point of the shoot, no more. This will cause the shoot to break into about three and these breaks will be strong enough to produce very fine flowers. Where extra large flowers are needed for exhibition or otherwise the shoots may be left and disbudded in the usual way later. The shoots springing from the body of the plants will not, in most cases, need pinching, only the stoutest, vigorous canes that break up from the roots or collar of the plants. In cutting the flowers see that one or two good eyes are left on the current growth and never cut back into the old. As the shoots develop attend to the disbudding regularly, and at the same time remove any flowers that may have been left, though there are not many of these just now in most places.

Where American Beauty has been kept on the dry side overhead, red spider may be showing a little and careful spraying with the spray pump is in order. Heavy spray from the hose must not yet be practised though on an exceptionally bright morning one good spraying may do no harm and will do good in bringing down the leaves that are discolored and yellow, of which there are always a few even in the best managed plants. Some growers are using compressed air now to dislodge these dead leaves and an excellent plan it is. But it is better to let the leaves remain, or at least to remove only such as can be conveniently got at by picking and shaking the plants than to run the risk of washing them off with the hose and having the plants wet in the afternoon. Such practice frequently lays the foundation for a bad attack of black spot. A point for thoughtful growers to consider is how far the natural protection of the leaf is washed off by the constant spraying that goes on, thus leaving the leaf unprotected and at the mercy of insect and fungus attacks. It is quite certain that solid, healthy, vigorous foliage is far more disease and insect resistant than leaves that are constantly and heavily sprayed and therefore thin in texture.

Care of the young stock is now an important part of the grower's work. The cutting beds must be kept moist; more cuttings are annually lost by allowing them to get dry before they are callused and commence to root than by any other detail of mistaken culture. They must also be frequently looked over and any that have failed removed. Do this before watering and the water will then resettle any of the sand that may have become disturbed. Shading must be carefully attended to, but the paper, muslin or whatever is used must not be kept on during dull weather. What is true of the cuttings is also true of the young stock in the earliest stages. The plants must not be waterlogged, and an occasional drying is necessary, but the young roots must have the moisture if they are to extend and establish the plants. A careful grower can see at once, by the look of his plants, if they are getting too much and will diminish the supply before any harm can be done, but there must be plenty of moisture or but little progress will be made. Once the plants are well established in the small pots they soon need a shift into larger ones. If allowed to get hard in these first pots the growth gets hard too and the plants will not start away freely. Watch for the slightest trace of mildew in odd corners and sulphur the pipes at night. A little sulphur kept constantly on the leaders around any places very susceptible to mildew also acts as a preventive.

FLORISTS' FERNS.

Nephrolepis.

For many years past various members of this interesting and beautiful group of ferns have been found in plant collections, though it is only during the past 10 or 15 years that they have attained to great prominence as commercial plants. The oldest species in cultivation is Nephrolepis exaltata this having been introduced more than 100 years ago. It is not only very widely spread in the tropical portions of the globe, but has also produced more useful varieties than all the other ten or more species in the genus. It is from this species, N. exaltata, that we have the famous Boston fern, also N. Scotti, N. Piersoni and its several sub-varieties, and the two or three Barrowsi forms, besides some others of European origin. Up to this time, N. exaltata has proved to be the most variable of the nephrolepises, but it is quite possible that some of the other members of the genus would also prove variable in form were they grown as extensively, and under similar conditions to those now given the exaltata group.

The original N. exaltata is seldom seen in commercial establishments in quantity at the present time, the Boston fern and its various sports having taken its place, and these are still among the most popular of ferns for household decoration. Among the plain leaved forms of N. exaltata the Boston fern and N. Scotti are undoubtedly the best, the first named being especially adapted for large specimens, and the second, with its compact growth and numerous fronds, making an admirable plant for a 4-inch to an 8-inch pot. Of the varieties with subdivided fronds there are several that are very beautiful when well grown, N. Piersoni elegantissima and N. Whitmani being among the best, while the later Pierson introductions and also N. todeaoides, the latter a European form, each have their champions. The chief fault to be found with these heavy-fronded varieties is in the fact that, when they are placed in the subdued light of a dwelling, the fronds either fall down from their own weight, and thus spoil the symmetry of the plant, or else they are liable to rot in the center and either of these troubles makes them less satisfactory in the house than the Boston or Scotti varieties. But the value of these ferns as house plants depends very much upon the manner in which they have been grown, for in order to have tough and enduring foliage, they should be grown in full light, given a fairly rich compost, and be thoroughly established in the pots in which they are sold. The latter provision is one that is sometimes lost sight of by those who persist in planting out these ferns on a bench during the summer, then potting them up in the fall, and frequently selling them off as soon as they are rooted through. This method of culture gives a good looking plant, but one that seldom lasts long under the trying conditions that obtain in the average dwelling.

For the purpose of getting up a stock of any of the nephrolepises there is no better method than that of planting out the stock plants on a bench containing four or five inches of good rose soil, keeping them moist and giving a night temperature of 60°, with plenty of air day and night whenever the weather will permit it, and full exposure to the light. Under such conditions the nephrolepises will grow rapidly, and soon produce an abundance of runners from which young plants may be obtained. The young plants should be potted into small pots and protected from the sun and draught until they are established, after which they should be given the same conditions as that noted for the parent plants.

When well rooted these young plants should be potted on, and, to produce bushy plants in the shortest possible time, it is a good plan to pot two or three of the young plants together in a 4-inch pot, shifting them on into 6-inch and 8-inch as may be necessary, giving the growing plants space enough to develop. When they become potbound they will be improved by feeding with liquid manure, but this should be done with judgment, as too much feeding makes them soft and liable to drop their pinnules.

Thus far, special reference has only been made to the members of the exaltata group, but there are several others that are grown in greater or less quantity. Among these is N. davallioides furcans and a form of that variety known as plumosa, both of which are strong growing and handsome plants, with long and graceful fronds, the latter being light green when given plenty of sunshine, and having the tips of the pinnules so much forked as to give them a crested appearance. N. rufescens tripinnatifida is the rather unwieldy name of a beautiful fern that is more frequent in private collections than among commercial growers. The stems of this fern being rufous, or covered with short reddish hairs, while the fronds are much divided at the tips of the leaflets, gives an ostrich plume effect. This fern is said to be a form of N. acuta, and was introduced some 25 years ago.

N. cordifolia is a well known and widely distributed species, and is one that may be very readily propagated from

EASTER PLANTS.
We l Flowered Plant of Crimson Rambler Rose.

spores. It is not unusual to find this fern coming up on or about newly imported cycas stems from Japan, and, as its seeds so freely, the seedlings frequently appear in quantity on the benches of a house in which it has been grown. This species is also known as N. tuberosa, from its habit of producing small tubers on the roots. Some sub-varieties of this species are also found in commerce in the form of N. pectinata, and N. cordata compacta, both of which are dwarf-growing and compact varieties that make very attractive plants for small ferneries.

N. Duffi, a small growing, crested variety from New Zealand, is now claimed by the botanists to be another form of N. cordifolia, so here again we find the variable character that has already been noted in connection with N. exaltata. N. Duffi is a very pretty little fern, but not grown extensively as a trade plant, and perhaps if one were tied to two or three varieties of these ferns as a business proposition, it would be safer to stick to N. Bostoniensis, N. Scotti and N. Whitmani than any other trio thus far known.

W. H. TAPLIN.

THE CARNATION.

Notes in Season.

A big crop of flowers appears to be general at present, consequently prices do not hold and large quantities of fine blooms are being sacrificed at a low figure, but this should not cause one to be neglectful of the plants in any way particularly now that the sun has greater power and the days are longer than a few weeks ago. Anyone having charge of large numbers of plants knows well what a task it is to keep the flowers cleared from the plants while they are in good condition, but there should not be any let up on this, even though the demand be not what one expects it to be. It is far better for the plants in many ways that all blooms be cut as they are ready; to allow old flowers to remain on the plants provides quarters for thrips and other pests. The weather almost every day now permits of plenty of ventilation being given, and this should be taken advantage of. It not only holds the crop and improves the flowers, but rejuvenates the plants, which they are in need of after their winter's work. Do not let up on the disbudding; also see to it that the shoots are kept in place as the rapid growth now going on quickly causes them to need attention.

Extra stimulant may now be given the plants by means of surface dressing. If the plants are well in bud and bloom with an abundance of new growths coming up they are in the best possible condition to receive extra nourishment. At this time we advise giving the beds a light dressing of pulverized sheep manure or bonemeal, making an exception with plants that cuttings are still to be taken from, as we find that cuttings taken from plants shortly after they have been given fertilizer are hard to root at this time of the year, due no doubt to the growth being so very active. Owing to the fact that less artificial heat is necessary to keep up the required temperature the beds do not dry out as fast, yet, with the extra ventilation and more sunshine, it is natural to expect the contrary to be the case. It is our experience that, if anything, a little more judgment is now called for to keep the soil in the proper condition. These spring-like days sets one thinking about putting on shade to hold the color, particularly with light and dark pink varieties, and if we were sure of continued bright weather for any length of time we would advise putting on a shade at once. But with houses that allow for an abundance of ventilation we advise going a little slow as yet with the shading, until the weather is more settled.

Unless the propagating has been finished that part of the work calls for the closest attention to finish it up as soon as possible, as the time for successful rooting is getting short. Even now the cuttings will need closer watching and heavier shading, also extra guarding against draughts. Any cuttings already rooted in the sand should be potted without delay, the root action being very rapid after it has once started. If allowed to continue long in the sand the plant is going to be a weakling for a long time. The young stock in pots on benches should be treated to a cool temperature with plenty of fresh air on all favorable occasions. They must receive attention in due time as regards topping the growth back. The greenfly will commence to work on them if not kept in check by frequent fumigation.

C. W. JOHNSON.

Notes on Varieties.

Notwithstanding the low price of blooms, it is gratifying to note their splendid quality and the advancement of the past few years. Time was, and not so long ago, that Lawson was about the only carnation of that shade of pink that was considered to be entitled to be classed as a fancy. Lawson in the past has played a worthy part, and its passing out will doubtless cause much regret, but that it is passing, there can be no room for doubt. The next question is, which of the new ones will take the large place it once filled?

The various owners of the "best" Rose Pink Enchantress should hold an exhibition of their own and have competent judges decide which is the best and drop the others. It looks as though we were approaching a muddle for the trade, in the claims and counter-claims over this variety. I have heard complaints that Rose Pink Enchantress is a poor keeper.

Winsor is a shade of pink that is very popular. Though there are others of its class that show larger blooms it holds a good position in the esteem of retailers and the flower buying public. It seems unfortunate that plants of the varieties Alma Ward and Mrs. C. W. Ward have never been disseminated. Both are varieties of unquestioned merit and the trade in general should have an opportunity to handle them.

The above reference to Rose Pink Enchantress may also be applied to White

EASTER PLANTS.

Forced Lilacs and Ferns in Tub

CHAMPAIGN, ILL.—Prof. J. C. Blair, chief of the department of horticulture of the university, is well pleased with the result of the meeting of the state horticultural advisory board, which approved all that had been done and recommended that the work be continued along the same lines as during the past two years.

Enchantress. Already we are beginning to hear from the "only" White Enchantress. Both Boston Market and Lieutenant Peary, in the hands of competent growers, are showing fine staying qualities and an abundance of bloom, and seem far from being counted out as paying commercial whites. Beacon is making a great run for first place in the scarlet varieties. This is no reflection on Victory, Red Chief and other varieties, which have good records.

Easter Lilies from Seed.

Much interest has been shown in the past few years in this country in the production of lilies from seed, experiments of the Department of Agriculture in this direction heretofore referred to in the pages of THE AMERICAN FLORIST having given an impetus to efforts along the same line. Amongst those who have carried on these experiments is Frederick C. Bauer, of Govanstown near Baltimore, Md., who has been very successful in producing some fine flowers, homogeneous in type, thick in texture, and borne on stems of good height and strength. The illustration herewith shows one of his best plants. The first seed came from the original crossing of L. giganteum and L. mulitiflorum. The seed of the earliest flowering specimen resulting was sown and the flowers it produced were fertilized with pollen from a good form of L. Harrisii (from Bermuda stock). Then two of the resultant plants, which proved the best and earliest, were again crossed, the strongest being selected as seed-bearer. One plant produced from this crossing—that shown in the engraving, made from a photograph—produced stems five feet four inches high, and bore 42 perfect flowers. Fourteen of these flowers were permitted to produce seed, which, planted in turn, gave a large number of plants which have flowered abundantly. The type was by no means fixed, great variety being exhibited in the length of the stem of the individual flowers, many of these measuring from 15 to 18 inches from the main stalk to the heel of the flower, which adapts the bells for cutting and using singly. The greater proportion of the flowers are borne at an incline or angle from the main stalk of about 45°, while in other types the flowers set on squarely.

The seed is sown in August; the plants, as soon as well established, are transplanted into thumb pots, shifted in the spring, and grown right on. The general experience, so far as evoked, has been that the flowers grown in this way lack uniformity; but Mr. Bauer has found that this can be secured by a process of careful selection so that the bulbs will produce as great or even greater uniformity as the bulbs usually found on the market. It is noticeable that the foliage grows from the ground and there is no disease at all. The plant shown was repotted after the first summer's rest and grown on, producing four bulbs which measured, as they grew in the pot, just 18 inches around. Mr. Bauer has planted this year something like 3,000 of his seedlings and the extension of his operations is looked for with great interest. The bulbs that are about flowering now are of the fourth or fifth cross, and of these the best and earliest individuals will be selected and fertilized again; from the seed thus secured still another crop will be raised.

S. B.

SEEDLING LILY—L. GIGANTEUM × L. MULTIFLORUM.
Raised by Frederick C. Baur, Govanstown, Md.

THE RETAIL TRADE

THE forced double red thorns—often labelled crab apple blossoms in retail stores—are very pretty, though the shape and growth of the plants leaves much to be desired in many cases.

MOST beautiful effects may be produced with the bright yellow daffodils, such as Golden Spur, and blue forget-menots. These are more suitable for daylight decoration than using under artificial light.

A Milwaukee Table Decoration.

At the recent magnificent dinner party at the Hotel Pfister given to Milwaukee friends by Jas. B. Regan, proprietor of the Hotel Knickerbocker, New York, the table was spread beneath a great umbrella of American Beauty roses and daffodils and had for its center a miniature lake 20 feet long and three feet wide, spanned by two rustic bridges and lined along its banks with moss and water lilies. Ducklings and goslings swam about in the water and therein a fountain played. Strings of smilax were festooned from the corners of the table to the sides of the room, which were banked with palms and ferns among which glowed myriad electric lights. The decorations were executed by Mrs. Miller, the Pfister florist, Aug. Kellner supplying the plants.

Fine Floral Designs.

The accompanying illustrations give a good idea of the excellent work turned out by the Alpha Floral Co., of Kansas City, Mo. The horseshoe was made for one of the Sells Bros.' sons and the name "Chesterfield" was that of the famous horse he rode. We are indebted to A. Elberfield of the above firm for the excellent photographs from which the illustrations were prepared.

A Buffalo Florist's Window.

The accompanying illustration shows the window of W. J. Palmer & Son's fine floral store in Buffalo, N. Y., as it was decorated at the time of the dog show recently. Anything well done and up-to-date, as this firm always is in its decorations, is bound to pull. Another fine window was arranged for the automobile

show, a lady sitting in an automobile, all full size, the automobile being made of carnations and galax, the frame being the work of the firm's own wire-worker.

The Rose for Decorative Purposes.

A paper read by J. F. Sullivan, Detroit, Mich., at the ninth annual meeting of the American Rose Society, held at Chicago, March 25-27, 1908.

In attempting to treat this very broad subject, many phases of it appear for the consideration of the essayist, and the introduction of anything that is really novel seems most difficult, but if the mere recital of that which is well known, and the awakening of increased interest in the subject, is, as I believe, valuable, the paper may be entitled to a place in the report of the proceedings of this society. It will be observed that the question is viewed from the position of a retailer of cut roses chiefly.

The present great extent of the rose trade was developed by many contributing factors, but I believe the chief of these were the pioneer retail florists, who in their time were the first to realize the commercial possibilities of the queen of flowers. To these men is due the honor of having appreciated the full worth of the rose, and laid the foundation of its illustrious career. They loved the rose and had faith in its future, and no unfavorable circumstance deterred them in advancing the prestige of their adopted flower, nor from courageously asking a price for it commensurate with its actual value as determined by the cost of production. Many of these pioneers have passed away, but their work is perpetuated, and their monuments are seen in the present magnitude of the rose industry. These enterprising, far-seeing retailers in the early days of their experience were quick to perceive the manifest delight and approval of their discerning customers on being shown a rose of more than ordinary size and beauty, and thus encouraged, they in turn urged the growers on to increased efforts, and the latter, stimulated more by the prospective reward than the love of their productions, continued to improve the existing varieties of roses, and by the repetition of these progressive steps in the eastern cities, chiefly Boston, there was created the substantial beginning of the evolution of the rose in this country, which has continued to the present day. Those were the days when reigned old Safrano, Isabella Sprunt, Bon Silene, Cornelia Cook as forcing varieties, and the annually forced crops of Gen. Jacqueminot, Anna de Diesbach, Baroness Rothschild, Merveille de Lyon and a few other hybrids.

REASON FOR POPULARITY.

And here is suggested the inquiry, Why have the retailers in the early days of floriculture, and continuing to the present time, selected the rose as the basic element in their business careers? Why have they continued to maintain the rose most conspicuously before their trade? Why are so many florists today, while not ignoring the increasing value of many other branches of the business, making roses a specialty and succeeding in their efforts to permanently popularize them? Because the retailers wisely view the rose as their chief asset in merchandizing. Without it, their place would be devoid of the essential attractiveness and proper equipment of a floral store. As an article of merchandise or practically considering it, the florists realize that in no other stock of cut flowers can they operate with the same degree of immunity from possible loss that the rose gives them. They can, as every florist well knows, stock up with a supply of tight cut buds, which, being at once saleable, continue to actually improve on their hands for several days, more or less, according to the season and varieties, before they begin to decline, and even then they are just about in the right condition for that funeral offering for which he wisely suggests them. For shipping long distances, no flower is more suitable or certain of satisfactory results, viewed alone upon its splendid keeping qualities. Retailers of the seaboard cities use roses almost exclusively in their so-called "steamer trade."

KEEPING QUALITIES.

I am reminded of the case of some blooms of Richmond being shown at a meeting of the Detroit Florist Club three years ago. The same flowers, after being kept in a refrigerator, were shown at the exhibition of the American Carnation Society in Chicago eight days later. This trait of the longevity of cut roses in good condition, which reduces its imperishable nature to a minimum and commends it so highly in a practical sense to the retailer, while in his possession and that of his customer, but also when the question of the dealers' supply is considered, as the rose can be shipped to him, if necessary, by his grower situated far away, and the availability of the rose in all seasons adds great value to his chief commodity in stock.

On no occasion of the many where flowers of some kind are used is the rose ever considered unsuitable or inappropriate. The retailer fully appreciates the appropriate character of the rose for all purposes of decorative effect, and its unequaled position without a worthy rival in the affections of the greatest portion of humanity. The florist can in all sincerity suggest the rose as the friendly gift, the christening of either the baby or the vessel, and for the hand of the bride it is most essential. We can select it as the message to the sick room, and with equal propriety use it as a mark of condolence and respect to the dead.

Indeed, were the rose eliminated completely from the mountain of retail floriculture, the cavity would be so great it would be difficult to properly identify it. These and many more that may be named, are the reasons why the retailers look upon roses as being the most reliable, valuable and indispensable of their merchandise.

Keeping pace with the evolution of the rose in the various degrees of its advancement came the improved methods in decorations, and here, too, the queen of flowers plays a most conspicuous part. In the richness of its individual beauty, clothed alone by its own rich foliage, it enables the decorator to carry out, better than with any other flower, the idea of a modest, charming simplicity in decorative effect, with the most satisfactory results. How frequently we are asked to adorn a person, a picture, a mantel or other object with "just one rose," so exquisite and impressive in its simplicity.

DESIGN BY ALPHA FLORAL CO., KANSAS CITY, MO.

VARIOUS USES.

In depicting the part the rose plays in elaborate decorations, we may say the world cheerfully concedes the tribute this flower alone deserves above all others, it being the very essence of decorative effect in whatever manner it is shown. The individual flower, the vase of them, the bank of roses, or baskets of the same, and it is doubtful indeed if there can be found in any part of the country a retailer whose establishment lays claim to being first class in its appointments, that does not give roses pre-eminence of importance in his store as a result of the recognition of their value fundamentally in decorative effects.

And this is not surprising when he considers the distinctive beauty and striking grandeur of the rose itself, stripped of all sentimental significance attached to it in ages past down to the present time, and even momentarily ignoring its delightful fragrance, ever present and welcome, in some degree of intensity, and standing alone in its purely decorative character, it challenges the unvarying admiration of all who behold it. Oftimes this admiration and devotion approaches the highest degree the heart is capable of.

And to what grandeur of elaborate decorations is the rose not capable of? With its gorgeous rich colors in many hues, the most exacting detail of elaborate effect is feasible. It yields itself gracefully to any situation, and in no place, either parlor, church or hall, will the rose fail to produce the acme of elaborate decorative effect. Any one of the many beautiful varieties, without the accompaniment of other flowers or floral accessories, is equal to any occasion when the perfection of floral beauty and magnificent splendor is desired. The florist who has much work in this line frequently meeting with situations where the room furnishings or other unfavorable conditions render the case difficult of solution, has but to turn to the "queen," which comes to his relief in whatever color the case demands, and the achievement of elaborate effect with ease is accomplished.

Other flowers may in their respective seasons find a measure of favor, usefulness and even popularity with the lovers of the beautiful in nature, and in decorations you may mix them in an incongruous mass without doing great violence to their individual character, but the rose alone cries out pleadingly for a position of isolation, where, unaided by associates, ribbons, ferns or other accessories, the rare, unrivaled splendor and magnificence of its decorative effect is most pleasing and appreciable. Indeed, the champions of no other flower would have the courage to question the supreme and exclusive position of the rose when considering the greatest achievements possible in elaborate decorations of the present day.

PERFECTION OF BEAUTY.

But it is not alone the practicability of the rose, it being the corner-stone of his business edifice, that makes it interesting to the retailer. He, with the whole civilized world, recognizes the perfection of its natural beauty and the inexpressible thrill of joy experienced by those who behold it in its magnificent and unequaled splendor. The florist presenting the rose, fair, fragrant and exquisite, offers no apology when advancing its fame as the queen of flowers, always encouraged and confident that no flower grows that can excel the rose, and where an occasion is presented when it is desired to express purity of life, a stainless character, unquestioned integrity and virtuous career, we turn instinctively to the emblematical flower, the pure white rose. The rose is beautiful, even in its dainty promising bud, the half or full open flower. Indeed, the great artists often select the latter as subjects for their finest work, and not infrequently do we see some varieties in the very last stages of their development and even bordering upon decay, yet embodying the very perfection of floral beauty, and when we consider the esteem in which it is universally held, the admiration and devotion it excites in both the rich and the poor, its unchallenged position as symbolical of innocence, purity, beauty and sweetness of character, the joyous hope it carries to the sick and afflicted; when we consider all these precious attributes of the rose, we are not amazed at its wonderful and ever increasing popularity.

DESIGN BY ALPHA FLORAL CO., KANSAS CITY, MO.

Retailers view with pleasurable gratitude the powerful agency of the flower shows in the development of the rose, and the maintenance of its popularity. In the early days of the rise and progress of this flower, industrially speaking, the retailers were more conspicuous for their zeal in using these shows as mediums to strengthen their individual work in behalf of the rose than they are at the present day, and the retailers are forced to admit the increasingly active participation in these events by the enterprising rose growers, and gratefully acknowledge the great good they are doing of a most permanent character.

ROSE NOVELTIES.

At the same time, the retailers deplore the seeming indifference of many growers in the important matter of providing them with more of the novelties in roses, the necessity for which is most apparent. So pronounced and general is this interest, and indeed eagerness of the rose patrons to satisfy their delights in new varieties, that I venture to say that, were some of the once favorite roses that are now relegated almost to oblivion, and which the so-called up-to-date grower of these times would disdain to grow, resurrected, they would find a ready market and many warm, appreciative friends among rose enthusiasts. As an example I might cite the case of Bon Silene, which is now grown in some quarters and is meeting with an encouraging demand. And in considering the adoption of varieties to meet this changing taste of the people, it is well to remember that it is not the size alone that constitutes the chief elements in a beautiful and most acceptable rose, as is clearly and constantly shown by even the most fastidious patrons of the retail stores while making their selections.

The public are craving for novelty—something different from the monotonous few varieties that greet them on their recurring visits to the floral store. Any of the older varieties are sufficiently attractive to the casual buyer, but the steady patrons who are our most valuable ones, must be shown something new to hold their continued and increasing interest in our chief commodity. As an evidence of this tendency on the part of a large portion of the flower lovers for variety and novelties, witness the in-

creasing interest shown by them the last two or three years in the dainty pompon and anemone chrysanthemums, and often by identically the same persons who formerly sought the largest specimens of that flower at the time obtainable. Even the now commonly grown Crimson Rambler, how frequently it is used in most important social functions for its decorative effect in preference to the concededly more beautiful varieties, simply because, for the time being, this rose carried with it the element of novelty. How eagerly would the rose enthusiasts today seek the beautiful hybrid roses, as they were formerly grown, if they were now available. These are the elements of the changing character of our retail business, which serves to sustain our conviction that if we should broaden the scope of the rose and still further popularize it, we must create greater diversity in the productions we offer.

TOO FEW VARIETIES.

If rose growers who are devoted to the production of cut blooms alone believe, as they evidently do, that a list of a half dozen varieties of the same, embracing merely the primary colors, will, even if ever so well grown and beautiful, satisfy the exacting taste and aesthetic inclination of the flower loving public, I would ask, how can they reconcile such a theory with the most palpable contradiction of it, when we consider the marvelous expansion of the rose plant industry as shown by the firms issuing catalogues? Many of these will tell you that they enjoy the continuous patronage of their old customers chiefly by the latter's intense interest in the newer varieties of roses as they are annually offered.

But the experimenting must be the burden, if we may so call it, of the growers. They must take the initiative steps. The retailers, zealous as they are, cannot afford to offer to the public a variety having only an imaginary existence or merely prospective value. To the timid but perhaps well-meaning grower I would say: Try out the new varieties giving promise of a good future; give them a fair and honest trial without prejudice, not as we too frequently see growers half-heartedly assigning the most unfavorable spot in their greenhouse to a few dozen plants of a novelty and thereafter being daily disturbed with suspicions that the stranger among his pet varieties is only another fake, and after a brief experience, seems only too willing to denounce it to other florists and exultantly proclaim that he knew it was no good when he bought it.

KILLARNEY.

As an illustration of the respective attitudes of the retailers and many growers I will cite the case of Killarney, a variety the superior merits of which are now universally conceded. Witness its struggle for the recognition deserved. Soon after Killarney's introduction in this country, about nine years ago, a few growers experimented with it in a limited way. The keen, well trained eyes of the retailers, who by chance came into possession of the cut blooms, recognized instinctively their rare beauty and prospective value, and, true to the enterprising methods that had already gained for them a big rose trade, they soon acquainted their customers with the distinctive finished beauty of the novelty, the supply of which is as yet limited. The increasing popularity of this variety and the consequent demand for it kept much in advance of the supply, which fortunately improved rapidly in the hands of but a few growers. Retailers everywhere urged more growers to plant it. The latter, nevertheless, were distrustful, and persistently refused to give it a fair trial, and in this case, as in many others, totally ignored the advice of the man behind the counter. One grower would say that it was too short stemmed, another called it a cropper, and another thought it a shy bloomer. A few wise ones thought that we had too many pink varieties, but in the meantime a few real wise ones—growers and retailers alike—were doing a big business in Killarney and incidentally advancing the popularity of the queen of flowers and aiding floriculture generally.

The growers' indifference to the constant pleadings of the retailers to awaken to the importance of growing varieties that would be particularly available in the warm summer season, has delayed inexcusably the full development of the lucrative trade for both grower and dealer that is attainable during this period. The present growers cannot justify their lethargy in the past in this respect by the absence in commerce, as they allege, of such varieties as will by their productiveness, color and quality commend them for the purpose named.

ROSES FOR THE MASSES.

The retailers often wonder, when contemplating the indisputable proud and exclusive position the rose holds in the hearts and minds of the people, what would be the extent of the commercial importance and increased popularity of the queen of flowers were it not for its present prohibitory price to the masses, which operates to its disadvantage, commercially speaking. With that barrier removed, appears to them visions of acres of glass being annually added to the existing large area now devoted to its culture, and the additions of thousands of florists engaged in this healthful and profitable industry, and in view of the vast strides made by hybridizers in recent years, may we not reasonably expect that a type of rose can yet be brought out which, in addition to the quality of the flowers, will also be sufficiently productive to allow them to be sold at a price that will place them in the hands of the masses, and their popularity thus extended to the full gratification of every lover of the rose? And this blessing may by the same process be extended to the multitudes of homes where outdoor culture of the rose is possible, were the suitable varieties available.

How frequently on our premises the prospective buyer who is viewing with delight a splendid blooming plant of, say, Frau Karl Druschki, asks if it is hardy. We proudly answer in the affirmative and prepare to take an order. When again questioned, "will it bloom again this season?" we reluctantly answer in the negative, as we see our prospective sale fade away. There is where we are deficient. We have not yet adjusted our productions to the actual requirements of the people we attempt to serve. We cannot expect amateur rose growers and the general public to purchase and be satisfied with such varieties that even in the hands of skilled florists will not succeed under similar conditions. And considering the retailers' part in the future, no one can question the wisdom of carrying forward with still greater vigilance and enthusiasm the splendid work on identically the same lines of those pioneer retailers referred to, whose careers were so strongly characterized by eminently successful results.

ADVERTISING.

In continuing the practice of those methods let us not deceive ourselves as to their sufficiency, unsupported in these times. For to maintain the same state of advancement we must enlist some of the means made necessary by the progressive spirit of the day. The exploitation of our wares being essentially a commodity of luxury, calls for our very best efforts to impress the public with their beauty and the multiplicity of their uses. We must show our finest, and encourage the admiration and consequent use of them. We must advertise; the day is upon us to employ printers' ink; our stores and stock must be made familiar with the people; we must acquaint the daily press with the current news concerning the rose—its development, its beauty and increasing popularity, and indeed it is a sad commentary we are forced to admit, that of all the matter recently appearing in the daily press and monthly periodicals, columns, yes, pages of it relating to the rose, either culturally or descriptive and eulogistic of it as the queen of flowers, very little, if any of it emanates from the great army of florists whose interests are so materially enhanced by such publicity, which, in other words, is real advertising, without any cost to the negligent beneficiaries. And if the retailers would maintain their coveted position as the leaders in popularizing the rose in the future as in the past, they cannot ignore this powerful assisting agency so universally available.

The identification of florists with the civic improvement societies now everywhere so popular and aggressive in their work, is another means by which our business may be greatly helped. All this

WINDOW DECORATION BY PALMER'S, OF BUFFALO, N. Y.

For the Dog Show.

PARTIAL VIEW OF G. C. C. SCHRADER'S RANGE, ELMHURST, N. Y.

missionary work must be carried on in the future as in the past by the retailer and even with more energy than formerly, for the grower, broadly speaking, is not known to the public or its quota of flower buyers, except the growers of Chicago and vicinity, who seem to be as successful in exploiting their work through the daily press as they are in carrying it on under their immense areas of glass. The retailer has an established identity. He is in the eyes of the people, and to them is a real fountain of floricultural knowledge.

A WORD ABOUT AMERICAN BEAUTY.

Society has, as a result of a combination of circumstances, aided by the florists themselves, forced the American Beauty to a position of prominence that seems at times to discourage the hybridizer in his endeavor to produce a successful rival to that famous variety, but, alas, every retailer knows that variety at times is anything but a real beauty, but having been wisely christened, its celebrated name often saves it from the condemnation it too frequently deserves. Originators need not fear for a place in this country for their meritorious productions, even if they fall far short of the size of the popular American Beauty. Size alone does not always commend a rose—length and strength of stem, with nice foliage supporting, a flower beautifully distinct in color and form, will never suffer materially in comparison with its companion of larger size, coarse texture and varying shades of unattractive colors. We shall say nothing of "bull heads" that in a measure serves to disfigure the whole rose family.

Personally, I should prefer to see half of the glass at present devoted to American Beauty given to a few of our leading sorts and a further extension of our present list of forcing varieties to include those particularly reliable for summer blooming, and in this position I fully realize that I am in danger of standing almost alone. But it is a well known fact that no longer are retailers embarrassed when they are unable to answer the call of the critical rose customer for American Beauty if they are prepared to offer as a substitute either that marvelously distinct and strikingly beautiful rose, Richmond, or its worthy and popular companion, Killarney, and indeed these are now often preferred to American Beauty, irrespective of the cost. Even from classic Boston comes a trade report as recent as last week, that "the demand for Beauties is not active, many people now preferring Richmonds and Killarney." And when we reflect upon the dismal failures attending the attempts of some growers with this rose, we are moved to pity and regret that the same glass and efforts were not devoted to other varieties which would be almost certain to yield better, if not entirely satisfactory results.

In conclusion allow me to say to those of us who are engaged in various ways in advancing the interests of the rose and who at times feel the encroachment of its reputed rival, the carnation, supported by its aggressive society, remember that we too have a society devoted to the queen of flowers and being faithful in our efforts in its ranks and working along lines of its noble aims and prompted by its suggestions, we shall maintain the rose in its glorious accendency, to where its unrivaled beauty and adaptability to all phases of decorative adornment justly entitles it, and after having accomplished so much in advancing its popularity, we shall still persevere in its behalf until we have achieved the full realization of our cherished desire and ambition—"A rose for every home; a bush for every garden."

At the Boston Spring Show.

The illustrations herewith are from photographs taken at the annual spring exhibition of the Massachusetts Horticultural Society, a full report of which appeared in our issue for March 28, page 440. The display of amaryllis, as there noted, was most creditable to T. D. Hatfield, gardener to Walter Hunnewell, Wellesley, and the finely flowered plant of Rhododendron Frederica shows the value of the greenhouse section of this genus.

WITH THE GROWERS

Gustave C. C. Schrader, Elmhurst, N. Y.

Gustave C. C. Schrader, whose range is located at Elmhurst, N. Y., has within the past few years become noted for the large quantity and excellent quality of smilax, Asparagus plumosus nanus and Adiantum cuneatum, which he grows. Though yet a young man, he has built up a business in the New York wholesale market that is very creditable to his energy and ability, and he is generally recognized as the leading grower of green in the vicinity of the metropolis. He makes daily trips, carrying his cut in an automobile, to the New York Cut Flower Exchange, where his sales agents are located, and he can fill the largest order on a few hours' notice.

Mr. Schrader, who is a native of Germany, came to this country with his parents when 12 years old. His father, who is still hale and active, at the age of 70, was a florist and the boy, quite naturally, followed the business. Soon after being married and starting in business for himself 15 years ago, he decided that his talent ran in other lines than growing a mixture of stocks. Starting in a small way he has steadily progressed until his range comprises an area of about 50,000 square feet of glass. Speaking recently of his experience, he said that there was now but a comparatively small demand

AT THE BOSTON SPRING SHOW.
White Rhododendron, Frederica.

in the New York market, for long strings of asparagus; he has therefore abandoned stringing, his asparagus stock being sold in bunches. He had erected one house 20 feet high but has of late, instead of stringing, utilized what may be called the second story, by boxes, resting on a latticed floor, in which the plants are grown.

Commercial fertilizers are almost exclusively used, both on the asparagus and smilax crops. After various experiments it was decided that the brands of fertilizers with which the southern tobacco growers were most successful was also suitable for asparagus and smilax. Mr. Schrader lays stress on the virtues of tobacco stems, both for fumigating and fertilizing purposes, and to these ends he has installed a cutter, run by wind power, the cut stems being spread liberally over the beds. In addition to this, smoking is occasionally resorted to, but cut-worms are found to be the worst enemies of the crops. When it is stated that the output of smilax is 300 to 400 strings per day, it will be readily understood that crops are not allowed to lag in the growing. Though there is a smaller glass area devoted to adiantum than to the other crops, it is grown in beds, for cutting, with the same success that attends the culture of smilax and asparagus.

AT THE BOSTON SPRING SHOW.

Judges Roland, Clark, Johannson, Finlayson and Hatfield.

At New Castle, Ind.

THE BENTHEY-COATSWORTH CO.

At the Benthey-Coatsworth plant, 10 houses in all are devoted almost entirely to roses. Otto Benthey, the genial manager, has everything looking spick and span. It does one good to go through these houses, as they always have the appearance of neatness and cleanliness. Bride and Bridesmaid are in tip-top shape and the cut has been very heavy lately. The quality is simply superb and the indications are that the present cut will be continuous. Killarney which reigns supreme on this place is holding up its reputation as a producer. While a trifle off crop at present, this will be only temporary as the plants are one mass of growth and buds and in the pink of condition. American Beauty is being dried off at present, to be started again in a short time for summer blooming. Otto certainly had American Beauty roses galore last year when they were bringing good money and is going to repeat it again this year. A bench of callas is one mass of buds and flowers and is giving a good account of itself financially. A bench of Asparagus Sprengeri is now coming into crop, but is cut hard to meet the demand. They have some 10,000 to 15,000 young plants of Killarney well established in pots, also many Bride and Bridesmaid. I also noticed some good geraniums and coleus for spring bedding.

AT THE BOSTON SPRING SHOW.

Amaryllises Shown by Walter Hunnewell, Wellesley, Mass., T. D Hatfield, Gardener.

HELLER BROS.

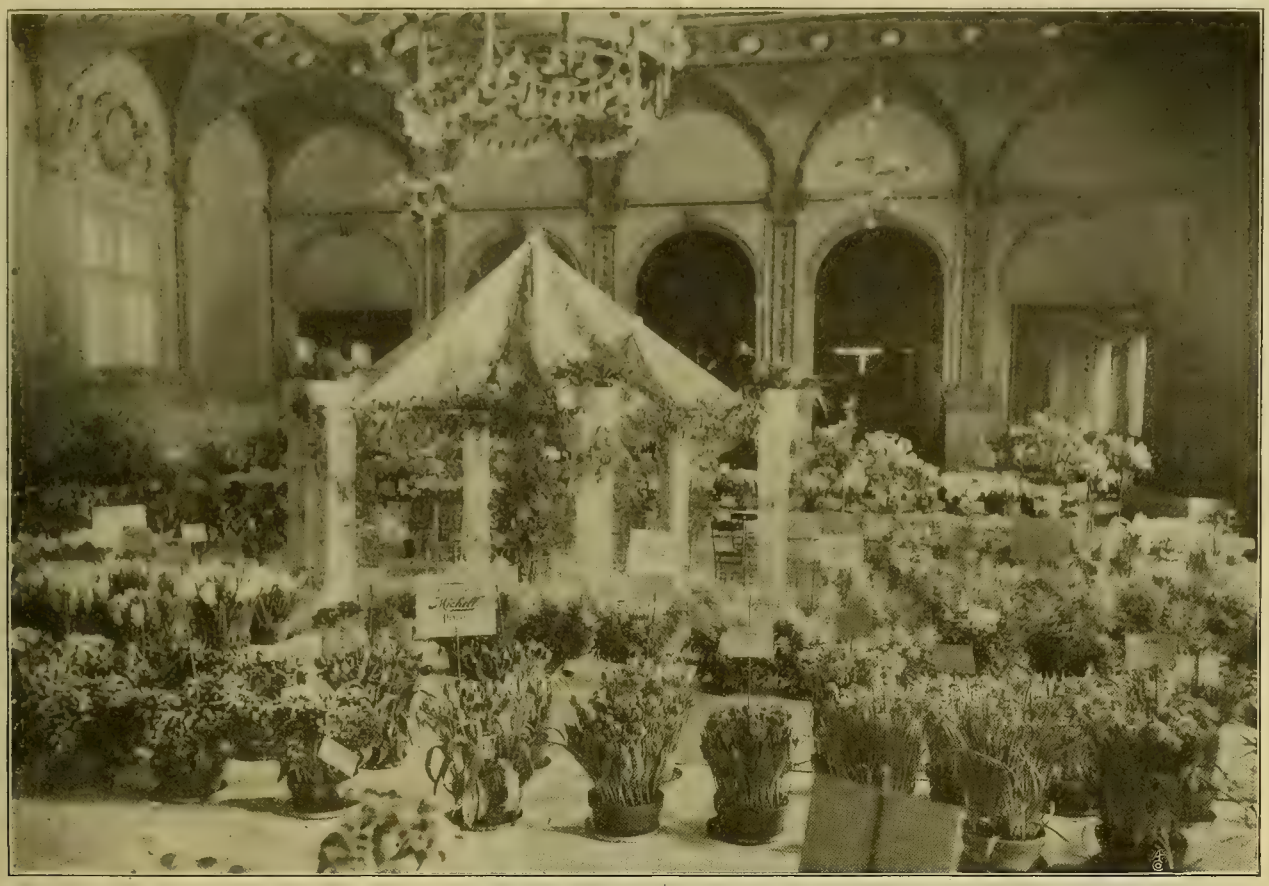
Heller Bros.' plant comprising 250,000 square feet of glass, is devoted principally to roses, although some space is given up to carnations and their ever increasing catalogue trade, which is beginning to be a very large part of the business. The roses are in good condition, being in heavy crop at present. Bride and Bridesmaid, predominate and are making fine growth. Many bottom breaks are in evidence and long cut stock is the result. Richmond, which for the past two years has proven a failure, is now looking fine and is giving a good account of itself. Why Richmond does not do well here is a mystery to the writer, but it looks as though Heller Bros. have at last found its requirements. A bench of Cardinal planted some time ago is in fine growing condition and gives promise of some good things later on. Killarney is planted moderately and is just coming into crop. The flowers are of good color but rather short in the stem. American Beauty is badly off crop, at present, but is showing signs of activity by breaking from the base. Two houses planted some five or six weeks ago for summer bloom, are growing nicely. Wm. R. Smith, the new summer rose, will be in crop shortly, but being similar to Kaiserin in habit and growth, the first flowers are not perfect. But to see this rose in warm weather is a beautiful sight. It is a very free bloomer and its slight tint of pink only adds to its beauty. Carnations are a trifle off crop at present with the possible exception of Lawson and Enchantress. The quality is fine and color perfect. A red seedling on the order of Manley, only three times as large and more brilliant, is a very promising thing and no doubt will be heard from next year.

WILLIAM DITTMAN.

Wm. Dittman, who has just returned from a short sojourn in Florida, is full of fish stories and the wonderful climate. Mr. Dittman has well earned a vacation this year as it has been an exceptionally successful one. His American Beauty roses this winter were the best he has had for some time and the crop was on nearly all winter. At present there is nothing doing but a most bountiful crop has been harvested. The tea roses are now producing some extra fine stock and the plants are in a healthy and vigorous condition. This will be the last year for teas and the whole place will be devoted to that peer of all roses, American Beauty.

WEILAND & OLINGER.

Weiland & Olinger's establishment, which is noted for its high grade stock,



PARTIAL VIEW OF THE SPRING SHOW OF THE PENNSYLVANIA HORTICULTURAL SOCIETY, MARCH 31-APRIL 2.

See Report in Last Issue, Page 508.

is still in the front rank. The place as a whole is in a very flourishing condition and a heavy crop is now on. Bride and Bridesmaid, Killarney, Mme. Chatenay, A. Roosevelt and Perle, comprising the tea section, are at present producing flowers which are hard to beat. American Beauty is in good shape and some fine stock is being cut at present. Carnations are in heavy crop and the quality of Enchantress, White Perfection, M. A. Patten, Victory and Robt. Craig is excellent, both in color, substance and form. Bulbs of which about a quarter of a million are grown are doing exceptionally well and very little disease is discernible. The market being overloaded with this class of stock this year, the quantity of bulbs grown next season will be materially reduced. Weiland & Olinger are optimistic in their views as regards business and the result is that several houses will be added to their present large range to take care of the greatly increased demand. HOOSIER.

Society of American Florists.

ANNUAL MEETING OF EXECUTIVE BOARD.

The executive board met at the Prospect house, Niagara Falls, N. Y., March 23-24. President Traendly and Messrs. McClure, Hallock, Wirth, Farquhar, Asmus, Young, Stewart and Rudd were present. Messrs. Kasting and Cowell were appointed to fill the vacancies caused by the absence of Messrs. Murray and Beatty. The usual routine business was transacted.

The programme for the August convention was discussed and the main features decided upon, the details being left as usual to the president and secretary.

As the charter provides that the main office of the society shall be in the city of Washington, the president was instructed to appoint an official representative of the society in the city of Washington who should maintain such an office.

E. V. Hallock was appointed a committee to revise parts of the proceedings relative to school gardens, to make such additions thereto as seemed advisable and put them in shape for publication for general distribution, carrying out recommendations made by the society.

It was resolved that the president of the society be authorized to offer the silver and bronze medals of the society at the horticultural exhibitions in this country for new and meritorious plants or flowers of American origin, provided that he is convinced that the exhibition at which they are proposed to be offered, shall be more than local in scope and of sufficient extent to warrant recognition by this society. No more than one medal to be awarded to the same plant or flower.

Chas. H. Keitsch, of Buffalo, N. Y., having been nominated by the Buffalo florists, was elected superintendent of the trade exhibition.

The secretary was instructed to correspond with the census bureau with a view to having the method of obtaining the census statistics in so far as they relate to floriculture more carefully considered, and that certain changes be made which will render the results more reliable and more valuable.

Considerable attention was given the action of the society regarding the nomenclature committee and registration and it was the sense of the board that following out the proposed course would entail an indefinite but large expense on the society in the future and therefore the board could not concur, and the matter was referred back to the society for further consideration. It was the sense of the executive board that it was neither feasible nor desirable for this society to attempt to fix the commercial value of any plant or flower under present conditions.

In view of the fact that it would soon be necessary to republish the by-laws, the committee discussed them in detail and recommended certain amendments to be submitted to vote at the next convention, most of them being merely verbal corrections.

An examination of the treasurer's report showed that the society now has in its permanent fund about $5,300 and nearly $4,000 in its general fund. This showing was very gratifying to the members of the board and it was believed it would also be pleasing to the members in general.

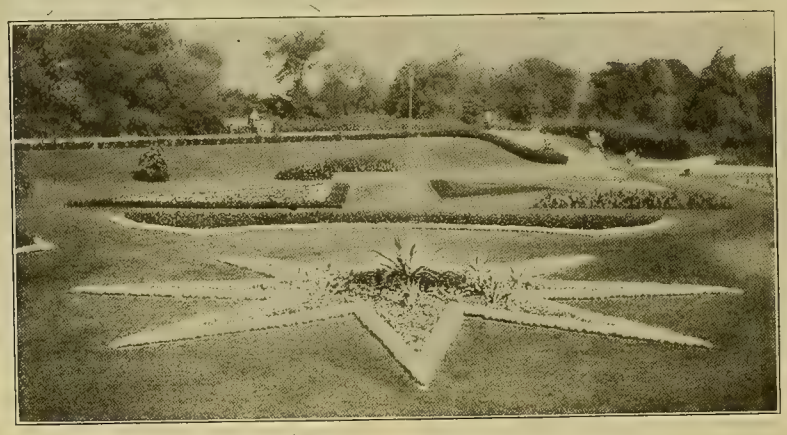
The members were more than pleased with the hearty and cordial manner in which the local people assisted them in their work and especially with the manner in which Mr. Cutler more than redeemed all the promises made at Philadelphia.

Practically the entire lower floor of the Cataract house has been placed at the disposal of the society as well as the grounds adjoining. This will give ample

space for the trade exhibition and the meetings under one roof and on one floor and will also give room for the planting of flower beds for the exhibition of plant novelties. The proprietor of the Cataract and International hotels assured the committee that he would be glad to have any such planting done and would furnish without charge a competent gardener to care for the plants up to exhibition time. As these accommodations are all furnished without expense to the society, it would seem that the financial results of the convention at Niagara Falls must necessarily be better than ever before.

Following the custom of some years past the accrued interest on both the permanent and general funds was ordered added to the reserve fund.

George W. McClure was appointed chairman of the committee on sports and



STAR FLOWER BED AT WASHINGTON PARK, CHICAGO.

J. R. Cloudsley was appointed as a member of that committee, the third member to be announced later. A. H. Ewing and H. E. Philpott, of the Canadian Horticultural Association, met with the committee on the last day and arrangements were partially completed for joint sessions of the Society of American Florists and the Canadian Horticultural Association, the details to be settled at a later date. The question of international games was left to the sports committee. It was decided that the bowling games should be held at Buffalo during the last day and evening.

The final resolutions, which were adopted with enthusiasm, expressed the appreciation of the board for the "many courtesies shown us by everybody we came in contact with during our visit." Ex-Mayor Cutler, Mr. Isaacs of the International Hotel Co., Major Butler of the Natural Food Co., and President and Mrs. Kasting were personally thanked in the final resolutions both for assistance offered and hospitalities extended and the board adjourned more than pleased with the kindness and courtesies shown and with the highest anticipations for a successful and enjoyable convention.

It should be noted by the members of the society that Mr. Isaacs offered in case enough early reservations of rooms were made at the Cataract house to reserve the entire hotel accommodations of the building for the members of the Society of American Florists. If this offer be taken advantage of, it will result in an ideal and unique situation in the experience of the society—trade exhibition, meeting hall and hotel accommodations all under one roof. The rates are from $3 to $5 per day, American plan, that is, meals included.

W. N. RUDD, Sec'y.

When and How to Use Bedding Plants.

A paper read by Alois Frey, head gardener at Lincoln park, Chicago, at the convention of the Society of American Florists, Philadelphia, Pa.

Riding through parks, along boulevards and country roads, speeding in trains through villages and towns, all over the country, passing the magnificent palaces of the wealthy with their beautiful lawns and the humble cottages of the poor surrounded by modest yards, everywhere the eyes meet the brightness of flowers and richly colored plants, which at once impresses upon us the popularity and universal love for bedding plants.

There is a large variety of these plants from the smallest annual like portulaca, to the stately subtropical plants, and the perennials must not be forgotten, for they figure greatly in various effective displays. Then we have tulips, hyacinths, daffodils, etc., for early spring flowering. No garden need be without flowers from the time the dainty little crocuses peep out of the snow until late in fall. No matter how small the purse enough seed can be purchased to obtain a very harmonious and artistic effect, as well as a continuous season of flowers. It is not the means of being able to procure a large amount of choice plants, but it is the good taste and skill of the designer, who understands how to make an arrangement to harmoniously and discriminately combine the various colors with immediate surroundings no matter how inexpensive, that appeals to the lover of nature with all its beauty, and this is what we are striving for more and more every day.

The average florist who deals in bedding plants should by all means give this particular subject thorough study, in order to be able to assist and educate his customers, who in most cases appreciate such advice and instructions in regard to arranging and planting their gardens so as to present a beautiful picture. It requires just as much artistic judgment and ability to accomplish this, as to paint a beautiful picture on canvas. The designer must show individuality and know exactly what proportion the plants will attain; how soon they will be fully developed, also how the colors will blend together; in fact, he must see the finished picture before him when he designs his plans. The sooner we commence to understand how to arrange these beautiful gifts of nature better, the sooner we make a large majority of the people of our grand nation happier. We have everything to do it with now let us understand how to do it. To cover the subject best I have divided it into two chapters, as the title of this article indicates:

WHERE TO PLANT.

The proper selection of the place for the floral display is first to be considered; a place where it will be properly effective is just as important as the execution of the planting, as this takes a definite part in the entire scheme. Locality, buildings and size of grounds must be taken into consideration. The smaller the place, the simpler should be the display; it is easy to overcrowd a small front lawn whereby the proper effect is entirely lost. Large places in proportion will have more elaborate plantings and the artist will have occasion to plan special features such as courtyards, parterres, sunken gardens, Italian gardens, etc.

The front of a building is most always selected for the display, which is generally formal, and, if the space is limited, a narrow border of plants adjoining the building will be sufficient, with perhaps one or two beds on the lawn, proportional to the latter. There should always be plenty of grass to offset the beds. The backyard as a rule is very much neglected and in many instances unsightly; here I would advocate a grass plot with a border plantation. How much more cheerful one would feel, looking into a well kept yard than at a lot of rubbish.

Places of larger dimensions with their beautiful landscape effects must be treated

BED OF TROPICAL PLANTS AT LINCOLN PARK, CHICAGO.

THE FLOWER GARDEN AT LINCOLN PARK, CHICAGO.

more in detail. Here we have an opportunity to lay out in connection with residences, conservatories and public buildings, courtyards, parterres, rose gardens, etc., which as a general rule are part of the architectural scheme and in harmony with the style of the building. In the last few years Italian gardens have again become quite popular, and these, especially set apart from the rest of the landscape, must be treated by themselves; they are very set and usually contain considerable color well blended together.

PARKS.

Besides the forms of special treatment already mentioned we also have other flower gardens, which give an opportunity for a larger variety of flowering plants, in the line of annuals, roses and perennials, etc., which, properly arranged, make a brilliant effect without interfering with the more subdued and restful landscape. Public parks especially form a great field for floral displays and, although some authorities on landscape gardening do not favor them, I believe the public fully appreciate flowers. The utmost care must be taken not to let them run wild all over the park; keep them in the vicinity of buildings or entirely away and screened off from the quiet landscape. Boulevards and small squares can also be most admirably brightened with flower beds.

At the convention in Dayton, O., all our members had the rare opportunity of seeing how the surroundings of a factory can be laid out in a most praiseworthy manner; here our bedding plants brighten daily the minds of thousands of people. Many people are not fortunate enough to possess a home with a lawn and flower beds. There is no necessity for such to deprive themselves of nature's gifts; they can enjoy them in a more modest way, by keeping flower boxes, which, no matter how obscure and unassuming the dwelling, give it a homelike air and enliven the aspect of many an otherwise somber home. On the other hand many beautiful residences rely solely upon piazza boxes for their floral display and exquisite results can be obtained in this manner.

Finally a few words should be devoted to the homes of our loved dead. There is nothing more soothing to the grief stricken heart than the sight of well kept cemeteries, bedded with appropriate flowers speaking the language of peace and rest. These are some of the many and varied ways of adornment that bedding plants lend themselves to; there still remains another problem to solve—namely, how to use them.

HOW TO USE BEDDING PLANTS.

Here skill in artistic arrangement and harmony of colors is put to a severe test. Starting with the beginning of the season, the various Dutch bulbs are the first to attract attention. They are easily cultivated and therefore most appropriate for the amateur. Exquisite effects and color schemes can be carried out and although their duration of bloom barely reaches more than four weeks, I think they make the most striking display of the season. Only the purest and clearest colors should be selected. Off colors and the peculiar magenta shades are hard to match with pure colors and are best planted by themselves or far enough away not to detract from others. Mixed beds containing a number of varieties look well, but beds of all one color show far better taste. Where a number of beds are planned great attention must be given to working out a harmonious color scheme. Pink, white and light blue blend admirably together, next comes yellow then red and yellow and the various reds. It is a great deal more pleasing to the eye to let the colors run into each other by degrees than to create too big a contrast. Colonies of crocuses, snowdrops and scillas singly and several together, irregularly scattered on the lawn look very charming.

Pansies, bellis and myosotis are also extensively used. Although the pansies come in a multitude of colors, they are mostly used mixed and often with Bellis perennis as a border. Little advantage has been taken of working out color schemes with pansies, and yet, if we stop to study their rich tints, tints which I think cannot be found in any other plant, the possibilities are wonderful.

Following these come the summer plantings with cannas, geraniums, heliotropes, begonias, petunias, coleuses, acalyphas, abutilons, salvias, verbenas and a great number of others too numerous to be mentioned. Almost all bedding plants thrive and flourish best in full sunlight except tuberous begonias and fuchsias, which do best in half shade, where there is plenty of indirect light; other plants like some of our hardier palms, phœnices, latanias, chamærops, the various fibrous rooted begonias, like semperflorens, Vernon, Schmitti and fancy leaved caladiums do well under both conditions.

SOIL.

The soil for cannas, musas, ricinus and Caladium esculentum should be very rich; their growth will be so much more luxuriant, while the rest of the plants like geraniums, begonias, verbenas, salvias, cupheas, ageratums, etc., also need enriched soil. Care must be taken not to use too much fertilizer as this will result in disaster; the plants will show an abundance of foliage in place of flowers. Bedding plants, before being set out in their summer quarters, should be properly hardened off, they should be exposed freely to the air and sunlight at least two weeks before the planting season commences. Nothing serves this purpose better than the hotbed, no matter how much some of the growers are opposed to this sort of cultivation. It is true, the cost of labor is somewhat higher, but the superior results obtained fully justify the expenditure made, and plants hardened off in this manner suffer but very little in transplanting.

We have plants of every desirable height from two inches up to eight feet, some with a wealth of flowers, others again with richly colored foliage, some with coarser, others with more graceful features. In the arrangement of plantings one great object, which is one of the great principles in landscape gardening, is in many cases lost sight of, namely the consideration of the sky line. Especially in large border plantations this should be applied. Here we have tall plantings broken with lower ones, until they finally run out to very low plants at the edge. In fact in larger displays, the relation of one bed to the other should be treated this way. While the beds are all

more or less formal, they should not appear stiff. Every plant should have plenty of room for full development and where a number of varieties are used in one bed, the tall ones should not be massed all together, but here and there one should rise above the lower ones, so as to present a loose and pleasing arrangement, while in this manner every plant will show its valuable points more advantageously. For example a bed planted only with Ficus elastica would look very stiff, but intermingled with the graceful Grevillea robusta and a border of ivy, it loses this stiffness and presents a very pleasing effect. This shows that by careful study we can improve the bad points of one plant with the good ones of another.

Particular care should be given to the selection of the various tints, blending richly colored foliage tastefully with the more gorgeously tinted flowers, so as not to create too big a contrast. Beds of solid colors, alternating with some of less contrast will tie the entire display harmoniously together and this will help greatly to achieve the desired plan. It is in the designers power to present a very brilliant or a very quiet picture according to the scheme that is required. Quiet and restful effects are worked out by using tints of various blues, white and grey, variegated, glaucous and bronze foliage with a little touch of red. Anthericum vittatum variegatum Punica granatum pumils, Abelia rupestris, heliotropes, Plumbago Capensis and P. C. alba, Phygelius Capensis, santolina and Abutilon Savitzi lend themselves well to this purpose. Much more could be said on the subject, but, in my opinion, one runs no risk of failures by adhering to the points laid out in my modest essay.

Bedding Plans.

We present herewith some diagrams of the flower gardens at Lincoln and Washington parks, Chicago, together with lists of plants used in each in 1906:

LINCOLN PARK.

1.—Begonia Erfordia grandiflora superba; border Cuphea platycentra.
2 and 5.—White single petunia; border Lantana delicatissima.
3 and 4.—Pentstemon gloxinoides.
6 and 9.—Subtropical, palms, crotons, dracænas, etc.
7 and 8.—Begonia Schmittii.
10 and 11.—White stocks, followed by heliotrope.
12 and 13.—Vinca alba.
14 and 45.—Geranium Countess of Harcourt.
15 and 16.—Pansies, border of Bellis perennis; followed by Baby Rambler rose and Pilea serpilifolia.
17 and 18.—Petunia single pink.
19 and 41.—Canna Souv. d'Antoine Crozy, second border Alocasia odorata and Salvia splendens alternate; outside border Pennisetum longistylum.
20 and 42.—Canna Egandale, second border Alocasia odorata, Salvia splendens and Eucalyptus globulus; outside border Pennisetum Ruppelianum.
21.—Cuphea silenoides, border Santolina tomentosa.
22 and 23.—Mixed beds; Dracæna indivisa, Abutilon Savitzii and Souv. de Bonn, Plumbago Capensis, Phygelius Capensis, Acalypha Godseffiana and A. obovata; border of Pentas lanceolata.
24 and 39.—Verbena, white; border alternanthera, red.
25 and 29.—Verbena, scarlet; border alyssum, dwarf.
26 and 27.—Mixed beds; geraniums in variety; heliotrope, abutilon, ageratum, verbena, iresine, vinca, lantana and petunia; border of Pyrethrum aureum.
28 and 38.—Ageratum, border Pilea serpilifolia.
30 and 37.—Bronze geranium; border althernanthera, yellow.
31 and 34.—Single petunia, pink and white.
32 and 33.—Lagerstrœmia Indica.
35 and 36.—Half standard heliotrope, underplanted with Cuphea platycentra; border of Santolina tomentosa.
40.—Geranium Mrs. E. G. Hill.
43.—Marguerite carnations.
44.—Abelia rupestris; border of Euonymus radicans variegatus.
46 and 53.—Subtropical, same as 6 and 9.
47.—Antirrhinum, pink; border Iresine Wallissi.
48 and 49.—Geranium Mrs. E. G. Hill.
52.—Antirrhinum, white; border Iresine Wallissi.
54.—Begonia Vernon; border golden begonia.
55.—Geranium Pullman.
56 and 57.—Center Ricinus Cambodgensis, Canna Florence Vaughan, Pennisetum macrophyllum atrosanguineum and Erythrina crista-galli in order named; border of Cyperus alternifolius.
Border around fountain Salvia Zurich and Impatiens Holstii; border Artemisia Stelleriana.

WASHINGTON PARK.

1 and 27.—Verbenas, border alyssum.
2, 6 and 32.—Pansies followed by vincas.
3, 7, 26 and 31.—Stocks, followed by cockscombs.
4.—Geranium Jean Viaud, border G. Mountain of Snow.
5.—Geranium Ben Shrader, border G. Mountain of Snow.
8 and 33.—Alyssum, border alternanthera.
9, 12, 22 and 25.—Coleus, border achyranthes.
10.—Canna Souv. de Anton Crozy.
11.—Canna Peley.
13.—Geranium A. Tennyson in center. G. Mme. Chievilier next, border alternanthera.
14.—Geranium Gen. Grant, border Santolina incana.
15.—Geranium Meteor, border santolina.
16.—Geranium E. H. Trego in center, G. Countess of Harcourt next, points ageratum, border santolina.
17.—Heliotrope, antirrhinums, nasturtiums, lemon verbena, scented geraniums, salvias, feverfew, cosmos, dusty miller, border lobelia.
18.—Geranium Trecuseur in center, G. Lowell next, border Begonia Vernon.
19.—Geranium S. A. Nutt, border santolina.
20.—Geranium Pres. Leon Simon, border santolina.
21.—Same as No. 17 except that border is of Begonia Vernon.
23.—Canna Chicago.
24.—Canna Mme. Crozy.
28.—Gomphrena.
29.—Geranium Mrs. E. G. Hill, border G. Mountain of Snow.
30.—Geranium Beaute Poitevine, border G. Mountain of Snow.

To Be Done Now.

IN THE GREENHOUSES.

April is the month in which seed of Asparagus plumosus nanus germinates most quickly.

Keep young ferns moving and never let them get hard in the flats or pots.

Disbud the roses regularly. Twice a week is none too often for stock that is growing freely.

See that no mildew is left to be carried on into summer. It is far easier to get rid of now than when the heating pipes are out of use.

There is still time to root swainsonas and this plant is very useful either for cutting or sale in pots.

Wake up any oddments of stock that may be laying around, such as dracænas, crotons or ferns out of condition.

Stop spraying Deutzia gracilis as soon as the flower buds can be distinctly seen.

Prick off seedling asters and other annuals early before they get crowded in the seed flats.

Watch the seedling begonias closely and give them more room directly they need it.

Push on with the chrysanthemum propagation, especially with varieties of which stock is likely to be short.

IN THE STORE.

It is not necessary to buy the most expensive plants for made up work.

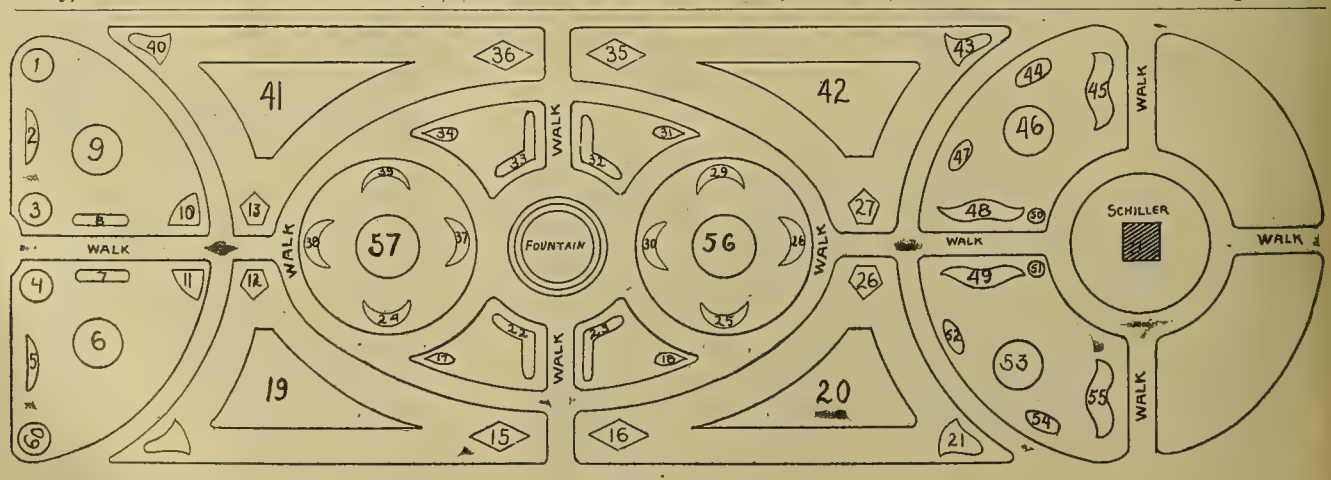
Never forget the foil paper on bouquet stems; soiled gloves may mean a customer lost.

Although many different flowers are used with violets as corsetiere bouquets they are best used alone.

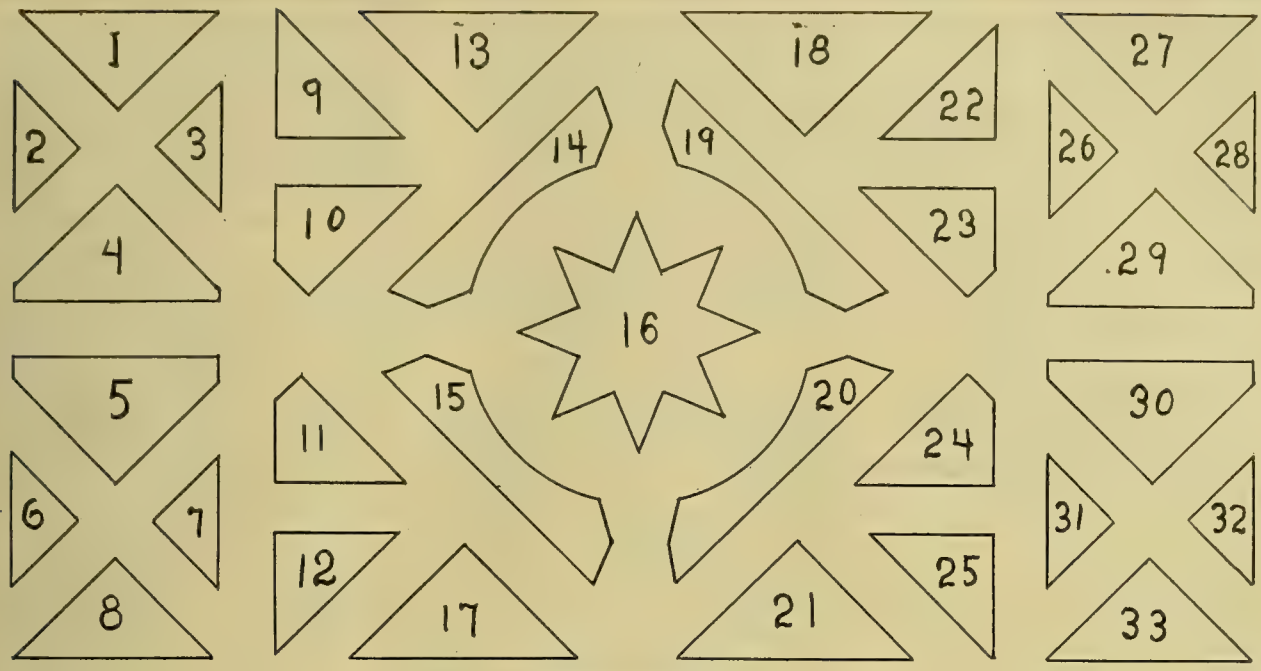
Heaths and birch bark go finely together in boxes or baskets.

Gardenias are very beautiful, but too heavily scented to be used very freely.

When in doubt as to blending of col-



BEDDING PLANS.
Plan of Flower Garden at Lincoln Park, Chicago.



BEDDING PLANS.

Plan of Flower Garden at Washington Park, Chicago.

ors use one color, green and white, and no mistake can occur.

OUTDOORS.

Get the small ragged shoots and frost killed ends trimmed out of the dwarf flowering shrubs without further delay.

Continue to sow sweet peas at regular intervals on well prepared soil, according to requirements.

Get all the help available now at planting deciduous subjects. Every day such plants are out of the ground lessens their chance of success.

Where the soil works well enough sow lawn grass seed, either for new lawns or the repair of old ones.

Push on with tidying up the herbaceous borders, pricking in what remains of the winter mulch.

Never neglect staking of all standard trees directly they are planted, as a wind whipped tree cannot obtain a hold.

Frequent hoeing and a little nitrate of soda to push along the early cabbage plants.

Obtain and plant suitable climbers and vines for veranda posts, dead trees or other objects it is necessary to cover.

OBITUARY.

Warren Ewell.

The death of Warren Ewell on April 2, removes one of the best known florists of Boston, Mass., and one who has been a familiar figure in the local floral interests for over a generation. He was long identified with the Old Guard by whom he was best known and held in great esteem. Physical ailments have prohibited his associating with the trade for the past few years, and his death was the result of heart trouble. He was one of the largest bulb growers of this section, the establishment over which he presided at Dorchester being long famed for its products. B.

Edward H. Pratt.

Major Edward H. Pratt, president of the T. S. Hubbard Nursery Co., of Fredonia, N. Y., died April 1. Major Pratt was born in Dansville 70 years ago, and at the outbreak of the civil war organized a company and with it served through the early campaigns of the Army of the Potomac until after Gettysburg, when with his command he went west and saw service at Chattanooga. He also served as a member of the staff of Fighting Joe Hooker at the battle of Lookout Mountain. Major Pratt went to Fredonia 21 years ago to become president of the Hubbard Nursery Co.

The Late Warren Ewell.

Lawrence J. Stuppy.

Lawrence J. Stuppy, the well known florist at St. Joseph, Mo., died March 31. Mr. Stuppy's health had been impaired by arterial ailment, but it was supposed he had lately improved much during an extended trip through the west. He had been at home, however, a few days when he suffered a stroke of paralysis and died the same day.

Mr. Stuppy was born in St. Genevieve, Mo., in 1849, but has resided in St. Joseph nearly all his life. He started the florist business in 1873, which business was incorporated in 1903. His sons Frank and John and three daughters survive him, two of the latter being members of the Sacred Heart Order. Mr. Stuppy was very active and successful in his business, always conducting the same in a straightforward manner and had the best interests of his customers at heart.

William Griffin.

William Griffin, one of the leading men in horticultural affairs in Lenox, Mass., a few years ago, and for years superintendent of Elm Court, the country place of William D. Sloane, died March 26, in Lakewood, N. J., where he was employed on Gregorian Court, George J. Gould's noted estate. Mr. Griffin came to Lenox on the creation of Elm Court out of property sold to Mr. Sloane by Richard Goodman. He developed the place into what it is practically today. At one time he was at the head of 150 men, and proved himself of great ability. His home on Elm Court estate became known as a most hospitable place and he entertained extensively. He was a member of Evening Star lodge of Masons of Lee and Berkshire commandery, Knights Templar, of Pittsfield. He is survived by a widow, three daughters and a son.

London.

The St. George's Nursery Co., Harlington, was awarded the gold medal of the Royal Botanic Society for an exhibit of about 130 plants of its finest strain of cyclamens, including the noted Ourown strain which was awarded a special certificate. Other notable varieties were Dame Blanch, Duke of Connaught and Grandiflora Alba, and as all were arranged with Cocos Weddelliana and ferns the exhibit was very attractive. Cutbush & Son and Thos. S. Ware, Ltd., had fine groups of plants and there was a remarkable display of cut flowers from Felton & Sons.

At Covent Garden, Hydrangea Otaksa, fine plants with three heads of flower in 6-inch pots, is selling well at $4.50 to $6 per dozen. The old hybrid rose Papa Gontier is selling well here as a cut flower. S.

HEAVY floods are reported from various Canadian points.

FROM Crookston, Minn., comes reports of an 8-inch snowstorm.

SHAMROCKS in small pots were grown by some Boston florists in 25,000 lots and sold at $50 per 1,000.

THERE has been no change in the conditions of the glass market. Prices are still low and the market easy.

JUST now the value of a careful fireman is apparent. There is room for great waste of fuel if he is careless.

THERE are rumors that the Bermuda growers will not, in the future, send any cut flowers to the American markets.

"ADVERTISING should contain little black matter, more white matter and a great deal of grey matter," says an English paper.

ROSENENTSTACHELPARAT is not the name of a new rambler rose, but that of an apparatus for removing thorns from rose stocks.

POSSIBLY it is not too soon to warn inexperienced growers against exposing plants. These sunny days and cold nights are very dangerous.

THE last four weeks have been very favorable for both seed and nursery work, the season advancing so gradually, that trade has been normal, never excessive and never checked.

Lilium Longiflorum, Formosa Type.

We are advised by The Yokohama Nursery Co., that the founder and president of that company, Uhei Suzuki, discovered on one of the islands south of Japan, in which location many lilies are grown, a wild lily of the longiflorum type. He caused some quantity of these bulbs to be collected and grown there as they are cultivated on the mainland. The bulbs grew well, but their forcing value had to be proven. Three years ago, the firm received the first six cases, which turned out well. The second year, some 60 cases were brought over with such satisfaction that the American agents instructed their Japanese nursery to plant as many as possible. Last year, the output was about 300 cases and six or seven times that number are expected with a good harvest the coming season. In its native island, this variety they say, flowers in February. The bulbs are ripened about the end of May and should be in New York by the early part of August. These lily bulbs should not be forced as hard as Harrisii, otherwise they grow too tall. Many growers in the United States who have tried these, recommend them.

Packing Easter Lilies.

ED. AMERICAN FLORIST:—

As we occasionally receive complaints as to the way our lily blooms reach customers I would be glad if you can tell me the best and most up-to-date methods of packing these flowers. I would like to know whether ice is used for long distance shipments or whether papers thoroughly moistened are sufficient to keep the flowers. Also how many can be packed in one box safely and the best style and size of boxes. Any other information you can give would doubtless be of service to others besides myself, as there must be many other florists looking for the same information. GROWER.

Easter lilies are cut for shipping with the buds partly open or so that the buds will open in full after standing a day or two in water in a warm room. When the buds are in this condition they can be packed and shipped without bruising. For lilies the shipping box should be 60 to 72 inches long, 12 inches deep, and 18 to 20 inches wide. This size package will hold 100 lilies very nicely. Commence at each end and place a good cushion of tissue paper. Then place the lilies with the buds standing at an angle of about 45°. For a box 18 to 20 inches wide you can get 10 to 12 blooms in each row. Between each row of buds put a half sheet of tissue paper, double it so that there will be two thicknesses of tissue. This makes a soft partition between the rows of lily blooms. From four to five rows can be placed in each end of the box, then place several layers of wet newspaper or a little wet moss on the stems that meet in the center of the box and secure them with cleats firmly nailed. This keeps the lilies from shifting around in the box. The empty box must of course be well lined with newspapers and tissue paper. Do not use wax paper, as it bruises the lilies. Also never place ice in a box with lilies. The air from the ice seems to rot the blooms.

C. L. WASHBURN.

We use light wooden boxes 10 inches high, 12 or 14 inches wide and four or five feet long. Cushion both ends for first blooms so that flowers will not push up against the end and pack towards the center, setting blooms upright and interlacing buds to prevent bruising flowers. Some soft tissue can also be used for interlacing. Cleat each side near center of box tight, and if ice is to be used wrap it in paper and lay between cleats in such a way that it can get beyond the cleats. String stretched across the top will prevent flowers being bruised from the weight of the paper. Have box lined with soft tissue. Coarse paper, like newspaper, should not come in contact with blooms.

AUGUST POEHLMANN.

National Council of Horticulture.

We have received the fourth installment of the series of articles sent out by the press service of the National Council of Horticulture. The articles are: "Easily Grown Annuals"; "Lawns"; "Growing Apples," and "The Dietetic Value of Fruit." They are concise readable notes that cannot fail to be of service to amateurs.

The following are the articles promised during the remainder of the year:

April 11.—"A Backyard Garden," "Hibiscus," "Kohlrabi and Brussels Sprouts," "Raspberries and Blackberries."

April 18.—"Egg Plant," "Hedges," "Red Hot Poker Plant," "Currants and Gooseberries."

April 25.—"Chives," "Hybrid Tea Roses," "Dogwoods." "Sweet Alyssum."

May 2.—"Deutzias," "Growing Dahlias," "Kale," "The Mulberry."

May 9.—"Bellwort," "Hardy Chrysanthemums," "Savoy Leaved Cabbage," "Salsify."

May 16. — "Cannas," "Beautiful Vines," "Salvias," "Strawberries."

May 23.—"Water Lilies in a Tub," "Japanese Iris," "Deutzias," "Cucumbers."

May 30.—"Honeysuckles," "Lawns," "Succulent Plants," "Beans."

June 6.—"Home Vegetable Garden," "Window Garden Plants," "Shrubs for Succession of Bloom," "Garden's Shady Nooks."

June 13.—"Polyantha Roses," "Succulent Plants," "Sweet Potatoes," "Dietetic Value of Fruits."

June 20.—"Asters for Autumn," "Planting Strawberries in July," "Juneberry," "Zinnias."

June 27.—"Hardy Ferns," "Squash," "Lettuce," "Designing Planting Scheme."

An Opportunity.

ED. AMERICAN FLORIST:—

Apropos of the recent discussion in your columns concerning opportunities for young men to learn the greenhouse business, will you kindly announce that the horticultural department of the Iowa State College can give employment to some one who is seeking an opportunity of this kind? Send application, references and requests for information to Horticultural Department, Ames, Ia.

Cats and Actinideas.

ED. AMERICAN FLORIST:—

In a recent issue of your paper, some one asks if cats really eat actinideas. I bought five vines some years ago, and the cat almost went wild, purring, rubbing and rolling over the vine until it was ruined. The others were protected with wire netting, but Thomas worked at that until he destroyed all of them. I could not notice any particular odor, but they attracted the cat as soon as the first buds came. I never had the satisfaction of seeing a full grown leaf.

Wants, For Sale, Etc

One Cent Per Word, Cash with Adv.

For Plant Advs., See Ready Reference Section.

Every paid subscriber to the AMERICAN FLORIST for the year 1908 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

Where answers are to be mailed from this office, enclose 10 cents extra to cover postage, etc.

Situation Wanted—As rose grower in good establishment by experienced grower: German, age 42. Address, E. R., Fairhaven, Pa. R. F. D. Route 1, Box 150.

Situation Wanted—Young American would like a position in first-class store long experience no objection to Pacific coast. Address Key 502, care American Florist.

Situation Wanted—As gardener and florist on Pacific coast; private or commercial; long experience, age 36, English, good references. Key 504, care American Florist.

Situation Wanted—By experienced grower of cut flowers, roses, carnations, 'mums, etc. and general stock; life experience; German, age 42. Key 505, care American Florist.

Situation Wanted—By pushing man, age 30, Scotch, capable of producing first-class stuff both in pot plants and cut flowers, expert propagator and grower of hardy perennials; single and an abstainer; good business abilities. Key 503, care American Florist.

Situation Wanted—By a first-class grower of roses carnations 'mums; also a general line of pot plants, bulbs and bedding stock; single, German 35 years of age; 20 years' experience; first-class references; capable of taking charge; far west preferred. Key 508, care American Florist.

Situation Wanted—As working foreman by good, practical, experienced grower of roses, carnations 'mums, cut flowers and pot plants; designer, landscape gardening etc.; sober, steady, not afraid to work; 29 years' experience; German, 43 years of age, married; best of references. Address Key 509, care American Florist.

Situation Wanted—Head gardener on a private place; first-class references; single, German; reliable, strictly sober, intelligent, of good education; 22 years' practical experience in all kinds of indoor cut flowers, palms, ferns, fancy pot plants, decorating landscape, carpet bedding, fruit and vegetables; disengaged April 15; good wages expected. Key 507, care American Florist.

Help Wanted—A man to work in rose sections; state wages without board. Apply COLE BROS., Peoria, Ill.

Help Wanted—An experienced rose grower; must come well recommended. THE ELIZABETH NURSERY CO., Elizabeth, N. J.

Help Wanted—Good man to run small place himself. Steady position: German preferred. With full particulars address Key 491, care American Florist.

Help Wanted—A good steady reliable man that knows the culuure of roses, carnations and 'mums; would like to have man at once. LEO H. HERMES 666 Gorman Ave., St. Paul, Minn.

Help Wanted—At once, a man capable of potting and bedding out also assisting in retail store when necessary; salary $12 per week; full particulars and copies of references in first letter. JOHN RECK & SON, Bridgeport, Conn.

Help Wanted—Good growers of first-class stock, roses, carnations, 'mums, etc. for retail store; coldest weather this winter 14 above; modern greenhouses; good wages to right party. Address Key 490, care American Florist.

Help Wanted—Assistant in retail place of 10,000 ft of glass; must be a good worker and sober; state age and references; wages $15.00 per week, steady place for a good man. Address SEATTLE FLORAL CO., 4th and Denny Way, Seattle, Wash.

Catalogues Wanted—I desire late catalogues from firms handling seeds, bulbs and florists' supplies. W. W. WESTON, Manila, P. I.

For Sale—27,000 feet of glass filled with first-class stock; located in one of Chicago's suburbs; low price. Address MRS. HUBERT HANSEN, 4016 N. Clark St., Chicago.

For Sale—A well established commercial place in the best town in southern California. Excellent opportunity for live florist and plantsman. Key 506, care American Florist.

For Sale—Greenhouses in good condition: 10,000 ft of glass, also double house, all modern good location, 210-ft front; or will sell greenhouses alone. HENRY EICHOFF, 2863 E. 75 St. Cleveland, Ohio.

For Sale—Greenhouses and stock; about 20,000 feet of glass, well stocked with all kinds of bedding plants, ferns, palms and cut flowers; for terms inquire of Mrs. Hugo Book, College street, Worcester, Mass., or L. Midgley, Worcester Conservatories, Worcester, Mass.

For Sale—A retail florist business, 5 greenhouses about 5000 feet of glass, store barn, 8 room house, lot 100 feet front, over 200 feet deep located in fine neighborhood; a good opportunity for two young men who understand the business with small capital to start; good reason for selling; party must have $5(00, balance to suit purchaser. G. F. THRUN 8707 Cedar Ave. Cleveland, O.

For Sale—Five greenhouses under 20,000 feet of glass, with growing crop of carnations four acres of ground, best kind of soil five-room and attic frame dwelling 24x36 feet, good well and windmill, barn, horse and wagon. Property built six years ago, and is in A1 condition. Will be sold at a bargain. WISCONSIN NATIONAL LOAN AND BUILDING ASSOCIATION, Room 22, Mitchell bldg. East Water and Michigan Sts., Milwaukee, Wis.

For Sale—At a sacrifice: a model floral establishment in the city of Youngstown, Ohio. This is the oldest floral establishment in the city, and has a trade that is desirable in every way. In order to close out an estate, this establishment will be sold at a price that will be an inducement. This is an excellent opening for some one desirous of engaging in the floral business. For further particulars call on or address, C. EDWIN OYSTER, Receiver, 507-508 Dollar Bank Bldg., Youngstown, O.

For Sale—One of the largest and best known mail order seed, bulb, plant and nursery establishments in the United States. This business was established in 1860 and is known by all seed people the country over, and many abroad, and has an enviable reputation for quality in seeds plants, etc. This is an excellent opportunity for an individual or corporation desirous of entering into this line of business, which is a very profitable one to engage in. To an ambitious young man or several of them associated together, it offers a rare opportunity to step into and take up the management of a business that is so thoroughly established and as well known as this one is. In order to close out an estate, the entire establishment, including 52 acres of testing gardens, office buildings, greenhouses containing 45,000 feet of glass, barns, seven dwellings, a complete and up-to-date printing establishment in which is turned out all printed matter used, including catalogs; horses, wagons, and entire equipment necessary to carry on this business successfully, will be sold at a sacrifice. Any one interested can have full particulars by addressing or calling upon the undersigned. C. EDWIN OYSTER, Receiver. 507-508 Dollar Bank Bldg., Youngstown, O.

WANTED.

A competent man for designing and packing room to take full charge. Must be a first-class workman on funeral work and be thoroughly experienced in the retail cut flower line. Also one experienced on pot plants and design work; good situation for the right men; apply with references

Komitsch & Junge are fast pushing to the front as leading orchid growers among those who supply the New York market with cut flowers. In sweet peas they doubtless have a larger area than any other growers of this part of the country, if not of the whole United States. All told, at their two ranges they have 15 large houses in sweet peas.

Emile Savoy is to the front again with a very fine stock of Easter plants, very noteworthy being a lot of finely flowered bougainvilleas. A great stock of small palms and ferns, the latter very suitable for dishes and combinations, are always to be found at this range.

The Mutillod Bros. are showing good stock in seasonable plants, their palms being noteworthy.

MIDDLETOWN, CONN.—The overturning of a lamp in the office of F. B. Fountain Co., started a blaze April 1 which did considerable damage to the floor and the woodwork. The fire was put out by Mr. Fountain without notifying the fire department.

TRADE FAIR.

The market last week was not overly active, although considerable quantities of stock were moved at the low prices that prevailed. Good carnations seemed a little less plentiful, but opinion is divided as to whether this is on account of more or less general going off crop or only because growers are not now cutting as closely as formerly, awaiting what they think will be a more favorable market at Easter. Prices as a consequence, while not higher, have held a little firmer. There are excellent offerings now in roses. Bride and Bridesmaid have seldom been better, and all growers seem to be cutting them. Chatenay is also an excellent thing. American Beauty is good in quality and quantity. Callas have moved better the past week than formerly. Opinion varies as to the outlook for Easter, but many have remarked the season's peculiarity in that while business generally has been slow, the holidays have held up to the average of other years. It is now certain there will be a good supply of lilies, both in pots and cut.

CLUB MEETING.

The Florists' Club held its regular meeting at the Union restaurant April 2 with President Leonard Kill in the chair and about 30 members present. No business of importance was transacted except the election of new members, as follows: John Michelson, 32 Randolph street; R. Schiller, 890 W. Madison street; Chris. Peterson, 1551 Kenmore avenue; Harry P. Prescott, Twenty-second and Halsted streets; Henry C. Blewitt, Des Plaines; Emil Pielke, Geneva, and A. Aggerholm, Onarga. There was also an interesting and informal discussion as to whether the wholesalers ought not to refuse to handle amateur grown stock, but no decision was reached.

THOMPSON, FLORIST, JOLIET.

The grand spring opening of Thompson, Florist, of Joliet, on last Friday and Saturday, was an entire success in every way, about 4,000 persons visiting the store in those two days. Every visitor was given a carnation and also a number for a drawing (to be held next Saturday) on a $10 palm. This number was in a circular which every person who desired a chance must take home and read. The floral attractions in the store consisted of a wedding canopy of wild southern smilax, crab apple blossoms and wistaria, studded with pink incandescent lights; also a table decoration of Killarney roses, lily of the valley and maidenhair ferns, with a Japanese combined candlestick and flower holder for a center piece. The grand opening was advertised in the local papers and by a card in the show window for several days previous.

NOTES.

Spring work has begun in Chicago's parks, and during the next couple of weeks the landscape gardener will do most of the planting and transplanting that is in view for the year. In the South Park system alone 10,000 trees and 50,000 shrubs are being set out more fully to realize the artistic possibilities of the grounds.

Geo. Asmus says the construction of the new store of Schiller, the Florist, at 904 and 906 Madison street, directly across the street from the present store, will be under way by May 1. Two immense window fronts will be put in, also a 25-foot house at the rear for decorative stock.

J. B. Deamud returned Monday morning from Michigan and reports that the plants the J. B. Deamud Co. is offering are in fine condition for Easter. Mr. Deamud has made arrangements to handle a practically unlimited quantity of Narcissus Emperor.

Frank Oechslin reports that many of his customers are buying Easter plants in larger lots than last year at this time. Other stock is also in big demand, especially Boston ferns and ferns for fern dishes.

Alderman Peter Reinberg was sent back to the council by a plurality estimated Wednesday morning at 961. This makes his third term.

The A. L. Randall Co. is having a very good demand for that firm's Easter baskets, among which several new designs are noticed.

Bassett & Washburn expect to have for Easter the largest stock of Easter lilies in the history of the house.

J. A. Valentine, of Denver, Colo., who has been here since the rose show, left for his home Sunday morning.

Anton Then will celebrate the twenty-fifth anniversary of his starting in business April 16.

The Kennicott Bros Co. is receiving some extra fancy Bountiful and Lawson carnations.

Some exceptionally fine Bride and Bridesmaid roses are being cut at J. A. Budlong's.

Wietor Bros. report cutting Mme. Chatenay roses with good strong 5-foot stems.

Geo. Reinberg will cut an exceptionally fine lot of stock for Easter.

Zech & Mann report a good call for their fine callas.

Visitors: J. J. Soper and wife, Rockford; Gus. Frederickson, St. Joseph, Mich.; W. E. Pew, Whitehall, Mich.; A. Loudenberg, Valparaiso, Ind.

Cleveland.

TRADE ERRATIC.

Business continues to be changeable, some days stock is cleaned up, then again trade drags. The carnation and rose crops have shortened up a bit, but the bulbous stock is coming in such large quantities that the shortening of other crops is not noticed. Several large store openings last week took thousands of carnations and tulips. The wholesalers had no trouble whatever in filling these orders; in fact it would have been possible to fill orders for several thousand more flowers without much effort. Harrisii lilies are rather short stemmed but the flowers are of excellent quality. American Beauty roses are becoming more plentiful. The demand for good long stemmed flowers is greater than the supply. The call for Richmond is heavy. Carnations continue to bring a fair price and we think that with a little tact the wholesalers can keep the prices up for the next two weeks. Sweet peas are coming along in fine shape. Green goods are plentiful and in good demand.

NOTES.

Smith & Fetters are showing an unusual pretty window display of Easter novelties. It is a blue and white idea in the best Smith style. Hampers of unique shape, filled with various pale blue flowers and white cut flower boxes tied with large bows of blue satin ribbon, are used in the decoration. The effect is very striking and certainly does not fail to attract considerable attention.

The James Eadie Co. has an elegant supply of Easter plants on hand; these include, genistas, rambler roses, hydrangeas, and azaleas, also the pyramid azaleas. The latter take exceptionally well with the trade. This firm is fortunate in having a full crop of roses and carnations just in time for the holiday business.

C. B. Wilhelmy, W. Twenty-fifth street, has been busy the past week with funeral work. His stock is looking fine.

The J. M. Gasser Co. has a number of small luncheons booked for the coming week.

WHOLESALE FLORISTS

PASADENA, CALIF.—The flower show this year will be located at the same place, the lot north of Masonic temple, which it occupied last year. There will be two tents and an alcove and the floor space, though triple that of last year, will scarcely accommodate the large number of entries. One tent will be 100x160, another 40x60 feet, and the alcove occupying the space between the two tents which will be on the extreme north and south areas of the lot. The alcove will contain all the bridal wreaths, arches and canopies. Richard Thomas of 308 Stevenson avenue is secretary.

DENVER, COLO.—At a meeting of the executive board of the Horticultural Society held in the rooms of the society at the capitol building March 25, the premium list for the horticultural exhibits at the state fair at Pueblo was made out. The society has $2,000 for distribution, $1,500 of which will go for premiums on fruit and $500 for premiums on flowers. The meeting was attended by W. S. Coburn, C. E. Parfet, D. R. Stotler and Mrs. M. A. Shute.

CADILLAC, MICH.—J. P. Herzog of Bay City, has purchased the floral business of R. A. Mason & Co. Mr. Herzog for a year has had charge of the retail store of the Wm. Roethke Floral Co. at Bay City.

LYONS, N. Y.—Oliver Horn, a retired nurseryman, died here some months ago, leaving considerable property, only part of which was found. It was believed that he was a hoarder of money, but a rigid search failed to reveal very much. A few weeks ago, the personal property was auctioned off, Henry C. Kaiser, a neighbor, buying a keg of old scrap iron and nails for 75 cents. Mr. Kaiser went through the keg, discovering a leather pouch containing $300 in gold. He turned it over to the administrator. The farm was sold at partition sale and bid in by Seth Woodard, an heir, for $4,575. He will tear the buildings to pieces to see if there is any more gold hidden. Other purchasers are ransacking their purchases to find wealth.

TRADE FAIR.

Business the past week was moderate with plenty of stock to meet all demands. Prospects for Easter are very bright, with enough of everything in sight to meet the demands. Nearly every florist has his cellar full of lilies and bulb stock is coming along just about right.

The April meeting of the Tri-City Florists' Club was held at the home of Henry Pauli on the evening of April 2, a large number being present. Officers for the ensuing year were installed, and a very interesting meeting held, after which luncheon was served by the host and a social hour spent.

A local 5-10 cents store is selling 4-inch geraniums at 5 cents each and 4-inch Whitmani ferns at 10 cents (same are listed by all wholesalers at $25 per 100) and a grocery store has been selling daffodils at 10 cents per dozen, outdoor stock from the south.

John Temple's greenhouse caught fire the other day from a brush fire. But for the quick run of the fire department much damage would have been done, as there was a high wind blowing at the time. As it was, some $300 will cover the damage done.

Three houses will be built this summer at Central park, two 22x125, one 12x125. Supt. Boehm is ready for spring planting with more and finer grown stock than ever before. Tulips are in bloom in the open at the park gardens.

Chas. Hummell has let the contract for the building of a greenhouse 20x80 feet; he will also rebuild his old range.

Julius Staack of Moline, Ill., is still on the sick list. T. E.

UTICA, N. Y.—Joseph Boehm, formerly with Bigelow & Son, has opened a flower store at 62 South street.

New York.

TRADE UNINTERESTING.

With low prices and a light demand, the cut flower district has had little during the past week to vary the monotony. When American Beauty roses get down to 15 cents for the best, cut flower news cannot be interesting. Even the street peddlers of violets have had a run for their money—10 cents per bunch—as the last three days of the week were cold and very windy and street trade was carried on at a great disadvantage.

EASTER STOCK.

The most interesting phase of the business at present is the Easter forecast which develops in the buyers for the retail stores visiting the plant growers scattered over the territory near the city. The hot spell of two weeks ago gave stock a great start and more of it is now in bloom than is desirable, but there is no indication of an Easter shortage. Though there has been much complaint about poor bulbs, the lily crop is very fair. Azaleas and hydrangeas will be in good quantity and condition while there will be much fine stock of Crimson Rambler, Dorothy Perkins, Lady Gay and other roses. The cold weather of the past week has been beneficial in holding back stock that had been coming on too fast; if we can have another week of cool weather, Easter prospects will be excellent, but indications point to a very conservative policy on the part of the retailers while an atmosphere of doubt surrounds them.

NOTES.

Chas. Zeller & Son, of Brooklyn, are now very busy between handling nursery stock and the many Easter plants with which their greenhouses are stocked. A striking feature at this range this season, has been a very fine lot of blue hydrangeas, which have been selling fast. This firm seems to have the right idea of bringing in tulips and hyacinths in pots and pans in neat and attractive shape for Easter.

John Scott of Brooklyn seems to be in training for the title of lily king for this section; he has something over 20,000 and they will be in just at the right time. He also has several houses of fine gardenias and other flowering and foliage plants, and it is well to remember that his range is the old homestead of Scottii fern.

At Cleary's Horticultural Hall, 62 Vesey street April 7, there was an exceptionally large offering at auction of nursery stock, both imported and domestic. One item was 2,000 rose plants, and there were trees in 100 lots, and bulbs by the barrel.

Though it is yet early for building operations, Wm. H. Lutton has two iron frame houses, each 28x145 feet, well on the way to completion for A. Demeusey, the well known Brooklyn grower of cut flowers. They will be utilized for carnation houses.

The Fruit Auction Co.'s plant auctions, which opened April 1, have been very successful, good stock of trees, shrubs, foliage, flowering and herbaceous plants going at very satisfactory prices. The attendance has been good and interest is increasing.

Pankok & Schumacher show a fine stock and they are about ready to put up the "all sold" sign. Their neighbors, the Hinode Florist Co., do not expect to have anything left, and the same applies to H. D. Darlington of Flushing.

G. Messeberg, another Brooklyn grower, in addition to a fine crop of pink and white carnations, is also showing a big stock of Easter plants, consisting of all the most popular things that are in demand at this season.

At the next meeting of the Florists' Club, April 13, in addition to the exhibits announced last week, W. A. Manda, of Orange, N. J., will exhibit Rosa Sinica or Cherokee rose and probably other plants from his fine collection.

Joseph Klein, a florist employed by Henry L. Bantelman, has the sympathy of all in the distressing accident by which his little daughter, aged three years, was burned to death March 30.

At Ford Bros.' may be seen an unusually fine exhibit for the season, of Beaute Poitevine and other geraniums, grown by John Tschupp & Co., of West Hoboken, N. J.

Peter Crowe, of Utica, was in the city April 6, looking over the wholesale district. Mr. Crowe is taking life easy but still devotes considerable attention to his ferns.

Louis Dupuy of Whitestone has a fine Easter stock which is likely to be quickly taken. Noteworthy among many good things are his ericas.

Robert Kift, of Philadelphia, was in the city on April 4, and made a flying visit to Boston.

Boston.

A SLIGHT IMPROVEMENT.

As Easter week approaches a slight improvement is felt. Aside from a fairly good demand for funeral work there is but little miscellaneous trading and as might be expected, spring plant trade is being postponed to Easter week. The stores are carrying light supplies of plants and several of them bear a rather deserted appearance, no doubt due to the effort directed to a general cleaning up before the holiday season. Market conditions are gradually changing and while yet there is no appearance of a scarcity, excepting for violets, stock is shortening up considerably. Violets are scarce and there will be a great scarcity of first class stock of this kind for Easter. The situation with carnations is but little changed. While receipts from growers are lessening there is still a heavy surplus being carried. Roses have suffered a further decrease in price and have been coming in in excellent condition, and in great quantities. Doubtless the coming week will find this stock very much absorbed and a good supply being held in store for later use. Certain sections report the lily crop light, but probably no difficulty will be met with in securing ample supplies. Lilium candidum will be available from several growers, but the demand for this lily is but a trifle compared with its favorite successors. An excellent supply of lily of the valley, sweet peas, gardenias and orchids is available and will be extensively favored owing to the shortness of the violet crop.

NOTES.

Chas. Ingraham, a well known grower, of late connected with W. J. Dana's establishment at Wellesley Hills, was found dead in bed by his room-mate at 11 a. m. April 5, at their boarding place in the same town. His companion, William Hofs, had dressed and left the room and when returning later found that Mr. Ingraham was dead. The deceased was 45 years old and his death resulted from heart disease.

Wm. Sim with his characteristic alertness to the situation is devoting all energies to the preparing for Easter of a suitable crop of violets. For several years the resources of this establishment have been the backbone of the local supply and this year more than ever will its value be appreciated. With both the Princess and his own product, Boston, a crop reaching 150,000 will be available.

M. J. Aylward of Woburn is planning the erection of a 200-foot house this spring. This entire plant is devoted to the growing of roses and the addition as outlined will increase the capacity of the output, which has been badly needed.

Welch Bros. for the Easter trade have secured the selling right of an exclusive line of gardenia plants which are being prepared for distribution among their favored patrons.

H. M. Robinson & Co. have just received their new spring stock of southern smilax and this favorite decorative vine was never seen in better condition.

The Thomas F. Galvin corporation has been handling a great volume of funeral work the past three weeks. Exclusive work is its specialty.

W. H. Elliott, accompanied by Mrs. Elliott, sailed for Bermuda April 7, and will enjoy a month's vacation in its more congenial climate.

B.

As Others See Us.

Under the caption of Random Notes, we note the following in The Horticultural Advertiser, England:

American carnations appear to be coming almost as fast as sweet peas, and the way they are being pushed, indicates that there is no falling off in the popularity of this flower in the United States. Winsor of course is going strongly, but another wonder is Winona, said to be the truest pink yet offered. A pale pink sort named May, is having a good turn also. Defiance promises to have a big run as a scarlet.

Roses, too, are constantly appearing, which tends to show what an appetite Americans have for glasshouse blooms. Mrs. Jardine, the Irish variety is now having a great run. My Maryland is also looked upon as a paying thing. Queen Beatrice and Rhea Reid are also much talked of in trade circles. Richmond, apparently, like Liberty, is a disappointment, owing to its lack of petals, and one or two big American growers talk of dropping it, although it does not appear that there is any other variety of similar color to take its place.

There seems to be an increasing interest in the single dahlia in America, especially since the advent of Twentieth Century. I remember testing the first of this new giant race and was much struck by its fine flowers. There are now about half a dozen new shades, and to my way of thinking these singles are much more refined than the peony type.

It is curious to note that while named verbenas have practically died out in this country, they are in great vogue in the United States.

J. L. Dillon, of Bloomsburg, Pa., is known as the verbena king, and I was amazed when his list came my way last year, to find him quoting some 60 varieties at wholesale rates. The only really decent lot of named verbenas I have seen in recent years, was that shown by H. B. May at the Temple last year. I certainly think that a great deal more might be made of this plant, for seedlings are not always satisfactory.

The big American geranium specialist is about to pay a visit to this country, and those who have anything good in the line should endeavor to get R. Vincent to pay a call. He leaves America April 4.

The seed adulteration act in Iowa, is going to give some firms a good deal of trouble. It is bad enough to find one's name quoted in a report as selling a mixture of grass and weed seed, but if the lay press gets hold of these reports—and quite recently one paper did—and publishes the same, it will not create much brotherly love.

LEOMINSTER, MASS. — Twelve members of the Worcester Market Gardeners Association made their tenth annual visit to the greenhouses of Geo. M. Kendall, 400 North Main street, March 28. The Worcester men were guests of the New England cucumber king, and all conceded that Mr. Kendall has the right to that name from the appearance of the thousands of cucumber plants they inspected.

NEW BEDFORD, MASS.—The fifth annual banquet of the Horticultural Society, March 26, was a very brilliant affair. It was followed by a brief entertainment. The tables were artistically arranged about the vestry, and were decorated with carnations, primroses, cyclamens and begonias. About the sides of the room were large ferns and palms, the whole producing a beautiful effect.

JOSEPH HEACOCK, WYNCOTE.

The well earned reputation of this extensive range is sustained by the great quantity of fine stock to be seen there now. Joseph Heacock is well known as a palm grower, and continues to compete with anybody in the production of fine decorative palms. It would be hard to find anything better than what he will offer this season in this line.

His roses are of very fine quality and in addition to the blooms of American Beauty, Richmond and Killarney, he has this spring a great stock of young plants, all in fine condition. Another feature of this range is the very promising pink seedling carnation, which has already been awarded certificates. It is a good color and the blooms are large, besides showing fine qualities of stem and foliage.

ADOLPH FARENWALD, HILLSIDE.

The admirers of fine roses cannot fail to be pleased by a visit to this range. Though A. Farenwald is noted for the fine quality of stock sent out from his range, a visit to the place is doubly interesting. Whatever dissatisfaction other growers may have experienced with roses on solid beds, here, at least, they seem to flourish in perfection. American Beauty, Richmond, Killarney, Liberty, Kate Moulton, and Mrs. Neihoff are all being grown with great success.

I was particularly impressed by the sight of a 300-foot house of Killarney, with four beds running the whole length of the house. Splendid blooms of this as well as the other varieties mentioned, were in sight. Though the stock of Kate Moulton and Mrs. Neihoff is not as large, both these varieties are well thought of.

MYERS AND SAMTMAN, CHESTNUT HILL.

Those who have recently visited the range of Myers & Samtman, will readily believe that the honors awarded their new rose, Wyndmoor, at the rose show, were worthily bestowed. One house is devoted to its culture. Seen in its home, this rose is nearer to American Beauty than anything that has yet been brought out. It seems to have the good qualities of both parents, American Beauty and Safrano, and in some respects promises to be a more useful rose than American Beauty. This statement may be questioned, but doubters may go and see for themselves.

ANDORRA NURSERIES, CHESTNUT HILL.

A very extensive business is being carried on at these nurseries at present, and there is no hard times talk. William Warner Harper, the proprietor, states that the orders this spring exceed those of any previous season. The nurseries have a very picturesque location and those who aim to take in the leading horticultural features around Philadelphia should not fail to pay them a visit.

EDWARD TOWILL, HILLSIDE.

Edward Towill, who is well known as a successful rose grower and has already an extensive range at Hillside, will this season erect a new house 35x 150 feet. The material will be furnished by the King Construction Co. The house will be ready in time for planting.

VICTOR GROSHENS, HILLSIDE.

Victor Groshens, who for 17 years was foreman at the Hugh Graham range on the York road, is a recent but important addition to the Hillside colony of rose growers. His two houses, each 496 feet long, are finely equipped, and his stock is looking well. His place is heated by two steam boilers, and with commodious boiler house and sheds, he seems to be one of the growers who started to build with an eye to the future. F.

Philadelphia.

PRICES OF STOCK DISCOURAGING.

Quantities of flowers still continue to flood the market, there being no scarcity of anything and the quality, as a rule, is very good. It is certainly a shame to see so many fine carnations coming in, day after day, with only a demand that calls for a third to a half of the quantity. Under these conditions, the general average price of the returns must be very discouraging to the growers. It seems there should be some plan evolved by those whose business it is to place this stock before the general public: We refer to the retailers and would think that with prices so inviting they would take advantage of the opportunity to get so much for so little, and would feel they could afford to keep plenty of stock on their tables all the time and the use of flowers would become more general. As it is now, the retailers are loth to break their market by selling as cheaply as they could and still make a good profit, and they only carry enough for the demands of their regular trade and take advantage of a higher profit than the conditions really warrant. The result is that the surplus accumulates and when it gets a day or two old is sold to the street men at very low figures. This stock, looking fairly presentable, is offered to the multitudes of shoppers at prices so much lower than they are used to paying that they buy, only to be disappointed, as such stock cannot keep long and a doubt is raised in the minds of the average flower buyer, against all low priced flowers. We believe that instead of too many flowers, there are not enough or at least what would be sufficient to supply the demand that would be created if fresh flowers were daily offered at the low prices that market conditions so often warrant, during the dull periods of fall and early spring. The cold snap of Friday and Saturday, acted as a retarder and cut down shipments somewhat, and gave a chance to get away with some of the surplus. Southern daffodils were also much benefited, arriving in a much firmer condition. Many Easter crops which had been giving some of the growers uneasiness, on account of their forward condition, will be retarded nicely. Many out-of-town buyers placed orders the past week and the outlook for a good business is satisfactory to most of them.
